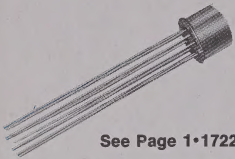
INDUSTRIAL PRODUCTS SELECTION GUIDE

ALL HI-G PRODUCTS ARE
ADVANCED RESEARCH
CENTER DESIGNED

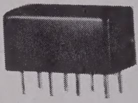
MINIATURE SEALED INDUSTRIAL RELAYS

Reduces Maintenance and Service Cost

The smallest physical size industrial relays available, providing the ultimate in reliable switching capability. Hermetic sealing prevents contamination — assures long life, trouble-free operation — sharply reduces maintenance and service cost. Ideal for data processing, communications, machine control, remote station, and power and low-level switching. . . in any environment containing dust, moisture, corrosive or explosive materials.



See Page 1•1722



See Page 1•1722

TO-5 SERIES

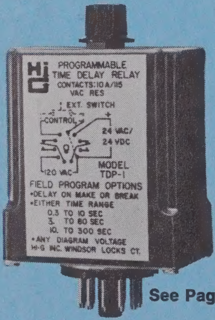
Hermetically sealed DPDT relays with switching capabilities from Dry Circuit to 1 ampere at coil sensitivities from 90 MW. available with and without internal diode coil suppression.

½ SIZE CRYSTAL CAN RELAYS

High speed hermetically sealed DPDT relays with switching capabilities from Dry Circuit to 2 amperes, at coil sensitivity of 350 MW.

TIME DELAY RELAYS

Series TD features CMOS digital circuitry; DPDT contacts — 10 amps resistive; no "false" operation on delay on make mode.



See Page 1•1723

MODEL TDP-1 PROGRAMMABLE

Easy to select for delay on make or break; 24VDC, 24VAC, or 120VAC; and for an adjustable delay range of 0.3 to 10, 3 to 80, or 10 to 300 seconds. Ideal for R & D and low volume production.

MODEL TDO & TDR

Conventional adjustable and fixed, single mode and voltage timers at competitive prices. See Page 1•1723

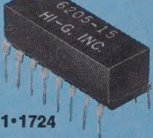
IN-LINE TIMER

HI-G, INC.
MODEL-6400
TIMER

See Page 1•1724

Low cost, series connected. Model 6400 has fixed delays of 1, 5, 10, 30 and 60 sec., inputs of 12, 24 or 48 VDC and ½ amp inductive output. Other options available.

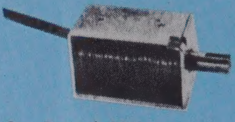
DIP PACKAGE TIMER



See Page 1•1724

No external components required for these Series 6200 & 6300 timers. Model 6200 for DELAY-ON-MAKE, 6300 for interval (one shot) applications. Choose from 5, 12, 24 or 48 VDC inputs. Use Model MCG-5 for 5 VDC master clear generator function.

INTERCHANGEABLE SOLENOIDS



See Page 1•1709

Low Cost Box Frame solenoid design are completely INTERCHANGEABLE wit popular industry standard sizes.

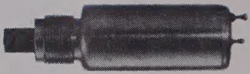
NEW "S" SERIES SOLENOIDS

See Page 1•1712

Unique Low Cost Standard Options fea ture 8 sizes in 2,304 combinations o voltage, duty cycle, clevis, pushrod shock dampener, and return spring.

Special Design Engineer's Solenoid Ki offering.

TUBULAR SOLENOIDS



See Page 1•1712

Standard and Custom designs are avail able utilizing the latest technology, ma terials, and manufacturing techniques fo built in long-life performance.

CUSTOM SOLENOIDS

See Page 1•1713

A custom commercial high speed prin head solenoid for Dot Matrix impac printers.

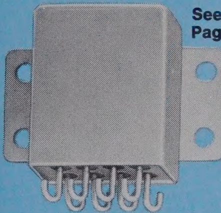
MILITARY PRODUCTS SELECTION GUIDE

AUG 25 1975
DAYTON OHIO
ENGINEERING ASSOCIATES

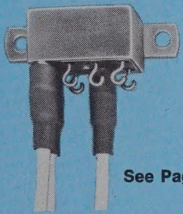
POWER RELAYS



See Page 1•1718

Power switching up to 10 Amperes in accordance with Mil-R-5757/23-/28. Available in a full range of coil resistances and mounting configurations to provide versatility of this Qualified product.

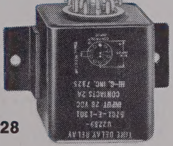
RADIO FREQUENCY RELAYS



See Page 1•1716

A complete line of RF switching devices with 200 watt handling capabilities at coil sensitivities of 250 MW. RF VSWR characteristics of 1.1:1 to 500 MHz in cable impedances of 50 - 75 - 95 ohms.

DELAY ON RELEASE TIMERS



See Page 1•1728

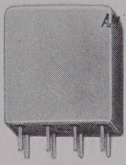
Series 5600/5700 offers 2, 5 and 10 amp contacts, one or two pole, delays to 300 seconds, temperature ranges −55°C to +85°C or +125°C and are hermetically sealed.

SENSORS

See Page 1•1729

Series 1300 for voltage, 1400 for phase and 7000 for frequency. Available with solid state or relay output; military or commercial applications/packaging.

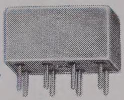
CRYSTAL CAN RELAYS



See Pages 1•1717, 1•1718, 1•1719

Reliable switching in a full size crystal can relay qualified to Mil-R-5757/10. Coil sensitivity of 250 MW. and contact ratings from low level to 2.0 ampere.

1/2 SIZE CRYSTAL CAN RELAY



See Page 1•1717

A long established relay design providing reliability and switch performance to the qualified standards of Mil-R-5757/9 — Dry Circuit to 2 Amperes at switching sensitivities of 250 MW.

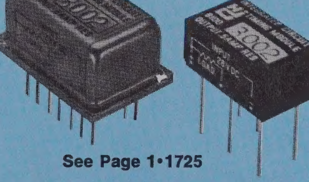
INTERVAL TIMER

4622-A-5001
TIME DELAY RELAY
INPUT 28 VDC
CONTACTS 4A
HI-G, INC.
7145

See Page 1•1728

Series 4600/4700/4800 offer one shot function for 10 milliseconds to 100 seconds in relay or solid state output. Factory fixed or field adjustable. Hermetically sealed, AC or DC inputs and temperatures to 125°C.

THICK FILM HYBRID TIMERS



See Page 1•1725

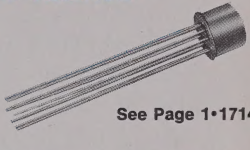
Delay on operate solid state output in 5, 12 and 24 VDC inputs 0.3″ wide x 0.1″ grid pin spacing. Model 6100 is epoxy and 6150 hermetically sealed. Delays are set but field trimmable.

1/5 SIZE CRYSTAL CAN RELAYS

See Page 1•1717

The ultimate in relay design, size and capability — Dry Circuit to 2 Amperes in a package capable of withstanding today's environmental stresses — Qualified to Mil-R-5757/37.

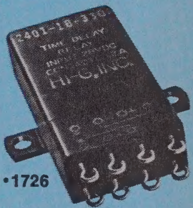
TO-5 RELAYS



See Page 1•1714

The fully qualified TO-5 series with switching capabilities from Dry Circuit to 1 Ampere at coil sensitivities from 60 MW. Qualified to Mil-R-5757/38-/40-/69-/70.

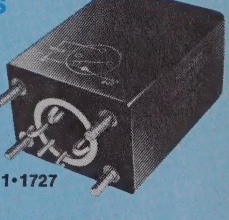
DELAY ON OPERATE TIMERS



See Page 1•1726

Series 2400-Crystal can (1.5″ max.) factory fixed to 120 seconds, to DPDT, 2 amp contacts and temperatures −55°C to +125°C.

VERSATILE DELAY ON OPERATE TIMERS



See Page 1•1727

For loads to 10 amps delays to 300 sec. AC or DC input, up to 4 PDT output. Series 1600 factory set; 1700 resistor adjustable with termperatures to 125°C.

18TH EDITION

how to use eem 75 76

This issue of EEM is the largest, most complete catalog ever published in the electronics field. The two volumes contain more than 5,000 pages of up-to-date information. New features have been added and you may find it helpful to scan this page as a guide to the easy use of EEM.

1. INDEX OF MANUFACTURERS' CATALOG PAGES

When you need data from particular manufacturers, just look them up alphabetically in the index beginning on page 3 (green pages). More than 700 manufacturers have catalog pages in EEM, and easy reference is given for all these pages in two-number figures. The first number in bold type indicates the volume (1 or 2); the second, the page number. Example: **1**•141 means Vol. 1, page 141.

2. PRODUCT INDEX AND DIRECTORY

All products are indexed by basic type. Each product shows three groups of manufacturers:

1. **Boldface** listings with page references tell you that this manufacturer's catalog pages are right at hand in the white pages.
2. * the asterisk means that this manufacturer has catalog pages in the white section but not on this particular product.
3. Lightface listings, unmarked, means that the manufacturer has submitted a data sheet to verify that they do manufacture this product, but no further data is available in EEM.

New feature You'll find a handy Product Index and Directory in each volume. All product designations are in both volumes, but page references are given only for those products in that volume; you are referred to the other volume when the catalog pages are there.

New feature The letter "D" preceding the listing tells you that the product is available from distributors.

New feature The letter "M" preceding the listing tells you that the product is available in military specifications.

3. TRADE MARK DIRECTORY

If you have just a trade mark, this directory gives you the product it signifies and who makes it. We've black edgemarked the section for easy location. Beginning on page 2•301 (green pages), there are more than 2500 manufacturers' trade marks listed. Once you have the product and manufacturer, look in the Manufacturers and Sales Offices Directory for complete name and address.

4. MANUFACTURERS' CATALOG PAGES

Here is the greatest collection of detailed catalog pages on electronic products available anywhere. The section is indexed by product category, alphabetically. Manufacturers' catalog pages appear in each product category in alphabetical order. There is a handy guide to the product category in each volume of EEM on the page facing page 1. The great number of catalog pages were divided into the two volumes to facilitate handling.

5. MANUFACTURERS/SALES OFFICES DIRECTORY

Here is all the data on where they are — addresses and phone numbers of main offices, branch offices, local representatives, local distributors plus local contact names and phone numbers.

NEW DATA — Additional data included this year:

a. Minimum order accepted
b. Federal Supply Code (FSC) number
c. Qualified Parts List (QPL) number
d. Individual contacts by name for price data, application information, customer service
e. Free literature offerings
f. Summary of categories of products manufactured by each company
h. Corporate logos or trade marks for easy location of manufacturers. Manufacturers with catalog pages in EEM are indicated by **boldface** listings and page number references.

6. DISTRIBUTOR'S DIRECTORY

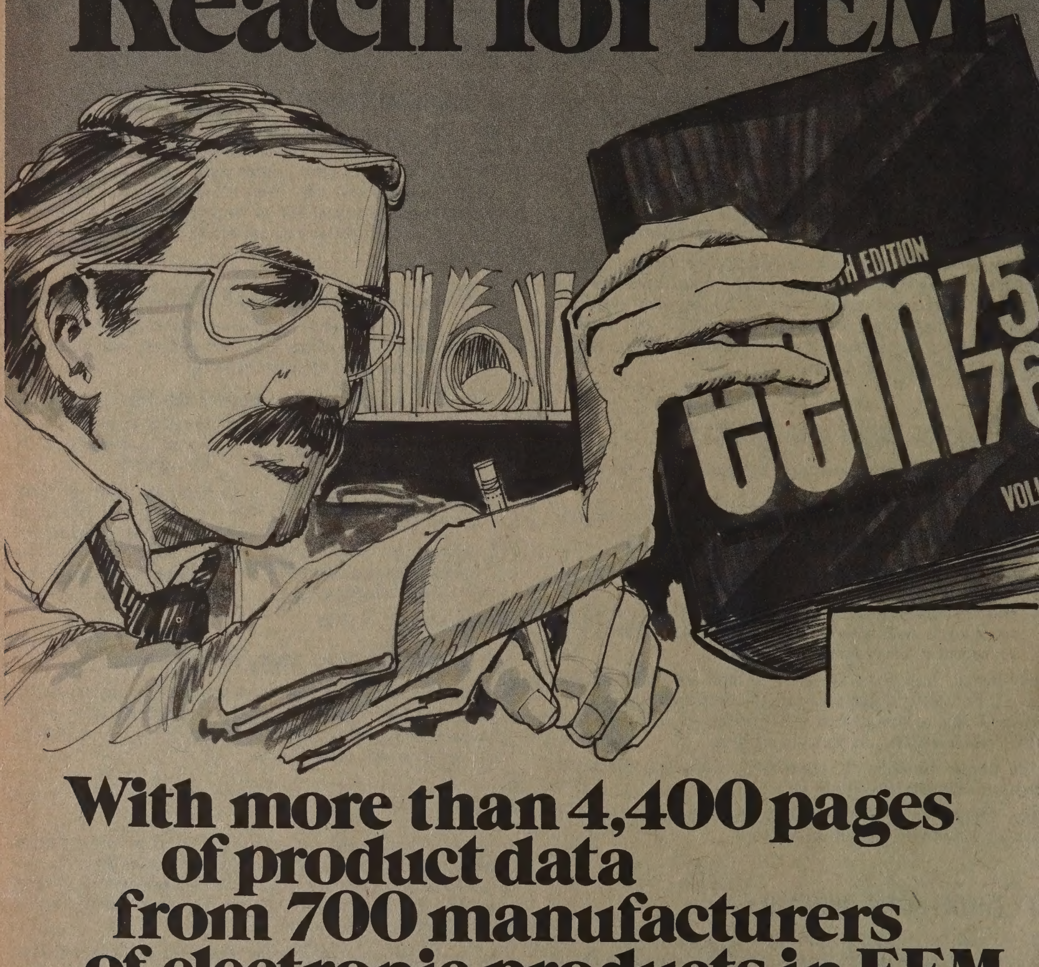
Yellow pages, black edgemarked for easy location, contain a geographic listing of electronic distributors offering name, address, phone number and sales manager. This section is to be found in Volume 2 following Manufacturers/Sales Offices Directory.

Your enthusiastic response and usage of EEM has helped make this edition the largest ever. Each year, we try to incorporate new features to make EEM better and easier to use. Your comments and ideas are sincerely welcomed. Please write Editorial Director, United Technical Publications, 645 Stewart Avenue, Garden City, N. Y. 11530.

EEM is published by United Technical Publications, div. of Cox Broadcasting Corp. Other publications serving the electronics industry are Electronic Products Magazine, O-T-S Catalog, IC Update Master, Electronic Marketing & Management (EM/M), Off the Shelf Magazine, Electronics Retailing and United's Cost and Pricing Service.

There is more catalog data available to you at your fingertips than ever before...when you

Reach for EEM



With more than 4,400 pages of product data from 700 manufacturers of electronic products in EEM.

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

PRODUCT INDEX AND DIRECTORY

The Product Index and Directory is designed to help locate manufacturers of specific types of electronic products. Products are listed alphabetically with many helpful cross references. The product categories are arranged in the following manner: general product type, specific description. For example, Microwave Generators is listed under Generators, Microwave; Solid State Lamps are found under Lamps, Solid State.

After each Product heading is an alphabetical listing of manufacturers who make that product. Those manufacturers appearing in boldface type with volume and page numbers have catalog data in the white pages of EEM. The volume number appears first, before the bullet, the page number is listed after it. Manufacturers who make the product but who may not have it listed among their catalog pages are in boldface with an asterisk. Manufacturers listed in lightface make the product but have not provided any catalog pages. Those manufacturers marketing the product through distributors have a "D" to the left of their names. Those who manufacture it to meet military specifications have an "M."

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

4 ways IC Update Master can solve the problem of device selection.

Smaller companies often offer special performance devices. How would you find a company making a device you need?

Go to the Master. Section 2 is a product guide to the entire IC industry. It allows you to survey all devices, their key operational characteristics, and the companies who supply each one.

You want to call for information on TI's MOS memories . . . What city would you call for information.

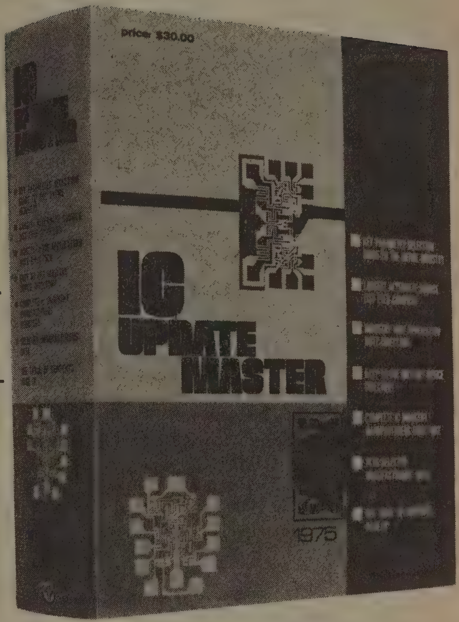
Go to the Master. Section 7 is a comprehensive telephone directory of the entire IC Industry. Page 7-37 lists Texas Instruments and the extension number for product information on MOS. It also contains a phone listing for TI sales offices and distributors throughout the country.

Motorola makes an MCM 4004 device . . . where would you look to find an alternate source for an MCM 4004?

Go to the Master. Section 3 is an industry wide cross reference. It contains over 14,000 cross references. Page 3-20 lists five other companies and their part numbers for pin-for-pin replacements of an MCM 4004.

Got a design problem . . . could an application note help?

Go to the Master. Section 5 is a comprehensive guide to the many IC application notes available. It lists the devices covered, describes each note and tells who publishes each one.



Over 2000 pages of help.

You can get a
copy of
the Master
for only $30

There are literally hundreds of other problems the Master can help you solve. It is a totally new concept and should revolutionize the cataloging of IC data . . . it will make your job of device selection easier than ever before possible.

When you get IC Update Master you'll wonder how you've gotten along without it. Send check or money order for $30 to:

Patti Foley

Acculine - automatic rotary dip soldering system - Hollis Engrg., Inc.
Acculock - recorders, magnetic tape - Emerson, Industrial Controls Div.
Acculog - recorders, magnetic tape - Emerson, Industrial Controls Div.
ACC-U-LOK - electronic line shaft system - Control Systems Research, Inc.
Accumat - solid state controller - Hotpack Corp.
Accumode - signal conditioner - Endevco
Accupower - power supplies-uninterruptible - Emerson, Industrial Controls Div.
Accuprint - drafting vellum - Bishop Graphics
Accuride - ball bearing slides - Accuride
Accuspede - controls-motor control - Emerson, Industrial Controls Div.
Accu/Stat - Controls - Allis-Chalmers
Accu-Strates - substrates .050" with a 2m" B/S - Accumet Engineering Corp.
Accutrim - trimming potentiometers - Vishay Resistive Systems Grp.
Accutron - timers and clocks - Bulova Watch Co.
Ace - electronic testing devices - Communications Technology Corp.
Ace - lock - Chicago Lock Co.
ACL - Pyro-processing system - Allis-Chalmers
Acoustalloy - diaphragm - Electro-Voice, Inc.
Acousta-Master - amplifiers & sound sys - Bogen Div.
Acousta-Voicing - sound equalization process - Altec Div.
Acoustifoam - windscreen material - Electro-Voice, Inc.
Acro-dial - 50 no. repertory telephone dialer - Acron Corp.
Acro-larm - emergency telephone dialer - Acron Corp.
Acro-probe - logic probe - Acron Corp.
Acrylafil - filberglass reinforced styrene-acrylonitrile - Fiberfil Div. Dart Ind.
Acrylweld - 2-part acrylic adhesive - Hardman Inc.
Act/Ion - ion-sensetive electrodes - Corning Glass Works
Actionator - heavy duty industrial motors - Honeywell
Acto - automatic frequency measuring system - Systron-Donner Corp.
Acts - automatic continuity test system - Data Numerics
Acuflex - acupuncture equip. - Jaesic Industries Co.
AD - vibratory feeders - Automation Devices, Inc.
AD - placement units - Automation Devices, Inc.
Adam - modular bread boarding system - E & L Instruments, Inc.
Adapt-a-Switch - Non Lighted & Lighted Pushbutton Switches - Arrow-Hart, Inc.
"Adapt-O-Mount" - motor base adapter - Overly-Hautz Co.
Adapts - analog/digital processing and test system - Varian Data Machines
Adepts - data acquisition & system control - Varian Data Machines
Adas - airborne recorders - Lockheed Aircraft Svc.
ADD-A-TRACK - tape recorders - V-M Corporation
Adjust-a-box - adjustable box wrench - Hunter Tools
Adjustohm - adjustable wire-wound resistors - Ward Leonard Elec. Co. Inc.
Adjusto-Switch - rotary switch - Airflyte Elctrns. Co.
Adjusto Torq - clutches & brakes - General-Electro Mechanical
ADLAKE - Solid State Devices - Adams & Westlake Co.
ADLAKE - Dry Reed Relays - Adams & Westlake Co.
ADLAKE - Mercury Plunger Relays - Adams & Westlake Co.
ADLAKE - Mercury Wetted Relays - Adams & Westlake Co.
AD-MU-00 - magnetic shielding alloy - Ad-Vance Magnetics
AD-MU-78 - magnetic shielding alloy - Ad-Vance Magnetics
AD-MU-80 - magnetic shielding alloy - Ad-Vance Magnetics
Adpac&T - industrial 12 bit A/D converter - Analogic Corp.
Adventurer - tool boxes - Vlchek Plastics Co.
AEI - Semiconductors - Calvert Elctrns., Inc.
Aelectra - electronic teaching equipment audio visual equipment - Ashman Industries (1966) Ltd.
AERO - frequency meters, elapsed time indicators - Arnoux Corp.
AerObiax - heater, cable - ARI Inds., Inc.
AerOcoax - heater, cable - ARI Inds., Inc.
AerOdet - resistance thermometer - ARI Inds., Inc.
AerOgard - thermowell - ARI Inds., Inc.
Aerograph - gas chromatographs, liquid chromatographs - Varian Assocs.
Aerolite - components - Aerolite Elexs Corp.
Aeron - air pollution test equipment - GCA/Precision Scientific
"Aeronautic Bearings" - ball bearings - Raway Bearing Corp.
AerOpad - thermocouples - ARI Inds., Inc.
AerOpak - thermocouple wire - ARI Inds., Inc.
AerOrod - heaters - ARI Inds., Inc.
AerOseal - moisture barrier - ARI Inds., Inc.
Aerotorch - butane torches - Wall-Lenk Mfg. Co.
AE-16 Rosin - activated rosin core solder - Bow Solder Products
AE-21 Nochar - activater rosin core solder - Bow Solder Products
Agamp - automatic gain adjusting amplifier - GTE Lenkurt Inc.
Agastat - timing devices, programmers - Control Products Div.
Agaswitch - time delay switches - Control Products Div.

Agnicon - silver-nickel contact material - GTE Sylvania Inc.
Agnostick - silver-cadmium oxide contact material - GTE Sylvania Inc.
AIM DAC - I.C. D/A converter - Precision Monolithics Inc.
AIMSERT - inserts - Aimsco Inc.
Aire-Regulator - temperature humidity chamber - Atlas Electric Devices
AIRFLEX - Clutches & Brakes - Eaton Corp.
AIROTOR - blower wheel - Torin Corp.
Air Pal - compact 2,3,&4-way valves - Airmatic/Beckett-Harcum
AIRPAX "parkermeter" - Panel & edge-reading meters - Airpax Elctrns.
Air-Quenching - Clinker cooler - Allis-Chalmers
AirSet - Roller mills - Allis-Chalmers
Ajaxomatic - automatic metal pouring - Ajax Magnethermic Corp.
Akrobin - plastic storage bin - Akro-Mils, Inc.
Alautronex - gold allow plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Alchrome - heating element alloy - GTE Sylvania Inc.
ALCOJET - powder machine detergent - Alconox Inc.
ALCOKNOB - PANEL & CONTROL KNOBS - ALCO Electronic Prods., Inc.
ALCOLITE - MINIATURE LAMPS & LIGHTS - ALCO Electronic Prods., Inc.
ALCONOX - powder manual detergent - Alconox Inc.
ALCOSTRIP - CERAMAIC STRIPS - ALCO Electronic Prods., Inc.
ALCOSWITCH - MINIATURE SWITCHES - ALCO Electronic Prods., Inc.
Alert - emergency locator transmitter - Pacific Communications
Alfred - Microwave Test Equipment - Singer Co.
Align-O-Pot - special shaft feature - Bourns, Inc.
Alinabal - rod ends & spherical bearings - MPB Corp.
Alkanex - polyester resin wire enamel varnish - General Elec.
Allacast Sys. - epoxy potting & encapsulating - Packaged Resins Div.
Allacast System - epoxy potting & encapsulating - Allaco Prods Div.
Allen-Head - hex socket screws - Allen Mfg. Co.
Allis-Chalmers - All goods - Allis-Chalmers
Alloy Rods - welding wire & electrodes - Chemetron Corp.
All Power - vehicle power converter - Techsonics
Allros - non-activated rosin flux - Alpha Metals, Inc.
All-State - brazing & soldering alloys - Chemetron Corp.
All-Talk - Telephones - Fanon/Courier Corp., Subs.
ALMA - Integrated Circuit Testers - Develco
Alnico 5 Cb - permanent magnet grade - Thomas & Skinner, Inc.
Alnico 9 Nb - permanent magnet grade - Thomas & Skinner, Inc.
ALPA - cameras, lenses, filters, programmer/timer - Heitz, Inc., Karl
ALPAC - ALUMINUM PACKAGE BRIDGE - Semtech Corp.
ALPAC JR. - ALUMINUM PACKAGE BRIDGE - Semtech Corp.
ALPAC SR. - ALUMINUM PACKAGE BRIDGE - Semtech Corp.
ALPAC "T" - 10 AMP FULL WAVE BRIDGE - Semtech Corp.
ALPAC 3 JR - 5 AMP 3 PHASE BRIDGE - Semtech Corp.
ALPAC 3T - 10 AMP 3 PHASE BRIDGE - Semtech Corp.
ALPAC 50 - 50 AMP FULL WAVE BRIDGE, ROUND - Semtech Corp.
ALPAC 50-R - RECTANGULAR FULL WAVE BRIDGE - Semtech Corp.
Alpha - floated rate integrated gyros - Singer Co.
ALPHALINE - 2 wire temp. & pressure transmitters - Rosemount Inc.
Alpha-Lite - alpha-numeric readout - Refac Elctrns./Pinlites
Alpha Max - D-C Servo Motor - I M C Magnetics
Alpha Tone - tone encoders, decoders - Alpha Electronic Services
Alphatron - vacuum gauge - Varian Assocs.
AlSiBase - Multilayer Substrates & Multi-chip pkgs. - American Lava Corp.
AlSiCoat - Ceramic Coatings - American Lava Corp.
AlSiPak - Ceramic packages & Chip Carriers - American Lava Corp.
Altecom - intercommunications - Altec Div.
Alti-Coder - altitude measurement & readout system - Kollsman Instr. Co.
Alti-Lerter - altitude alerting device - Kollsman Instr. Co.
Alugard - lightning arresters - General Elec. Co.
Alumalytic - capacitors - General Elec. Co.
ALUMA-TRAK - Aluminum Chassis Slides - Zero Mfg. Co.
ALUMEL - thermocouple alloy - Hoskins Mfg. Co.
Alumifoam - foam dielectric - Times Wire & Cable
Aluminax - aluminum shielded coaxial cables - Saxton Prods.
Aluminex - speaker voice coil form - CTS of Paducah, Inc.
Aluminex - speaker bobbins and speakers - CTS Corp.
Alumisol - solid dielectric - Times Wire & Cable
Alumispline - spline dielectric - Times Wire & Cable
ALUMOWELD - Rod, wire and strand - Copperweld Bimetallics
Alumtap - cutting fluid - Brooks Co. Inc., Winfield
AMBICON - automatic level control - Fairchild Sound Equip.
Ambi-Stat - ambient temperature controllers - Honeywell
Ambitrol - constant voltage/current supply - Power Designs, Inc.
Ambroid - liquid cement - Ambroid Co.
American - liquid meters - Singer Co.
American - gas meters, calorimeters and flow meters - Singer Co.
American Beauty - soldering irons, supplies, ultrasonic cleaners - American Elec. Heater
Amersil Fused Silica - opaque fused silica - Amersil, Inc.
Amflex - coaxial cable - Amphenol RF Div.
Aminco-Aire - environmental control source - American Instr. Co.
Amite - digital watches - American Microsystems, Inc.
AMLOC - dryer control - Pall Trinity Micro Corp.
Ampac&T - amplifiers (10V inverter, 10V follower, 10V differential - Analogic Corp.
Ampact - explosive cartridges - Amp Inc.
Amp-Blade - connector - Amp Inc.
Amp-Crimpac - flat packs header - Amp Inc.
Amp-Edge - connectors - Amp Inc.
Ampeez - connectors - Amp Inc.
Amp-Fine-Y-R - splice - Amp Inc.
Amp-Fit - tube fittings - Amp Inc.
Ampillume - indicator lights - Amp Inc.
Amp-In - connectors - Amp Inc.
Amp-Incert - connectors - Amp Inc.
Ampip - post-insulation pod - Amp Inc.
Amp Klip - semiconductor fuses - International Rectifier Corp.
Amplastic - plastic tubing - Amp Inc.
Amp-Leaf - connectors - Amp Inc.
Ampli-Bond - electrical splices & terminals - Amp Inc.
Amplibox - portable public address system - PASO Sound Products Inc.
Ampli-Cycle - power converter - Electric Machinery Mfg. Co.
Ampliducer - straingage transducer incorporating highlevel signal amplifier - West Coast Resch. Corp.
Amplifilm - dielectric material - Amp Inc.
Amplimica - capacitors - Amp Inc.
Ampli-Speed - magnetic drives - Electric Machinery Mfg. Co.
Amplite-End - closed-end splice - Amp Inc.
Amplivar - splices - Amp Inc.
Ampli-Vox - public address systems - Perma Power Div.
Amp-Lok - connectors - Amp Inc.
Ampmodu - interconnection system - Amp Inc.
Amp-O-Lectric - electric machines - Amp Inc.
Ampomator - making machine - Amp Inc.
Amportapower - hydraulic tools - Amp Inc.
Ampower - splices & terminals - Amp Inc.
Amprobe - clamp-on volt/ammeters and strip chart recorders - Amprobe Instr.
Ampseal - connectors - Amp Inc.
Amp Shield - connectors - Amp Inc.
Amp-Sulation - heat shrinkable tubing - Amp Inc.
Amp-Tab - connectors - Amp Inc.
Amp-Tapematic - machines for tape-mounted terminals - Amp Inc.
Amp-Tapetronic - electric machine for applying tape-mounted terminals - Amp Inc.
Amp-Unyt - connectors - Amp Inc.
AMS 6002 - 1024-bit P-channel MOS RAM - Advanced Memory Sys., Inc.
AMS 6003 - 2048-bit P-channel MOS RAM - Advanced Memory Sys., Inc.
AMS 7001 - 1024-bit N-channel MOS RAM - Advanced Memory Sys., Inc.
AMS 7001 Storage Card - High-speed Read/Write Memory Card - Advanced Memory Sys., Inc.
Analogger - analog data logger - NES, Inc.
Analok - A/D conversion circuit - Analog Devices
Analytical Titra-Kit - redox and pH measurements. - Analytical Measurements
Analyzer 2000 series - distortion analyzers - Digitech Data Inds., Inc.
Anniversary - copper tips, iron plated, nickel flashed - Wall-Lenk Mfg. Co.
Antex - solder irons - M M Newman Corp.
Antex - solder irons - Newman Corp., M. M.
"Anti-Static #79" - static eliminator - Merix Chem. Co.
"Anti-Static #79-OL" - static eliminator - Merix Chem. Co.
Anzac - active & passive components - Adams-Russell Co., Inc.
APC-N - precision 7mm connector - Amphenol RF Div.
APC-7 - precision 7mm connector - Amphenol RF Div.
APC-7S - precision 7mm connector - Amphenol RF Div.
Apex - metallic seals - Servotronics, Inc.
Apiezon - oils, greases, waxes - Biddle, James G.
Apilon - ceramic friction material - Delevan Div., American Prec. Inds.
Aqua-Clean - pc board water cleaner - Hollis Engrg., Inc.
Aquadag - conductive/resistive coating - Acheson Colloids Co.
AQUA-SOL - Water soluble soldering fluxes - Kenco Alloy & Chemical Co., Inc.
AR - chemicals - Mallinckrodt, Inc.
Arcolytics - aluminum electrolytic capacitors - Arco Electronics Inc.
Arcom - mobile digital communication system - Atlantic Research Coropration
ARDA - tinning apparatus - Electrovert
Aremcobond - epoxy adhesives - Aremco Prods., Inc.
Aremcolox - machinable ceramics - Aremco Prods., Inc.
Aristocrat - spkr. sys. - Electro-Voice, Inc.
Arkomax - Columnar Alnico Permanet Magnets - Arnold Engineering Co.
ARM - connectors - American Microwave Inds., Inc.
Armaflex - foamed plastic insulation - Armstrong Cork Co.
Armalok - urethane foam insulation - Armstrong Cork Co.
Armco Nitronic 32 - non-magnetic stainless steel for skidwire & power applications - Armco Steel Corp.
Armco Nitronic 33 - low magnetic permability stainless for riser & line pipe - Armco Steel Corp.
Armco Nonoriented Electrical Steels - silicon steels for core applications - Armco Steel Corp.
Armco Oriented Electrical Steels - silicon steels with grain orientation - Armco Steel Corp.
ARMM - micro miniature connectors - American Microwave Inds., Inc.
Armortite - direct burial non-metallic sheath - Okonite Co.
Arnox - Ceramic Permanent Magnets - Arnold Engineering Co.
Aro - resistance welding guns - portable - Falstrom Co.
Aron Alpha - adhesives - Vigor Co.
Arontite - sealants - Vigor Co.
ARSM - sub-miniature connectors - American Microwave Inds., Inc.
ARULAB - ultrasonic test equipment - Arenberg Ultrasonic Lab Inc.
Arval - equip. balancers - Falstrom Co.
A-Scope - interferometer - Varian Assocs.
ASTRO - encapsulated electronics - Astro Products Co.
ASTRO-AIRE - fans - Astro Dynamics
Astro-Brite 135 - color TV picture tube - Westinghouse Elec. Corp.
astro-cobra-flex - semi-rigid flexible cable - Astrolab, Inc.
Astrodome - photoelectric control - General Elec. Co.
ASTROFLO - flow generators and flowmeters - Astro Dynamics
Astrogide - p.c. card guides; guides circuit board - Bivar, Inc.
ASTROLIFT - general cargo lift & Dual parking lift - Astro Dynamics
Astroline - console model wave soldering sys. - Hollis Engrg., Inc.
Astrolite - Drake Mfg. Co.
Astrolok - universal coaxial connector - Astrolab, Inc.
Astroplate - tarnish free finish - Amphenol RF Div.
Astro Super Flex - coaxial cable (precision) - Astrolab, Inc.
Astro/348 - connector - Amphenol Connector Div.
Asymptotic R Calorimeter - Heat Flux sensor - Hy-Cal Engineering
Atlas - technicians service books - LMB Heeger, Inc.
Atom - aluminum electrolytic capacitors - Sprague Elec. Co.
Atom - fire detection system - Kidde, Walter & Co.
Atomiclad II - composite electrical contact rivets - GTE Sylvania Inc.
ATR - Applicable to all products - ATR Electronics, Inc.
ATS*960 - Automated Test System - Texas Instrs. Inc.
Attache Phone - phone in a briefcase - Livermore Data Systems, Inc.
Attenuator-Rated Ferramics - ferrites - Indiana General
Attenuduct - wave guide filter - Filtron Company, Inc.
Audimax - limiter - CBS Laboratories
Audio Baton - audio filter - Blonder-Tongue Labs., Inc.
Audio Hailer - S-168M - Audio Equip. Co., Inc.
AUDIOTEX - home entertainment accessories - GC Electronics
Audio-Verter - paper tape transmitter - Digitronics Corp.

Auric - gold plating solutions - Fidelity Chem. Prods. Corp.
Aurion-X - ion-exchange gold reclamation unit - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Aurobond - gold strike - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Autec - selective gold plating - Viking Inds., Inc.
AUTO-AMP - servo controls - Hills-McCanna Co.
Auto-Answer - automatic telephone answer - Bramco Controls Div.
Autobalance - automatic true rms AC/DC transfer standard - Ballantine Laboratories, Inc.
AUTO-BOOST - automatic low-line voltage booster - Microtran Co., Inc.
Auto-Bridge - automatic limit bridge - Beckman Instrs.
Autodata - data acquisition systems - Vidar Autodata Inc.
Auto-Draft - interactive graphics system - Auto Trol Corp.
Auto-Flow - mark II drafting machine - Keuffel & Esser Co.
AUTO-GAIN - automatic gain amplifier - Ithaco, Inc.
Autohet - automatic heterodyne converter - EIP, Incorporated
Autoline - automatic in-line pc board cleaner - Hollis Engrg., Inc.
Autoloader - system for automatically loading substrate into the sel-rex tf screen printer - Sel-Rex Co. Div. Oxy Metal Industries Corp.
AUTOLOC TM - Lock-in Amplifier - Keithley Instruments Inc.
Automac - press overload control - Cardinal Control Co.
Automagnetic - (magnetic processing system) - RFL Inds.
Automata - card reading equipment - Chatsworth Data Corp.
Automet - automatic weather reporting - E-Systems Inc.
Autometronic - automatic resolution universal counter - Ballantine Laboratories, Inc.
Auto Mod - complete telemetry systems - Autocon Inds., Inc.
Autopin - continuous wire pinning machines - Autosplice/Dv Gen Staple
Autopolar - microwave polarization switch - Teledyne Micronetics
Autoprep - gas chromatograph - Varian Assocs.
Auto-Probe TM - Portable digital multimeter - Keithley Instruments Inc.
AutoRad - x-ray exposure control - Torr Labs.
Auto-Ranger - charge amplifiers - Unholtz-Dickie Corp.
AUTOROTOR-HAM II - Rotor for Amateur Operators - Cornell-Dubilier Electronics
Autosal - lab salinometer - Guildline Instrs., Inc.
AutoScan - Automatic Test Equipment - Addison Div. Muirhead, Inc.
Auto-Snap® - flexible panel switching - Automation Displays Inc.
Autosplice - wire fed splicing equipment - Autosplice/Dv Gen Staple
Autosyn - instruments & systems of remote indications - The Bendix Corp.
Autotab - high production circuit board hardware - Autosplice/Dv Gen Staple
AUTOTAK® - Automatic tachometer indicator - Howell Inst. Inc.
Autotape - positioning system - Cubic Corp.
AUTOTEMP® - automatic temperature indicator - Howell Inst. Inc.
Auto-Ten - automatic attenuator - Fairchild Sound Equip.
AutoTrak - Automatic Test Equipment - Addison Div. Muirhead, Inc.
Autronex - acid type gold electroplating process for ind'l applications. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Avanti - fluorescent emergency lights - Teledyne Big Beam
AWAC - alumoweld-aluminum power conductors - Copperweld Bimetallics
Axial Flow - valves, regulators and control devices - Singer Co.
Aximax - fan - Rotron, Inc.
Axiohm - axial lead enamel resistors - Ward Leonard Elec. Co. Inc.
A4 - acoustic automatic answer attachment - MI2 Data Systems Inc.

B

B - potentiometers - Bourns, Inc.
Bakelite - plastics products; vinyl, pe, etc. - Union Carbide, Chemicals & Plastics
Balco - resistance alloy - GTE Sylvania Inc.
BAL-CON - stacking connector - Eby Co., Hugh H.
Baldwin - instruments - BLH Elctrns., Inc.
Balladier - microphones - Conrac Corp.
Ballantine - AC voltmeters - Ballantine Laboratories, Inc.
Ball-Lok - quick release pins - Avibank Mfg. Inc.
Ball-Pak - Bearings for disc harrows - Allis-Chalmers
Banc-Lok - inserts - Cherry Rivet & Boots Nut Divs.
Band-o-Code - band marking of insulated wire - Storm Products Co.
BANDOMATIC - installation tooling - Burndy Corporation
Band-Scan - control system - Sequential Information Systems
Bantam - leak detector - Varian Assocs.
BANTAM - miniature round connectors - Burndy Corporation
Bantam Rota-Crimp - crimping tools - Amp Inc.
Ban the Blob - fluorescent ballasts - Jefferson Elec.
Barocel - pressure transducers - Datametrics Inc.
Barratron - transmitting tubes - Litton Inds.
Baseline - thermal relays - Warren G-V Communications
Bazooka - vacuum probes - Air-Vac Engrg. Co.
Bazooka - solder gobbler/iron - Air-Vac Engrg. Co.
BDT - non cyanide gold plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
BeaU - connector, barrier terminal strips - Vernitron Elec. Comps.
Beau-Tech Tools - soldering aids - Precision Elec. Co.
Becon - printed circuit connectors - Teledyne Kinetics
BEE Line - communication connectors - Hughes Aircraft Co., Connecting Devices
Beeplites - Drake Mfg. Co.
Behlman - ac power sources - Elin Div.
Beldfoil R - Aluminum/Polyester Shield Material - Belden Corp.
Belgard - burglar alarm - Aqualarm Inc.
Bellco Nameplates - plastic & metal identification plates - Bell Co., Inc.
BELLE KLIPSCH - loudspeaker system - Klipsch & Assocs. Inc.
"Bellowform" - printed circuit connector contact - Continental Connector Corp.
BELT-LINE - Teflon Transistor Sockets - U.S. Terminals
Bemac II - ac generators - Electric Machinery Mfg. Co.
Bemcoil - surface heat exchange material - Bemco, Inc.
Bemol - Lubricants, molybdenum disulfide - Rogers Corp.
Benavac Mark II - hetrodyne processor - Delta-Benco-Cascade LTD.
Benchmaster - bench top test chamber - Tenney Engrg., Inc.
Bench-Model Solderette - wavesoldering equip. - Electrovert
Berg - pliers - Erikson Specialized Tool Co.
BergCon - packaging system - Berg Electronics
BergFlo - plating process - Berg Electronics
BergLance - male pin - Berg Electronics
BergLok - modular interconnection system - Berg Electronics
Bergold - graduated gold plating - Berg Electronics
BergPac - reed relay terminal - Berg Electronics
BergPin - wire wrapping pins - Berg Electronics
BergPost - wire wrapping posts - Berg Electronics
BergStik - straight and right angle headers - Berg Electronics
Berlon - beryllium oxide epoxy resin materials - National Beryllia Corp.
Berlox - pure oxide ceramics, composite systems, ceramic-to-metal assemblies - National Beryllia Corp.
Berlox-strate - pure beryllia substrates - National Beryllia Corp.
Besponder - Tracking Radar Devices - Vega Precision Labs.
BEST - Automotive Speakers, Stereo Kits, & Access. - Oxford Speaker Co.
BET - RF power transistors - Motorola Semiconductor Prods.
Beta - precision CRT displays - Infodex, Inc.
Beveloid - conical involute gears - Invincible Gear Co.
Beyer - earphones, input transformers - Gotham Audio Corp.
Bicronite - epoxy coating process - Bicron Elctrns. Co.
Bicron/Vollmer Gages - contact measuring instrument - Bicron Elctrns. Co.
Bicron X-Ray Gage - non contact measuring instrument - Bicron Elctrns. Co.
Bi-Film - resistance elements - Bourns, Inc.
Biflex - type of speaker - Altec Div.
Big Beam - emergency lights & hand lamps - Teledyne Big Beam
"Big-Bertha" - rotatable antenna support masts - Telrex Labs.
Big Inch - motors - Haydon Switch & Instr., Inc.
Big Look® - panel meters - General Electric Co.
BIMET - clad metals - Handy & Harman
Bimode - solid state diodes - Varian Assocs.
BIMODE - diodes - Varian Electron Tube & Device Grp.
Bimode Diodes - microwave multiplier diodes - Varian Solid State East Beverly Div.
BINA-DEC R - BCD converter - Industrial Elctrn. Engrs.
BINAVERTER - Binary to Decimal Converter - Metric Systems Corp.
BINA-VIEW R - binary-input self-decoding readout - Industrial Elctrn. Engrs.
Biode - silver/silver chloride electrode (af/agcl) - Biocom, Inc.
Biolink - telemetry systems - Biocom, Inc.
Bio-Solv - solubilizers - Beckman Instrs., (AISSD)
Bi-Pac - mechenical switch module - Controls Research Corp.
BIPAX - flexible package - Tra-Con, Inc.
Biplexer - 19.2 bps full-duplex modem - Codex Corp.
Biraco - tubing - Birnbach Co., Inc.
Bi-Scan - electrostatic printer/plotter - Varian Data Machines
Biscuit - blower - Rotron, Inc.
Bistable Amplifier - ultrasensitive solid state relay - Cross Electronics Inc.
BIT - miniature audio transformer - TRW/UTC Transformers
Bit Error 2000 series - rate test sets - Digitech Data Inds., Inc.
BiTran - educational computer - Fabri-Tek, Inc.
B.I.T.S. - Backplane Integrated Test System - Addison Div. Muirhead, Inc.
BITSWITCH - PCB-mounted programming device - Stanford Applied Engineering
Black-Daylite - television receivers - General Elec. Co.
Black-Magic - Unifield low cross talk Transmission Line flat cable - Ansley Elctrns. Corp.
Black-Out - front panel for lighted readout - Info-Lite Corp.
Blendmaster - metering, mixing, dispensing machines - Hull Corp.
BLEND-OHM - screenable resistance paste - Methode Elctrns., Inc.
Blendtrol - digital blending sys. - Foxboro Co.
BLI - instrumentation - Beukers Labs., Inc.
B-Line - potentiometers - Bourns, Inc.
Bloc-Lite - indicators-lighted - LVC Inds. Inc.
Blue Dot - precision coaxial connectors - Maury Microwave Corp.
Blue Dot - flashcubes - flashbulbs - magicubes - GTE Sylvania Inc.
Blue-Point - automotive hand tools - Snap-On-Tools
BLUE RIBBON - electrical connectors - Amphenol Ind'l. Div.
Blue-Streak - Pre Homogenous flat cable - Ansley Elctrns. Corp.
Blue Stuff - cleaner/lubricant - Tech Spray, Inc.
Blue Top - projector lamps - GTE Sylvania Inc.
Bogen-Call - paging sys - Bogen Div.
Bogen-Call Pagemaster - personal, selective paging - Lear Siegler, Inc.
Bogen-Phone - telephone-intercom sys - Bogen Div.
Bomb-Tail - closed-end splice - Amp Inc.
Bondalum - transit cases - Craig Sys. Corp.
Boomerang - sediment corer - Benthos, Inc.
Boots - nuts - Cherry Rivet & Boots Nut Divs.
BOPAC - microwave circuitry & components - Varian Assocs.
BOPAC - microwave circuitry components - Varian Electron Tube & Device Grp.
Bopac - microwave circuitry components - Varian Assocs.
Bord Pak - instrument cases & card guides & racks - Buckeye Stamping Co.
Bostflex - high flexibility industrial cables - Boston Insulated Wire & Cable Co.
Bostgard - high temperature soaking pit cables to 2100°F - Boston Insulated Wire & Cable Co.
Bostrad - fire & radiation resistant elec. cables - Boston Insulated Wire & Cable Co.
Bourns - potentiometers - Bourns, Inc.
Bouyoucos - soil moisture meas. inst. - Beckman Instrs.
Boxer - Airmovers - I M C Magnetics
BOXER - axial fans - IMC Magnetics Corp.
Boyd Bolt - self-retained bolts - Tridair Inds.
BR - relays - Babcock Electronics
Brandenburg - high voltage power supplies - Zi-Tech Div.
Bransonic - ultrasonic cleaner - Branson Cleaning Equip. Co.
Brazaloy - flux - Chemetron Corp.
BRILLO-LOCK - air filters, permanent aluminum - Evans George Corp.
Brimar - cathode raytubes - Inter-Tech. Grp., Inc.
BriteSorb - synthetic magnesium silicate - Philadelphia Quartz Co.
Broad-Band Rated Ferramics - ferrites - Indiana General
Brooksmite - flowmeter - Brooks Instr. Div.
Brown Booster - high-surge voltage regulator - Micron Industries Corp.
Brush - name of recorder line - Gould, Inc.
Bubbitrol - pressure operated control - Autocon Inds., Inc.
Buchanan - terminal blocks, printed circuit board connectors - Control Products Div.

Buddybuzzer - dual alarm system - Tapeswitch Corp. Amer.
Bulk Metal - resistor and potentiometer elements - Vishay Resistive Systems Grp.
Bullet - sealing hub connector - Thomas & Betts Co.
Bullet Blade - Plows - Allis-Chalmers
Bullet-Nose - lugs - Sealectro Corp.
BULLS-EYE - subminiature circular connectors - Hughes Aircraft Co., Connecting Devices
BUSS - fuses & fuseholders - Bussmann Manufacturing
Butterfly - double-break switches - Licon Div.
Butterfly - double-break mechanism - Licon Div.

C

Cabinetrol - motor control - General Elec. Co.
Cable Maker - terminals - Amp Inc.
Cablemaster - cable test equipment - Chatsworth Data Corp.
Cablemaster - cable & harness test equip. - Cablemaster Div.
Cablematic - wire stripping tools - Ripley Co., Inc.
Cable-Rap - plastic spiral wrap - Transcon Mfg. Co.
CADENCE - musical instrument speakers - Utah Electronic Div.
Cadis - computer aided design information sys. - Macrodata
Caeon 27 & 28 - solvent - solvent
Cage-Trol - induction-motor controls - Electric Machinery Mfg. Co.
CALECTRO - experimenter-hobbyist items - GC Electronics
Calfax - speciality fasteners - Tridair Inds.
Cali-Brain - amplitude measuring system (scoper) - Dynascan Corp.
CALICO - monitor oscilloscopes - California Instrs. Co.
Caliper - thickness tester - Branson Cleaning Equip. Co.
CALORIMIXER - Gas Mixing Controls - Cutler-Hammer, Inc.
Calrod - heaters - General Elec. Co.
CAMBI-CARD - circuit boards - Cambridge Thermionic Corp.
CAMBION - electronic components & swagers - Cambridge Thermionic Corp.
Cam-Bolt - spring-lock shelf supports - Simmons Fastener Corp.
Camper - lanterns - Teledyne Big Beam
CAPABLE - computerized logic tester - Computer Automation, Inc.
Caplet - rivets-insulated - Pylon Co., Inc.
Capopad - combination transistor pad & cap - Bivar, Inc.
Caps - cannon authorized plug specialist - ITT Cannon Electric
Cap-Sure - component holders - Industrial Devices
Captain - lighting prods. - Union Carbide
Caravelle II - CB Rig - Fanon/Courier Corp., Subs.
Carbolube - carbon products - Carbone Lorraine Industries Corp.
Cardiline - microphone - Electro-Voice, Inc.
Cardopull - p.c. card ejectors - Bivar, Inc.
Carefree - rechargeable batteries - Eagle-Picher Inds.
CAROUSEL IV & IVA - Inertial navigation system - Delco Electronics Div.
Cartridge Lamps - Drake Mfg. Co.
CartriFile R - magnetic tape and disk systems - Tri-Data Corp.
Cartrol - industrial memory system - Pacific Technology
Cary - spectrophotometers - Varian Assocs.
CASCADE - die-cast coax speakers - Utah Electronic Div.
C-A-S-H - I.C. Packing Harkware - Standard Logic Inc.
CAST - Computerized auto. systems tester - PRD Elctrns., Inc.
Catabond - copperclad laminates - NVF Co.
Catalog #100 - catalog - Workman Electronic Prods., Inc.
CAVEX - Speed Reducers - Eaton Corp.
CAVMATIC - ultrasonic generators - Phillips Mfg. Co.
C-B - coils - Caddel-Burns Mfg. Co., Inc.
CBE - combression bonded encapsulation - Westinghouse Elec. Corp.
CB-Mate - CB wattmeters - Bird Electronic Corp.
CC Enveloped by Q - used on all products - Coil-Craft Inc.
CC-4 - printed circuit board - Photocircuits Div., Kollmorgen Corp.
C-Dek - data entry devices - Mohawk OEM Sales
CDM - Terminal Blocks - Curtis Industries Inc.
CDP - p.a. horn - Electro-Voice, Inc.
CE-CON - card edge connector - Eby Co., Hugh H.
Celcor - ceramic substrates - Corning Glass Works
CELESTA - die-cast coax speakers - Utah Electronic Div.
Cell Mate - battery chargers - Seven Sciences, Inc.
Cell-O-Air - polyethylene dielectric - Superior Cable Div.
Cello-Flex - Electrical insulation - Allis-Chalmers
Celluline R - Tubular TV Lead-In Wire - Belden Corp.
CEM - coaxial magnetron - Varian Assocs.
Cem - coaxial magnetrons - Varian Assocs.
CEM - magnetrons - Varian Electron Tube & Device Grp.
Cemco - switches - Columbus Electric Mfg. Co.
Centaur - fan - Rotron, Inc.
Centigrid - low profile DPDT relay - Teledyne Relays
Centi-Loc - connector - ITT Cannon Electric
Centra-Gap - lamination shape - Thomas & Skinner, Inc.
Centricore - cores - Magnetic Metals Co.
Centrisafe - centrifugal accelerator (centrifuge) - Trio-Tech, Inc. of Calif.
Centrisort - automatic parts handler - Trio-Tech, Inc. of Calif.
Centri-Stak - Multi-stage compressors - Allis-Chalmers
Centrix - Grinding mills - Allis-Chalmers
Centura - wallplates, switches, outlets - Leviton Mfg. Co., Inc.
Centurion SSB Plus - SSB TRansceiver - Fanon/Courier Corp., Subs.
Ceradot - cermet fixed resistor - CTS Corp.
Cerafil - Ceramic Capacitor - AVX Ceramics
Ceralam - Ceramic Capacitor - AVX Ceramics
Ceramabond - ceramic adhesive - Aremco Prods., Inc.
Ceramacast - castable ceramics - Aremco Prods., Inc.
Ceramacoat - ceramic coatings - Aremco Prods., Inc.
Cerama-Dip - potting ceramic - Aremco Prods., Inc.
Cerama-Probe - measuring instr/coatings - Aremco Prods., Inc.
Cerameterm - terminal - Fansteel Inc.
Ceramicon - Ceramic capacitors - Erie Technological Products
Ceramo - thermocouple wire - Thermo Elec. Co., Inc.
Ceramocouple - thermocouple - Thermo Elec. Co., Inc.
CERAMOLITHIC - mfg. process - USCC/Centralab, Elec. Div.
CERAMOLITHIC - ceramic capacitors - Centralab
CeramVac Series - ceramic vacuum relays - Torr Labs.
Ceramvar - controlled expansion alloy - GTE Sylvania Inc.
Ceraseal - Ceramic Capacitor - AVX Ceramics
Ceratrim - cermet trimmers - CTS Corp.
CeraTrolS - ceremet potentiometer - CTS Corp.
Cercor - heat exchangers - Corning Glass Works
Cerma-Cel - steel-housing, ceramic-base thyristor - Hutson Industries
Cermide - variable & fixed resistors (primarily high resistance) - CTS Corp.
Cermolox - ceramic/metal power tubes - RCA, Ind'l. Tube Div.
Cerocup - Ceramic Capacitor - AVX Ceramics
Cerol - Ceramic Capacitor - AVX Ceramics
Certacell - voltage reference - Codi Corporation
Certavolt - voltage ref - Codi Corporation
Certi-Crimp - crimping tools - Amp Inc.
Certi-lok - insertion tools - Amp Inc.
Certimesh - woven wire cloth - Pall Trinity Micro Corp.
Certi-Seal - splice - Amp Inc.
Challenger - amplifiers & sound sys - Bogen Div.
Challenger - Steel Electronic Cabinets (Medium Duty) - Equipto Enclosure Systems
ChA-MP - tool - Amp Inc.
"Champion" - adding-subtracting machines - Victor Comptometer Corp.
Channelite - piezoelectric ceramics - Channel Inds.
Channellight - room construction - Hotpack Corp.
Channeltron - electron multiplier (CEM) - Galileo Electro-Optics Corp.
Channeltron - electron multiplier array (CEMA) - Galileo Electro-Optics Corp.
Charaband - computer line printer - Dataproducts Corp.
Chase - nipples & couplings - Thomas & Betts Co.
CHASSIS-TRAK - Slides & Handles - General Devices Co., Inc.
Check-Lite - Pilot Light Push Button - Adalet Mfg. Co.
Chem-Blanks - photo-etching - Braun Co., Inc.
Chemcor - chemically strengthened glasses - Corning Glass Works
Chemcor - chemically strengthened glasses - Corning Glass Works, Television Prods. Div.
Chemfluor - products of teflon - Chemplast, Inc.
Chem K - high capacitance insulating material - Chem Aero, Inc.
Chemputer - circular chemical computer - Coleman Instr. Div.
Chemtron - reed relays - COSAR Corp.
Cherry - rivets - Cherry Rivet & Boots Nut Divs.
Cherry Lock - rivets - Cherry Rivet & Boots Nut Divs.
Chinalak - varnishes - Dolph, John C. Co.
Chip Stik - Calculator chip w/memory - Western Digital Corp.
ChipStrate&T - solderable chips on standardized substrates - Unitrode Corp.
Chlorothene Nu - chlorinated solvent - Dow Chemical Co.
Chlorothene VG - chlorinated solvent - Dow Chemical Co.
Cho-Nector - elastomer interconnector - Chomerics, Inc.
Cho-Seal - conductive elastomer RFI gasket - Chomerics, Inc.
Cho-Shrink - conductive heat shrinkable plastic - Chomerics, Inc.
Cho-Sil - conductive elastomer RFI gasket - Chomerics, Inc.
Cho-Therm - Electrically isolating, thermally conductive elastomer - Chomerics, Inc.
Chromafilter - filters for display readouts - Panelgraphic Corp.
Chromafuse - display light deffusers - Panelgraphic Corp.
Chromascreen - rear projection screen - Panelgraphic Corp.
Chromatrix - color tv picture tubes - GTE Sylvania Inc.
Chromatrix - color TV picture tubes - GTE Sylvania Inc.
Chroma 80 - video tape - Memorex Corp.
Chroma 90 - video tape - Memorex Corp.
CHROMEL - thermocouple & resistance alloys - Hoskins Mfg. Co.
Chronologger - electronic attendance reporting system - NES, Inc.
Chronos DTM - hand held digital test meter - Advanced Digital Research
Chronotrol - a indicating program controller - Barber-Colman Co.
Cimclad - copper clad laminate - Cincinnati Milacron
CIMRON - digital multimeters - California Instrs. Co.
Cimron - digita multimeters - Calico Div.
Circap - ceramic capacitors - Dilectron
Circa-Tin - immersion tin process - Conversion Chem. Corp.
Circle "B" - motors and timers - Bristol Saybrook Co.
Circuit-Deck - precision cermet switches - Beckman Instrs.
Circuitip - level tips for printed-circuit components - Amp Inc.
Circuitrim R - trimming potentiometer - TRW/IRC Potentiometers
CIRCUIT RYDER - infrared thermometer - Raytek, Inc.
Circuit Zaps - pc prototype material - Bishop Graphics
CIRKITBLOCK: - buildingblock power module - Powercube Corp.
Cirqpil - plug-in circulator - Cir-Q-Tel, Inc.
CJ - cold junction reference source - Omega Engrg., Inc.
CLAREED - switching assemblies - Clare & Co., C.P.
Claspcon - .025" & .045" square wire to crimp terminal connector - Molex Inc.
Classette - tape recorders - Audiotronics
Classic - Motors & Gearmotors - Carter Motor Co.
Classic - cabinets - Par-Metal Prods. Div.
Classic - Intercoms - Fanon/Courier Corp., Subs.
Classic III - CB Rig - Fanon/Courier Corp., Subs.
Clean-N-Dri - detergent - Clean Room Prods.
CLEVELAND - Speed Variator - Eaton Corp.
CLEVELAND - Worm Gear Sets - Eaton Corp.
CLEVELAND - Speed Reducers - Eaton Corp.
CLF - fuses - General Elec. Co.
Climate-Lab - environmental chamber - American Instr. Co.
Clincher - ball valves - Jamesbury Corp.
Cliniflow - blood flowmeters - Carolina Medical Elctrns., Inc.
Clip-AC - Line Voltage Regulator - Tele-Dynamics/Wanlass
Clorinol - A-C capacitors - Sprague Elec. Co.
CLR-2 - Base Antenna - Hy-Gain Electronics Corp.
CMC - directional couplers - Connecticut Microwave Corp.
CMC1200 - elevator control - Cubic Corp.
CMV Teflon - teflon parts - Dixon Corp.
Co/Alr - switches & outlets - Leviton Mfg. Co., Inc.
Coaxiclamp - connectors & splices - Amp Inc.
Coaxicon - connector - Amp Inc.
"Coaxitube" - coaxial cable - Precision Tube
Coaxwitch - Coaxial Switches - Bird Electronic Corp.
Co-Belt - extremely rugged recorders - Genisco Tech. Corp.
Cobra - cb 2-way radios - Dynascan Corp.
Cobreflex - horn - University Sound
Codasyn - frequency synthesizer - Adret Corporation
Codistor I - low voltage regulators - Codi Corporation
Codistor II - high voltage silicon rectifiers - Codi Corporation
Coiltite - wire-wrapping bits & sleeves - O. K. Machine & Tool Corp.
Collimizor R - allignment meter - Materials Resch. Corp.
Color Bright 85 RE - color TV picture tubbes - GTE Sylvania Inc.
Color Bright 85 RE - color tv picture tubes - GTE Sylvania Inc.
Color Bright 85 XR - color tv picture tubes - GTE Sylvania Inc.
Color Bright 85 XR - color TV picture tubes - GTE Sylvania Inc.
Color Cord - cord sets - Pacific Electricord Co.
Color-Keyed - connectors, tools & dies - Thomas & Betts Co.
Color/Matic - color analyser - Lektra Labs., Inc.

Color Screen 85 - color TV picture tubes - GTE Sylvania Inc.
Color Screen 85 - color tv picture tubes - GTE Sylvania Inc.
Colorvue - 50-220 MHZ line of solid state CATV equip - AEL Commumications Corp., Sub. of Amer. Elctrn. Labs. Inc.
Combat - boron nitride - Carborundum Co.
COMPAC - MEDIUM CURRENT BRIDGE RECTIFIER, SILICON - Semtech Corp.
COMPAC SERIES COUNTERS - Electrical and Mechanical Counters - ENM
Compactor - Pressure roll process for material agglomeration - Allis-Chalmers
Com-Pak - power supplies - Lambda Elctrns.
Com-Pak Mark II - power supplies - Lambda Elctrns.
Complimiter - peak limiting amplifier - Spectra Sonics
COMPLOT - digital plotting systems - Houston Instrument
"Comptograph" - calculators - Victor Comptometer Corp.
Comp-U-Kit - electronic modules - Scientific Measurements
Computerminal - data terminal - Wyle Computer Prods., Inc.
Computroller - 3330 type disc controllers - Diva, Inc.
Comstoc - graphic recording paper and film - Keuffel & Esser Co.
ComTran - educational computer - Fabri-Tek, Inc.
Conacure - hardeners (curing agents) for epoxies & polyurthanes - Conap, Inc.
Conapoxy - epoxy base resins & compounds - Conap, Inc.
Conathane - Polyurethane resins & systems - Conap, Inc.
Concentrikit - put together replacement potentiometers (for concentric controls) - CTS Corp.
CONCO-FOAM - 300 ohm twin lead - Consolidated Wire & Assoc. Corps.
CONDOR - propeller fan - IMC Magnetics Corp.
Conducting Twenty/Twenty - conductive epoxy - Allaco Prods Div.
Conducting Twenty/Twenty - epoxy/conductive - Packaged Resins Div.
Condux - electrically conductive elastomers - Hardman Inc.
CO-NETIC - magnetic shielding material - Perfection Mica Co.
ConFlat - flanges - Varian Assocs.
Conflat - sealing flanges - Varian Assocs.
Confuzz - conductive tapes & closures - Technical Wire Products, Inc.
CONHEX - r.f. connector - Sealectro Corp.
CONITEL - digital data acquisition & supervisory system - Leeds & Northrup Co.
Conmax - conductive nickel/silicone - Technical Wire Products, Inc.
Connecto-Blok - wiring system - Thomas & Betts Co.
Conographics - graphic display terminal - Hughes Aircraft Co.
Conographics - graphic display terminal - Hughes Aircraft Co.
Conqueror II - CB Rig - Fanon/Courier Corp., Subs.
Conrad-Missimer Division - manufactures standard environmental test chambers and equipment - Bemco, Inc.
Consil - conductive silver/silicone - Technical Wire Products, Inc.
Consotrol - instruments - Foxboro Co.
CONtac - harness assembly - Berg Electronics
Contempo - console system. - Par-Metal Prods. Div.
Controflex - flexible ribbon - Tapeswitch Corp. Amer.
Controfluxer - Regulator/Filter Device - Advanced Power Inc.
CONTROLPAC - control systems - Eagle Signal
CONTROL PLUS - temp controls; counting & timing controls - MKC Electronics
Converti-Fuse - panelboards, safety switches, switchboards - General Elec. Co.
Cool Glo - light tables - Bishop Graphics
Co-Ord - matrix boards - LVC Inds. Inc.
Copalum - terminals & splices - Amp Inc.
COPEL - resistance alloy - Hoskins Mfg. Co.
Coppergard - shielded coaxials - Superior Cable Div.
"Copperply" - lead wire (copper-coated) - Nat'l-Standard Co.
Copper Sweat - plumbers solder - Bow Solder Products
Copperweld - rod, wire and strand - Copperweld Bimetallics
CopScan - FM Monitor Scanners - Fanon/Courier Corp., Subs.
Copyphone - facsimile transmission systems. - Telautograph Corp.
Cords Limited - cord sets - Essex International, Inc.
Corning - instruments, recorders - Corning Glass Works
Corning - fluidic products - Corning Glass Works, Fluidic Products
Corning - glass optical waveguides - Corning Glass Works, Television Prods. Div.
CORNWALL - loudspeaker system - Klipsch & Assocs. Inc.
Coronol - rubber insulated cable - General Elec.
Corrgard - polyester film - Superior Cable Div.
COS/MOS - complementary symmetry metal-oxide-semiconductor - RCA Solid State Div.
Count Modules - printers - Practical Automation, Inc.
COUPLATE - thick film circuit - Centralab
Couploid - Face couplings - Invincible Gear Co.
Covap R - tungston filaments - Materials Resch. Corp.
COWECO - coil winding equipment - Coil Winding Equip. Co.
CPPC - synchros & servo motors - Clifton Precision
Cradle - telephone type relays - Gould Inc.
Cradleclip - wire cable harness - Electrovert
Craig - film editing equipment - Kalart Victor Corp.
Cramolin - contact cleaner - Caig Labs., Inc.
Cranegard - hookload indicators - Dillon, W.C. & Co.
Crescent - rings, retaining - Waldes Kohinoor, Inc.
Cris-Pic - TV image impressor - Kalart Victor Corp.
Criteria System - IC burnin systems - Reliability Inc.
CRL - electronic components - Centralab
CRL (within a diamond) - electronic components - Centralab
CRONUS - digital electronic stopwatch - Intersil, Inc.
Crop-Trol - temperature controllers - Honeywell
Crossfire - broadband antenna system - Channel Master Div. Avnet
CRT - corona resistant teflon cable - Daburn Electronics & Cable Corp.
CRT-PAC - CATHODE RAY TUBE SILICON HIGH VOLTAGE MULTIPLIER - Semtech Corp.
Cruiser - CB Rig - Fanon/Courier Corp., Subs.
Cryo-Panel - thermal shroud tubing - High Vacuum Equip. Corp.
CryoSource TM - Cryogenic Refrigerators - Sargent Welch Sci. Co.
Cryoterm - noise sources, cryogenic - Maury Microwave Corp.
Cryo-Tip - cryogenic cooling tip - Air Prods. & Chems., Inc.
Crystal-Cap R - polyester film capacitors - General Instr. Corp., Semiconductor Prods Grp.
Crystal Chronetic - motors - Haydon Switch & Instr., Inc.
Crystal Clear - optically clear epoxy adhesive - Allaco Prods Div.
Crystal-Clear - optically clear epoxy adhesive - Packaged Resins Div.
C-Scan - solid state keyboard - Controls Research Corp.
CTC-71 - energized rosin filled core solder - Alpha Metals, Inc.
Cubath - acid copper electroplating process. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
CUBE-PAC: - module assembly package - Powercube Corp.
Cubic - computer tape - Memorex Corp.
Cubitape - Surveying tool - Cubic Corp.
Cubond - copper brazing paste - Gliddon Metals
CuClad - rigid microwave substrate material - 3M Company
CUE-SWITCH R - low-mass, slim-profile, image transparent switch - Industrial Elctrn. Engrs.
Cuflex - flexible pointed circuit material - 3M Company
CUPAC - HIGH CURRENT STUD SILICON RECTIFIER - - Semtech Corp.
Cupron - resistance alloy - GTE Sylvania Inc.
Cupronel - thermocouple alloy - GTE Sylvania Inc.
Cuprox - analytical reagent - Coleman Instr. Div.
Curristor - current sensing resistor - General Resistance, Inc.
Curtis Indachron - low cost elapsed time indicato - Curtis Instrs., Inc.
Curvacore - Transformers - Allis-Chalmers
Cushion Grip - Screwdrivers - Klein, Mathias & Sons, Inc.
Cusil - brazing alloys - Gte Sylvania, Inc.
Custom - Converters - Carter Motor Co.
Custom Vand VII - Pumps - Allis-Chalmers
CV-D - microphone - Electro-Voice, Inc.
C-W - coils - Caddel-Burns Mfg. Co., Inc.
Cycle Log - controller, programmable - Foxboro Co.
CYCL-FLEX - timers counters - Eagle Signal
Cyclohm - fans-blowers - Howard Industries
Cyclonair - blower - Rotron, Inc.
Cyclonome - Pulse Counters & Stepping Motors - Sigma Instruments, Inc.
CYCLOPTIC - Stereoscopic Microscope - American Optical Corp.
Cyclo-Rubber - cyclicized rubber materials - Hardman Inc.
C-21 - pressure sensitive individual wire seals - Hughes Aircraft Co., Connecting Devices

D

DAFAB - Polyester Monofilament fabric - Wire Cloth Enterprises, Inc.
Daflex - vinyl tubings - Daburn Electronics & Cable Corp.
Daflon - teflon tubings - Daburn Electronics & Cable Corp.
Dag - lubricant - Acheson Colloids Co.
Dage - coax connectors - Bendix
DAKA WARE - plastic knobs - Davies Molding Co., Harry
Dalic - selective electroplating - Sifco Metachemical
DAMS - dedicated analytical module system for single purpose spectro- or electro-chemical instrumentation. - Bromberg Engineering
Danameter - digital voltmeter - Dana Labs., Inc.
Dan-L - Relay Socket - DAN-L Inc.
Danner - linear motion & rotary attenvators - Gotham Audio Corp.
Danyon - special formulation vinyl insulation on retractile cords - Daburn Electronics & Cable Corp.
Dapon - resin - FMC Corp.
Daprene - shrinkable neoprene tubing - Daburn Electronics & Cable Corp.
Datab - pressure-sensitive markers (computer printed) - Brady Co., W. H.
Datacel - Optoelectronic Relay - Sigma Instruments, Inc.
DATA CHECK 200H - cable & continuity tester - Data Numerics
DATA CHECK 200S - Cable & continuity tester - Data Numerics
Datacord - magnetic tape transport - American Videonetics Corp.
Datadraft - automated drafting system - Dimensional Systems, Inc.
Datafile - mass memory - Burroughs Corp.
DATA IV/70 - Key-to-disc Systems - Four-Phase Systems
Datakoat - spray coatings - Datak Corp.
Data Krome - optics system - Kollsman Instr. Co.
Data-Lit - numeric & alph numeric displays - Litronix
Datalite - ultra-miniature indicators - Dialight
Datamark - kits for marking elctrn. equip. - Datak Corp.
DATA-MONITOR - annunciators - Tec, Inc.
Datanet - data communications equip. - Honeywell Information Systems
DATA PANEL - backlighted display systems - Tec, Inc.
DATAQUIRE - data acquisition systems - DataGraphics Corp.
Datarama - status display systems - Ferranti-Packard, Ltd. Elec. Div.
Data-Rite - contact - T-Bar Inc.
DATA-SCREEN - data display (crt) terminals - Tec, Inc.
DataScript - data input device for remote projection equipment - Kollsman Instr. Co.
Dataseeker - modem/comm. terminal interface test set - Dataprobe, Inc.
Datasette - digital magnetic tape cassette recorder/reader - Chalco Engrg. Corp.
Dataswitch - reed relay - Wheelock Signals
Datasyn - digital readout system - Data Technology Inc.
Data-Trak - analog programmer - Research, Inc.
Data Transcriber - data acq syst. - Baganoff Assocs., Inc.
Data-Verter - data acquisition, recording, & transmitting equip. - Digitronics Corp.
Data-Voices - voice operated identification computer entry system - Datawest Corp.
DATAWATCH - alarm monitors & signal transmitters - Metrix Instrument Co.
DATAx&T - Data Acquisition Modules - Data Translation
DATOS - instrumentation interfaces - DataGraphics Corp.
Decap - cured epoxy remover - Dynaloy, Inc.
Decitek - Punched tape readers - Decitek
Decitrak - digital control sys. - Theta Instr. Corp.
Decohm - relays - open and hermetically sealed - Davis Elec. Co.
Decora - wallplates, switches outlets - Leviton Mfg. Co., Inc.
DEECEEDUCER - Pressure-To-DC Converter - Solid State Electronics Corp.
Defectometer - ndt - eddy current equipment - Automation Inds.
Deflectron - yokes - CELCO
Degrestil - vapor degrestil - Electrovert
DEI MOTOR GUARD - under voltage monitor - Diversified Electronics Inc.
DeKabox - decade resistors and capacitors - Electro Sci. Inds.
DeKadial - decade dials - Electro Sci. Inds.
DeKapacitor - decade capacitor - Electro Sci. Inds.
DeKapot - decade potentiometers - Electro Sci. Inds.
DeKastat - decade rheostat - Electro Sci. Inds.
DeKavider - decade voltage divider - Electro Sci. Inds.
Dektak - surface elevation measuring equip - Sloan Technology Corp.
DEL-CON - Digital Systems - Delco Electronics Div.

Delmica - capacitor - Del Electronics Corp.
Delphic II - data projectors - Kollsman Instr. Co.
Deltabeston - asbestos-insulated wires - General Elec.
Deltadyne - differential press, ind, switches & gages - Pall Corp.
Deltafilm - film capacitors - Dearborn Elctrns. Div.
DELT ALERT - Ultrasonic Burglar Alarm - Delta Products
Deltaply - fluorocarbon capacitors - Dearborn Elctrns. Div.
Delta-T - digital audio time delay - Gotham Audio Corp.
DELTA-T - Semiconductor Cooling Products - Wakefield Engrg., Inc.
Delta-Tension - self-tensioning tape cartridge - Genisco Tech. Corp.
Deluxe Molded - Drake Mfg. Co.
Demod - demodulator - General Magnetics
Densichron R - Densitometers - Sargent Welch Sci. Co.
Densi-Lux - enlarging meter - Lektra Labs., Inc.
Densi-Meter - color analyzer - Lektra Labs., Inc.
Densi-Timer - automatic enlarging timer - Lektra Labs., Inc.
DENSITOCOLOR - controls, density - Heitz, Inc., Karl
Dentronix - pliers - Mann, Henry Inc.
Depend-a-Bond - solders - Alpha Metals, Inc.
DESCO - plug-in assemblies - Dietz Design, Inc.
Desicote - water-repellent coating compound - Beckman Instrs., (AISSD)
Designers - data sheets - Motorola Semiconductor Prods.
DESIGN III - Desktop CRT Display Terminal - Ann Arbor Terminals, Inc.
DeSolder Well - desoldering station - Hexacon Elec. Co.
De Solv - resin solvent - Ram Chems.
DETECT-A-FIRE - fire detectors - Fenwal, Inc.
DET-O-JET - liquid machine detergent - Alconox Inc.
Dewprobe - dewpoint sensors - Honeywell
D-I - differential ion pump - Perkin-Elmer Ultek Inc.
Diac - rms AC converters - Dana Labs., Inc.
Diactor - voltage regulator - General Elec. Co.
Diagraph - impedance plotter - Rhode & Schwarz Sls.
Dial-A-Gain - voltage amplifiers - Unholtz-Dickie Corp.
Dial-An-Amp - constant current adaptor - General Resistance, Inc.
Dial-An-Ohm - dialable resistance decade - General Resistance, Inc.
Dial-A-Source - dialable current source - General Resistance, Inc.
Dial-a-Temp - variable heat soldering station - Hexacon Elec. Co.
DialaTrol - temperature controllers - Honeywell
Dial-A-Vider - dialable voltage divider - General Resistance, Inc.
Dial-A-Volt - dialable voltage reference - General Resistance, Inc.
Dial & Coder - Automatic Telephone Dialer - Delta Products
Dial-Flo - oven air velocity control - Hotpack Corp.
Dial-O-Verter - data communication equip. - Digitronics Corp.
Diamfile - diamond contact cleaner - Jonard Industries Corp.
Diamond - impregnated wire - Laser Technology, Inc.
Diamond Grip - terminals & splices - Amp Inc.
DIB - dual in-line bridge - Varo Semiconductor, Inc.
Diekut Stik-Ons - drafting aids - Bishop Graphics
Die-Saver - fluidic die protection systems - Corning Glass Works, Fluidic Products
Diffaxial - speaker - University Sound
"Dif Filters" - dual-in-line LC filters --ESC Elctrns. Corp.
Diffraction Horn - tweeter - Electro-Voice, Inc.
Difilm - film dielectric capacitors - Sprague Elec. Co.
Digiac - digital computer trainers - Digiac Corp.
Digibezel - alpha-numeric display - NOBEX Div.
DigiBit - digital logic modules - Tech Serv., Inc.
Digicard - ic packaging - Digitronics Corp.
Digichek - digital logic analyzers - Applied Control Co.
Digicom - digital communication - E-Systems Inc.
Digicom - stepping commutator - General Devices, Inc.
DIGI CORDER - digital cassette terminal memory unit - Intern'l. Computer Prods., Inc.
Digicount - bi-directional counters and displays - Itek Corp. Meas. Sys. Div.
DIGI DECK - digital recording mag. tape deck - Intern'l. Computer Prods., Inc.
Digi Designer - circuit design aid - E & L Instruments, Inc.
Digidial - digital turns-counting dial - Beckman Instrs.
Digi-Drives - control systems - Sequential Information Systems
Digi-Klips - printed circuit connectors - Components Corp.
Digiline - linear measuring systems - Itek Corp. Meas. Sys. Div.
Digi-Lock - control system - Sequential Information Systems
Digilogger - digital data logger - NES, Inc.
Digi-Mark - electronic frequency counter - Chadwick-Helmuth Co., Inc.
DIGIMAX - digital data instrumentation - Leeds & Northrup Co.
Digimite - portable, digital potentiometer - Thermo Elec. Co., Inc.
Digiphase - digital frequency synthesizers - Dana Labs., Inc.
Digiplus - digital logic modules - Tech Serv., Inc.
Digi-Probe - pulse & logic detection & analysis - Automatic Production Systems Inc.
Digiscale - linear measuring system - Itek Corp. Meas. Sys. Div.
Digisec - optical shaft encoders - Itek Corp. Meas. Sys. Div.
Digi-Shaft - shaft/digital converter - Computer Conversions Corp.
DIGISWITCH - digital (thumbwheel) switches - Digitran Co.
DigiTec - Electronic Test and Measurement Equipment - United Systems
Digitemp - controller - Delta Design, Inc.
Digitest - digital multimeter - Schneider Electronics, Inc.
"Digit-Matic" - digital printers - Victor Comptometer Corp.
Digitrak - signal tracking device - Edo Western Corp.
Digitrend - multipoint digital recording system - Doric Sci. Corp.
Digi-Tronic - digital weight indicator - Howe Richardson Scale Co.
Digivac S/G - vacuum readout tube - Wagner Elec.
DIGIVUE R - Display/Memory unit. This is a gas discharge, plasma panel - Owens-Illinois, Inc.
Dilectron - ceramic capacitors - Dilectron
D I Line - double insulated line - UNGAR, Div.
DI-MESA - thyristor construction technique - Hutson Industries
Dimie - capacitors - Dearborn Elctrns. Div.
Di-Min-Ode - 1.5 watt zener diode - General Semiconductor Industries, Inc.
Diode-Lite - led indicator lights - Dialight
Di Pak - dual-in-line packaging sys - Scanbe Canoga Industries
Dip Alarm - solid state audio indicator in dip package - Projects Unlimited, Inc.
DIP-BIT - filters - Cambridge Thermionic Corp.
D-I-P Delay Lines - digital delay module - Pulse Engrg., Inc.
Dip-Dry - drying systems - Allied Chemical Corp.
Dip Flash - solid state load pulser - Projects Unlimited, Inc.
Dip-Lite - digital readout with dual-in-line mounting - Refac Elctrns./Pinlites
Dip-Pak - hot melt peelable plastic coating - Fidelity Chem. Prods. Corp.
Dipstik - high density packaging module - Stanford Applied Engrg., Inc.
DIPSTIK - DIP packaging system - Stanford Applied Engineering
Director - Intercoms - Fanon/Courier Corp., Subs.
DirecTorr R - Direct Drive Vacuum Pump - Sargent Welch Sci. Co.
Directron - selenium rectifiers - Sanford-Miller Corp.
Directweld - DC welded steel tubing - ITT-Higbie Mfg. Co.
Discaps - ceramic capacitors - Radio Materials Co.
Discohm - disc type power resistors - Ward Leonard Elec. Co. Inc.
Disc-R-Kap - resistor capacitor combination - Centralab
Displaducer - inertial angular displacement transducer - Larson Aero Dev.
Displex - cryogenic refrigerator - Air Prods. & Chems., Inc.
Dissopad - wash away spacers - Bivar, Inc.
DISTEC - displacement detecting instruments - Helm Instr. Co.
DI-T - incher - TRW/UTC Transformers
DMS - transient recorder - Zonic Technical Labs.
DNF1100 - noise filter - Burwen Lab. Inc.
DNF1201 - noise filter - Burwen Lab. Inc.
DNF1500 - noise filter - Burwen Lab. Inc.
Dodge - screw thread inserts for plastics - Heli-Coil Prods.
Dolflex - enamels & compounds - Dolph, John C. Co.
Dolphon - epoxy resin compounds, polyester resins - Dolph, John C. Co.
Dolphseal - water repellent - Dolph, John C. Co.
Dolph-Spray - lacquer, enamel, varnish - Dolph, John C. Co.
Donner - inertial systems - Systron-Donner Inertial Div.
Doorbell® - rectifier modules - Unitrode Corp.
DOROIDAL - coils - Cambridge Thermionic Corp.
Do-T - ouncer audio transformer - TRW/UTC Transformers
DOT MicroSTOR - domain tip memory - Cambridge Memories, Inc.
Double/Bubble - package for 2-part epoxies - Hardman Inc.
Double Diamond - glass thermometers and bi-metal thermometers - H-B Instr. Co.
Double-Seal - ball valves - Jamesbury Corp.
Double-Talk - phased mobile antennas - New-Tronics Corp.
Dow Key - coaxial relays & switches - Kilovac Corp.
d/p Cell - transmitter, electronic or pneum - Foxboro Co.
DPR - potting & encapsulating compounds - Hardman Inc.
Dragon - rubber and friction tape - Okonite Co.
Dri-Flo - orifice meters of the metallic bellows type for differential pressure measurement - Singer Co.
Dri-Lok - fluorescent ballasts - Jefferson Elec.
Dri-Mark - pressure sensitive transfers - Meyercord Co.
Dr: Wick - de soldering braid - American Elec. Heater
Dryatrol - pneumatic switching valve - Pall Trinity Micro Corp.
D&S2AMS - digital dedicated analytical module sytem - Bromberg Engineering
DTF - disciplined time/frequency standard model FE-1050A - Frequency Elctrns.
DU - null-balance spectrophotometer - Beckman Instrs., (AISSD)
Dualatch - connectors - Amp Inc.
Dualay - self-supporting aerial cables - Okonite Co.
Dual-Cooled - Transformers - Allis-Chalmers
Dual Hi/Lo Filter - double high pass/low pass filter - Rockland Sys. Corp.
Dual-Lock - spring-lock shelf supports - Simmons Fastener Corp.
Dual-Scan - supervisory control system - GRM Corp.
Dual Source - power supply - Elasco
Dual-Trol - recycling timer - Industrial Timer Corp.
"Dub-L-Loc" - straps-grommets - Budwig Mfg. Co.
Ducter - ohmmeters - Biddle, James G.
Dumont - Electronic tubes - Dutrex Inds., Inc.
Dunco - relays - Struthers-Dunn, Inc.
Duo-Clean - pc board degreaser - Hollis Engrg., Inc.
Duodial - turns-counting dial - Beckman Instrs.
Duofoil R - Aluminum/Polyester/Aluminum Shield - Belden Corp.
Duo-Seal R - Vacuum Pumps - Sargent Welch Sci. Co.
Duostat - power supply - Beckman Instrs., (AISSD)
Duotrol - pressure operated control - Autocon Inds., Inc.
Duo-Tyne - connector - Amp Inc.
Duo-volt - Outdoor Lighting Control - Sigma Instruments, Inc.
Duplex - type of speaker - Altec Div.
Dura-Blue - ion sensitive bulbs of glass electrodes - Beckman Instrs., (AISSD)
Durac - hydrometers - H-B Instr. Co.
Duracell - batteries - Mallory Battery
Dura Clad - transformers - Aladdin Elctrns.
Duracolor - foil shielded coax - Columbia Elctrn. Cables
"Dura-Con" - microminiature connectors - TRW/Cinch Connectors
Duraflex - waveguides & flexible metallic conduit/hose - Co-Operative Inds., Inc.
Durafoam - patented foam tv transmission line - Columbia Elctrn. Cables
Duramic - diaphragms and parts for use with scientific apparatus and equipment - Singer Co.
Duranol II - non-flammable impregnant - Filtron Company, Inc.
Dura-Pac - solid state relays - H-B Instr. Co.
Durasel - rectifier - Alpha Components Corp.
Duratemp - microwave switches - Varian Assocs.
DURATEMP - microwave switches - Varian Electron Tube & Device Grp.
Duratherm - high temperature furnace cable - Boston Insulated Wire & Cable Co.
Duratrak® - contact surface - General Radio Co.
Durawatt - power transistors - National Semiconductor Corp.
Durcon - laboratory sinks and tops - Dullron Co., Inc.
Dur-Cor - hard oxide transparent photoplates for making 1C photomasks - Corning Glass Works, Television Prods. Div.
Durever - soldering iron tips - Precision Elec. Co.
Durotherm - soldering tips - Hexacon Elec. Co.
Dur-X-Thane - extruded polyurethane cable jacket - Whitmor Wire & Cable
Duzall - flux - Chemetron Corp.
DV 5 - microminiature ceramic variable capacitors - JFD Electronics Components Corp.
DW "Multi-Switch" - "multi-switch" switches - Switchcraft, Inc.
Dymax - engineering adhesives - MPB Corp.
Dymograph Balancers - balancing machines - Annis R B Co.
DYNAC - injection molding adaptive control system - Dynisco
Dynaclad - batteries - Exide Power Sys. Div.
Dynacote - accelerator - Radiation Dynamics, Inc.
Dyna-Crimp - hydraulic crimping unit - Amp Inc.
DYNA-CU - magnetic compass transducer sys. - Larson Aero Dev.
Dynacube - miniature generator/alternator - Hamilton Technology, Inc.
Dyna-Flex - triple-tip probe - Dynascan Corp.

DYNAform - coaxial RF switches - Amphenol RF Div.
Dynagen - accelerator - Radiation Dynamics, Inc.
Dynagrip - solder/flux kit - Chemetron Corp.
Dyna-Jet - tube tester - Dynascan Corp.
Dynakit - high fidelity components in kit form - Dynaco Inc.
Dynaload - power supply tester - Transistor Devices
Dynamag - duo-plasmatron ion source - Radiation Dynamics, Inc.
DYNAMATIC - AC & DC Adjustable Speed Drivers - Eaton Corp.
Dyna-Mike - hi-k ceramic capacitor - ITT Jennings
Dynamitron - accelerator - Radiation Dynamics, Inc.
Dyna-Mod - audio/video modulator - Dynair Elctrns. Inc.
Dynamonitor - acceleration voltmeter - Endevco
DYNAMOUNT - automotive speaker system - Jensen Sound Labs.
DYN/AMP - D.C. current metering - Halmar Electronics, Inc.
Dynaphase 28 - dynamic headsets - Stanton Magnetics, Inc.
Dynaphase 40 - dynamic headsets - Stanton Magnetics, Inc.
Dynaphase 50 - dynamic headsets - Stanton Magnetics, Inc.
Dynaphase 60 - dynamic headsets - Stanton Magnetics, Inc.
Dynaphase 65-4C - 4 channel dynamic headset - Stanton Magnetics, Inc.
"Dyna-Q" - loading coils - K-W Engineering Works
Dyna-Race - aluminum ball bearing slides - Grant Hardware Co.
DynaRad 150 - x-ray inspection system - Torr Labs.
Dynasolve - cured plastic removers - Dynaloy, Inc.
Dyna-Switch - overload prevention switches - Dillon, W.C. & Co.
Dynatach - electric tachometers - Electric Tachometer Corp.
DYNATRAC - heterodyne lock-in amplifier - Ithaco, Inc.
Dyna-Trol - furnaces - L & L Special Furnace Co.
Dynatrol® - controls - Automation Prdts.
Dyna-Tune - demodulators - Dynair Elctrns. Inc.
Dynayoke - yokes - CELCO
Dy-Nos-Stick - digital test probe - Nu-Concept Computer Systems, Inc.
Dyteck - commercial/marine temperature monitors - Aerospace Avionics, Inc.

E

E - switches, rotary, cam, power, snap-action - Electro Switch Corp.
EAGLE A - low permeability alloy - Eagle Magnetics Co.
EAGLE "AAA" - high permeability alloy - Eagle Magnetics Co.
Eastobond - hot-melt adhesives - Eastman Chem. Prods.
Easy-Crimp - ratchet hand tools - Hollingsworth Solderless Terminal
EASY-FLO - silver brazing alloy - Handy & Harman
EASYMATCH - RF TUNER - Alford Mfg. Co.
Easypoxy - epoxy adhesive kits - Conap, Inc.
EATON - Precision Gearing - Eaton Corp.
EATON - Power Transmission Equipment - Eaton Corp.
EATON - Fluid Strainers - Eaton Corp.
Eaton Brand - fasteners - Eaton Corporation
EB-CON - edge board connector - Eby Co., Hugh H.
Eccentrix - adjustable shear/alignment pin - Tridair Inds.
ECCO - epoxies, urethanes, etc. - Emerson & Cuming, Inc.
E-CELL devices - Microcoulometers for timing & integrating - Plessey Electro-Products
Echo - Intercoms - Fanon/Courier Corp., Subs.
Echo Gel - encaps. compound - Communications Technology Corp.
Echorder - tape recorder - RIL Elctrns., Inc.
Echordette - tape recorder - RIL Elctrns., Inc.
Eclipse&T S100,S200 - computers - Data General Corp.
Ecliptic - Tachometer Generators - Carter Motor Co.
ECO FUSE - econ limiter fuse - Economy Fuse Div.
Ecoline - mobile air filtration unit - Hollis Engrg., Inc.
Ecolog - environmental data logger - NERA, Inc.
E COM - core Memory System - Standard Memories, Inc.
Econalign; Pow-R-Flex; Simul-Torque - couplings, shaft, rigid & flexible - Metal Bellows Corp.
ECON FUSE - clearsite plug fuse - Economy Fuse Div.
Econistor - inexpensive resistors - General Resistance, Inc.
Econocap - capacitance diodes - Motorola Semiconductor Prods.
Econ-o-Clad - laminates metal clad - Engelhard Minerals & Chem.
Econofire - pastes-thick film microcircuits - Electro Mats. Corp. Amer.
Econoflux - liquid inorganic acid flux - Alpha Metals, Inc.
Econogide - p.c. card guides; guides circuit board - Bivar, Inc.
Econoglo - Drake Mfg. Co.
Econo-Heat - furnaces - Aremco Prods., Inc.
Econo-King - portable oven - Hotpack Corp.
Econo-Lap - thick film lapped substrates - Accumet Engineering Corp.
Econo-Line - automatic plating and/or processing sys. with an economical approach. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Econoline - plastic low-signal transistors - Sprague Elec. Co.
Econo-Line - rotary switches - Oak Inds. Inc.
Econolite TM - Miniature panel lights - Chicago Switch, Inc.
Econo-Master - furnaces - L & L Special Furnace Co.
Economite TM - Miniature slide switches - Chicago Switch, Inc.
Econo-Polish - substrates .025" with a 1.5m" one side - Accumet Engineering Corp.
Econopot - Off-the-shelf Precision Potentiometer - New England Instr.
Econo-Skan - reflective skanner - Skan-A-Matic Corp.
Econ-o-Tape - laminates metal clad - Engelhard Minerals & Chem.
Eddystone - communications receivers - Marconi Instrs.
Edgecon - edge connectors - Molex Inc.
Edgegard Hood - dust-free work bench - Baker Co., Inc.
EDGE-ON - pc connector - Burndy Corporation
Edge-Pac R - PC connectors - Elfab Corp.
Edison - temperature detectors, fire detectors - Edison, Instr. Div.
Edison U/V - flame safeguard - Edison, Instr. Div.
EDU - Digital Clock - Efratom California, Inc.
EEV - Industrial Tubes - Calvert Elctrns., Inc.
Efcor - electrical fittings. - I-T-E Electrical Components Grp.
EFR - Receiver/Controller LF/ VLF - Efratom California, Inc.
E-GAS - specially prepared sulfur hexacluoride for etching silicon - Matheson Gas Products
e-Gun - evaporation source - Varian Assocs.
80 K Series Hybrids - plug-in logic modules - Struthers-Dunn, Inc.
#800 Dipsert IC Base - dispenses IC's - Solder Removal Co.
#880 Insertic Tool - inserts integrated circuits - Solder Removal Co.
#885 Pul-N-Sertic Tool - inserts & extracts IC's - Solder Removal Co.
EL - thyratrons & gas filled rectifiers - Electrons Co.
Elastic Stop nuts - self-locking nuts - Esna Div.
Elasto-Flex - shock absorbing skids - Craig Sys. Corp.
Electric Lacquer - lacquer - Dolph, John C. Co.
Electricord - wire, cord and cable - Pacific Electricord Co.
Electrifugal - Pumping units - Allis-Chalmers
Electri-Sealed - Sealess pumps - Allis-Chalmers
Electrocolor 111 & 135 - color TV picture tube - Westinghouse Elec. Corp.
Electrocom - solid state commutator - General Devices, Inc.
ELECTROCOM® - Teletypewriter terminal equipment - Electrocom Inds.
Electrocraft - electronic components - GC Electronics
ELECTRO CUT&T - insulation, tape & foam cutters. - Automatic Die Cutting Mch
Electrodag - Conductive/resistive coatings - Acheson Colloids Co.
Electroduct - PVC wiring duct - Electrovert
Electrofeed - vibratory parts feeder - Black & Webster, Inc.
Electrolab - electricity/rotating maches. trainers - Digiac Corp.
Electro-Lap Seal - cable joint and terminal kit - Okonite Co.
Electro-Lift - garage door openers - Perma Power Div.
Electrologic - single & multiple card reader & interface - Meriam Inc.
Electromate - ion measuring instrument - Beckman Instrs., (AISSD)
ELECTROMAX - signalling controller - Leeds & Northrup Co.
Electro Module - packaged clutch & brake - Warner Elec. Brake & Clutch Co.
Electronflo - electroplate fusing sys. - Electrovert
Electronik - temperature recorders & controllers - Honeywell
Electropane R - electrically conducting glass - Libbey Owens-Ford Co.
Electropunch - punch press-electric - Black & Webster, Inc.
Electroscan 30 - electroanalytical system - Beckman Instrs., (AISSD)
Electroset - automatic terminal setter - Black & Webster, Inc.
Electro-Shield - rfi shielding components - Estes Engrg. Co.
Electrostac - Stacic D.C. Adjustable Speed Drivers - WER Industrial
Electrotable - indexing table - Black & Webster, Inc.
Electrotape - surveying tool - Cubic Corp.
ELECTRO TIME - solid state devices - Clare & Co., C.P.
Electro-Ty - calbe tie - Electrovert
Electro-Voice - all electro-voice products - Electro-Voice, Inc.
Electro-Voice - cartridges & needles - Ev-Game Inc.
"Electrowriter" - electronic handwriting - Victor Comptometer Corp.
ELGARD - Uninterruptible Power Source - Elgar Corporation
Eliminator - loudspeaker - Electro-Voice, Inc.
Elin - ac power sources, ac line correctors - Elin Div.
Elin - ac line correctors - Behlman Div., California Instrs.
Elinco - ac and dc sub-fractional and fractional hp motors and generators. - Electric Indicator Co., Inc.
Elipti-Grip - terminals - Thomas & Betts Co.
Ellipt-O-Reel - elliptical waveguide - Gabriel Elctrns. Inc.
ELMCO - coil winding machinery - Elden Mfg. Co.
EL-MENCO - capacitors - Electro Motive Corp.
Elmet - molybdenum and tungsten - Philips Elmet Corp.
"ELMO" TM - exterior light monitor - Doran Mfg. Co.
Elph - digital thermocouple indicator - Thermo Elec. Co., Inc.
Eltex - electronic telex exchange - Frederick Electronics Corp.
EMA iron - microwave absorbing material - Electronautics
EMC - Field intensity analyzer - Singer Instrumentation
EMCOR - Modular Enclosure Systems - Ingersoll Prods.
Emico - electrical meters - Sheller-Globe Corp.
Emlock - miniature connector for flexible cable - Cablewave Systems Inc.
E-Module - ultrasonic generator - Branson Cleaning Equip. Co.
Empco - electromagnetic transducers - Carolina Medical Elctrns., Inc.
"Empirical-Log" - "Empirical-logs" broad band antenna's - Telrex Labs.
Emralon - dry film lubricants - Acheson Colloids Co.
EMS°II - Electronic Message Switcher - Texas Instrs. Inc.
EMT - reverberation units, compressors, turntables, wow & flutter meters, orchestra tuning standard - Gotham Audio Corp.
EMTEL - Seismic/Isoamp/Time & Frequency Standards - Develco
ENCOM - intercom equip. & telephone apparatus - Encom Prods. Co., Inc.
ENDECO - soldering/desoldering tools - Enterprise Development Corp
Endevco - vibration, force and pressure transducers, and signal conditioners - Endevco
Endur-All - Transformers - Allis-Chalmers
Enercon - rotary drives - Control Products Div.
Energized - core solder - Alpha Metals, Inc.
Ener/Pak - Standby power units - Allis-Chalmers
Engaloy - brazing alloys - Engelhard Minerals & Chem.
Engineering Structual Foam - foam resins - General Elec.
Ensolite - pvc sponge mat'l. - Uniroyal, Inc.
Enviro-Bond - compound - Superior Cable Div.
Enviro Vac - thermal control system - High Vacuum Equip. Corp.
E-Pac - UPS System - Instr. & Control Sys., Inc.
EPC - bobbins & cases - Electrical Plastics Corp.
Epibase - silicon power transistors - Motorola Semiconductor Prods.
Epicap - capacitance diodes - Motorola Semiconductor Prods.
Epion TM - ion implanted diodes & rectifiers - Solid State Devices, Inc.
Epocap - epoxy compounds - Hardman Inc.
Epocel - filter cartridge - Pall Trinity Micro Corp.
Epocel - filter medium - Pall Corp.
Epocrete - 2-part epoxy concrete materials - Hardman Inc.
Epocure - epoxy curing agents - Hardman Inc.
Epolast - epoxy compounds - Hardman Inc.
Epolene - polyolefin waxes - Eastman Chem. Prods.
Epomarine - 2-part epoxy compounds for splash zone & underwater application - Hardman Inc.
Eposet - epoxy compounds - Hardman Inc.
Eposolve - solvent for epoxy clean-up - Hardman Inc.
Epo-Tek - epoxies - Epoxy Technology
Epoweld - epoxy compounds - Hardman Inc.
EPOXYCAST - High-Voltage Transformer - TDC, Div. Freq. Technology Inc.
Equipt-Air - Blowers & Fans - Equipto Enclosure Systems
Equipto - Steel Electronic Cabinets (Heavy Duty) - Equipto Enclosure Systems
Equipto - stools, racks, lockers - Equipto
Equiseal - Pump stuffing boxes - Allis-Chalmers
ERDAC III - electronic recording systems. - Macrodyne Inc.

Erickson - couplings - Thomas & Betts Co.
ERSA Tip 1G - soldering iron - Edsyn, Inc.
Ersin - wire rosin cored solder - Multicore Solders
Escon - special relays - Guardian California
Escosil - optical fused quartz & silica - Esco Products
ESlok nuts - commercial self-locking nuts - Esna Div.
ESlok screws/bolts - self-locking externally threaded fasteners - Esna Div.
Estane R - polyurethanes, thermoplastic - Goodrich Chem. Co., B.F.
ETC - Transformers & reactors - Electronic Transformer Corp.
Etch/Path System 100 - semiconductor metal etcher - Qualco
Etch/Path System 200 - semiconductor metal etcher - Qualco
Eternacell® - lithium organic battery - Power Conversion Inc.
Ethafoam - polyethylene foam - Dow Chemical Co.
Ethocel - ethylcellulose resin - Dow Chemical Co.
Ethofil - fiberglass reinforced polyethylene - Fiberfil Div. Dart Ind.
ETS - electronic training systems - Digiac Corp.
E-V - all electro-voice products - Electro-Voice, Inc.
Evanohm - resistance alloy - GTE Sylvania Inc.
Everdur - conduit - The Anaconda Company Brass Division
Eveready - batteries, flashlights, miniature lamps, lanterns. - Union Carbide
Everfast - liquid cement - Ambroid Co.
EVM - loudspeaker - Electro-Voice, Inc.
EXCELLITE - audio-type connectors - Amphenol Ind'l. Div.
Exec and VIP - hand lamps - Teledyne Big Beam
Exec-u-Flite - altimetry systems - Kollsman Instr. Co.
Executive - Intercoms - Fanon/Courier Corp., Subs.
Exetron - Watch - Exetron Corp.
Exide - batteries & chargers - Exide Power Sys. Div.
Exide - maintenance free batteries - Wisco Div.
ExpandaCore 10 - DEC System 10 Add-On - Cambridge Memories, Inc.
ExpandaCore 11 - DEC PDP-11 Add-On - Cambridge Memories, Inc.
ExpandaCore 16 - 16K core memory - Cambridge Memories, Inc.
ExpandaCore 620 - varian 620 Add-On - Cambridge Memories, Inc.
ExpandaCore 8 - 8K core memory - Cambridge Memories, Inc.
ExpandaMac - lockheed MAC 16 Add-On - Cambridge Memories, Inc.
Expandomatic - ph measuring instruments - Beckman Instrs., (AISSD)
Extended Range - heat guns - Sigma Sys. Corp.
Extra - liquid scintillation sample vials - Beckman Instrs., (AISSD)
Extrusol - bar solder - Multicore Solders
E-Z-Code - wire markers - Thomas & Betts Co.
"E-Z-DUO" - cir. breaker "two in one" - Wadsworth Electric Mfg. Co.
Eze-Stik - pressure sensitive label stock - Fitchburg Coated Products
"E-Z-RED - cir. breakers - Wadsworth Electric Mfg. Co.
"E-Z Release" - spring loaded contact - Continental Connector Corp.
E-Z-Trim - potentiometer - Bourns, Inc.
E-1 - display terminal - Information Displays, Inc.

F

FA - fluid adhesives - Bacon Inds.
Fabicon - Automatic image orthicon - Teletron
Fabicon - completely automatic camera tube - Teltron
Fabri-Therm - varnished glass cloth - General Elec.
Faceloid - involute face gears - Invincible Gear Co.
FACT - flexible automatic circuit testing machine - Hughes Aircraft Co.
FACT - flexible automatic circuit tester - Hughes Aircraft Co.
Fairloc - integral fastener - Sterling Instr.
FAIRLOC - rotating component fastening device - Stock Drive Prods.
Fansteel - metals, wire, tubing - Fansteel Inc.
Faria - meter movements panel meters - Faria Meter Corp.
Farm-O-Stat - temperature controllers - Honeywell
FARVAL - Centralized Lubricating Systems - Eaton Corp.
FasBUS - DEC PDP-11 semiconductor Add-On - Cambridge Memories, Inc.
Fas'n-It - white glue - Ambroid Co.
Fast - flux & solder - Lake Chemical Co.
Fastaire - dryers, hand, electric - blowers, portable, electric - Humphrey, Inc.
FASTATCH - switches and variable resistors - Centralab
Fastemp - electronic thermometers - Amprobe Instr.
Fastop - magnetic particle brake/clutch - Lear Siegler, Inc.
Fastin-Faston - connectors - Amp Inc.
Fastline - core memory system - Fabri-Tek, Inc.
Faston - receptacle & tab terminals - Amp Inc.
Fastrak® - marker - General Radio Co.
Fastraps® - wire/cable ties - Grayhill Inc.
F.A.T - fully additive circuitry - Advanced Circuitry
Faylon - mixing consoles & equalizers - Gotham Audio Corp.
Fazeguard - phase failure sensor - Opad Elec. Co., Inc.
Feather - fan - Rotron, Inc.
Featheride - cartridge - Electro-Voice, Inc.
Fedis - front end design information sys. - Macrodata
FENWAL 360 SYSTEM - portable fire suppression system - Fenwal, Inc.
Ferramic - ferrites - Indiana General
FETRON - solid state tube replacements - Teledyne Semiconductor
FFA - fluid flexible adhesives - Bacon Inds.
FFB - friction brake - General-Electro Mechanical
FFC - friction clutch - General-Electro Mechanical
FFRB - fail-safe friction brake - General-Electro Mechanical
Fiberfrax - ceramic fiber products - Carborundum Co.
Fiber-Lite - fiber optic illuminators - Dolan-Jenner Inds., Inc.
Fiberloy - Polymer base materials - Rogers Corp.
Fibertemp - fiber temperature sensor - Trans-Met Engrg.
FI-CORD - recorders, magnetic tape - Heitz, Inc., Karl
Fidelex - metal strippers - Fidelity Chem. Prods. Corp.
Fidelplate - electroless plating solutions - Fidelity Chem. Prods. Corp.
Fieldial - magnetic field regulators - Varian Assocs.
Fieldial - magnetic field regulator - Varian Assocs.
Fieldlab - oxygen gas analyzer - Beckman Instrs., (AISSD)
Filamite - filament wound parts - NVF Co.
Fil-Cap - miniature feed-thru capacitors - Filtron Company, Inc.
Filmatic - polyester film capacitor, self encased - Paktron Div.
Filmatic - computer tape cleaning machine - Udel Manufacturing
Filmbrid - quadrature coupler - Merrimac Inds., Inc.
Filmite - film dielectric capacitors - Sprague Elec. Co.
Film-Met - trimming potentiometer (metal film) - Amphenol Connector Div., Controls Opers.
Filmplate - tape preservation fluid - Udel Manufacturing
Fil-Shield - shielded enclosures - Filtron Company, Inc.
Filtercon - RFI Filters - Erie Technological Products
Filter Flo Diffuser - HEPA filtration module - Weber Tech Products
Fil Therm - thermal fuse - Filtron Company, Inc.
Filtron - principal register trademark - Filtron Company, Inc.
FINCO - Antennas & Accessories - Finney Co.
Fineline - console model wave soldering system - Hollis Engrg., Inc.
FINGRIP - terminal - Burndy Corporation
FIN-PAC - FAMILY OF HIGH VOLTAGE SILICON RECTIFIERS - Semtech Corp.
Fire Away - portable fire extinguishers - Kidde, Walter & Co.
FIREROD - cartridge heater - Watlow Elec. Mfg. Co.
Fire Star - fire-fighting vehicle - Lockheed Aircraft Svc.
Firewall EP, Sr & Firewall III - fire resistant cable-control, power & instrumentation - Cerro Wire & Cable Co.
Firezone - high temperature wire - Cerro Wire & Cable Co.
Firon - pastes-thick film microcircuits - Electro Mats. Corp. Amer.
Five/Ten - electron beam system - Sloan Technology Corp.
5-Way - binding posts - Superior Electric Co.
5x5 R - lightweight pilots' headphones - Telex Communications, Inc.
Flamenol - polyvinyl chloride-insulated wires - General Elec.
Flash Flow Welder - tap welder - Ewald Instrs. Corp.
Flash Front - back lighted dead front panels - Panelgraphic Corp.
Flash Stripper - shielding stripper - Ewald Instrs. Corp.
FLATOHM - resistor - Centralab
Flat Plate - slot array antenna - Rantec Div.
FLATSO - Radial Lead Thick Film Resistor - Pyrofilm Resistor Co., Inc.
Flat Store - Core Memory - Standard Logic Inc.
Flattac - connector system - Elco
Flexaguide - flexible waveguide - Airtron
Flex-A-Plug - plug-in type power take-off devices - General Elec. Co.
Flex'ator - constant force compression spring - Ametek, Hunter Spring Division
Flexcon - connector, test - Air-O-Tronics Prods.
Flexfoam - foam dielectric microphone cable - Columbia Elctrn. Cables
Flexi Glove - vinyl glove - Clean Room Prods.
Flexite - extruded plastic tubings - Markel, L. Frank & Sons
Flexitorch - tig welding - Falstrom Co.
Flexlead - high temperature wire & cable - Markel, L. Frank & Sons
Flexlife - flexible high gloss cable jackets - Columbia Elctrn. Cables
Flexmax Circuits - multilayer flexible printed circuits - Flexprint Div
Flexobond - urethane adhesive - Allaco Prods Div.
Flexobond - urethane adhesive - Packaged Resins Div.
Flexoprene - Neoprene jacketed portable cable - Standard Wire & Cable Co.
Flex-Pak - amplifiers & sound sys - Bogen Div.
Flex-Plate - Driving components for flexible couplings - Allis-Chalmers
Flexprint Circuitry - flexible printed circuits - Flexprint Div
Flexstrip - Flat cable and Jumpers - Ansley Elctrns. Corp.
Flextac - connectors - Hypertronics Corp.
Flextech - extruded mechanical tubings - Markel, L. Frank & Sons
Flextension - special aersol extender - Tech Spray, Inc.
Flex-Tex - Coupling (CAC) - Allis-Chalmers
Flex-Weld - Welding technique for flat conductor cable - Ansley Elctrns. Corp.
Flip-Chip - Logic Module - Digital Equipment Corp.
Flip-Dip - p.c. mounting method - Berg Electronics
Flip Loc - quick detach clamp - Viking Inds., Inc.
Flip-Pak - solid-state controlling device - Gems Sensors Div.
Flipper - wire snips - Clauss Cutlery Co.
Flippy - reversible flexible disk - Information Terminals
FLIP-R - Flip-chip resistor - Mini-Systems, Inc.
Floatrol - float operated control - Autocon Inds., Inc.
Flo Fuse® - automatic stop valve - Marotta Sci. Controls, Inc.
Flotrac - displacement instrumentation - Hull Corp.
Flouroglide - dry lubricants - Chemplast, Inc.
Flowtronic - velocity flowmeters - Datametrics Inc.
Fluid Pisont - Bearings for motor-pump units - Allis-Chalmers
Fluoralloy - solutions and mixes - Beckman Instrs., (AISSD)
Fluor-X - nuclear gauges - Nuclear Resch. Corp.
Flushlite - Drake Mfg. Co.
Flush-Seal Pressure Plugs - socket head plugs - Allen Mfg. Co.
Flying Coil - d c ironless - EEMCO Div.
Foamcone - radar-augmentation device - Teledyne Micronetics
Foamflex - semi-rigid cable - Cablewave Systems Inc.
Foam Wipe - urethane foam wiper - Clean Room Prods.
FOBALLOY - substitute for gold-tin solder - Plessey Inc.
Footrol - foot switches - General Control Co.
Forbon - vulcanized fibre - NVF Co.
Formaldafil - fiberglass reinforced acetal - Fiberfil Div. Dart Ind.
Forum - conference system - Fairchild Sound Equip.
Fotoceram - glass-ceramics - Corning Glass Works, Fluidic Products
Fotoform - glass-ceramics - Corning Glass Works, Fluidic Products
Fotoform - light sensitive glasses - Corning Glass Works
Foundation - panel instrument line - Westinghouse Elec. Corp.
Fox 1 & Fox 2 - computers - Foxboro Co.
FPL - control systems - Sequential Information Systems
Frahm - resonant reed frequency meters, tachometers - Biddle, James G.
FRC Fab-Ri-Cable - woven ribbon cable - Zippertubing Co.
"FREON" - Flourinated Solvents & Refrigerants - E.I. DuPont de Nemours & Co.
FREQMETER - Frequency-To-DC Converter - Solid State Electronics Corp.
FRICTION-AIRE - elementless electric oven - Blue M Electric Co.
Frigichip - thermoelectric cooling modules - Melcor-Materials Elctrn. Prods.
Frigidri - refrigerated dryer - Pall Trinity Micro Corp.
FRK - Miniature Rubidium Frequency Stabled - Efratom California, Inc.
Frost Aid - coolant - Chemtronics, Inc.
"Frost-Off" - de-icer - Merix Chem. Co.
FRT - Rubidium Laboratory Standard - Efratom California, Inc.
Full-View - flowmeter - Brooks Instr. Div.
Fulscope - controller - Taylor Instr. Process Control Div.
Funelet - funnel flanged eyelets - Circon Corp.
Fusa-Fab - tape - General Elec.
Fusa-Flex - tape - General Elec.
Fusa-Flex - putty - General Elec.
Fusa-Mat - tape - General Elec.
Fusecor - glass reinforced vinyl cable filler - Whitmor Wire & Cable

Fuseplug - fused electrical connector - Arco Electronics Inc.
FUSETRON - fuses & fuseholders - Bussmann Manufacturing
Fusionbrazed - brazed steel tubing - ITT-Higbie Mfg. Co.
Fusionweld - AC welded steel tubing - ITT-Higbie Mfg. Co.
Future - ion measuring electrodes - Beckman Instrs., (AISSD)
Fuz-Ion Sealed - metalized polycarbonate capacitors - Dearborn Elctrns. Div.
Fuzz Buttons - electrical contacts - Technical Wire Products, Inc.
FWACO - fasteners - Aimsco Inc.
Fyrindex - fire detector - Kidde, Walter & Co.
Fyrite - Oxygen & Carbon Dioxide Indicator - Bacharach Instrument Co.
Fyr-Lace - lacing tape - Gudebrod Bros. Silk Co., Inc.

G

GaAsLITES - light emitting diodes - Monsanto-Elctrn. Spec. Prods.
GAC - relay armature - General Automatic Corp.
Gammamet - high voltage & current contact - GTE Sylvania Inc.
Gammatrol - nuclear gauges - Nuclear Resch. Corp.
GAP KAP - ceramic capacitor - Centralab
Garalease - mold release agent - Ram Chems.
Garalyst - resin curing catalyst - Ram Chems.
Gardsman - Temperature Controllers, millivoltmeters - Gulton Inds., Inc.
Garox - resin curing catalyst - Ram Chems.
Gas-Pointer - Dual Range Combustible Gas Indicator - Bacharach Instrument Co.
Gates - Rock and ore processing equipment - Allis-Chalmers
GEL/CELL - rechargeable gelled electrolyte bat. - Globe Union, Inc.
Gelyte - lead acid battery - Gould, Inc.
Gemat - tape, glass mat - General Elec.
Gemcor - clutches & brakes - General-Electro Mechanical
Gemlite - Drake Mfg. Co.
GE-Mov - metal oxide varistor - General Elec. Co.
GE-mov varistors - metal oxide varistors - General Elec.
Genal - injection phenolics - General Elec.
Genalex - instruments - General Elec. Co.
GENERATION 70 - low-cost pulse instruments - E-H Resch. Labs., Inc.
Genesolv - fluorinated solvents - Allied Chemical Corp.
Geodolite - measuring instr. - Spectra-Physics, Inc.
Geon R - vinyls - Goodrich Chem. Co., B.F.
Geoprene - neoprene insulated cable - General Elec.
Georgian - speaker system, cabinet - Electro-Voice, Inc.
Geosol TM - Heavy-Wall Solderable Insulation - Belden Corp.
Geotrol - gasoline-resistant wire - General Elec.
GERTSCH - Frequency meters & AC instrumentation - Singer Instrumentation
Giant - general instrument advanced nitride technology - General Instr. Corp.
Giant II - general instrument advanced N-channel tech. Ion-implant - General Instr. Corp.
Giantview - large screen television projector - General TV Network
Giant Voice - public address and warning systems - Altec Div.
Gibsiloy - powder metal composition material - GTE Sylvania Inc.
Giga-Trims - piston air trimmer - Johanson Mfg. Corp.
Gladiator SSB Plus - SSB TRansceiver - Fanon/Courier Corp., Subs.
Glascote - protective coating - Dolph, John C. Co.
GlasGuard - Ceramic Capacitor - AVX Ceramics
Glasply® - fiberglass tubing - SGL Graphics
Glasrod - pultruded rod shapes - Glastic Corp.
Glass Amp - Lead mounted Rectifier - General Instruments Corp.
Glass Amp II - Lead mounted Rectifier - General Instruments Corp.
Glassivated - high-reliability diodes - Motorola Semiconductor Prods.
Gleaner - Harvesters - Allis-Chalmers
Gleaner-Baldwin - Harvesters - Allis-Chalmers
Glennite - piezo ceramic & ferro ceramic materials - Gulton Inds.
GlidCop - dispersion strengthened copper - Gliddon Metals
Glober - igniters, components, elements - Carborundum Co.
Glo-Dot - pilot lights - Industrial Devices
Glo-Lite - Drake Mfg. Co.
Glyptal - paint varnish enamel lacquer - General Elec.
Glyptal - resin adhesive - General Elec.
Gol-Bond - selective gold plating - Braun Co., Inc.
Goldtop - high temperature battery - General Electric
Gold Top - hi temperature batteries - General Elec. Co.
Goodwin - sporting goods - Midland International Corp.
Gozinta - tuner cleaner tool - Workman Electronic Prods., Inc.
GPD - General Purpose Devices (low cost amplifiers in TO-12 packages) - Avantek, Inc.
GP/duroid - Fiber-elastomer materials - Rogers Corp.
GP-612 - Digital Printer - Gulton Inds., Inc.
Graftran, Symbolpoint - programs for upd series digitizer systems - Data Technology Inc.
Granulator - Grinding mill - Allis-Chalmers
Graphallast® - submerged bearing - Graphite Metallizing Corp.
Graphalloy® - bearing, elec brush, or contact - Graphite Metallizing Corp.
Graphilm® - lubricant to 1000°F - Graphite Metallizing Corp.
Graphlon® - submerged bearing - Graphite Metallizing Corp.
Graphmetex® - insulating material - Graphite Metallizing Corp.
Grate-Kiln - Kiln processing system - Allis-Chalmers
Gravitain - filter element - Pall Trinity Micro Corp.
Greencaps - low cost capacitors - Radio Materials Co.
Greenline (FINCO) - MATV & Components - Finney Co.
G.R.I. - hermetically sealed reed switches - Risk Inds, Inc., George
Griplet Connector - terminal - Berg Electronics
GriprinG - rings, retaining - Waldes Kohinoor, Inc.
GROMMES - Hi Fi & Stereo components public address & sound equipment - Precision Electronics, Inc.
Grommet Strip - continuous strip grommeting - Electrovert
Gromstrip - extruded channel - ICO/Rally Corp.
Groundamatic - outlets - Leviton Mfg. Co., Inc.
GR874R - coaxial components - General Radio Co.
GR900® - precision coaxial components - General Radio Co.
Guardette - motor overload protectors - General Elec. Co.
Gude-Dial Cord and Champion-Dial Cord - dial cord - Gudebrod Bros. Silk Co., Inc.
Gude-Glass - lacing tape - Gudebrod Bros. Silk Co., Inc.
Gudelace - lacing tape - Gudebrod Bros. Silk Co., Inc.
Gude-Nylace - lacing tape - Gudebrod Bros. Silk Co., Inc.
Gude-Q - lacing tape - Gudebrod Bros. Silk Co., Inc.
Gude-Space - lacing tape - Gudebrod Bros. Silk Co., Inc.
Gude-Ties - lacing tape - Gudebrod Bros. Silk Co., Inc.
Gyro Flux Gate - remote indicating compass system - The Bendix Corp.
Gyropoise - turntable - Stanton Magnetics, Inc.
GyroSURVEYOR - borehole surveying gyros and systems - Humphrey, Inc.

H

Hailer JR - S-203 - Audio Equip. Co., Inc.
Halltiplier - Watt & Var Transducers - Scientific Columbus
Halltron - Hall Effect Probes & Hall Effect Instrumentation - Ohio Semitronics, Inc.
Ham-Mate - Radio Amateur Wattmeters - Bird Electronic Corp.
Hand-Hole - buried plant enclosure - Superior Cable Div.
Han-D-Mag - audiophile demagnetizers - Annis R B Co.
HANDY FLUX - fluxes for brazing - Handy & Harman
HANDYLab - prepacked devices - Motorola Semiconductor Prods.
Handy-Wrap - wire wrapping tools - Ostby & Barton Co.
Hardset - heat-curing hard rubber compound - Hardman Inc.
Harosyn - brushless synchros - Harowe Servo Controls
Hartlock - Locking & Non-Locking Caps & Connectors - Arrow-Hart, Inc.
HATCORONE - Butyl rubber insulation - CCS Hatfield Wire & Cable Group
HATFLEX - Non-metallic cable - CCS Hatfield Wire & Cable Group
HATLON - Hypalon insulation - CCS Hatfield Wire & Cable Group
HATRON - NBR/PVC jacket (color) - CCS Hatfield Wire & Cable Group
HATVINOL - PVC insulation - CCS Hatfield Wire & Cable Group
Havar - alloy - Hamilton Technology, Inc.
Haysite - fiberglass reinforced plastics - Synthane Taylor Corp.
HC Holtzer - Cabot Motors - Eastern Air Devices Motor Div.
HD - heavy duty detergent cleaner - Clean Room Prods.
HDT - hitemp adhesive - Allaco Prods Div.
HDT - high temp adhesive - Packaged Resins Div.
HeatBank - heat recovery system - Hughes Aircraft Co.
Heat Guard - elec. soldering iron holders - Hexacon Elec. Co.
Heat-Les - air dryer - Pall Trinity Micro Corp.
Heat-Les - desiccant dryer - Pall Corp.
Heat Prober - thermister type electronic thermometer - Wahl, Wm. Corp.
Heatram - power supply dissipator - Power Designs, Inc.
Heatrax - heat shrinkable tubing - ICO/Rally Corp.
Heat-Seal Stik - sealant and pipe thread compound - Lake Chemical Co.
Heat Spy - infrared thermometers - Wahl, Wm. Corp.
Heatzone - high temperature wire - Cerro Wire & Cable Co.
Heetstrip - heating element - Therm-O-Lab Corp.
Heintz & Kaufman - electron tubes - JSH Electronics, Inc.
HELIAX - elliptical waveguide - Andrew Corp.
Heliax - coaxial cable & elliptical waveguides - Andrew Antenna Co. Ltd.
HELIAX - coaxial cable - Andrew Corp.
Heli-Cal - flexible shaft coupling - Helical Prods. Co., Inc.
Helicord - retractile cords - Storm Products Co.
Helidel - delay lines - Beckman Instrs.
Helilube - potentiometer lubricant - Beckman Instrs.
Helipot - precision potentiometers - Beckman Instrs.
Helitrim - trimming potentiometers - Beckman Instrs.
Heli-Tube - spiral tubing - M M Newman Corp.
Heli-Tube - spiral wrap tubing - Newman Corp., M. M.
HELI-WHIP - whip antennas - Anixter-Mark
Helix Design - potentiometers, transducers & delay lines - Beckman Instrs.
HELM-PAK - modular instrument controls & monitors - Helm Instr. Co.
HEP - hobby devices - Motorola Semiconductor Prods.
HERESY - loudspeaker system - Klipsch & Assocs. Inc.
Hermeflex - hermetic rotary seals - Singer Co.
Hermeticool - refrigeration system - Tenney Engrg., Inc.
Hetrocolor - time base corrector - Television Microtime, Inc.
Hexacon - elec. soldering irons - Hexacon Elec. Co.
HEXCLAD - contact mfg. process - Plessey Inc.
Hex Wik - solder remover - Hexacon Elec. Co.
HEYCO - strain relief bushings, insulating bushings & cable clamps - Heyman Mfg. Co.
HGA/Transtech - amplifiers-powerpacks - HGA Elctrns., Inc.
H/I - scientific instruments - Hacker Instrs., Inc.
Hiatt Clips - coaxial cable clips - Electrovert
Hi-Break - electric circuit breakers - General Elec. Co.
Hi-Brite - paints - Shannon Luminous Mat'ls.
Hickory Brand - wire & cable - Superior Cable Div.
HICO - sub-miniature, low inertia, permanent magnet DC motors; gearmotors; & tach generators, fans & blowers. - Horizons International, Inc.
HICO - relays - Hoagland Instr.
Hi-Cor - organic flux filled solder - Alpha Metals, Inc.
Hi-Cyclic - directional control valves - Airmatic/Beckett-Harcum
Hi-Density - Feeders - Allis-Chalmers
Hi-Etch - capacitors - General Elec. Co.
Hi-Ex - fire extinguishing foam - Kidde, Walter & Co.
Hi-Flux - magnetic equipment - Annis R B Co.
Hi Fy - gas chromatographs - Varian Assocs.
Hi-Jul - energy capacitors - Dearborn Elctrns. Div.
HI-KAPS - ceramic capacitor - Centralab
Hi/Lo Filter - high pass/low pass filter - Rockland Sys. Corp.
Hi-Meg - insulator - Dolph, John C. Co.
Hinge-Lock - spring-lock shelf supports - Simmons Fastener Corp.
HI NIL - high noise-immunity logic - Teledyne Semiconductor
Hinjon - lugs - Thomas & Betts Co.
Hipotrode - high voltage sparker electrode - Hipotronics, Inc.
Hi Pow - high power dummy loads - Electronautics
Hippo-clip - clips - Mueller Electric Co.
Hi-Therm - varnish - Dolph, John C. Co.
Hi-Thro - fluoborate plating baths - Allied Chemical Corp.
HI-VO-KAPS - ceramic capacitors - Centralab
Hi-Volt - voltage testers - Industrial Devices
HI-Z - ground fault sensors - Electrons Co.
Hi-Z - voltmeter & accessories - Ross Engineering Corp.
HKP - cutting machine - Porter, H.K., Inc.
HLT - stressed panel fastener - Tridair Inds.
HMC - hybrid microelectronic circuits - AEL, Inc.
Hole-in-the-Head - tamper-proof screws - Pan-L-Fast
Homalite-LR - low reflectance plastic sheet - SGL Homalite
Hometaxial - RCA power trasnsistor technology offering low-charge carrier density at the collector junction for reduced heating effect - RCA Solid State Div.
Homosil - clear fused quartz - Amersil, Inc.
HONEY BEE - Video Audio Tape Motor - Hurst Mfg. Corp.
HOPPER STAKER - swaging machines - Cambridge Thermionic Corp.
Hopstretcher - antenna feed - Gabriel Elctrns. Inc.

Horizon Line - voltmeters & ammeters - General Elec. Co.
Horizon Line® - panel meters - General Electric Co.
Hornet - miniature soldering iron - Hexacon Elec. Co.
Hot Hand - tubing shrinkers - American Elec. Heater
"Hot Line Telephone" - automatic dial telephone - Warren G-V Communications
Hot Shot - dry batteries - Union Carbide
Hot Tip - soldering accessory - Air-O-Tronics Prods.
Howell-Bunger - Hydraulic free discharge regulating valve - Allis-Chalmers
HPI - meters - Assembled Products Co.
HR - heat resistant transfers - Meyercord Co.
Hub-Clamp - fastener - Sterling Instr.
HUBLOC - component fastening device - Stock Drive Prods.
Hub-Lock - fastener - Sterling Instr.
Humidolain - ceramic products - Star Porcelain Co.
Humiseal - coatings - Humiseal Div.
Humistat - relative humidity controller - American Instr. Co.
Humitex - recording chart - Foxboro Co.
Hustler - communication antennas & accessories - New-Tronics Corp.
Hy-A-Sil - silicon rectifiers - Sanford-Miller Corp.
HYBRIDGE - RF BRIDGE - Alford Mfg. Co.
Hybrid Modules - precision resistor divider networks - Pulse Engrg., Inc.
Hy-Bute/60 - butyl gum, for insulation - General Elec. Co.
Hycar R CTBN - reactive liquid polymers - Goodrich Chem. Co., B.F.
HYDENT - compression terminals & splices - Burndy Corporation
HYDRATEMP - Synthetic-rubber insulation - CCS Hatfield Wire & Cable Group
Hydrive - high output amplifiers - Infodex, Inc.
Hydrocone - Crushers - Allis-Chalmers
Hydrofeed - recording lathe - Components Corp.
HYDRO-FLOW FLUID - Soldering leveling & fusing chemical - Kenco Alloy & Chemical Co., Inc.
Hydro-Jet - pc board water cleaner. - Hollis Engrg., Inc.
Hydropress - book pressing machine - A. M. W. Corp.
Hydroset - Crusher mechanism for vertical shaft movement - Allis-Chalmers
Hydrosolv - liquid organic water soluble flux - Alpha Metals, Inc.
Hydro Squeegee - solder leveling/cleaning mach. - Lear Siegler, Inc.
Hydrotector - package r-h inspection sys - American Instr. Co.
"Hye-Que" - antenna connector - Budwig Mfg. Co.
HYFEN - connector contacts - Burndy Corporation
Hy-Fi - gas chromatograph - Varian Assocs.
Hyflux - Alnico 5 magnets - Indiana General/Div. Emm Corp.
Hygrade - fabric base sleevings - Markel, L. Frank & Sons
Hygro-Cel - cup r-h sensor device - American Instr. Co.
Hygro-Champ - clamp r-h measuring device - American Instr. Co.
Hygrodynamics - hygrometer product line - American Instr. Co.
Hygrosensor - relative humidity transducer - American Instr. Co.
Hygrotran - convertors, humidity signal (resistance) - American Instr. Co.
HYJOULE - high energy fault Locators - Associated Research, Inc.
HYLINK - compression splice - Burndy Corporation
HYLOK - connector system - Burndy Corporation
HYLUG - compression terminal - Burndy Corporation
Hyper Sel - rectifier - Alpha Components Corp.
Hypertac - connectors - Hypertronics Corp.
Hypertac - PC and rack & panel connectors - Industrial Electronic Hardware
HYPOINT - leadless ic receptacle - Burndy Corporation
HYPOT - high potential Testers - Associated Research, Inc.
HYPRESS - installation tooling - Burndy Corporation
Hy-Range - CB Transceivers - Hy-Gain Electronics Corp.
HYRING - two piece compression terminations - Burndy Corporation
Hy-Scan - Monitor Receivers - Hy-Gain Electronics Corp.
Hy Seas - VHF marine equipment - Hy-Gain Electronics Corp.
Hy-Therm R - Heat flux sensor - Hy-Cal Engineering
H-Zone - high temperature wire - Cerro Wire & Cable Co.
H-10&T - servicemen's leak detector - General Electric Co.

I

IBR - integrated bridge rectifier - Varo Semiconductor, Inc.
ICEM - magnetrons - Varian Electron Tube & Device Grp.
ICEM - inverted coaxial magnetron - Varian Assocs.
Icem - coaxial magnetrons - Varian Assocs.
Ice-Trol - ambient-compensated temperature controllers - Honeywell
Ickypic II - compound - Communications Technology Corp.
ICPAX - integrated circuit packaging system - Techmar Corp.
Icsotimer - time delay - Instr. & Control Sys., Inc.
Idads - automatic drafting system - Information Displays, Inc.
IDEA - Integrated Diesel Engine Analyzer - PRD Elctrns., Inc.
IDIgraf - display terminal - Information Displays, Inc.
IDIIOM/II - computer controlled display - Information Displays, Inc.
IEE-APOLLO - incandescent, segmented filamentary display - Industrial Elctrn. Engrs.
Imagescope - fiber optic flexible image device - Galileo Electro-Optics Corp.
IMCair - propeller fans/centrifugal blowers - IMC Magnetics Corp.
IMcoder - Incremental Optical Encoder - I M C Magnetics
IMCom - Brushless D-C Motor - I M C Magnetics
IMCool - Tubeaxial Fans - I M C Magnetics
Imidex - polyimide-containing composition - General Elec.
ImLec - electronic components - Inter-Market, Inc.
Imlec - thumbwheel switches - Inter-Market, Inc.
Imlec - indicators, legend displays - Inter-Market, Inc.
Imlec - lamps, pilot lights - Inter-Market, Inc.
Imlec - CCTV equipment - Inter-Market, Inc.
Immersion Gold - immersion plating process. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
IMPAC - COMMERCIAL MEDIUM CURRENT SILICON RECTIFIER - Semtech Corp.
Impac - digital panel meters - Velonex, Display Prods.
"Imperial" - adding machines - Victor Comptometer Corp.
Imperial Line - heavy-duty production - UNGAR, Div.
ImperviTran - environmentalized transformer - Micron Industries Corp.
Incert - edge-mount leadless ceramic pkg. - Metalized Ceramics
Incor - Rare earth magnets - Indiana General/Div. Emm Corp.
Incre-Lock - control systems - Sequential Information Systems
Incusil 10 - brazing alloys - Gte Sylvania, Inc.
Incusil 15 - brazing alloys - Gte Sylvania, Inc.
Indomica - mica - Humiseal Div.
Indox - Ceramic magnets - Indiana General/Div. Emm Corp.
Induct-A-Ring - shaker armature - Unholtz-Dickie Corp.
Inductosyn - transducers - Farrand Controls, Inc.
Inductosyn - encoder - Del Electronics Corp.
Inductrol - induction voltage-regulator - General Elec. Co.
Industrite - abrasion, heat, chem., oil & flame resistant cable - Boston Insulated Wire & Cable Co.
Industrol 812 - digital process control - Research, Inc.
Infinitron - resistance elements - Bourns, Inc.
Infinitron - conductive plastic potentiometer - Bourns, Inc.
Info-Lite - lighted readouts, status indicators & systems - Info-Lite Corp.
INFOTRAK - card-chart recorder - Leeds & Northrup Co.
Infrasil - clear fused quartz - Amersil, Inc.
Insco - electronic instrumentation - Electro-Optical Inds., Inc.
Insertomat - component assembly system - Electrovert
In-Source® - vacuum evaporation system - Applied Materials Inc.
Insta-Lead - precut wire leads - Storm Products Co.
Instamator® - construction estimating calculator - Diversified Electronics Co.
Instant Circuit Boards - instant circuit boards - Circuit-Stik, Inc.
Instant Lettering - dry transfers - Datak Corp.
"Instant Weld"® - alpha cyanoacrylate adhesive - Oneida Electronics Mfg.
Instaplate R - processing equip. for metalphoto R - Metalphoto Corp.
Insta-Test - breakdown testers - Grand Transformers
Insul-Bolt - fastener-insulated - Pylon Co., Inc.
Insulcaps - heat shrinkable caps - Burlington Opers. Div.
Insulcon - glowers - Carborundum Co.
Insulet - rivets-insulated - Pylon Co., Inc.
Insulets - outlet fittings - Thomas & Betts Co.
Insuliner - sleeves - Thomas & Betts Co.
INSULINK - insulated compression splice - Burndy Corporation
Insul-Mate - test adapters - Air-O-Tronics Prods.
Insulsplice - continuous strip insulating equipment - Autosplice/Dv Gen Staple
Insultape - heat shrinkable tape - Burlington Opers. Div.
Insultek - insulating finish - Int'l. Elctrn. Resch.
Insultite - heat shrinkable tubings - Burlington Opers. Div.
Insulube - insulating finish - Int'l. Elctrn. Resch.
INSULUG - insulated compression terminal - Burndy Corporation
Integra - consoles - Par-Metal Prods. Div.
Integra-Test - leak detector - Varian Assocs.
Integrid - integrated cir. P.C. card - Elgin Elctrns., Inc.
Intercap - capacitors - International Comps Corp.
Intercette - digital cassette tape transports - Interdyne
Intercheck - thermal switch - Guildline Instrs., Inc.
Interconnect PABX Telephone Systems - 20 lines & up - Milgo Electronic Corp.
Interface: A - speaker system - Electro-Voice, Inc.
Interface 33 - Styled Modular Instrument Enclosures - Amco Engineering Co.
International Servicemaster - tubes - International Comps Corp.
Interohm - resistors - International Comps Corp.
Interrosper - Tracking Radar Devices - Vega Precision Labs.
Intershake - communication test equipment - Atlantic Research Coropration
Interzone - polyimide insulated wire - Cerro Wire & Cable Co.
INTER-8 - low pickup cabling - Perfection Mica Co.
Intri-Cut - chemical milling process - Chem Aero, Inc.
"Invert-A-Stat" - static inverter - Gould Inc.
"Inverted-Vee" - "balun" fed doublet antenna kit - Telrex Labs.
Inverter-Rated Ferramics - ferrites - Indiana General
Inverto-Tran - ferrite inverter transformer series - Pulse Engrg., Inc.
Invertron - ac power sources - Elin Div.
INVERTRON - ac power sources - California Instrs. Co.
Invertron - AC power sources - Calico Div.
Invertron - ac power supplies - Behlman Div., California Instrs.
Involoid - internal rack generated - Invincible Gear Co.
"Ionflo" - ion deflection measurement - Thermo Sys., Inc.
IPAC - Time Sequencer - Instr. & Control Sys., Inc.
IPT-500 Series - comp. test handler - IPT Corp.
IPT-700 Series - comp. test handler - IPT Corp.
IPT-800 Series - comp. test handler - IPT Corp.
IRD - all products - IRD Mechanalysis, Inc.
Iriditron - gamma radiography machines - Automation Inds.
Iriscorder - Videopupillography - Hamamatsu TV Co., Ltd.
Ironclad - battery plates - Exide Power Sys. Div.
Iron Grip, V-Grip - shelving, racks, bins - Equipto
Irrasil - tape, silicone - General Elec.
Irrathene - irradiated polyethylene - General Elec.
Irricon - tape, semi-conducting - General Elec.
Isobase - accelerometer - Endevco
Isobox - enclosure that isolates an accelerometer from changing ambient conditions. - Endevco
ISO-CURVE - R-T, curve-matched, interchangeable thermistors - Fenwal Elctrns.
Iso-Elastic - temperature compensated alloy - Chatillon John & Sons
Isofilm - electronic capacitors - General Elec. Co.
Iso Fork - tuning fork - Philamon, Inc.
Isoformer - transformer - Elcor Prods. Neotec Elctrns. Inc.
ISO-KAP - ceramic capacitors - Centralab
ISO-LATCH - Iso Thermal Latching Valve - General Valve Corp.
Isolationist - line isolation transformers - CEA
Isolene - liquid cis 1,4 polyisoprene rubber polymer - Hardman Inc.
Iso-Lit - opto isolators (couplers) - Litronix
ISO-OP-AMP - solid state modular isolation operational amp. - Burr-Brown
ISO-PAK - Modular DC/DC Converter Power Supplies - Stevens-Arnold, Inc.
Isopil - plug-in isolator - Cir-Q-Tel, Inc.
Isoply - isolated power supply - Elcor Prods. Neotec Elctrns. Inc.
ISOPODS - electronic packaging system (module) - Hughes Aircraft Co
ISOPOLAR REFERENCE - ultrastable precision reference - Data Precision Corporation
Isorex - transformer - Elcor Prods. Neotec Elctrns. Inc.
Iso-Seal - temperature compensated scale - Chatillon John & Sons
ISOTAB - plastic tab-mount thyristor - Hutson Industries
Isotherm - thermistors - Victory Engrg. Corp.
Isothermal - RF transistors - Motorola Semiconductor Prods.
ISO-TIP - cordless rechargeable soldering iron - Wahl Clipper Corp.

Isovar - power supply automatic current to volatage crossover - Elcor Prods. Neotec Elctrns. Inc.
Isowatt - isolated VERSAWATT type - RCA Solid State Div.
"I" Supply - constant current source - Calex Mfg. Co., Inc.
I&S2 - ion implantation - American Microsystems, Inc.
ITECO - test equipment - Industrial Test Equip.
IVACON - AC Line Conditioner - Deltec Corp.

J

Jackey - folding hex key set - Allen Mfg. Co.
JAICO - relays & blade switches - Jaidinger Mfg. Co., Inc.
Jak-switch TM - Jack adapter switch - Chicago Switch, Inc.
JANETTE - Speed Reducers, Gearmotors - Eastern Air Devices Motor Div.
Janset - knobs - Jan Hardware Mfg. Co.
JAQUET - Speed Indicators - Sticht Co., Inc. Herman H.
Jarecki - hydro mechanical presses - Taylor-Winfield Corp.
JETCAL® - jet engine tester - Howell Inst. Inc.
Jetflow - channel inductors - Ajax Magnethermic Corp.
Jet Flux - liquid flux - Chemetron Corp.
Jet Plater - self-contained plating unit - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Jet Set - self-locking honeycomb panel fastener - Esna Div.
Jet-Temp - thermocouples - General Elec. Co.
Jolta - autolinear coupling - Jan Hardware Mfg. Co.
"Jones" - plugs and sockets - TRW/Cinch Connectors
JotDraft - printed circuit symbols - Datak Corp.
Judco - insulated wire & cable - Judd Wire Div.
Junior Spectrophotometer - low cost uv-visible-spectrophotometer - Coleman Instr. Div.
J–W - Gas Detection Product Logo - Bacharach Instrument Co.

K

Kalar - elastomeric compounds - Hardman Inc.
Kalene - elastomeric compounds - Hardman Inc.
Kalex - polyurethane elastomers - Hardman Inc.
Kamag 14 - generators - Kato Engineering Co.
Kappa - delay lines - Kappa Networks
Kapseal - low friction seal - Minnesota Rubber Co.
KARADIO - Applicable to auto radio sets - ATR Electronics, Inc.
Karak - carbon graphite parts - Ohio Carbon Co.
Karen - precision altitude system - Kollsman Instr. Co.
Kari - float switch - Zi-Tech Div.
Kasil - potassium silicate - Philadelphia Quartz Co.
K-det - Sync Instrument Motor - Hurst Mfg. Corp.
Keenserts - inserts & studs - Tridair Inds.
Keeper - cables for ion measuring electrodes - Beckman Instrs., (AISSD)
Kelox - solid bushing inserts for strong threads in weak materials - Heli-Coil Prods.
Keltip - cryogenic sensor - Degussa Inc.
Kelvin Klamps - four-terminal clamps - Electro Sci. Inds.
Kelvin Klips - four-terminal clips - Electro Sci. Inds.
KEMET - tantalum, ceramic & film capacitors - Union Carbide Corp.
Kemfuze - chemical fuse - Bel Fuse
KEMPURE - inert gas purifiers - Kewaunee Scien. Equip. Corp.
Kenbrite - zinc plating bath - Conversion Chem. Corp.
Kencad - cadmium plating bath - Conversion Chem. Corp.
KENCOR - MAGNETIC DRUM MEMORIES - Kenton Engrg. Corp.
Ken-Rad - radio tubes - General Elec. Co.
Ken-Tel - telephone cables and wires - Okonite Co.
Kentrix - multimeter & meter line & its accs. - Uchida of America Corp.
Kenvert - sealers, acids, dry powders - Conversion Chem. Corp.
KEP - electrical impulse counters - Kessler-Ellis Prods.
KERN - lenses - Heitz, Inc., Karl
KeyNet - key to tape remote data entry - Honeywell Information Systems
Keyplex - disk to tape data entry - Honeywell Information Systems
Keytape - data entry - Honeywell Information Systems
K & H - speaker systems, equalizers - Gotham Audio Corp.
KIFIS - integrated flight instrument system - Kollsman Instr. Co.
Kilo-Pac - Power Supply - Velonex, Instrument Div.
Kilovac - relays & switches - Kilovac Corp.
KILOVOLT STAC - HIGH VOLTAGE SILICON RECTIFIER FOR OIL - Semtech Corp.
Kimfol - polycarbonate film - Schweitzer, Peter J. Div.
Kimfone - polysulphone film - Schweitzer, Peter J. Div.
Kinamatic - machines electric motors & generators - General Elec. Co.
Kinatrol - machines & controls - General Elec. Co.
Kine-Finish - roll-finishing dies - MPB Corp.
Kineform - roll forming dies - MPB Corp.
Kine-Miser - roll-roll-forming and roll-finishing attachments on turning machines - MPB Corp.
Kine-Roller - roll-forming and roll-finishing machines - MPB Corp.
King - floated rate integrated gyros - Singer Co.
Kingsley Wire-Marking Machines - marking machines - Kingsley Mach. Co.
Kink-Loc - lead formations - Radio Materials Co.
KINOPTIK - lenses for image intensifiers, scanners - Heitz, Inc., Karl
KINOPTIK - lenses, collimator - Heitz, Inc., Karl
Kintrac VII - kinetic rate monitoring instruments - Beckman Instrs., (AISSD)
KLEEN-STRIP - self-stripping foil-shielded cables - National Wire & Cable Corp.
Kleentrack - contact cleaner - R-Columbia Products, Inc.
Klein-Buhrke - safety equip - Klein, Mathias & Sons, Inc.
Klein Chicago Grips - a grip to pull cables - Klein, Mathias & Sons, Inc.
Klein Haven Grips - a grip to pull cables - Klein, Mathias & Sons, Inc.
"Klein Kord" - Safety Straps - Klein, Mathias & Sons, Inc.
Klein Spee-D-Nut driver - nutdriver with revolving handle - Klein, Mathias & Sons, Inc.
Klein Speedriver - screwdriver with revolving head - Klein, Mathias & Sons, Inc.
Klipring - rings, retaining - Waldes Kohinoor, Inc.
KLIPSCHORN - loudspeaker system - Klipsch & Assocs. Inc.
Klip Sels - transient surge suppressors - International Rectifier Corp.
Klipsocket TM - lampholders - Chicago Switch, Inc.
"Kliptite" - push-on terminal tabs - Kulka Elec. Corp.
KLIXON - motor controls - Texas Instruments
K & N Level - zinc plating bath - Conversion Chem. Corp.
Knobpot - potentiometer - Bourns, Inc.
Kodacel - plastic film & sheet - Eastman Chem. Prods.
Kontact 60 - aerosol contact cleaner - Jonard Industries Corp.
Kontakt-Chemie - sprays for electronic equipment - Regmo Data Corp.
Kontakt WL - degreaser-washer - Regmo Data Corp.
Kontakt 60 - contact cleaner - Regmo Data Corp.
Kontakt 61 - anti-corrosion lubricator - Regmo Data Corp.
Kon-Tork - Torque proportioning differentials - Allis-Chalmers
Kooler-Krown - heat dissipator - UNITRACK Div.
Korless Electrodes - edm electrodes - Uniform Tubes
Korvex - shrinkable tubing - Chemplast, Inc.
k-Pak - chips carrier - Motorola Semiconductor Prods.
K-Prene - urethane material - Di-Acro
Krak-Stik - sealant and pipe thread compound - Lake Chemical Co.
Kralastic - electroplating chem. - Uniroyal, Inc.
Kreco - communications antennas - Kreckman, Herb Co.
KRESKY-WARD - Furnaces - Zero Mfg. Co.
K-Set - magnetic tape head - Michigan Magnetics
KSR - capacitors - General Elec. Co.
Kwick-Konnect - connectors - Sealectro Corp.
Kwik-Way - water applied decals - Meyercord Co.
Kyread - magnetic tape developer - Kyros Corp.

L

Labpot - potentiometers - Bourns, Inc.
La-Co - fluxes and sealing compounds - Lake Chemical Co.
La-Co Loc - plastic pipe cements - Lake Chemical Co.
Lakin - hickey - Thomas & Betts Co.
Lamicor - polyester fiberglass - NVF Co.
Lamplighter - photoelectric street lighting control - Cardinal Control Co.
Lamtac - connectors - Hypertronics Corp.
Lancelok - terminals - Amp Inc.
Landmark - high fidelity music system - Electro-Voice, Inc.
Landmark - music system - Electro-Voice, Inc.
LA SCALA - loudspeaker system - Klipsch & Assocs. Inc.
Lase-A-Lign - laser alignment autocollimator - Laser Inc.
Laserscribe® - automatic wafer scriber - Quantronix Corp.
Lasertrim® - resistor trimming system - Apollo Lasers Inc.
"Lastec" - wire saws, wire, polishing machines, sieve shakers - Laser Technology, Inc.
Laticrete - coatings, anti-static & conductive - Uniroyal, Inc.
Lauda - constant temperature circ - Brinkmann Instrs., Inc.
Lavolain - ceramic products - Star Porcelain Co.
LC - tuners - JFD Electronics Components Corp.
LCA - low coefficient of expansion adhesives - Bacon Inds.
Leak-Pruf - acid core solder - Alpha Metals, Inc.
LEAK-TEC - liquid leak detecting fluids - American Gas & Chemicals Co., Ltd.
Le Carbone - brushes & contacts - Carbone Lorraine Industries Corp.
Le Carbone-AD - batteries - Carbone Lorraine Industries Corp.
Lectr-AU-Lyte - acid type electroplating process of 80% gold and 20% nickel - Sel-Rex Co. Div. Oxy Metal Industries Corp.
LectroDuct - shielded electrical raceways - Lectro Magnetics, Inc.
Lectrofilm - capacitors - General Elec. Co.
Lectroless AU - electroless gold plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Lectro Line - RFI/EMI power line filters - Lectro Magnetics, Inc.
Lectro-Nic - nickel plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Lectro-Screen - durable, ductile nickel electroformed screens for thick film production - Sel-Rex Co. Div. Oxy Metal Industries Corp.
LectroShield - shielded room & cabinets - Lectro Magnetics, Inc.
LectroVent - shielded air ventilators - Lectro Magnetics, Inc.
L.E.D. - light emitting diode - Packaged Resins Div.
LED - light emitting diode castings sys. - Allaco Prods Div.
LEE-BUS - Bus Bars - Atlee Corp.
LEE-STRIP - Bus Strip - Atlee Corp.
LEE-TAC - Lam. Bus Bar Insulation - Atlee Corp.
Lektra/Lite - diffusion light source - Lektra Labs., Inc.
Lektron - sound lectern - PASO Sound Products Inc.
Lenscote - anti-reflection optical coating - Metavac, Inc.
Leonard - Trash rakes for intake of hydraulic turbines - Allis-Chalmers
Lepak - cap sealing equipment - Lepel High Frequency Labs.
Level-Tek - detection & control sys - Robertshaw Controls Co.
Level-Tel - detection & control sys - Robertshaw Controls Co.
Lev-o-Let - switches, outlets - Leviton Mfg. Co., Inc.
LEVOLIER - switches - McGill Mfg. Co. Inc.
Lev-o-Lock - plugs, connectors - Leviton Mfg. Co., Inc.
LEXAN - polycarbonate resin - General Elec.
LGH - high voltage lead - Amp Inc.
LID - leadless inverted device (micro-semiconductor) - Amperex Electronic Corp.
Life Term - terminals for RFI Filters - Filtron Company, Inc.
Light Conditioning TM - dimmer control - Leviton Mfg. Co., Inc.
LIGHT WATCHMAN - photoelectric controls - Ripley Co., Inc.
Limistor - linear thermistor - Keystone Carbon Co.
Limitamp - motor control - General Elec. Co.
LIMITRON - fast acting fuses - Bussmann Manufacturing
Limitstat - safety thermostat - Hotpack Corp.
Linamatic - book backlining machine - A. M. W. Corp.
LINC Tape - mini computer tape memory system - Computer Operations
LINE - Electro-Mechanical Relays - Line Electric Co. Unit Esterline Corp.
Linebusy - Telephone Comm. System Accessory - Phone-Aid Co.
Line-O-Lite - pilot lights - Industrial Devices
Line Radiator - loudspeaker - Electro-Voice, Inc.
Line Radiator - speaker system - Electro-Voice, Inc.
Line-Volt - voltage testers - Industrial Devices
Link-Lock - spring-lock shelf supports - Simmons Fastener Corp.
Linobate - lithium niobate - Crystal Technology
LiquiFlex - Adjustable speed drives (formerly Accutrol) - Allis-Chalmers
LIQUI-NOX - liquid manual detergent - Alconox Inc.
LIRA - infrared analyzer - Mine Safety Appliances Co.
Lite-Mike - light instrumentation - EG & G, Inc.
Lite-Mike - light meter - EG&G, Inc.
Lite-Panels - Drake Mfg. Co.
Lithocon - silicon storage tube - Princeton Elctrn. Prods.
Littel "Multi-Switch" - "multi-switch" switches - Switchcraft, Inc.
Little Caesar - retention assembly - ITT Cannon Electric
Little Gem - drawers - Equipto
"Little Gem" - foot press - Sjoberg, C. & Son, Inc.
"Little Gem" - flat clips - Sjoberg, C. & Son, Inc.

Little Giant - patch & monitor modules - International Data Sciences

Little Giant - 1 watt microglass regulators - Centralab Semiconductor

"Little Joe" - tools - MacDonald & Co.

Live-Lock - structural panel fastener - Tridair Inds.

Lloyd - lampholders, flourescent - Westmoreland Plastics Co.

LMB - Metal cabinets, etc. - Heeger Inc.

Load-Pak - solid-state controlling device - Gems Sensors Div.

Lo-Cate - tracking & positioning sys. - Beukers Labs., Inc.

Lockit-Socket - Integrated Circuit Sockets - U.S. Terminals

Locktite - connectors - Thomas & Betts Co.

Lo-Cog - d-c motors - Pittman Corp.

LOCOST - automated test systems - Julie Research Lab.

Loc-Trac - Zipper Tubing Track - Alpha Wire Corp.

Lo-Flo - fuel oil meters - Singer Co.

Logan - antenna - Instruments for Industry, Inc.

Logicator - electro magnetic readout - Bowmar Instr. Corp.

Logic Pen - logic probe - Advanced Digital Research

Logic Timer - digital timing instruments - Durgin & Brown, Inc.

LogiTran - educational computer - Fabri-Tek, Inc.

Lokon - locknuts - Allen Mfg. Co.

LONCO COPPERBRITE - copper cleaner - London Chemical Co.

LONCO SEALBRITE - solderable protective coating - London Chemical Co.

LONCO SONIC-SOLE - degreasing & flux removal - London Chemical Co.

LONCOTERGE - flux removal & cleaning & copper cleaner - London Chemical Co.

LONER - SOLDERING INSTRUMENT (IRON) - Edsyn, Inc.

Longhair - record brush - Stanton Magnetics, Inc.

Lorcap - ceramic discs and monolythic capacitors - Arco Electronics Inc.

Lo-Torque - low force limit switch - Denison, R.B., Inc.

Lo-Volt - voltage testers - Industrial Devices

Low-Head - Vibrating and gyratory screens - Allis-Chalmers

Low-Var - capacitors, fixed, ceramic - Republic Elctrns. Corp.

Loxarmor - interlocked armor cables - Okonite Co.

Loxswitch - limit switch - Denison, R.B., Inc.

Lox Thermistor - thermistors - Victory Engrg. Corp.

LPB - lighted pushbutton switch - Unimax Switch Corp.

LPS ESA-100 - rust inhibitor lubricants - LPS Research Labs

LPS instant cold galvanize - rust inhibitor - LPS Research Labs

LPS instant contact cleaner - solvent degreaser - LPS Research Labs

LPS#1 - rust inhibitor lubricants - LPS Research Labs

LPS#2 - rust inhibitor lubricants - LPS Research Labs

LPS#3 - rust inhibitor lubricants - LPS Research Labs

LSHV - high voltage cables - Boston Insulated Wire & Cable Co.

LST - low skin temperature oven - Hotpack Corp.

Lubritrol - Mill lubrication system - Allis-Chalmers

Lug-It - lugs - Thomas & Betts Co.

Lumapac - inverter/ballasts - EWC, Inc.

LumenMeter - light instrumentation - EG & G, Inc.

Lumen Meter - light measuring instrument - EG&G, Inc.

Lumiten - light controlled attenuator - Fairchild Sound Equip.

Lustre-Zinc - zinc chromate plating - Titchener, E.H. & Co.

Lustrocolor, Mark III, IV & V - color TV picture tube - Westinghouse Elec. Corp.

Luxicon - light conduit - Dolan-Jenner Inds., Inc.

LX-CJ - self powered cold junction reference source - Omega Engrg., Inc.

LYREC - tape timers - Gotham Audio Corp.

M

MACHINE MINDERS - energy signature transducers. - Macrodyne Inc.

MACO - a solid state programmable sequence logic control system - Barber-Colman Co.

Mac-16 - digital computer - Lockheed Elctrns. Co.

Magacycler - frequency to voltage converter - Pioneer Magnetics

Magaverter - voltage to frequency converter - Pioneer Magnetics

MAGCENTRIC - magnetic bearings - Cambridge Thermionic Corp.

Magflo - bath magnetic stirrer - Hotpack Corp.

Magic Circle - Electronic Remote Control - A.R.F. Products

MAGIC SERIES - Airborne digital computers - Delco Electronics Div.

Magic tip - screw holding screw driver - Hunter Tools

MAGIC WAND - Electrostatic Neutralizers - Sticht Co., Inc. Herman H.

Magitran - wafer thin loudspeaker systems - Era Acoustics

MAGLOCK - magnetic proximity switches - NAMCO CONTROLS

MAG-MIX - magnetic stirrers - GCA/Precision Scientific

Magmod - magnetic modulator - General Magnetics

Magnacaps - low voltage capacitors - Radio Materials Co.

Magnacord - tape equipment - Telex Communications, Inc.

Magnapak - magnetostrictive spaced lamination transducers - Westinghouse Elec.

Magna-Press - small bench presses - Airmatic/Beckett-Harcum

MAGNAREED - Power Reed - Solid State Electronics Corp.

MAGNATORC - small dc motors - Hansen Mfg. Co.

Magnatrak - ultrasonic cleaning generator - Westinghouse Elec.

Magna-Weigh - dial indicator scales - Howe Richardson Scale Co.

Magneform - metal forming equip. - Maxwell Labs., Inc.

Magne-Gage - plating thickness gauge - American Instr. Co.

Magnemetrics - magnetic measuring instrumentation - Walker Scientific, Inc.

Magnesearch - low magnetic flux densities - RFL Inds.

MAGNESIL - magnetic materials - Magnetics

Magnetic Tweezer - pick-up tool - Orbit Inds.

Magnetreater - de-magnetizer (variable) - RFL Inds.

Magnette - circuit breakers - Heinemann Elec. Co.

Magnion - laboratory magnet systems - Walker Scientific, Inc.

MAGNI-WHIRL - constant temperature baths - Blue M Electric Co.

Magnum&T - high current bridges - Unitrode Corp.

Magolite - lightweight insulating cement - Varian Assocs.

Magolite - insulating cement - Semicon Assoc., Inc.

MAGSENSE - voltage comparator - Pioneer Instrumentation

Magstrip - Terminal Strip - Magnum Elec. Corp.

Magswitch - magnet operated switch - Denison, R.B., Inc.

MAGTECH - d.c. tachometer generators. d. c. torque & servo motors - Magnetic Technology

Magterm - Independent Perimeter Terminals - Magnum Elec. Corp.

Major - fan - Rotron, Inc.

M. A. Miller - replacement phonograph stylii - Pageant/M.A. Miller Co.

Manchex - batteries - Exide Power Sys. Div.

Manix Mfrg - production equip. pliers - Mann, Henry Inc.

Manson - friction tape - Okonite Co.

Manumatic - leak detector - Varian Assocs.

MARK - microwave antennas - Anixter-Mark

Markal Ball Paint Marker - industrial marker - Markal Co.

Markal Dura-Ink & Sharpie - felt tip markers - Markal Co.

Markal Paintstik - paintstik markers (industrial paint in stik form) - Markal Co.

Markal Paper Riter - felt tip pen - Markal Co.

Markal Protective Coating - coating compounds - Markal Co.

Markal Protective Coating - protective coatings - Markal Co.

Markal Slic-Tite with "Teflon" - 4 thread sealants (stik, paste, tape, packing) - Markal Co.

Markal Thermomelt - temperature indicators crayons - Markal Co.

Markal Thermomelt - temperature indicators - Markal Co.

Mark "C" - switches - Cole Instrument Corp.

Mark-El - parts marking service - Acme Model Engrg. Co.

Markette I - flexible disk - Memorex Corp.

MARK I - wave solder mach. - Tech. Devices Co.

MARK II - wire cutter & stripper - Tech. Devices Co.

MARK III - circuit card fixture - Tech. Devices Co.

Mark III - Alpha Numeric Printer - Gulton Inds., Inc.

Mark IV - single cable 5-300 MHz hybrid, integrated push-pull line of solid state 2-way CATV equip - AEL Communications Corp., Sub. of Amer. Elctrn. Labs. Inc.

Mark IV Hammer - impact printing mechanism - Dataproducts Corp.

Mark IX - comp. lead trimmer - Tech. Devices Co.

Marksman - Temperature Recorders - Gulton Inds., Inc.

Mark Ten & Mark Ten "B" - Electronic Ignition Systems - Delta Products

Mark V - dual cable, hybrid, integrated push-pull 5-300 MHz line of solid state 2-way CATV equip - AEL Communications Corp., Sub. of Amer. Elctrn. Labs. Inc.

MARK V - component lead former - Tech. Devices Co.

Mark X - disc packs - Memorex Corp.

MARLOX - metal sheathed thermocouples - Marlin Manufacturing Corp.

Marquis - loudspeaker, enclosures - Electro-Voice, Inc.

Martech - extruded & molded bio-medical prods. - Markel, L. Frank & Sons

Marz R - metals purity grade - Materials Resch. Corp.

MASKCOAT - Plating Stop-off - Western Coating Co.

Masq-Matic - automatic plating sys. for continuous strip IC lead frame plating. - Sel-Rex Co. Div. Oxy Metal Industries Corp.

Masterline - matv equipment - Blonder-Tongue Labs., Inc.

MASTER-MITE - flameless heat gun - Master Appliance Corp.

Master Power - vehicle power converter - Techsonics

Mate-N-Lok - connectors - Amp Inc.

Matri Dot - Printers - Practical Automation, Inc.

Matrix IV - Electronic Cabinetry - Zero Mfg. Co.

Max-C - piston trimmer capacitors - JFD Electronics Components Corp.

Maxeal V and VII - Pumps - Allis-Chalmers

Maxi-Color R - Shielded TV Lead-In Wire - Belden Corp.

Maxipak - closed circuit TV systems - Audiotronics

Maxi Power - vehicle power converter - Techsonics

MAXI-"Q"UBETM - Case B 110 mil chip capacitor - American Technical Ceramics

MazeMaster - Wiring Aide - Addison Div. Muirhead, Inc.

McCully - Crushers and other minerals processing machinery - Allis-Chalmers

M.C. Jones - microwave devices - Bendix

M.C.M. - dow inertia moving coil motors - Electro-Craft Corp.

MC (MC5000) - Digital High Speed Printers - Datalog Div., Litton Sys.

McMOS - complementary MOS logic IC's - Motorola Semiconductor Prods.

MCRT - torque meters & rotary transformers - S. Himmelstein & Co.

MCSIM - Microcontroller simulator - Scientific Micro Sys.

M DAC - miniature digital-to-analog convertor - Analog Devices

MDTL - diode-transistor logic IC's - Motorola Semiconductor Prods.

Measure-Matic - positive displacement pumps - Airmatic/Beckett-Harcum

MEC - custom wire processing - Manger Elec. Co., Inc.

MECL - emitter-coupled logic IC's - Motorola Semiconductor Prods.

MECL 10,000 - emitter-coupled logic IC's - Motorola Semiconductor Prods.

Mec/221 - electronic calculators - Victor Comptometer Corp.

Mec/223 - electronic calculators - Victor Comptometer Corp.

Mec/224 - electronic calculators - Victor Comptometer Corp.

Mec/225 - electronic calculators - Victor Comptometer Corp.

Medallion - car sound, accessories, tools - Midland International Corp.

MEDI-SAFE - Low Leakage Medical Cable - Brand-Rex Co.

Mega-Bias - duplicating equip. & access. - International Electro-Magnetics

Megaflex - tubing, fluorocarbon, flexible - Co-Operative Inds., Inc.

Meg-A-Life II - device and program - Motorola Semiconductor Prods.

Megamemory - large scale memory system - Electronic Memories & Magnetics Corp.

Megason - ultrasonic cleaners, vapor degreasers - Ultrasonic Instrs. Int'l., Inc.

MegaSorb - pumps - Varian Assocs.

Megatrometer - high megohm meter - Penn Airborne Prods.

Megavoice - power megaphone - PASO Sound Products Inc.

MEG-CHEK - megohmmeters - Associated Research, Inc.

Megger - insulation, continuity, earth test instrs. - Biddle, James G.

Megmeter - megohm indicator, insulation tester - Ross Engineering Corp.

MEGOHMER - Insulation Testers - Sticht Co., Inc. Herman H.

Mektherm - Heater circuits - Rogers Corp.

Mektron - Printed circuitry - Rogers Corp.

Melacel - cellulose fiber - Pall Trinity Micro Corp.

Melcor - thermoelectric cooling module - Melcor-Materials Elctrn. Prods.

Meldin - polyimide molded shapes and parts - Dixon Corp.
Memotron - direct view storage tube - Hughes Aircraft Co.
Memotron - direct view storage tube - Hughes Aircraft Co.
Mentor - multimeters, limit testers, ratio trim/test instrs. - Biddle, James G.
Mercutron - keyboard switch module - Mechanical Enterprises, Inc.
Mercutronic Keyboard - computer terminal keyboard - Mechanical Enterprises, Inc.
Merix Anti-Static for Recors - LP records & electronic cleaner - Merix Chem. Co.
Merlon R - polycarbonate - Mobay Chem. Corporation
Mesa - modular semiconductor equipment - Allied Chemical Corp.
Messagefax - transmission of typed or handwritten material - Datalog Div., Litton Sys.
Metalex - shielded frames - Cal-Metex Corp.
Metal Glaze R - cermet element - TRW/IRC Potentiometers
Metal Glaze TM - thick film resistors-proprietary system - TRW/IRC Resistors
Metalonics - cathodes, dispenser. - Philips Elmet Corp.
Metanet - thick-film resistors - Sprague Elec. Co.
Meta 4® - computer systems - Digital Scientific
Met-Bel - vacuum/compressor pumps - Metal Bellows Corp.
Met Coil - multilayer ceramic inductors - Metalized Ceramics
Metfilm - metalized film dielectric capacitors - Sprague Elec. Co.
Met Gold - selective gold plating - Metalized Ceramics
Met-Loc - all metal self locking thread system - Deutsch Fastener Corp.
METOXILITE - HIGH TEMP. BONDED SILICON RECTIFIER - Semtech Corp.
Met Pac - low cost packaging - Metalized Ceramics
Metracorder - magnetic tape recorder (ASC11) - Metra Instruments, Inc.
Metralarm - high speed digital data display & alarm - Metra Instruments, Inc.
Metralogger - data & alarm printer - Metra Instruments, Inc.
Metrascope - bargraph CRT data aquisition display - Metra Instruments, Inc.
Metri-Gap - measuring gages - Lion Precision Corp
Metrion pH Meter - low cost ph meter - Coleman Instr. Div.
Metro Basket - wire material handling baskets - Metropolitan Wire Corp.
Metrobeam - construction laser - Metrologic Instruments, Inc.
"Metro-Coat" - solder coat process - Metropolitan Circuits Inc.
Metrohm - polarograph - Brinkmann Instrs., Inc.
Metso - sodium metasilicate - Philadelphia Quartz Co.
MEZZER - electronic measuring instruments - Castle TV Tuner Service, Inc.
Me-2 - dual-in-line sockets - Scanbe Canoga Industries
MF - Drake Mfg. Co.
MHTL - high-threshold logic IC's - Motorola Semiconductor Prods.
Mica and Indomica - insulation and parts - Industrial Mica Div.
Micaclad - insulation - Electric Machinery Mfg. Co.
Mica Mat - mica paper reconstituted mica - General Elec.
MIC amp R Modules - Thin Film Unit Amplifier - Avantek, Inc.
"Micanite" - micaceous materials - 3M Co.
Micapak - multilayer lamination service - Mica Corporation
Micaply - high pressure laminates - Mica Corporation
Micatemp - high temperature wire - Cerro Wire & Cable Co.
Michigan - loudspeakers - Electro-Voice, Inc.
MiCLAD - Electrical insulation - Allis-Chalmers
Mic-Pac - hi freq hi power transistor package - Microwave Semiconductor Corp.
Micro-Acoustic - audio equalizer - Frazier, Inc.
Micro Bead - thermistor - Victory Engrg. Corp.
Microceram - microminiature ceramic fixed capacitors - JFD Electronics Components Corp.
MICROCHOPPER - Solid State Chopper - Solid State Electronics Corp.
MICROCLAREED - switching assemblies - Clare & Co., C.P.
Micro-Clean - pc board in-line cleaner - Hollis Engrg., Inc.
MicroCoax - miniature semiridge coaxial cable - Uniform Tubes
Microcom - telemetry commutator - General Devices, Inc.
MicroController - bipolar microcomputer - Scientific Micro Sys.
Microdata 1600 - computer - Microdata Corp.
Microdata 32/S - computer - Microdata Corp.
Microdata 3200 - computer - Microdata Corp.
Microdata 400/10 - computer - Microdata Corp.
Microdata 800 - computer - Microdata Corp.
Microdial - digital & concentric dials - Amphenol Connector Div., Controls Opers.
Microflash - flash equipment - EG&G, Inc.
Microflector - reflectors - Microflect Co.
MICROFLEX - timers counters - Eagle Signal
Microfork - tuning fork - Murata Corporation of America
Microfuse - miniature fuses - Littelfuse, Inc.
MICRO-GAP - replacement speakers - Utah Electronic Div.
Micro-gator - Clips - Mueller Electric Co.
Microhex - connectors - Sealectro Corp.
Micro i - miniature inductors - Delevan Div., Coil Prods.
Microlet - microminature eyelet - Circon Corp.
Microloss - microwave absorbent material - Coax Devices Inc.
Micro-Master - microfilm equipment - Keuffel & Esser Co.
Micro Match - monitoring & test equip. - Bendix
Micromatic - polyester & polypropylene film capacitors (axial lead), self encased - Paktron Div.
Micro-Minac - digital computers - Singer Co.
Microminim - Flexible miniature cables - Standard Wire & Cable Co.
Micro-Optic - fiber optic controls - Dolan-Jenner Inds., Inc.
Micropac modules - process interface hardware for micro mini, maxi computers - PCS., Inc.
Micropac OEM - microcomputer based control system for the high volume OEEM - PCS., Inc.
Micropac RT - remote multiplexer for computers - PCS., Inc.
Micropac 80 - microcomputer development system - PCS., Inc.
Micropak - closed circuit TV systems - Audiotronics
Micropin - contact - ITT Cannon Electric
Micropix - cathode ray tubes - Litton Inds.
Micro-Plug - phone plugs - Switchcraft, Inc.
Micropot - precision & trimming potentiometers - Amphenol Connector Div., Controls Opers.
MicroProbe - elec. test instr. - Circon Corp.
Microram - semiconductor memory - Electronic Memories & Magnetics Corp.
MICROREED - Microminiature Reed Relay - Solid State Electronics Corp.
Micro Sentry - voltage relay - Magnetics, Div. of Spang Industries, Inc.
Microsocket - contact - ITT Cannon Electric
Microsource - power supply - Elasco
Microspec - infrared spectrophotometer - Beckman Instrs., (AISSD)
MICROSTAR - Laboratory Microscope - American Optical Corp.
Microstrate - laminates - National Beryllia Corp.
Micro-Synclamps - sub-min. servo clamps - Timber-Top, Inc.
Micro-T - miniature package (transistors) - Motorola Semiconductor Prods.
Microtech - flexible waveguides - Waveline, Inc.
Microtel - microwave radio - GTE Lenkurt Inc.
MICROTEMP - Thermal Cutoff - Micro Devices Corp.
MICROTEMP MULTIPROTECTOR - SENSES HEAT-CURRENT - Micro Devices Corp.
Microthik - keyboards - Refac Elctrns/Wild Rover
MicroTool - small hand tools - Circon Corp.
Microtransmitter - monolithic radio transmitter (1C) - Lithic Systems, Inc.
Microtron - cooking tubes - Litton Inds.
Micro-Vectorbord - Small Hole Perforated Insulating Board - Vector Electronic Co., Inc.
Micro Video - television microscope sys. - Circon Corp.
Micro Video Metrology - television microscopic measuring sys. - Circon Corp.
Micro-Well - ink rollers - Mohawk OEM Sales
Microzone - electrophoreses apparatus - Beckman Instrs., (AISSD)
MIDA - miniature integral diode assemblies - Motorola Semiconductor Prods.
MIDGET - modular integrated digital tester - PRD Elctrns., Inc.
Midgi-Coder - bcd to numeric decoder/driver - Refac Elctrns./Pinlites
Midgi-Counter - decode counter, encoder - Refac Elctrns./Pinlites
Midgi-Dial - dial assy. - Theta Instr. Corp.
Midgi-Lite - digital readout - Refac Elctrns./Pinlites
Midgi-Wedg - Drake Mfg. Co.
Midland - communication, home entertainment - Midland International Corp.
Midway - wall plates - Leviton Mfg. Co., Inc.
Mil-Clamp - coaxial connector cable attachment - Amphenol RF Div.
Mil-Crimp - coaxial connector cable attachment - Amphenol RF Div.
Mil-E-Store - military core memory system - Dataproducts Corp.
Milk-Trol - ambient-compensated temperature controllers - Honeywell
Milliken - igh-speed cameras (16 mm) - Teledyne Camera Sys.
MILLISEC - Ultra High Speed Relays - Stevens-Arnold, Inc.
MilliTorr - ionization gauge - Varian Assocs.
Mil-Loc - mil-std stressed panel fastener - Deutsch Fastener Corp.
MilMaster - electronic micrometers - Electron-Machine Corp.
Milros - mildly activated rosin flux - Alpha Metals, Inc.
Milwaukee Wrot - washers & stampings - Wrought Washer Mfg., Inc.
Mina - ball bearings - MPB Corp.
Mina-Gear - gear-motors - General Elec. Co.
Minapar - plastic bearing retainers - MPB Corp.
Minapure - lubricant - MPB Corp.
Mineac - miniature electronic auto collimator - Barnes Engrg. Co.
Mineon - Drake Mfg. Co.
MineSpot - lighting system - Mine Safety Appliances Co.
Miniature - Relay Socket - DAN-L Inc.
Mini-Aud - audio power amplifier - Dynair Elctrns. Inc.
Mini-Bal - balanced amplifier - Dynair Elctrns. Inc.
MINI BEE - Video Audio Tape Motor - Hurst Mfg. Corp.
Minibreaker - small circuit protectors - Aiken Industries
Minibridge - silicon rectifier - Elctrn. Devices
Mini/Bus - Electrical power distribution systems - Rogers Corp.
MINIBUTTON - digital (thumbwheel) switches - Digitran Co.
Minicam - camera - CBS Laboratories
Mini-Cator - indicator lights - Industrial Devices
MINI-CONSOLE - small plastic instrument enclosure - Techmar Corp.
mini-cubeR - Case A 55 mil chip capacitor - American Technical Ceramics
Mini-Dap - pulse DA - Dynair Elctrns. Inc.
Mini-Dav - video DA - Dynair Elctrns. Inc.
Mini-Davs - syne-mixing video DA - Dynair Elctrns. Inc.
Mini-Dial - dial assy. - Theta Instr. Corp.
Minidisc Package - impatt diodes - Hughes Aircraft Co.
Mini-Fade - 2-input video fader - Dynair Elctrns. Inc.
MINIform - coaxial RF switches - Amphenol RF Div.
Mini-gator - Clips - Mueller Electric Co.
MINI-GUN - heat tool - Raychem Corp.
Minilamp - minature indicator lights - Int'l. Prods. Inc.
MINILEVER - digital (thumbwheel) switches - Digitran Co.
Miniload - Miniature RF Loads - Bird Electronic Corp.
MINILOK - terminal blocks - Burndy Corporation
Mini-Matrix - plugboard switch - NES, Inc.
Mini-mike TM - Miniature slide switches - Chicago Switch, Inc.
MINI-MISER - low-cost stepping motor - Ledex Inc.
Mini Mite - portable potentiometer - Thermo Elec. Co., Inc.
Mini-Mix - mixers, adapters, audio accessories - Switchcraft, Inc.
Mini-Mod - audio-video modulator - Dynair Elctrns. Inc.
Mini-Monitor - Miniature RF Wattmeters - Bird Electronic Corp.
Mini-Mop - video cable equalizer - Dynair Elctrns. Inc.
"Mini-Mounts" - a sys. for prototype circuit assembly (breadboarding) - Christiansen Radio Inc.
Mini-Mov - metal oxide varistor - General Elec. Co.
MiniOhm - miniature resistors - General Resistance, Inc.
Minipak - soldering equip. - Electrovert
Mini-Pre - audio pre-amplifier - Dynair Elctrns. Inc.
Miniprogrammer - programming switches - Cole Instrument Corp.
Mini-Reader - portable rh-temp indicator - American Instr. Co.
MINIREED - Miniature Reed Relay - Solid State Electronics Corp.
Mini-Rote - rotary commutator - Airflyte Elctrns. Co.
MiniSat - low VCE (sat) transistor - PowerTech, Inc.
Mini Sentry - infrared intrusion detector - Laser Systems Corp.
Mini-Seq. - sequential switcher - Dynair Elctrns. Inc.
Minisert - miniature p.c. socket - Berg Electronics
Miniservo - Compact Lab Recorder - Esterline Angus
Mini-Slide - pilot lights & sockets - Industrial Devices
Minisource - power supply - Elasco
Mini-Split - special effects generator - Dynair Elctrns. Inc.
Mini-Spot - Screen Brightness Meter - Photo Research Corp.
MINISTAC - SUB-MINIATURE HIGH VOLTAGE - Semtech Corp.
MINISTIC - SUB-MINIATURE SILICON RECTIFIER - Semtech Corp.
Mini-Store - commercial core memory system - Dataproducts Corp.

MINISWITCH - digital (thumbwheel) switches - Digitran Co.
Mini-Synclamps - min. servo clamps - Timber-Top, Inc.
Mini-System - digital strain recorder - B & F Instrs., Inc.
Mini T - subminiature 5 amp general purpose relay - Teledyne Relays
Minitac - connectors - Hypertronics Corp.
Minit-Cure - epoxy adhesive - Packaged Resins Div.
Minit-Cure - epoxy adhesive - Allaco Prods Div.
Mini-Test - continuity tester - Industrial Devices
Minithin - thin wall teflon wire - Thermax Wire Corp.
Minitron - hermetically sealed miniature inverter - Nova Electric Mfg. Co.
Mini-Twister - wire twisting device - Storm Products Co.
Miniverter - miniaturized frequency changers/inverters - Nova Electric Mfg. Co.
Mini-Volt - voltage testers - Industrial Devices
Mini-Wedge - pilot lights & sockets - Industrial Devices
Mini-3 - 3 input video switcher - Dynair Elctrns. Inc.
Mini-6 - video switcher - Dynair Elctrns. Inc.
MIN-KAPS - ceramic capacitors - Centralab
Minnie - connector - Amphenol Connector Div.
Mirr-Maid - mirror pictures - Thin Film Services
Mirropane R - transparent mirrors - Libbey Owens-Ford Co.
Misco Redline - replacement & specialty speakers - Minneapolis Speaker Co.
Miser - micropower led flasher (1C) - Lithic Systems, Inc.
Missilite - Rectangular Annunciator Light - Illuminated Products Inc.
Mix-Kit - package device for 2-part compounds - Hardman Inc.
MKS Baratron - pressure-vacuum meter - MKS Instrs., Inc.
MLC - multilayer monolytic capacitor - Radio Materials Co.
MMOS - MOS logic IC's - Motorola Semiconductor Prods.
Mobilaxm - back-up alarms - Midwest Electronic Industries
Mobilflash - alternating flasher - Midwest Electronic Industries
Mobilfone R - radio communication equip. - Mobil Electronics, Inc.
Mobilite - L.V. lights - Midwest Electronic Industries
Mobilmatic - remote control - Mobil Electronics, Inc.
Mobilpage - business sound system - Midwest Electronic Industries
Mobiltel - mobile telephone equipment - GTE Lenkurt Inc.
Mobiltemp - remote temp. indicator - Midwest Electronic Industries
Mobiltone R - tone signalling equip. - Mobil Electronics, Inc.
Model AP - Tape/Ticket Printer - ITT General Controls
Model D Decade - digital printer - ITT General Controls
MODEL T - Sync Instrument Motor - Hurst Mfg. Corp.
Model UP - Universal Ticket Printer - ITT General Controls
Modems - medium and high speed data sets - International Communications
Modpak - closed circuit TV systems - Audiotronics
Modscan - data acquisition & control systems - LFE Control System Industries
Moducal® - lightweight fiberglass panels - SGL Graphics
Mod-U-Card - modular plug-in circuit cards - NES, Inc.
Modulair - cabinet panel - Rotron, Inc.
Module-Masq - semi-automatic selective gold plating sys. for sheet & strip. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Module-Matic - tape controlled plating sys. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Module-X - modular plating equip. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Moduline - gas chromatography instruments - Varian Assocs.
Moduline - gas chromatographs - Varian Assocs.
Moduline - rotary switches - Oak Inds. Inc.
Modulite® - sign panels and displays - SGL Graphics
Modul/Matic - color analyzer - Lektra Labs., Inc.
Moduload - RF Loads with integral heat exchangers - Bird Electronic Corp.
MODULOK - terminal blocks - Burndy Corporation
Modu-Mount Cabinetry - electronic enclosures - Honeywell Inc.
Modupac - modular logic circuits - Analogic Corp.
MODUPANEL - rack adapter systems for modular supplies - Systron Donner Trygon Div.
Moduprint - printers - Practical Automation, Inc.
Modutrim - microminiature ceramic variable capacitors - JFD Electronics Components Corp.
MOISTURPUMP - industrial dehumidifiers - Electro Impulse
MOLALLOY - solid lubricant components - Pure Carbon Co., Inc.
Molan - computer control language - Harrel, Inc.
"Mold-Ease Conc. Pcr" - mold lubricant - Merix Chem. Co.
Molded Heat - molded to shpae electrical heater - Sierracin/Thermal Sys.
"Molded-On" - cable end molding - Barker Prods. Co.
Molgard - mold release agent - Ram Chems.
Moli-Spray - Lubricants, molybdenum disulfide aerosol - Rogers Corp.
Molydag - dry film lubricants - Acheson Colloids Co.
Molyspray - molybdenum metallizing wire - Philips Elmet Corp.
Monastrip EP - epoxy stripper - Mona Inds., Inc.
Mono AD - I.C. A/D converter - Precision Monolithics Inc.
Monobeam - infrared analyzers - Beckman Instrs., (AISSD)
Monobloc - Monolithic ceramic capacitors - Erie Technological Products
Monobond - epoxy adhesive - Allaco Prods Div.
Monobond - epoxy adhesive - Packaged Resins Div.
Monoceram - monolythic type ceramic capacitor - San Fernando Elec. Mfg.
Monochip - custom integrated circuit - Interdesign Inc.
Mono CMP - monolithic comparater - Precision Monolithics Inc.
Mono DAC - monolithic D/A converter - Precision Monolithics Inc.
MONO-KAP - ceramic capacitor - Centralab
MONO-KAP TM - ceramic capacitors - USCC/Centralab, Elec. Div.
Monolithic - switch arrays - Refac Elctrns/Wild Rover
Mono OP - monolithic operational amplifier - Precision Monolithics Inc.
"Mono-Pole" - steel antenna supporting mast structures - Telrex Labs.
Monopoxy - single-component epoxy resin adhesive - Hardman Inc.
Monoxor - Carbon Monoxide Detector & Indicator - Bacharach Instrument Co.
Monsanto - Electronic Test and Measurement Equipment - United Systems
Moody - hand tools - Moody Tools, Inc.
Moody Kit - tool sets - Moody Tools, Inc.
MoON-X - high perfection silicon - Monsanto
Mother Trucker - Truck Antenna - Hy-Gain Electronics Corp.
Motogard - motor overtemperature protection system - Power Control Corp.
Motomatic - motor & speed controls - Electro-Craft Corp.
Motopulse - rotary solenoid - Barber Corp.
Mototrol - pressure operated control - Autocon Inds., Inc.
Mounty - hand lamps - Teledyne Big Beam
MPC - precision coaxial connectors - Maury Microwave Corp.
MPF - precision waveguide flanges - Maury Microwave Corp.
MP-System 1000 - modular instrumentation system - McKee-Pedersen Instrs.
Mr. Battery - custom battery designs - Power, Inc.
MRTL - resistor-transistor logic IC's - Motorola Semiconductor Prods.
MSP - miniature surge protector - Joslyn Elctrn. Sys.
MTLC - ultraminiature tuners - JFD Electronics Components Corp.
MTM - magnetic tape memory - Raymond Engrg. Inc.
MTNS - metal thick nitride semiconductor - General Instr. Corp.
MTOS - metal thick oxide semiconductor - General Instr. Corp.
MTTL - transistor-transistor logic IC's - Motorola Semiconductor Prods.
Mu-Caps - capacitors, fixed, ceramic - Republic Elctrns. Corp.
Mucon - capacitors, fixed, ceramic - Republic Elctrns. Corp.
Muffin - fan - Rotron, Inc.
Muffle Module - sound enclosure - Automation Devices, Inc.
Multibit - multi state core for memory applications - Electronic Memories & Magnetics Corp.
Multi-Cell II - silicon high-current rectifiers - Motorola Semiconductor Prods.
Multi-CJ - multi calibration cold junction reference source - Omega Engrg., Inc.
Multi-Coax - coaxial contacts - Amphenol RF Div.
Multicore - solder & chemicals - Multicore Solders
Multidex - rotary switches - Oak Inds. Inc.
Multidial - Turns Counting Dial - Spectrol Electronics Corp.
Multiductor - tripple frequency convertor - Ajax Magnethermic Corp.
Multiflash - flash equipment - EG&G, Inc.
Multiform - glass and glass-ceramic preforms & spacers - Corning Glass Works, Television Prods. Div.
Multimemory - semiconductor memory system - Electronic Memories & Magnetics Corp.
Multi Mite - portable potentiometer - Thermo Elec. Co., Inc.
Multi-Mode Tonotron - direct view storage tube - Hughes Aircraft Co.
Multi-Mode Tonotron - direct view storage tube - Hughes Aircraft Co.
Multi-Pac - Power Supply - Velonex, Instrument Div.
Multi-Pac R - multiple PC boards, sandwiched - Elfab Corp.
Multipak - powder compacting presses - Pentronix
Multipak - closed circuit TV systems - Audiotronics
Multiple Microflash - flash equipment - EG&G, Inc.
Multiplex - Paper making machinery - Allis-Chalmers
Multi-Printer - digital printer - ITT General Controls
Multi-Swage - swaged electronic components - Bead Elctrns.
Multi-Switch - "multi-switch" switches - Switchcraft, Inc.
Multisyn - encoder - Del Electronics Corp.
Multitron - gamma radiography machines - Automation Inds.
Multiwire - circuit board - Photocircuits Div., Kollmorgen Corp.
Multizone R - zone melting apparatus - Materials Resch. Corp.
Musicaster - speaker system - Electro-Voice, Inc.
Musicaster - loudspeaker - Electro-Voice, Inc.
Muxpac&T - Ultra high impedance 8-channel multiplexer - Analogic Corp.
MVM - air variable - JFD Electronics Components Corp.
mW MRTL - resistor-transistor logic IC's - Motorola Semiconductor Prods.
Mycro Z - polished silicon wafers - Siltec Corp.
Mykroy - glass bonded mica - Synthane Taylor Corp.
M2 - memory module - MI2 Data Systems Inc.

N

NAFOAM - low-capacity instrumentation cables - National Wire & Cable Corp.
NAFOIL - Foil-shielded cables - National Wire & Cable Corp.
Namograph - marking machines - Kingsley Mach. Co.
Nanaline - delay line fixed - Bel Fuse
Nanistor - high speed resistors - General Resistance, Inc.
Nanocom - telemetry commutator - General Devices, Inc.
Nanohex - connectors - Sealectro Corp.
Nanologic - data acquisition and timing system - Chronetics, Inc.
Nanomemory - Core memory system - Electronic Memories & Magnetics Corp.
Nanos - fan - Rotron, Inc.
Nano-Skan - reflective skanner - Skan-A-Matic Corp.
Narrow-Caps - capacitors, fixed, ceramic - Republic Elctrns. Corp.
Natite - industrial ceramic materials - Nat'l Ceramic Co.
Navtrak - navigation systems - Edo Western Corp.
NCG - oxy fuel gas welding apparatus - Chemetron Corp.
Needle Finder - needle merchandiser - Ev-Game Inc.
Neg'ator - constant force spring - Ametek, Hunter Spring Division
NELWELD - equipment - Nelson Stud Welding TRW Inc.
NEOFLEX - Neoprene insulated welding cable - CCS Hatfield Wire & Cable Group
Neptune - San Fernando Elec. Mfg.
NETIC - magnetic shielding material - Perfection Mica Co.
Neumann - condenser microphones, disk cutting equip., rumble meters, phase correlation meters - Gotham Audio Corp.
Neutralite - Device for voltage regulators - Allis-Chalmers
Neutronex - neutral noncyanide gold electroplating process. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Newdamp - balancing fluid - Bacon Inds.
New Easy - cutting machine - Porter, H.K., Inc.
Newtron - digital readout tube - Apollo Corp.
N-GAS - special mixture for chemical vapor deposition of silicon nitride. - Matheson Gas Products
Nial - thermocouple alloy - GTE Sylvania Inc.
Nicad - nickel codimur Botteur - Gould, Inc.
Nickelply - steel wire (nickel-coated) - Nat'l-Standard Co.
Nicoro - brazing alloys - Gte Sylvania, Inc.
Nicoro 80 - brazing alloys - Gte Sylvania, Inc.
Nicusil 3 - brazing alloys - Gte Sylvania, Inc.
Night Lark - power failure lights - Teledyne Big Beam
NiGuard - Ceramic Capacitor - AVX Ceramics
NIMO R - 10 & 64 gun CRT - Industrial Elctrn. Engrs.
Nimpac - Power Supply - Velonex, Instrument Div.
90° Sweep - sweep right angle TNC, N & SMA, SC - Astrolab, Inc.
Nioro - brazing alloys - Gte Sylvania, Inc.

Niromet - controlled expansion alloy - GTE Sylvania Inc.
Niron - controlled expansion alloy - GTE Sylvania Inc.
Ni Span C Alloy 902 - temperature compensated material - Engelhard Minerals & Chem.
Nitrophyl - Cellular hard rubber floats - Rogers Corp.
Nitrox® - reactor system - Applied Materials Inc.
Nixie R - indicator tube - Burroughs Corp.
Nixox - catalyst chamber - Air Prods. & Chems., Inc.
Noals - automatic noise level adjuster - Altec Div.
No Arc - hi voltage insulator - Chemtronics, Inc.
Nobex - components - NOBEX Div.
NoBrush - permanent magnet converters, frequency-generators, & alternators - Georator Corporation
Noisefoe - ear muffs - Mine Safety Appliances Co.
Nokorode - soldering flux - Dunton, M.W. Co.
Nomad - portable cases - B & F Instrs., Inc.
No-Mar - special set screw - PIC Design Division
No-Nik - wire stripper - Clauss Cutlery Co.
Nontact - non-contact temperature sensor - Trans-Met Engrg.
Norac - non-rotating armored cable - Boston Insulated Wire & Cable Co.
Norbatherm - temperature controller - Cross Electronics Inc.
Nordic - high density connector - Viking Inds., Inc.
Normatic - solid state welder control - Square D Co.
Normatype - drytransfer lettering - Keuffel & Esser Co.
Norpak - solid state logic control - Square D Co.
NORPLEX - Industrial Laminated Thermosetting Plastics - Norplex Div.
Norseman - hand tools - Erikson Specialized Tool Co.
Norsman - wire wrap connector - Viking Inds., Inc.
North Seeker - gyro/repeater sys. - Humphrey, Inc.
Noryl - thermoplastic resin - General Elec.
Noryl Resins - phenylene oxide based resins - General Elec.
No-Slip - positive drive belt - PIC Design Division
No-Til - Planters - Allis-Chalmers
Novacon - DC to DC converter - Nova Electric Mfg. Co.
Novadisc® - fixed-head disc - Data General Corp.
Novaerter - frequency changers/inverters - Nova Electric Mfg. Co.
NOVA-1200,1210,1220,800,820,840,2,830 - computers - Data General Corp.
N-S Rocket Wire - high-tensile wire - Nat'l-Standard Co.
Nu Blac - ceramic products - Star Porcelain Co.
Nucor - power components - NUCOR Corp.
Nurl-Loc - Terminals, wire-wrap panels, sockets, test jacks. - Richardson
Nutsert - insert fasteners - Avibank Mfg. Inc.
Nyebar - barrier film - Nye, William F., Inc.
Nyetact - electrical contact lubricant - Nye, William F., Inc.
NYFAB - Nylon monofilament fabric - Wire Cloth Enterprises, Inc.
NyGrip - Nylon Cable Clamp - Weckesser Co. Inc.
Nylafil - fiberglass reinforced nylon - Fiberfil Div. Dart Ind.
NYLET - terminal bushings. - Heyman Mfg. Co.
Nylobond - connectors - Amp Inc.
NYLOCLIP - nylon cable clip - Burndy Corporation
Nylode - talc reinforced nylon - Fiberfil Div. Dart Ind.
Nylox - adhesive composition for nylon, etc. - Hardman Inc.
Nyloy - rod ends with ball bearings - MPB Corp.
Nystagmotrac - optical stimulator - Beckman Instrs., (AISSD)
NYTYE - wire & cable ties - Heyman Mfg. Co.
N-4 - zirconium copper alloy - Nippert Co.

O

Observer - cctv cameras - Blonder-Tongue Labs., Inc.
Odin - edgeboard connnector - Viking Inds., Inc.
O-GAS - special mixture for chemical vapor deposition of silicon dioxide. - Matheson Gas Products
OHFST - clear fused quartz - Amersil, Inc.
Ohiohm - resistors - Ohio Carbon Co.
Ohmega - conductor-resistor laminates - Mica Corporation
Ohm-Free 1035 - thick film conductor ink - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Ohmpath - thick film resistive inks. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Oildag - lubricant - Acheson Colloids Co.
Oilon PV80 - self lubricating plastic - Cadillac Plastic & Chemical
Oilostatic - oil pressure pipe type cable transmission systems - Okonite Co.
OK - company name - O. K. Machine & Tool Corp.
Okoclad - aluminum sheathed wiring systems - Okonite Co.
Okocord - portable cord and flexible cable - Okonite Co.
Okoflex - instrument control tubing - Okonite Co.
Okoguard - high-voltage cable - Okonite Co.
Okolene - (polyethylene) insulated wire - Okonite Co.
Okometal - fatigue-resistant alloyed lead sheaths - Okonite Co.
Okonite - wire, cable, tape, rubber & cement splice roller - Okonite Co.
Okoprene - cable & wire protective coverings - Okonite Co.
Okoseal - chemical resistant cable and wire - Okonite Co.
Okosheath - covering for lead-sheathed cable - Okonite Co.
Okotherm - high temperature cable - Okonite Co.
Olympic Series - CATV systems & equipment - C-COR Elctrns.
OMAG, MULTISCOPE - magnifiers, microscopes - Heitz, Inc., Karl
Omega - data reduction sys. - Beckman Instrs., (AISSD)
Omega - Metallic seals - Servotronics, Inc.
Omegaclad - insulated wire - Omega Engrg., Inc.
Omegalok - compression fitting - Omega Engrg., Inc.
Omegatite - thermocouple insulators - Omega Engrg., Inc.
OMI - electronic components - Omtronics Mftg., Inc.
Ommi-Coat - nuclear gauges - Nuclear Resch. Corp.
Omnephase - AC phase controls - Omnetics, Inc.
Omnetime - solid state timers - Omnetics, Inc.
Omni-Amp - thermocouple amplifiers & transmitters - Omega Engrg., Inc.
OMNICLOSURE - electronic enclosures - Techmar Corp.
Omnicorder - miniature recorder - Edison, Instr. Div.
Omnidaptor - universal 45 RPM adaptor - Aldshir Mfg.
OMNIFEROUS® - real-time FFT analyzers - Nicolet Scientific Corp.
Omni-Glow - pilot lights - Industrial Devices
OMNIGRAPHIC - graphic recorders - Houston Instrument
Omniguard - monitor - Edison, Instr. Div.
Omni-II - deposit control master - Sloan Technology Corp.
Omni-Lert - programmable indicator lights - Industrial Devices
Omniprox - proximity sensors - Scientific Technology
OMNISCRIBE TM - strip chart recorders - Houston Instrument
Omnisort - document sorting system - E-Systems Inc.
Omni-Spra - special aerosol extender - Tech Spray, Inc.
OmniTester - automatic circuit test set - Automatic Production Systems Inc.
OMNY-BUS - laminar bus bar - Methode Elctrns., Inc.
OMNY-PAC - printed circuits/I. C. applications - Methode Elctrns., Inc.
#1 Gun - portable electric heat gun - Burlington Opers. Div.
1+1 - two tone selective call system - Bramco Controls Div.
1420 LINEAR TESTER - bench top IC tester for linear IC's - Sitek, Inc.
"On The Ball" - aerospace chemical - Merix Chem. Co.
O-Pac - power packs - Opad Elec. Co., Inc.
"Open-Aire" - stero headphones - Sennheiser Elctrn. Corp.
Operational Filter - multifunction variable filter - Rockland Sys. Corp.
Optach - shaft encoder - H H Controls Co., Inc.
Optecon - optical incremental encoders - Data Technology Inc.
Opticator - electroluminescent readout - Bowmar Instr. Corp.
Opti-Coder - encoder - Sequential Information Systems
OPTIMA - electronic enclosures - Optima Enclosures
Option Blocks - individual/dual terminators resistor networks pull up/pull down interface resistor networks - Pulse Engrg., Inc.
Opti-Scan - encoder - Sequential Information Systems
Opti-Sensor - pick off - Sequential Information Systems
Optivue Plus - CRT lifetime warranty - Channel Master Div. Avnet
Opto-Hybrids - hybrid microcircuit subsystem combining photovoltaic sensor, current amplifier, level detector and dtl/ttl output amplifier - Centralab Semiconductor
Optoline - pc board assembly director - Hollis Engrg., Inc.
Optosafe - safety curtains & spatial volume sensor - Scientific Technology
Optosil - clear fused quartz - Amersil, Inc.
Optoswitch - led photoelectric controls - Scientific Technology
Orange Drop - radial lead film capacitors - Sprague Elec. Co.
OraSorb - carbon filter for plating baths. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Orcon Switch - pushbutton switches - Switchcraft, Inc.
Original Bright Gold - cyanide gold plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Orthomode - hybrid mixers - Varian Assocs.
ORTHOMODE - hybrid mixers - Varian Electron Tube & Device Grp.
Orthomode Mixers - microwave rf mixers - Varian Solid State East Beverly Div.
ORTHONOL - magnetic materials - Magnetics
Orthonull® - balance finder - General Radio Co.
Orthosil - special lamination material - Thomas & Skinner, Inc.
Orthospan Mixers - microwave mixers - Varian Solid State East Beverly Div.
Orthostar - Double Balanced Mixer - Aertech Industries
Oryx - subminiature soldering irons - Telvac Instr. Co.
OSCIDUCER - Pressure-To-Frequency Converter - Solid State Electronics Corp.
Osha-Spec - safety products - Cadillac Plastic & Chemical
OSM - omni spectra miniature - Omni Spectra
OSSM - omni spectra sub-miniature - Omni Spectra
OTA - operational transconductance amplifier - RCA Solid State Div.
Outdoorsman - battery-operated lanterns - Teledyne Big Beam
Ovalite - pilot lights - Industrial Devices
Overlay - RCA's high-frequency RF technology - RCA Solid State Div.
Oversewing Machine - book binding sewer - A. M. W. Corp.
Oxytron - complete pre-plate sys. for printed circuit production. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Oyltite-Stik - sealant and pipe thread compound - Lake Chemical Co.

P

Pacecom - computer cables - Pace Wire & Cable Corp.
Pace/pak - modular hydrid circuits - International Rectifier Corp.
Pacer - mercury-vapor photo printers - Chemcut Corp.
Pacers - temperature compensated reference diodes - Centralab Semiconductor
Pachydyne&T - R. F. power supply - Applied Materials Inc.
Page-All - Telephones - Fanon/Courier Corp., Subs.
Pageant - replacement phonograph stylii - Pageant/M.A. Miller Co.
Pagemaster - paging sys - Bogen Div.
Pak-Drives - control systems - Sequential Information Systems
Pak-Rak - storage rack - test rack or shipping container - UNITRACK Div.
Pak Series - 4 to 12kw electron beam power supplies - Sloan Technology Corp.
Pak-X-Trac - DIP desoldering tool - Nu-Concept Computer Systems, Inc.
Palco - brazing alloys - Gte Sylvania, Inc.
Pall - filters - Pall Trinity Micro Corp.
Palladex II - palladium plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
PallCell - filter medium - Pall Corp.
Pall-Flo - valve - Pall Trinity Micro Corp.
Pallmatic - drain valve - Pall Trinity Micro Corp.
Paloro - brazing alloys - Gte Sylvania, Inc.
PAMCO - electro-mechanical assembly service - Paraplegics Mfg.
Panalyzer - x-ray spectrochemical analyzer - Panametrics Inc.
Panaplex R - panel display - Burroughs Corp.
Pan-A-Trol - control panels - General Elec. Co.
Panavox - Ceiling &/or Wall Loud Speaker - Wilder Engrg. Prods, Inc.
Pancake - Overfloor raceways systems - Wiremold Co.
Panduct (R) - Plastic Wiring Duct - Panduit Corp.
Panel Mite - standard size thumbwheel switch - Tech Labs., Inc.
Paneltone 87D - metal display panels - Panelgraphic Corp.
Panhandle - carrier equipment - GTE Lenkurt Inc.
Pan-L-Clad - plastic-metal laminated panels - Photo Chemical Prods. Cal.
Pan-Term (R) - Solderless Terminals - Panduit Corp.
Panther - rubber, friction and plastic tapes - Okonite Co.
Pan-Ty (R) - Cable Ties - Panduit Corp.
Paper Riter - felt tip marker - Lake Chemical Co.
Paraformer - Line Conditioner - Tele-Dynamics/Wanlass
PATCH-OHM - resistor block - Cambridge Thermionic Corp.
PATHE ELECTRONIC - cameras, motion picture 16mm and double-super 8mm - Heitz, Inc., Karl
Patinate - lead plating process - Conversion Chem. Corp.
Patrician - deluxe spkr. sys. - Electro-Voice, Inc.
PDC - solid state & incandescent display sys. - Precision Dynamics Corp.
PDP - Programmable Data Processor - Digital Equipment Corp.

PDQ - Modular edgeboard connector - Stanford Applied Engineering
PEAC - photo-electronic auto collimator - Barnes Engrg. Co.
Peaklite - indicator light - Penn Keystone Corp.
Peaklok - transient voltmeter - Pioneer Instrumentation
Peak-N-Notch - active band pass/stop filter - Radiation Devices Co.
Peak Shock Annunciator - an instrument for indicating that specific preset response accelerations have been exceeded - Engdahl Enterprises
Peak Shock Recorder - an instrument for sensing & recording response spectrum - Engdahl Enterprises
PEC (within a diamond) - thick film circuits - Centralab
PEDALINE - Footswitches - Line Electric Co. Unit Esterline Corp.
PED-A-VAC - low cost desoldering equipment - Pace Inc.
Pee-Wee - Clips - Mueller Electric Co.
Pegi - Insulating cable cleats - Adalet Mfg. Co.
Pelaspan Pac - protective packaging foam - Dow Chemical Co.
Pelican - Hydraulic Flow Control Gates - Allis-Chalmers
Pem - self-clinching fasteners - Penn Engrg. & Mfg. Corp.
PemFlex - self-locking fasteners - Penn Engrg. & Mfg. Corp.
PemHex - self-clinching, self-locking fasteners - Penn Engrg. & Mfg. Corp.
PemSert - self-clinching flush fasteners - Penn Engrg. & Mfg. Corp.
Pem-Serter - automated press - Penn Engrg. & Mfg. Corp.
Penfile - burnisher cleaner - Jonard Industries Corp.
"Pennlon" - molecular reinforced polyolefin - Dixon Corp.
Pentaflow - premium grade miniature fans - Pamotor, Inc.
PEP-AST - analog storage terminal - Princeton Elctrn. Prods.
PEP-VID - video image differentiator - Princeton Elctrn. Prods.
PEP-400 - image storage & scan conversion terminal - Princeton Elctrn. Prods.
PEP-402 - image storage & scan conversion terminal - Princeton Elctrn. Prods.
PERFAB - Perlon monofilament fabric - Wire Cloth Enterprises, Inc.
Perfect Pair - matched emitter/sensor optohybrid assembly - Centralab Semiconductor
PERI-APOLLAR - lenses - Heitz, Inc., Karl
Perma Brush - rotating switch - General Devices, Inc.
Perma-Cell - rechargeable batteries - General Elec. Co.
Permafoam - shielded foam transmission line - Columbia Elctrn. Cables
PERMALENE EP - Ethylene propylene rubber insulation - CCS Hatfield Wire & Cable Group
PERMALENE PE - High-molecular weight insulation - CCS Hatfield Wire & Cable Group
PERMALENE XP - Corss-linked polyethylene insulation - CCS Hatfield Wire & Cable Group
Permalex - electrical apparatus - General Elec. Co.
Permaline - cable jacketing material - Columbia Elctrn. Cables
Permaline - seismic base slip tables - Unholtz-Dickie Corp.
Permanode - platinized tentalum anodes. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
PERMAPRENE - Neoprene jacket - CCS Hatfield Wire & Cable Group
Perma-Probe - leak detector sniffer probe - Varian Assocs.
Perma-Resin - resin coating systems - Photo Chemical Prods. Cal.
Perma-Shield - pressure-sensitive wire markers - Brady Co., W. H.
PERMA–TORQ - coil forms - Cambridge Thermionic Corp.
Permohm R - Uniform Web Lead-In Wire - Belden Corp.
Permopad - permanent p.c. component spacers - Bivar, Inc.
Pestilyzer - measuring instruments - Varian Assocs.
Petrosorb - adsorbent filled cartridge - Pall Trinity Micro Corp.
Petrosorb - filter housing - Pall Trinity Micro Corp.
P-F - plastic fabricated dust bellows - Gagne Assocs., Inc.
Phantom Power - neumann simplex power supply for condenser microphones - Gotham Audio Corp.
Phase/AMP - SCR power control - Halmar Electronics, Inc.
Phazor - phase measuring equip. - Industrial Test Equip.
Phenolite - laminated plastics - NVF Co.
Phenoweld - phenolic adhesives for nylon, etc. - Hardman Inc.
Phi-Deck - cassette tape transport - Individualized Instruct. Inc.
Phonalert - Telephone Comm. System Accessory - Phone-Aid Co.
Phosroc - high temperature wire - Cerro Wire & Cable Co.
Photact - photographic papers and films - Keuffel & Esser Co.
Photo Etch - printed circuit set - Datak Corp.
Photofluorometer - photoelectric fluorometer - Coleman Instr. Div.
Photoforming - chemical milling - Hamilton Technology, Inc.
Photo-Lux - back illuminated panels - Photo Chemical Prods. Cal.
PHOTOMOD - photocell coupler - Clairex Elctrns. Inc.
Photo-Optic - photoelectric controls - Dolan-Jenner Inds., Inc.
Photorepeater - automatic sys-electro-mechanical-optical - GCA/David W. Mann
Picabond - communications splice - Amp Inc.
PICOCLAREED - switching assemblies - Clare & Co., C.P.
Picofuse - miniature fuses - Littelfuse, Inc.
Picomin - microminiature vibration transducer - Endevco
PICOMM - coordinate measuring machine - Potter Instr. Co.
Pico-Pac - Power Supply - Velonex, Instrument Div.
PICOREED - switching assemblies - Clare & Co., C.P.
Picotrim - capacitors - Voltronics Corp.
Pidg - terminals & splices - Amp Inc.
Piezite - ceramic crystal - Endevco
Piggy - wire connectors - Thomas & Betts Co.
PIL - miniature pulse transformer - TRW/UTC Transformers
Pin Bar® - solderless bus bar - Lear Siegler
PINCOMM - pin compatible core memory - Standard Memories, Inc.
Pinlite - micro-miniature lamps - Refac Elctrns./Pinlites
Pin Saver - pin straightener, connector - Air-O-Tronics Prods.
Pintofile - instrument systems terminal - XINCOM Corp.
Pipetite Paste & Stik - sealants & pipe thread compound - Lake Chemical Co.
Pipix - fiber optic crt's - Litton Inds.
Pistoncap - trimmer capacitors - Sprague-Goodman Electronics, Inc.
Pitmo - d-c motors - Pittman Corp.
Pitran - pressure sensitive transistors - Stow Labs., Inc.
Pittman - d-c motors - Pittman Corp.
Pixie - force transducer - Endevco
PIXIEPOT(R) - 10-turn potentiometer - Duncan Electronics, Inc.
Placovar - alloy - Hamilton Technology, Inc.
Planar Coax - microelectronic interconnection and packaging technique - Bunker-Ramo Corp.
Planetgear - counters - Haydon Switch & Instr., Inc.
Plaqohm - placque type power resistors - Ward Leonard Elec. Co. Inc.
Plaslode - talc reinforced polypropylene - Fiberfil Div. Dart Ind.
Plaslube - lubricated thermoplastics - Fiberfil Div. Dart Ind.
Plasma-Lux/Plasmalux - digital readouts - Cherry Electrical Prods. Corp.
Plasma-Power - laser power supplies - Crestronics Inc.
Plasti-Bond - terminals - Amp Inc.
Plasti-Cal - top-laminated transfers - Meyercord Co.
Plastic-Pack - Concave backing material - Allis-Chalmers
"Plastiform" - flexible magnets - 3M Co.
Plasti-Grip - terminals & splices - Amp Inc.
Plastilease - mold release agent - Ram Chems.
PLASTI-PAK - plastic packaging material - Centralab
Plasto-Joint Stik - pipe thread compound - Lake Chemical Co.
Platanex III - platinum plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Platanium Anodes - platinum plated titanium anodes - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Plazma-Beam - zone refining equip. - Materials Resch. Corp.
Plenco - phenolic molding compounds - Plastics Engrg. Co.
Plesa - passivated diodes - Varian Solid State East Beverly Div.
Plike - wire stripping plier - Hunter Tools
Plug-In Analyzers - spectrum analyzers - Nelson Ross Elctrns.
Plugmold - Multioutlet Systems - Wiremold Co.
Plug-N-Probe - probe, test - Air-O-Tronics Prods.
Plug Stat - temp sw - Control Prods., Inc.
Plumbicon - TV camera tubes - Amperex Elctronic Corp.
Plusistor - positive temperature coefficient thermistors - Victory Engrg. Corp.
PLYCON - harness systems - Methode Elctrns., Inc.
PLYO-DUCT - flat, flexible cable - Methode Elctrns., Inc.
PMB - magnetic brake - General-Electro Mechanical
PMC - magnetic clutch - General-Electro Mechanical
PMI - phono accessories & parts - Pageant/M.A. Miller Co.
Pneu-Therm - pneumatic-temp tranducers - Dynamic Controls Corp.
PNR - control cable - Cerro Wire & Cable Co.
PNRX-90 - control cable - Cerro Wire & Cable Co.
Pocket Magnetometers - gauss meters - Annis R B Co.
Pogo Contact - connectors (contacts-spring loaded) - Pylon Co., Inc.
Poke-Home - crimp contacts - Amphenol Connector Div.
POKE-HOME - removable contact connector - Amphenol Ind'l. Div.
POLARFLEX 10 - Hot-Melt strippable coating - Western Coating Co.
PolarHex - positive polarization means for coupling connectors - Hughes Aircraft Co., Connecting Devices
"Polarizing Screwlocks" - locking device for rack & panel connector - Continental Connector Corp.
Polar Path - gyro magnetic compass system - The Bendix Corp.
Polasheet - conductive gasketing - Cal-Metex Corp.
Polastrip - conductive gasketing - Cal-Metex Corp.
Policefax - transmission of fingerprints - Datalog Div., Litton Sys.
POL-LAR - formed capacitor covers - Precision Paper Tube Co.
Poly-C - capacitor - General Elec. Co.
Polycarbafil - fiberglass reinforced polycarbonate - Fiberfil Div. Dart Ind.
Polychip - copper-plated teflon chip capacitor - Polyflon Corp.
Polycycle - motor-generators - General Elec. Co.
Poly-Dimensional - Styled Small Instrument Enclosures - Amco Engineering Co.
Polydyne - speed drives - General Elec. Co.
Polyguide - clad laminates - Burlington Opers. Div.
Poly-Lok - polyethylene compound - Superior Cable Div.
Polynoid - linear induction motor - Skinner Polynoid Div.
Poly-Planar - plastic wafer-thin loudspeakers - Era Acoustics
Poly-Planar - plastic wafer-thin loudspeakers - Magitran Co.
Poly Q - liquid scintillation sample vials - Beckman Instrs., (AISSD)
Polyrad - Cross-Linked Polyethylene Insulated Wire - Brand-Rex Co.
Polyscin - polycrystalline scintillation phosphor - Harshaw Chemical Co.
Polyseal - motors, insulation, coils, windings - General Elec. Co.
Polyskop - sweep test sys. - Rhode & Schwarz Sls.
Poly-Sonic - outdoor speakers - Era Acoustics
Poly-Sonic - outdoor speakers - Magitran Co.
Poly-T - injection moldable thermoset - Fiberfil Div. Dart Ind.
Polytran - polycrystalline optical material - Harshaw Chemical Co.
Polyvolt - lighting controls - General Elec. Co.
"Pop" Rivets - blind fasteners - USM Corp.
Poron - Porous plastic materials - Rogers Corp.
Porta/Flex - vapor degreaser, portable - Gagne Assocs., Inc.
Portalarm - portable security alarms - Scientific Technology
Portametric - portable measuring instrument - Electro Sci. Inds.
PORTA-PEAK - portable strain gage measuring instruments - Helm Instr. Co.
Portatemp - portable hand held digital T/C pyrometer - Trans-Met Engrg.
Porta-Test - leak detector - Varian Assocs.
Porta-Trace - portable light boxes - Gagne Assocs., Inc.
Portionator - epoxy dispenser - Glenmarc Mfg. Inc.
Posi-Ground - voltage leakage elimination in soldering irons - Hexacon Elec. Co.
Posistor - positive Temp Coeff. resistor - Murata Corporation of America
Positerm - Flexible circuit cable assemblies - Rogers Corp.
Postirol - forced oil injection systems - Electrovert
Postlite - Drake Mfg. Co.
Powerblock Power System - high current darlington - PowerTech, Inc.
Power Commander - battery charger - RIL Elctrns., Inc.
Power-Crater - Engines - Allis-Chalmers
Power-Dyne - torque wrench - Raymond Engrg. Inc.
POWERFET - 2 watt fet amplifier - Teledyne-Crystalonics
Powerflex - Electronic Switching & Controlling Systems - Sigma Instruments, Inc.
Powerformer - dry type transformer - Jefferson Elec.
Power-Glas - glassivation of junctions - General Elec.
Power Glas - glass passivated thyristors - General Elec. Co.
Powergrip - belts - Uniroyal, Inc.
Powerhouse - utility searchlights - Teledyne Big Beam
Powerhouse - hand lamps - Teledyne Big Beam

Power-Line - p.a. amplifier - University Sound
Powerline - power line filters - Filtron Company, Inc.
Power Mark + - circuit breakers - General Elec. Co.
Power Mov - power metal oxide varistor - General Elec. Co.
POWER-O-MATIC 60 - ovens and control - Blue M Electric Co.
POWER-O-MATIC 70 - ovens and control - Blue M Electric Co.
POWER-O-MATIC 80 - ovens, furnaces & control - Blue M Electric Co.
Powerpac - hi freq hi power transistor package - Microwave Semiconductor Corp.
Power-Plus - Amplifiers - Fanon/Courier Corp., Subs.
Power Point - plug in cart. - Electro-Voice, Inc.
Powerstat - variable transformers - Superior Electric Co.
Power-Style - switchboards - Square D Co.
POWERSWITCH - solid state relay - Fenwal, Inc.
Powertherm - SCR bridge rectifier - Gentron Corp.
Powertron - a.c. power supplies - Industrial Test Equip.
PowerUp-15 - fast charge battery - General Electric
Power/Vac - circuit interrupters - General Elec. Co.
Power Verter - dc to dc inverter - Alpha Components Corp.
Pow-R-Disc - flat-pack power rectifiers & power SCR's - Westinghouse Elec. Corp.
POXYLUBE - Dry-Film Lubricants - General Devices Co., Inc.
PRAM tm - Programmable Random Access Memory - Harris Semiconductor
PRECO - bobbin lugger - Precision Paper Tube Co.
Preenx - heater cable & cord - General Elec.
"Premax" - communication antennas & accessories - Premax Prods. Div.
"Premax" - ground rods - Premax Prods. Div.
Pre-Met - plating solution filter - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Prep-Lap - seam welders - Taylor-Winfield Corp.
Pres-Bond - gasketing tapes - Press-On Prods.
Pre-Sembly - etched circuits - Analog Devices
Pres-Loc - pres to open or close - Deutsch Fastener Corp.
Pres-Mount - double coated adhesive foam tape - Press-On Prods.
Pres-Pak - pressure sensitive adhesive coated corrugated - Press-On Prods.
Pressfax & Pressfax DRR - Transmission of newspaper/magazine pages - Datalog Div., Litton Sys.
PRESS-FIT - teflon-insulated terminals - Sealectro Corp.
Presslite - Illuminated Pushbutton Switch - Illuminated Products Inc.
Pressuretrol - pressure controllers - Honeywell
PRESTEST - Indicating Light with Test Circuit - Cutler-Hammer, Inc.
Prime' - Centralab semiconductor high reliability program - Centralab Semiconductor
Primewire - premium alum. welding wire - Chemetron Corp.
Princess Line - micro-precision production - UNGAR, Div.
Princeton 801 - graphic computer terminal - Princeton Elctrn. Prods.
Printact - printed contact - Printact Relay Div.
PRINTACT - Printed Contact Relay - Executone, Printact Relay Div.
Print N Mark - component marking & printing equip. - GTI Corporation
Printweigh - weight printer - Toledo Scale
Pritchard Photometer - Photometer - Photo Research Corp.
Probeye - infra-red imaging system - Hughes Aircraft Co.
Probeye - infra-red imaging system - Hughes Aircraft Co.
Probotrol - liquid contact probe - Autocon Inds., Inc.
Process 87-D - marking & finishing panel process - Panelgraphic Corp.
Professional - transistor & diode test equipment - Components Corp.
Profil - fiberglass reinforced polypropylene - Fiberfil Div. Dart Ind.
Pro-Grip - Propionate Cable Clamps - Weckesser Co. Inc.
Proloid - radar-augmentation device - Teledyne Micronetics
Pro-Med - acupuncture equip. - Jaesic Industries Co.
Prong-Lock - rings, retaining - Waldes Kohinoor, Inc.
Propellon - coolant - LMB Heeger, Inc.
Propellon - Coolants - Heeger Inc.
Propimax - fan - Rotron, Inc.
Proportionall - heat input control - Hotpack Corp.
Protectocoats - solderability protection - Alpha Metals, Inc.
Protectoswitch - operator safety device for punch presses - Black & Webster, Inc.
Protistor - fuses - Carbone Lorraine Industries Corp.
Protonex - gold electroplating process that defies metallic contamination. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Prototypes by Kotokast - experimental molded parts - Minnesota Rubber Co.
Proxagard - presence sensing equipment - Gordon Engineering Corp.
Proxiswitch - (capacitance proximity devices) - Photobell Co., Inc.
Proxswitch - proximity switch - Denison, R.B., Inc.
P/S ALLOY - laboratory clamps - GCA/Precision Scientific
PSB - Drake Mfg. Co.
P*-Shooter (*Polymer) - polymeric sealant applicator gun - Hardman Inc.
PSI - captive screw, low cost - Tridair Inds.
PSS - pss filter medium - Pall Corp.
PSS - filter media - Pall Trinity Micro Corp.
PTM - filters, dryers - Pall Trinity Micro Corp.
PTM-66 - color analyzer - Lektra Labs., Inc.
Pull-Thru - contact insertion tool - Hughes Aircraft Co., Connecting Devices
Pulscript - printing demandmeters - General Elec. Co.
Pulsecurity - Wireless Remote Alarm - A.R.F. Products
Pulse-Dot - soldering equip. - Circon Corp.
Pulselector - Resonant Reed Device - A.R.F. Products
Pulsender - Mechanical Pulser - A.R.F. Products
Pulse-Rated Toroids - ferrites - Indiana General
Pulsignal - Electronic Remote Control - A.R.F. Products
Pulsistor - power thermistors - Victory Engrg. Corp.
Pultec - equalizers, filters and amplifiers - Pulse Techniques, Inc.
Puppets - PC circuit layout & design system - Bishop Graphics
PUREBIDE - ceramic graphite - Pure Carbon Co., Inc.
PUREBON - mechanical carbon - Pure Carbon Co., Inc.
Push-Penny - plugs - Thomas & Betts Co.
PV - female receptacles - Berg Electronics
PVB - potentiometric voltmeter bridge - Electro Sci. Inds.
PVCA - Vinyl Insulated Aluminum Strip - Brand-Rex Co.
PVZ - capacitors - General Elec. Co.
Pwrpac&T - power supplies - Analogic Corp.
PYGMY - connector - Bendix Corp., The
Pyranol - capacitor and dielectric material - General Elec. Co.
Pyranol Transformer - electric transformer - General Elec. Co.
Pyr-AU-Bond - gold electroplating process developed for wire & eutectic bonding & leaded glass semi-conductor devices. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Pyrex - borosilicate glasses - Corning Glass Works
Pyrex - borosilicate glasses and products - Corning Glass Works, Television Prods. Div.
Pyrobond-PT-333 - silicon carbide graphite conversion - Ultra Carbon Corp.
Pyroceram - glass-ceramics - Corning Glass Works
Pyroceram - glass-ceramic sealing compounds - Corning Glass Works, Television Prods. Div.
Pyrocon - surface temperature pyrometer - Alnor Instrument Co.
Pyromark - refractory coatings - Tempil Div.
Pyromatic - solid-state temp control - Alnor Instrument Co.
Pyro Panel - infrared heat panel - Research, Inc.
Pyro-Tech - pyrolytic coated graphite - Ultra Carbon Corp.
Pyrotest - Hand Held Potentiometer - Gulton Inds., Inc.
Pyrotroller - electronic temp control - Alnor Instrument Co.
PZT - piezoelectric ceramics - Vernitron Piezoelectric Div.
P-10 Low - Loss - linear solenoid - Barber Corp.

Q

QC - mic connector - Electro-Voice, Inc.
QCC - Quick Custom Cable - Alpha Wire Corp.
Q Compound - encaps. compound - Communications Technology Corp.
QHT - transformers - General Elec. Co.
QO - molded case circuit breakers - Square D Co.
Q-PEX - alkaline etchant - Conversion Chem. Corp.
QR - rotary fastener - Tridair Inds.
QSR - electronic capacitors - General Elec. Co.
QT-Synclamps - 1/4 turn servo clamps - Timber-Top, Inc.
Quad - logs on printed material & decals on components - CVC Products, Inc.
Quadco - controls - Quadrastat Controls Corp.
Quad-O-Dyn - hydraulic seal - Minnesota Rubber Co.
Quad-O-Stat - hydraulic seal - Minnesota Rubber Co.
Quadradar - surveillance and precision approach radar - ITT Gilfillan Div. of ITT
Quadra-Powr - valve actuator - Jamesbury Corp.
Quad-X - hydraulic seal - Minnesota Rubber Co.
QUALICOMP - electronic components - International Importers
Qualifier 901 - Digital IC Tester - Fairchild Sys. Technology
Quantachron - time based programmer - Matrix Corp.
QuantaLatch - transient recorder - QuantaLog, Inc.
Quantum - broadband antenna system - Channel Master Div. Avnet
QUANTUM L - computer tape - Memorex Corp.
QUARTZQ - coil dope - Millen Mfg. Co. Inc., James
Quat 2 - biocidal-fungicidal cleaner - Clean Room Prods.
Quencharc - capacitor resistor rc network - Paktron Div.
Quick Connect - thermal relays - Warren G-V Communications
Quick-Crimp - crimp terminals & connectors - I-T-E Electrical Components Grp.
Quick-E-Poles - Divided, vertical multioutlet assemblies - Wiremold Co.
Quickey - low profile keyboard - Chomerics, Inc.
Quick-Lock - spring-lock shelf supports - Simmons Fastener Corp.
Quick-Scan - control/measuring instrs. - Taylor Instr. Process Control Div.
Quick-Set - thermo-regulators - H-B Instr. Co.
"QUIET" - Ultra Low Noise Mixer - RHG Elctrns. Lab.
Quik/Bus - Power distribution conductors - Rogers Corp.
Quik-Change - indicator lights - Industrial Devices
Quik-Circuits - printed circuit board hobby line - Circuit-Stik, Inc.
QUIK-E - D.C. voltage calibrator - Pioneer Instrumentation
QUIK/PIK - small parts storage - Akro-Mils, Inc.
Quik-Wrap - wire wrapping & unwrapping tools - Jonard Industries Corp.
Quso - micro-fine silica - Philadelphia Quartz Co.
QWIK-TY - connector strain releif - Glenair, Inc.

R

RA-CON - right angle connector - Eby Co., Hugh H.
Radax - spkr. cone design - Electro-Voice, Inc.
R.A.D.I. - random accers digital ndication - Westronics
RADIAX - slotted coaxial cable - Andrew Corp.
Radiax - radiating coaxial cable - Andrew Antenna Co. Ltd.
Radiflex 300 - x-ray inspection system - Torr Labs.
Radifluor 360 - x-ray inspection system - Torr Labs.
Radi-Flux R - Heat Flow Calibration - Hy-Cal Engineering
"Radiodyne" - receivers, towers etc. - Western Coil & Elec. Co.
RADIOHM - variable resistor - Centralab
Rainbow - Color Changing cap presslite switch - Illuminated Products Inc.
Raisedlay - laminates metal clad - Engelhard Minerals & Chem.
Rally Rap - spirally cut tubing - ICO/Rally Corp.
Ramanel - polyester enamel - Ram Chems.
Ramaset - epoxy enamel - Ram Chems.
RAMCON - rotary actuators - Hills-McCanna Co.
Ramdom Data Telecom - data acq - Baganoff Assocs., Inc.
Ramor-IC - DIP desoldering and extraction tool - Solder Removal Co.
Ram-Pac Power Sources - DC-DC converters - Reliability Inc.
RamRod - zener diodes - Motorola Semiconductor Prods.
Range Rider - modem test sets, printers, analysers - International Data Sciences
Rapid-Syn - steppers, drivers, pulse sources & preset indexers - Computer Devices of Calif.
RATIOHMIC RESISTANCE - high accuracy resistance measurements - Data Precision Corporation
Ratiometric Ohms - ohms converters - Dana Labs., Inc.
Raycarl - cold heading process - Camcar Screw & Mfg.
Raycorder - digital magnetic tape recorder - Raymond Engrg. Inc.
RAYLAY - Light Controlled Relay - Solid State Electronics Corp.
Raymaster - all light source equipment - Gates, Geo. W. & Co., Inc.
Raymer - tuners-amplifiers-receivers for background music & general purpose - Trutone Elctrns., Inc.
RAYNGER - infrared thermometer - Raytek, Inc.
RAYOTUBE - temperature detector (radiation-type) - Leeds & Northrup Co.
RAYOVIN - hook-up wire - Raychem Corp.
Raysistor - Optoelectronic Devices - Raytheon Co.
Reactalloy - pastes-hydrogen firing - Electro Mats. Corp. Amer.
Reactospeed - variable speed motor control - Autocon Inds., Inc.
Reactrol - regulator - General Elec. Co.
Reality - data base management system - Microdata Corp.

Real Time I, II, III - microprogrammable array transform processor - Datawest Corp.
Rebel 23 Plus - CB Rig - Fanon/Courier Corp., Subs.
Recipromatic® - counter - General Radio Co.
RE-CIRK-IT - circuit breakers - Heinemann Elec. Co.
Re-Coil - induction heater accessory - Miller, L.C. Co.
Rectodyne - power supplies - Christie Elec.
Redball - CB Rig - Fanon/Courier Corp., Subs.
Red Cap - Monolithic dipped ceramic capacitors - Erie Technological Products
Reddi-Wrap - precut wire for wire wrapping - Storm Products Co.
Reddy - lugs & taps - Thomas & Betts Co.
Redhead - light-emitting diodes - Motorola Semiconductor Prods.
Redi-Bar® - cultured Quartz Bar - P. R. Hoffman Co.
REDI LINE - Motor-generator to 1000 watts - Applied Motors Inc.
"RED LIGHTNING" - #72 "Red Lightning" Soft Solder Liquid Flux - Superior Flux & Mfg. Co.
Red Line - thermal relays - Warren G-V Communications
Red-Lit - discrete led lamps - Litronix
"RED MARVEL" - #74 "Red Marvel" Soft Solder Liquid Flux - Superior Flux & Mfg. Co.
Red Top - thermo-regulator - H-B Instr. Co.
REEDAC - solid state relay - Gordos/Grisby-Barton
Reedlays - relay - Computer Comps.
Reevelec - heating equipment - Reeve Electronics, Inc.
Ref Bloc R - Precise ambient reference junction, thermocouples - Hy-Cal Engineering
Ref Cel R - Multi-channel reference system temp. - Hy-Cal Engineering
Reflectin-Lead - solder plating bath - Conversion Chem. Corp.
Reflectoscope - ndt - ultrasonic equipment - Automation Inds.
ReFLEX - battery charging system - Christie Elec.
Refractosyn - angle detector - H H Controls Co., Inc.
Regadyne - all AC adjustable speed drives - Control Products Corp.
Regal - numbering machines - Bostitch
Regency - loudspeaker, enclosures - Electro-Voice, Inc.
Regent - Motors & Gearmotors - Carter Motor Co.
Regulimit - adjustable safety thermostat - Hotpack Corp.
Regu/Tran - Combined regulator and transformer unit - Allis-Chalmers
Regutron - speed controls - Electric Machinery Mfg. Co.
Reliabraze - copper brazing powder - Alpha Metals, Inc.
RELI-ACON - printed circuit connectors - Methode Elctrns., Inc.
Reliacor - activated rosin flux - Alpha Metals, Inc.
Reliafoam - rosin foam fluxes - Alpha Metals, Inc.
Relialab - environmental rooms - Tenney Engrg., Inc.
RELI-ALOK - ejector/lock component - Methode Elctrns., Inc.
Reliance - regulators for controlling the flow and pressure of gas - Singer Co.
RELI-APAC - backplane wiring systems - Methode Elctrns., Inc.
RELI-APLANE - backpanel/connector system - Methode Elctrns., Inc.
RELI-APLUG - plug-in header - Methode Elctrns., Inc.
Relieros - activated rosin flux - Alpha Metals, Inc.
Reliasolv - grade cleaners - Alpha Metals, Inc.
Reliatemp - environmental rooms - Tenney Engrg., Inc.
Rely-Ohm - Hybrid Resistor System - Engelhard Minerals & Chem.
Remove-A-Pad - temporary spacers-dissolving type - Dynaloy, Inc.
RESINITE - impregnated coil forms - Precision Paper Tube Co.
Resiston - potentiometers - Bourns, Inc.
Resist-O-Stat - decade/resistor - General Resistance, Inc.
Resistox - oxidation resistant copper powder - Gliddon Metals
Resi/Tran - Pad mounted transformers - Allis-Chalmers
Re-Tip - soldering iron tip cleaner - Solder Removal Co.
REVERBERTRON - artificial reverberation device - Fairchild Sound Equip.
Rever-Synclamps - reverse servo clamps - Timber-Top, Inc.
Revmaster - motor speed controls - Opad Elec. Co., Inc.
RFI, MICRO-FILTER - for RFI/EMC filters - RF Interonics
Rhenex - rhenium plating process. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Rhino-Hide - cable - Pacific Electricord Co.
Rhodex - rhodium plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Ribflex - ribbon wound power resistors - Ward Leonard Elec. Co. Inc.
Rigimesh - sintered woven wire cloth - Pall Trinity Micro Corp.
Rigimesh - filter medium - Pall Corp.
RIM - Research Instrument Module System - Princeton Applied Resch. Corp.
Ring-Gun - assembly tool - Waldes Kohinoor, Inc.
Ring-Jector - assembly tool - Waldes Kohinoor, Inc.
Ring-Mount - assembly tool - Waldes Kohinoor, Inc.
Ring-O-Mat - assembly tool - Waldes Kohinoor, Inc.
Ripl-Flo - Vibrating screens - Allis-Chalmers
Ripple Round - anodes - Alpha Metals, Inc.
Rippleweld - lead attach process for filmatic R capacitors - Paktron Div.
Rivet-Loc - terminals - Sealectro Corp.
ROBOT - cameras, recorders, lenses, filters, programmer/timers - Heitz, Inc., Karl
ROBOT - x-ray cameras, remote controls, digital counter, oscilloscope cameras - Heitz, Inc., Karl
Robotec - electronic overload protection - Power Designs, Inc.
Rock-A-Lite - lighted rocker switch - Leecraft Mfg. Co., Inc.
Rockcyl - Grinding mill - Allis-Chalmers
ROCKETTE - Rocker Operated Switches - Cutler-Hammer, Inc.
Rock-Wipe Switch - switches - Cherry Electrical Prods. Corp.
Rodar - controlled expansion alloy - GTE Sylvania Inc.
Rodpeb - Grinding mills - Allis-Chalmers
Ro-Flo - Compressors and vacuum pumps - Allis-Chalmers
Rol-a-chart Magnets - Permanent & Flexible Plastic Magnets - Rol-a-chart Div.
Roll-Mark - automatic application system - Meyercord Co.
Roll 'N Measure - tapeless measuring device - Klein, Mathias & Sons, Inc.
Rollpin - self-locking spring pins - Esna Div.
Rolltemp - roll temperature sensor - Trans-Met Engrg.
Rolltronic - Roll Temperature Control System - Trans-Met Engrg.
Rolm - 1601 Ruggednova - Rolm Corp.
Rolox - 2-part epoxy compounds - Hardman Inc.
Rol-Pak - rings, retaining - Waldes Kohinoor, Inc.
Roly-Poly - round wafer-thin replacement speakers - Magitran Co.
Roly-Poly - replacement round speakers - Era Acoustics
Rom-Simulator - Microcontroller simulator - Scientific Micro Sys.
Rosite R, GCD & TA - inorganic cold molded parts - Rostone Corp.
Rosite 2150 - melamine, cold molded, arc quenching - Rostone Corp.
Rosite 3250 & 3550 - glass reinforced polyester, non-tracking - Rostone Corp.
Rosite 3450 - glass reinf. polyester, corrosion resistant - Rostone Corp.
Rota-Crimp - crimping tools - Amp Inc.
Rotaswitch - shaft encoder - Disc Instruments, Inc.
Roto-Cone - Valves - Allis-Chalmers
Roto-Lock - Spring-lock shelf supports - Simmons Fastener Corp.
Roto-Netic - stepping motor - Heinemann Elec. Co.
Rotopulser - rotary pulse transducer - Dynapar Corp.
Rotosil - opaque fused silica - Amersil, Inc.
Roto-Tellite - indicator light - Master Specialties Co.
Rotovalve - Hydraulic flow control valve - Allis-Chalmers
Rotran - Rotary Generator - Inland Motor Div. Kollmorgan
RP E Z Kleen Air Filter - air filter - Research Prods. Corp.
RP Industrial Filter - air filter - Research Prods. Corp.
RP MV EZ Kleen Air Filter - air filter - Research Prods. Corp.
RT - stripping solutions - Allied Chemical Corp.
RT/duroid - Fiber-reinforced plastic material - Rogers Corp.
RT, Hybridisc,ULR - ceramic capacitors - Dilectron
Rubbon - fluxless solder - Chemetron Corp.
Rubicon - bridges, potentiometers, colorimeters - Penn Airborne Prods.
RUF-NEK - waterproof seismic connectors - Hughes Aircraft Co., Connecting Devices
Ruggednova - 1602 Ruggednova - Rolm Corp.
Rulon - reinforced teflon for bearings and seals - Dixon Corp.
Rush - wire strippers - Eraser Co.
Rustrak - Miniature Graphic Recorders - Gulton Inds., Inc.
Ruthenex - ruthenium electroplating process. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Rx Gears - high precision instrument gears - Instru-Lec Corp.
R620/L-100 - ruggedized computer - Varian Data Machines

S

Saber-Champ - blade probe rh measuring device - American Instr. Co.
Sabre - instrumentation recorder/reproducers - Sangamo Electric Co.
Sabre Tooth - connectors - Thomas & Betts Co.
Safe-Pak - solid-state controlling device - Gems Sensors Div.
"Safe-T" - Bullpins - Klein, Mathias & Sons, Inc.
Safe-T-Klip - test clip - Industrial Devices
Safe-T-Kord - test cord - Industrial Devices
Safe-Tran - Pad mounted transformers - Allis-Chalmers
Safety White - fluorescent ballasts - Jefferson Elec.
SAF-T-PLUG - wall-mounted power supply - Dynamic Instr. Corp.
Sa-Fuse - electrical controls - Electric Machinery Mfg. Co.
Sali - Insulating bushings - Adalet Mfg. Co.
Sal-Met - flux - LMB Heeger, Inc.
Salmet - Flux - Heeger Inc.
Sam - aircraft S&B radio - Brelonix, Inc.
Samguard - security - Aerolite Elexs Corp.
Sampac&T - Sample and holds (fast acquisition, buffered and high speed - Analogic Corp.
Sam R - monitoring SSB/AM receiver - Brelonix, Inc.
SAN-DEL - instrument cleaning systems - M. P. Odell Co.
Sans-A-Fuse - fusing device - Workman Electronic Prods., Inc.
SAR - silicon avalanche rectifier - Varo Semiconductor, Inc.
Sara-Sonic - ultrasonic cleaners - Sara Scientific Co.
Sara "7" - detergent - Sara Scientific Co.
Sat II - microfilm reader - Information Handling Services
Satintone 87D - metal display panels - Panelgraphic Corp.
Saucer - fan - Rotron, Inc.
SBE - Tw0-Way Communications - Linear Systems, Inc.
SBG - chemicals - Mallinckrodt, Inc.
SCA - transistors - Semicoa, Inc.
Scalar - patented antenna feed horn - TRG,
Scanatron - facsimile - Victor Comptometer Corp.
Scanfare - FM Monitor Scanners - Fanon/Courier Corp., Subs.
Scope-Mate - portable oscilloscope camera - Vu-data Corp.
SCOPE–MOBILE - Cart, oscilloscope, wheeled - Tektronix, Inc.
SCORESTRATES - ceramic substrate - Centralab
"Scotch" - electrical insulating tapes - 3M Co.
Scotch - P.C. board masking tapes - 3M Company
"Scotchcast" - electrical insulating resins - 3M Co.
Scotchflex - cable/connector system - 3M Company
"Scotchtite" - tubings - 3M Co.
SCREW LAUNCHER - screw holding drivers - Vaco Products Co.
SCR-Rated - PM DC Motors - Indiana Gen'l. Div.
S-D77 - programmable controllers - Struthers-Dunn, Inc.
Sea-Air - marine SSB radio telephone - Brelonix, Inc.
Sealcor - aluminum rod - Chemetron Corp.
Sealdbin, Sealdtank, Sealdrum - containers, storage - Uniroyal, Inc.
SEALECTROBOARD - cordless program board - Sealectro Corp.
Sealectrocard - static card readers - Sealectro Corp.
Sealectroswitch - programming switches - Sealectro Corp.
Sealflex - insulation - Electric Machinery Mfg. Co.
SEALINK - sealed splice - Burndy Corporation
Sealox - microcircuit packages, silicon - National Beryllia Corp.
Seal-Pac - transformer - General Elec. Co.
SEAL-STOP - STOP-OFF FOR ELECTROPLATING - Seal-Peel, Inc.
Sea Scanar - sonar system - Honeywell
SeaSpace - oceanography apparatus - Exide Power Sys. Div.
Secre/Data - data scrambler - Com/Tech Systems Inc.
Secre/Fax - facsimile scrambler - Com/Tech Systems Inc.
Secre/Vox - voice scrambler - Com/Tech Systems Inc.
Se-Cur-It - wood glue - Ambroid Co.
SE/duroid - Resin bonded fibrous material - Rogers Corp.
SEED TM - Shield Effectiveness Evaluation Device - Belden Corp.
SE Eyelets - eyelets - USM Corp.
Seico - thermocouples - Syscon Int'l., Inc.
Seico - surface temperature sensors - Syscon Int'l., Inc.
Seico - portable pyrometers - Syscon Int'l., Inc.
"Selec-Pak" - IF band-pass filter - General Instr. Corp., Automatic Mfg. Div.
SELECTASHAFT - rotary switches - Centralab
Select-a-Wave - wavesoldering equipment - Electrovert
Selection - specific ion electrodes - Beckman Instrs., (AISSD)
SELECTOFRAME - lead frame - Plessey Inc.
Selectrol - float operated control - Autocon Inds., Inc.
Selectronic - data terminal - Anderson Jacobson
Select-Talk - Telephones - Fanon/Courier Corp., Subs.
SELF-LOC-K - removable, crimp contacts - AirBorn, Inc.
Self-Scan R - panel display - Burroughs Corp.
Selistor - arc suppressor - Eastern Delta Corp.

Sellectric TM - wiring devices - Leviton Mfg. Co., Inc.
Sel-Masq - semi-automatic selective strip electroplating machine - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Sel-Rex-Bright Rhodium - rhodium plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Sel-Rex Pur-A-Gold - gold electroplating process for semi-conductor applications. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Sel-Rex Rhodium Sulfate - rhodium plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Sembo - dispenser cathodes - Semicon Assoc., Inc.
Semiac - semiconductor variac - Alpha Components Corp.
Semi/Dyne - Traveling Wabe Tube Amplifiers - LOGIMETRICS INC.
Semitung - tungsten powder - Semicon Assoc., Inc.
Semitung - tungsten materials - Varian Assocs.
SEMPAC - MOLDED SILICON RECTIFIER - Semtech Corp.
Sensable R - Heat Flow Gage - Hy-Cal Engineering
Sensaire - temperature transmitter - Taylor Instr. Process Control Div.
Sensall - level sensing systems - National Sonics
Sensco - industrial radiation pyrometers - Electro-Optical Inds., Inc.
Sensiflex - sensitive pressure switches and equip. for fluidics - Gagne Assocs., Inc.
Sensimatic - accounting machine - Burroughs Corp.
Sensimeter R - Readout system, temp. meas. - Hy-Cal Engineering
Sens-Pak - solid-state controlling device - Gems Sensors Div.
Sentinel - fan - Rotron, Inc.
Sentriline - Filter-Couplers, RF - Bird Electronic Corp.
Sentronic - load cells - Thwing-Albert Instr. Co.
Sentry - loudspeaker - Electro-Voice, Inc.
Sentry Master - hotel TV theft alarm - Channel Master Div. Avnet
Seo-Grip - Nylon Cable Clamp - Weckesser Co. Inc.
Serdex - Humidity Indicators & Recorders - Bacharach Instrument Co.
Serdex Modules - serial data exchange circuits - Analog Devices
SerenDIP - SPST solid state relay - Teledyne Relays
SERIES 200 - Modular CRT Display Terminal - Ann Arbor Terminals, Inc.
Series 3 - graphics display terminal - Vector General, Inc.
Series 6000 - tape drive - Microdata Corp.
Series 8000 - disc drive - Microdata Corp.
SermaBond - cement type coatings - SermeTel Teleflex Inc.
SermaLon - fluorocarbon filled coating material - SermeTel Teleflex Inc.
SermaLoy - diffusion coatings - SermeTel Teleflex Inc.
SermaLube - dry film lubrication coatings - SermeTel Teleflex Inc.
SermaSeal - inorganic sealant coatings - SermeTel Teleflex Inc.
SermeTel W - inorganic corrosion resistant coatings - SermeTel Teleflex Inc.
SERVO-CAP - hi current ceramic capacitors - USCC/Centralab, Elec. Div.
Servocap - ceramic capacitor - Centralab
Servo-Linear - speaker system - Electro-Voice, Inc.
Servospeed - electronic motor speed control - Electro-Devices, Inc.
Serv-Rite - thermocouples & T/C wire - Gordon, Claud S. Co.
Setchell Carlson - video monitors, uhf/vhf receivers - Audiotronics
"7MAG" - aerospace chemical coating - Merix Chem. Co.
71-1 T.D. - circuit card fixture - Tech. Devices Co.
SF/duroid - Electrical insulating materials - Rogers Corp.
SFR - selectable fixed resistor - Bourns, Inc.
SGL Waber - outlet strips; wheeled carriers - SGL Waber Electric
SHADOWEIGHT - tone arm - V-M Corporation
Shawnee - solid state counter - Automatic Timing & Controls Co.
Shawnee - solid state timer - Automatic Timing & Controls Co.
Shearite - hand tools - Amp Inc.
Shieldflex - shielding materials - Magnetic Metals Co.
Shield-Kon - grounding sheath connectors - Thomas & Betts Co.
Shieldmu - shielding materials - Magnetic Metals Co.
Shield-Stripp - hand tool for stripping braided coax shielding - Gagne Assocs., Inc.
Sho Rate - flowmeter - Brooks Instr. Div.
"Shorewall" - sheet piling - Overly-Hautz Co.
Short Stop - electronic motor brake - Ambi-Tech Inds. Inc.
Shrinkdown - heat shriknable tubings - Markel, L. Frank & Sons
Shure Squeezer - tool - Thomas & Betts Co.
Shure-Stake - tool - Thomas & Betts Co.
Sidicon - silicon vidicon tube - Teltron
Signaflo - Transmission Line flat cable - Ansley Elctrns. Corp.
SIGNALEX - Electro-Mechanical Digital Readouts - Staver Co., Inc.
Signal Kicker - antennas - Turner Div.
"Signalock" - Frequency Locking System - LOGIMETRICS INC.
SigNet - signal network cables - Superior Cable Div.
Silastic - Adhesive/sealant - Dow Corning
Sil-Bond - selective silver plating - Braun Co., Inc.
Sil-Clad - insulation - Electric Machinery Mfg. Co.
Silco-Flex - Motor and generator insulation - Allis-Chalmers
Silcoro 60 - brazing alloys - Gte Sylvania, Inc.
SILENT PAGER - WAITRESS PAGING SYSTEM - Baumker Mfg. Co.
Silfared - infrared filter - Metavac, Inc.
Silflex - silicone sleeving - Varflex Corp.
Silflo - brazing alloys - Chemetron Corp.
SIL-FOS - silver brazing alloy - Handy & Harman
Silgar - tube - Alpha Components Corp.
Silicane - low cost silicone substitute - Packaged Resins Div.
Silic-O-Netic - time-delay relay - Heinemann Elec. Co.
Silicontrol - scr gate drives - Vectrol, Inc.
Silimite - Feedwater treatment for removal of silica - Allis-Chalmers
Silmate - silicone rubber form-in-place gaskets - General Elec. Co.
Silohm - resistors, varistors - Carbone Lorraine Industries Corp.
Silox® - reactor system - Applied Materials Inc.
Silpaint - thick film silver conductive paste for microelectronics - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Silvaloy - brazing alloys - Engelhard Minerals & Chem.
Silvercap - capacitor - Del Electronics Corp.
Silver-Grip - special set screws - PIC Design Division
Silver II - silver oxide watch battery - Ray-O-Vac Div.
Silverweld - terminations - Bourns, Inc.
Silvrex - silver plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Silvrex - silver plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Simpson "260" - vom multimeter - Simpson Electric Co.
Simuline® - Telephone Channel Simulation Equipment - Seg Subsidiary
Simuline® - telephone channel test & simulation equipment - Comstron Seg.
SineDolor - Dental desensitizer - Controltek Inc.
S.I.R.&R - syncronous inverter regulator system of electronic voltage control - Acme Electric
Sivicon - silicon vidicon camera tube - Amperex Elctronic Corp.
Six-Pac - reed switch module - Controls Research Corp.
Skan-coat - reflective skanner - Skan-A-Matic Corp.
Skipper - fan - Rotron, Inc.
SKY CAP - Ceramic Capacitor - AVX Ceramics
Sky-Tie - Bus drop cable clamps - Adalet Mfg. Co.
SL - chemicals - Mallinckrodt, Inc.
Sleev-Scru - fastener-insulated - Pylon Co., Inc.
Slic-Tite with "Teflon" - 4 thread sealants: paste, stik, tape, cord - Lake Chemical Co.
SLIDELINE(R) - slide actuated potentiometer (control) - Duncan Electronics, Inc.
Slidelite - lighted switch - Leecraft Mfg. Co., Inc.
Slim-Caps - capacitors, fixed, ceramic - Republic Elctrns. Corp.
Slim Jim - magnetic tape head - Michigan Magnetics
Slim Jr. - miniature soldering iron - Hexacon Elec. Co.
Slimline - digital panel instruments - NES, Inc.
SLIMPAC - HIGH VOLTAGE RECTIFIER - Semtech Corp.
SLIMPAC JR. - HIGH VOLTAGE RECTIFIER - Semtech Corp.
SLIMPAC SR. - HIGH VOLTAGE RECTIFIER - Semtech Corp.
Slim Sr. - miniature soldering iron - Hexacon Elec. Co.
SLIP-LOCK - Teflon Insulated Terminals - U.S. Terminals
Slip-Sync - automatic synchronizer - Chadwick-Helmuth Co., Inc.
Slo-Blo - miniature fuses - Littelfuse, Inc.
Slo-Syn - synchronors/stepping motors, controls, drives - Superior Electric Co.
SMART - add on & replacement core memory - Standard Memories, Inc.
Smart counters - 6 digit display calculator - Nu-Metrics
Smitty - folding hex wrench set - Hunter Tools
Smoke Signal - smoke & gas detector - Universal Security Instrs.
Snail - connectors - Pylon Co., Inc.
Snap-A-Part - break apart ceramic substrates - Mepco/Electra, Substrate Div.
"Snapblocks" - Sectional terminal blocks - Kulka Elec. Corp.
Snap-Coupler - Tractor quick hitches - Allis-Chalmers
Snap-In - captive screws - Tridair Inds.
Snaplite - indicator light - Leecraft Mfg. Co., Inc.
SNAP-LOCK - limit switches - NAMCO CONTROLS
Snap-on - automotive hand tools - Snap-On-Tools
Snap-Out - aluminum tower - Up-Right Scaffolds
Snap-Pak - rings, retaining - Waldes Kohinoor, Inc.
SNAPPER - DC servo motors - Torque Systems
SNAP-TITE - variable resistor - Centralab
SnapTrack - relay/timer mounting system - RDI/Reed Devices, Inc.
Snaptrol - snap together replacement potentiometers - CTS Corp.
SNAP-WRAP - modular connector panels - Amphenol Ind'l. Div.
Sniffer - Portable Combustible Gas Indicator - Bacharach Instrument Co.
Snipe - Wiping action Snap Switch - Illuminated Products Inc.
Snortini - desoldering tool (mini) - Edsyn, Inc.
Snow-Bee - Snow thrower - Allis-Chalmers
-S/N- R - fatigue life gage - Micro-Measurements Div.
Socks - connectors - Thomas & Betts Co.
Soder-Mask - a temporary solder resist - Solder Removal Co.
Soder-Wick - a desoldering aid - Solder Removal Co.
Sod-R-Braze - soldering & brazing equip. - Chemetron Corp.
SODR-X-TRACTOR - desoldering tool - Pace Inc.
Softy - work hats - Clauss Cutlery Co.
So-Hot - heater - Therm-O-Lab Corp.
SOLATRON - line voltage regulator - Sola Electric
SOLDAPULLT - DESOLDERING TOOL - Edsyn, Inc.
SOLDAVAC - DESOLDERING TOOL - Edsyn, Inc.
Soldercon - IC & transistor sockets - Molex Inc.
Solderette - wavesolder equip. - Electrovert
Solder Master - elec. soldering irons - Hexacon Elec. Co.
SOLDERPAK - automated insultation - Raychem Corp.
Solid-D - polyethylene dielectric - Superior Cable Div.
Solid-Gel - rechargeable batteries - Elpower Corp.
Solid-Lite - solid state lamps & displays - OPCOA, Inc.
Solid State - dry reed hybrid modules - Struthers-Dunn, Inc.
Solid-Tubes - silicon rectifier - Elctrn. Devices
Solistrand - terminals & splices - Amp Inc.
Solofast - quick-operating fasteners - Paneloc Corp.
Solu Bridge - solution conductivity instrument - Beckman Instrs.
Solu Chek - electrical conductivity meters - Beckman Instrs.
Solu Meter - liquid measuring instrs. - Beckman Instrs.
Sol-U-Salt - plating salts - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Sonac - ultrasonic controls - Delavan Electronics
"SONA GRAPH" - Sound Spectrum Analyzer - Kay Elemetrics Corp.
SONBLASTER - ultrasonic cleaner - Ultrasonic Corp.
Sono - cleaning solvents - Ultrasonic Instrs. Int'l., Inc.
Sonocaster - speaker system - Electro-Voice, Inc.
Sonocaster - loudspeaker - Electro-Voice, Inc.
SONODOME - high frequency speakers - Jensen Sound Labs.
Sonodur - hardness tester - Branson Cleaning Equip. Co.
Sonoflux - ndt - magnetic particle equipment - Automation Inds.
Sonogen - cleaners & degreasers - Branson Cleaning Equip. Co.
Sonoray - flaw/thickness tester - Branson Cleaning Equip. Co.
Sonotite - piezoelectric ceramic - Linden Labs., Inc.
Son-Tector - ultrasonic detector - Techsonics
Soundcaster - mobile sound system - PASO Sound Products Inc.
Sound Director - Sound Columns - Argos Products Co., Inc.
Sound discriminator - audio detection system - Acron Corp.
Sound Spot - microphone - Electro-Voice, Inc.
SpaceMaker - Electric motor controls - Allis-Chalmers
Space Saver - 3 1/2" compact edgewise photoelectric controller - Larson Instr. Co., Inc.
Space Saver - electrical fittings - I-T-E Electrical Components Grp.
Spade-Lok - terminal - Amp Inc.
Sparkcaps - spark gap capacitors - Radio Materials Co.
Spartan - fan - Rotron, Inc.
Spartan SSB Plus - SSB TRansceiver - Fanon/Courier Corp., Subs.
Sparvar - aerosol prods. - Krylon
Spasaver TM - Miniature switches - Chicago Switch, Inc.
SPC-12 - 8-bit general purpose industrial control minicomputer - General Automation
SPC-16 - 16-bit general purpose automation minicomputer - General Automation
Specialyst - dual optics-24x and 48x large screen - Visidyne Inc.
Spec-Master - outlets, switches - Leviton Mfg. Co., Inc.

Spec Stat - temp sw - Control Prods., Inc.

Spectra - Exposure Meters, Photometers, TV Optoliner - Photo Research Corp.

Spectrochrom - chromatographic analyzer - Beckman Instrs., (AISSD)

Spectrocolorimeter - spectrophotometer-colorimeter - Beckman Instrs., (AISSD)

Speculag - silver plating bath - Conversion Chem. Corp.

Spec 200 - electronic control inst. - Foxboro Co.

Speech Director - Sound System Lectern - Argos Products Co., Inc.

Speedetex - speed detection equipment - Speed Detectors, Inc.

Speedfoil - high speed radiant heater - Armstrong Cork Co.

Speed Nut - fasteners - Eaton Corporation

SPEEDOMAX - electronic indicators, recorders, controllers - Leeds & Northrup Co.

Speedreader - remote meter reading attachments - Singer Co.

Speed Serts - inserts & studs - Tridair Inds.

Speed Servo II - Servo Chart Recorders - Esterline Angus

Speed-Wrap - wire-wrapping tools - O. K. Machine & Tool Corp.

Speedy - wire snips - Clauss Cutlery Co.

Spemco H-H - switches - Specialties Mfg. Co., Inc.

Sphincter - sockets - Pylon Co., Inc.

Spiradel - High Q Constant Delay Line - Allen Avionics, Inc.

Spirafil - semi-rigid cable - Cablewave Systems Inc.

Spirakore - transformer - General Elec. Co.

Spiral - blower - Rotron, Inc.

Spiraltron - electron multiplier (SEM) - Galileo Electro-Optics Corp.

Spiral Wrap Heaters - heaters wraped around cylinders - Sierracin/Thermal Sys.

Spirap - wire & cable binding - Amp Inc.

SPIRA-SHIELD - flexible cable sheath - Perfection Mica Co.

Spir'ator - constant force spiral spring - Ametek, Hunter Spring Division

Split - ball bearings - MPB Corp.

Spoolarc - spooled wire - Chemetron Corp.

Sportsman - flashlights and lanterns - Ray-O-Vac Div.

Spot Check - magnetic tape head - Michigan Magnetics

Spot-Lok - nylok spot-lok socket screws - Allen Mfg. Co.

Spotmeter - Photometer - Photo Research Corp.

Spring Kit - packaged springs & forms - Helix Spring Corp.

Springter - sockets - Pylon Co., Inc.

Sprioband - wire/cables harnesses - Electrovert

Sprite - fan - Rotron, Inc.

SPT - tape, splicing - General Elec.

Sputtergun - thin film sputtering system - Sloan Technology Corp.

Sputtersphere TM - sputtering system - Materials Resch. Corp.

Squaristor - square resistors - General Resistance, Inc.

SR - clear fused quartz - Amersil, Inc.

S.R.M. - sma-type r.f. connectors - Sealectro Corp.

SRO - Stereo-4 - Electro-Voice, Inc.

S-R-4 - strain gages - BLH Elctrns., Inc.

SSB Analyzers - spectrum analyzers - Nelson Ross Elctrns.

STABILAC - Stable AC Power Source - TDC, Div. Freq. Technology Inc.

STABILARC - Lighting Ballast - TDC, Div. Freq. Technology Inc.

Stabilene - stable base film - Keuffel & Esser Co.

Stabilflo - control valves - Foxboro Co.

Stabiline - automatic voltage regulators - Superior Electric Co.

Stabilite - laser resonator design - Spectra-Physics, Inc.

Stabilizer 100 - pc board component lead lock-in system® - Hollis Engrg., Inc.

Stabilizer 150 - pc board fluxing and component lead lock-in system® - Hollis Engrg., Inc.

Stable-K - capacitors, fixed, ceramic - Republic Elctrns. Corp.

Stacer - self-extending spiral tube - Ametek, Hunter Spring Division

STACPAC - RECTIFIER, SILICON - Semtech Corp.

Staffel - terminal blocks & strips - Electrovert

Sta-Flow - synthetic plastic resins - Air Prods. & Chems., Inc.

Sta-Flux - stabilizer and flux combined for use in stabilizer 150 systems - Hollis Engrg., Inc.

Stairway-Type - tower sections - Up-Right Scaffolds

Sta-Kon - terminals, tools - Thomas & Betts Co.

Stancote - Plastic insulated wire - Standard Wire & Cable Co.

STANDCO - Tachometers, Frequency Meters, Elapsed Time Meters - Sticht Co., Inc. Herman H.

Stanflex - Rubber jacketed portable cable - Standard Wire & Cable Co.

Stantrol - temperature & heater controllers - ARI Inds., Inc.

STANTRON - MODULAR ELECTRONIC CABINETS - Stantron Div.

STARAN - associative array processor system - Goodyear Aerospace Corp.

Sta-Strap (R) - Cable Ties - Panduit Corp.

StatFlex - dc adjustable speed drive - Allis-Chalmers

STAT-I-CHART - Visual Control Boards - Rol-a-chart Div.

Statos - electrostatic recorders - Varian Assocs.

Statos - a prod. line of electrostatic recorders - Varian Data Machines

Statos Sys. - digital printer/plotter systems - Varian Data Machines

Statos 21 - electrostatic printer/plotter - Varian Data Machines

Statos 31 - electrostatic printer/plotter - Varian Data Machines

Statos 33 - electrostatic printer/plotter - Varian Data Machines

STATUS-INDICATOR - compact, 12-message projection readout - Industrial Elctrn. Engrs.

Status Seeker - logic test sets - Dataprobe, Inc.

Stavolt - power supplies - Christie Elec.

Sta-Vo-Trol - voltage regulator - General Elec. Co.

Stedivolt - a.c. line voltage regulator - Kelk, George Ltd.

Stenafax - electronic stencils - Fitchburg Coated Products

Step - sequential television equipment programmer - Chrono-log Corp.

Stereon - spkr. sys. - Electro-Voice, Inc.

STEREO-O-MATIC - record changers - V-M Corporation

STEREOSTAR - Stereoscopic Microscope - American Optical Corp.

Stereo-V - phono cartridge - Electro-Voice, Inc.

Stereo-4 - 4-channel matrix system - Electro-Voice, Inc.

STI - LED photoelectric controls - Scientific Technology

Sticky Fingers - self-adhesive rf1/em1 shielding - Instrument Specialties

STICPAC - XRAY RECTIFIER - Semtech Corp.

Stic 2 - adhesive spray - Caig Labs., Inc.

Stik Klips - adhesive backed fastening devices - Daburn Electronics & Cable Corp.

Stik-On Heaters - adhesive backed resistance heaters - Sierracin/Thermal Sys.

STODDART - Field intensity meters - Singer Instrumentation

STORED-ARC - welder - Nelson Stud Welding TRW Inc.

Storm-Flex - silicone flat cable - Storm Products Co.

Strainrite - ceramic products - Star Porcelain Co.

Strapping - wire/cables harnesses - Electrovert

STRATE-BREAKS - prescored ceramic substrates - Coors Porcelain Co.

Strato-Therm - splice & terminal - Amp Inc.

Streamseal - Butterfly valves - Allis-Chalmers

Stripac - hi freq hi power transistor package - Microwave Semiconductor Corp.

Stripall - thermal wire stripper - Teledyne Kinetics

Stripmaster - wire strippers - Ideal Industries Inc.

Strip Pack - terminal board - Elgin Elctrns., Inc.

StripSwitch - shell-less P.C. board switch - UID Electronics Div.

Striptrol - self assemble replacement kits (for side-by-side potentiometers) - CTS Corp.

Strobeguard - high intensity obstruction warning lights-for utility towers, tall buildings, microwave antennas - EG&G, Inc.

STROBETTE - stroboscopes-tachometer - Power Instrs., Inc.

Strobex - strobe light - Chadwick-Helmuth Co., Inc.

StrobolumeR - electronic strohoscope - General Radio Co.

StroboslaveR - strobostopic light source - General Radio Co.

Strobotac® - electronic stroboscope - General Radio Co.

Strobrite - high intensity stroboscope - U.S. Scientific Instrs.

Strongset - all purpose solder - Chemetron Corp.

STUNTRONIC - station controllers - Teletype Corp.

Stur-D-Dial Cord - dial cord - Gudebrod Bros. Silk Co., Inc.

Sturdi-Stand - electric soldering iron holder - Hexacon Elec. Co.

Stur-D-Lace - lacing tape - Gudebrod Bros. Silk Co., Inc.

STYCAST - casting resins - Emerson & Cuming, Inc.

Styrafil - fiberglass reinforced polystyrene - Fiberfil Div. Dart Ind.

Styrofoam - polystyrene foam - Dow Chemical Co.

Styron - polystyrene - Dow Chemical Co.

SUBBER - signal tracing analyzer-by signal substitution. - Castle TV Tuner Service, Inc.

Sub-Minax - coaxial connector - Amphenol RF Div.

Sue - digital computer - Lockheed Elctrns. Co.

Sulfamex - nickel plating chems. - Sel-Rex Co. Div. Oxy Metal Industries Corp.

Sulfil - fiberglass reinforced polysulfone - Fiberfil Div. Dart Ind.

SUNSWITCH - photoelectric controls - Ripley Co., Inc.

Super-Band - 50-270 MHZ line of solid state CATV equip - AEL Communications Corp., Sub. of Amer. Elctrn. Labs. Inc.

Super-Cast - vehicle scales - Howe Richardson Scale Co.

Super Caster - spkr. syst. - Electro-Voice, Inc.

Super Caster - Stereo-V - Electro-Voice, Inc.

Super Champ - hand tool - Amp Inc.

Supercharger - I.C. handling equipment - Delta Design, Inc.

Supercon - electrical connectors - Superior Electric Co.

Supercordx - cord - General Elec.

Supercoronol - rubber insulated cable - General Elec.

Super Erecta Shelf - open wire shelving & trucks - Metropolitan Wire Corp.

SUPERFAST - 30 NANOSECOND RECTIFIER, SILICON - Semtech Corp.

Superflex - coaxial cable - Columbia Elctrn. Cables

Super Frost AiD - component cooler - Chemtronics, Inc.

Super-Hush - thin-film resistors - Analog Devices

Superior - Gyratory and jaw crushers - Allis-Chalmers

Super-K - capacitors, fixed, ceramic - Republic Elctrns. Corp.

Supermatec - solid state controller - Hotpack Corp.

Super Mite - portable potentiometer - Thermo Elec. Co., Inc.

Supernova - computers - Data General Corp.

Super/reg - electronic DC voltage regulators - Trio Labs, Inc.

SUPERSAFE - 6 Supersafe Fluoride-Free Paste Flux - Superior Flux & Mfg. Co.

SUPERSAFE - #32 Supersafe For Use In Foam Fluxers - Superior Flux & Mfg. Co.

SUPERSAFE - #77 Supersafe Non-Corrosive Paste Flux - Superior Flux & Mfg. Co.

SUPERSAFE - #30 Supersafe Soft Solder Liquid Flux - Superior Flux & Mfg. Co.

Super-Sonax - tweeter - Electro-Voice, Inc.

Super-Stabe - power resistor networks - Analog Devices

Superstrate R - ceramic substrates, ultra-fine grained - Materials Resch. Corp.

Super-Synclamps - large servo clamps - Timber-Top, Inc.

Super-Torq - cap screws - Allen Mfg. Co.

Super-Track - ratio resistor networks - Analog Devices

Super-Twistaguide - triple strength twistaguide - Airtron

Super 270 - connector - Amphenol Connector Div.

Super-40 - waveguides & accessories - Airtron

Supramesh - filter medium - Pall Corp.

Supramesh - rigimesh w/stainless steel powder sinter-bonded - Pall Trinity Micro Corp.

Suprasil - clear fused quartz - Amersil, Inc.

Suprasil-W - clear fused quartz - Amersil, Inc.

Sure-Ty - cable ties - I-T-E Electrical Components Grp.

Surfamax - porous stainless steel fiber - Pall Trinity Micro Corp.

Surgitron - ac & dc protectors - Joslyn Elctrn. Sys.

Surmetic - plastic package (zener diodes) - Motorola Semiconductor Prods.

Sus-Tension - film processing hangers - Lektra Labs., Inc.

Sweep-Sync - automatic synchronizer - Chadwick-Helmuth Co., Inc.

Swemar - sweep marker generator - Leader Instruments Corp.

Swidget - slide switch - CW Industries

Swidget, Jr. - slide switch - CW Industries

Swing-Wa - switches, panelboards - General Elec. Co.

Swivitop - screw drivers - Moody Tools, Inc.

Sydewynder - slide switch - CW Industries

Sylgard - Resin - Dow Corning

Sylvania - intergrated circuits - Lansdale Transistor & Elctrns.

Synch-Lock - control systems - Sequential Information Systems

SYNCHRO-DIP - solid state relay - Gordos/Grisby-Barton

Synchro-Lok - thick film screen alignment system - Sel-Rex Co. Div. Oxy Metal Industries Corp.

SYNCHRON - timing motors & clock movements - Hansen Mfg. Co.

Synchro-Pac - syn. motors - Electric Machinery Mfg. Co.

SYNCHRO-REEDAC - solid state relay - Gordos/Grisby-Barton

Synchrostat - electrical controls - Electric Machinery Mfg. Co.

Synchro Sweep Generators - frequency response sweepers - Nelson Ross Elctrns.

Synchrotel - self-synchronous motors - Kollsman Instr. Co.

Synclamps - servo clamps - Timber-Top, Inc.

Sync-Loc - motors - Bristol Saybrook Co.

Syncron - condenser microphones - Dynalab Corp.

Syncronometer® - digital time comparator - General Radio Co.

Sync-Trol - synchronous-motor controls - Electric Machinery Mfg. Co.
Synduction - Motors - Allis-Chalmers
Synthane - laminated plastic - Synthane Taylor Corp.
SYNTHINOL - hook up wire - Consolidated Wire & Assoc. Corps.
Synthite - varnishes - Dolph, John C. Co.
Syntholvar - extruded pvc tubing - Varflex Corp.
Syntorque - a.c. motor - EEMCO Div.
SYNTRON - Semiconductor Products - FMC Corporation
SYNTRON - Parts Handling Products - FMC Corporation
SYNTRON - Material Handling Products - FMC Corporation
SYSTEM III&T - wire-wrapping cards - Adcor Electronic Packaging Corp.
SYSTEM III&T - artwork design services - Adcor Electronic Packaging Corp.
SYSTEM III&T - universal PC cards - Adcor Electronic Packaging Corp.
System IV/40 - Remote Intelligent Terminal System - Four-Phase Systems
System IV/70 - Intelligent Terminal System - Four-Phase Systems
System 18/30 - small, general purpose computer - General Automation
System 306 - Fourier spectrum analyzers - Elsytec, Inc.
System 547 - modular wet processing production system - Chemcut Corp.
Systrac - systems - Systron-Donner Inertial Div.
SYSTROL - solid state drive systems - Control Systems Research, Inc.
Systron - data products - Systron-Donner Inertial Div.
S-42 Alloy - antimony gold plating process - Sel-Rex Co. Div. Oxy Metal Industries Corp.

T

T-A - digital meters - Tekelec, Inc.
Tab-Gun - heat guns - Sigma Sys. Corp.
TABLOCK - mixed flow wheel - Torin Corp.
Tabl-Top - automatic plating sys. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
TACHLITE - stroboscopes - Power Instrs., Inc.
Tacholog - tachometers with revolution counters - Kollsman Instr. Co.
Tach-Pak - Tachometer system - Airpax Elctrns.
Tach-Trol - Tachometer system - Airpax Elctrns.
TAG-RING - shieled wire termination - Glenair, Inc.
"Tallymaster" - adding-subtracting machines - Victor Comptometer Corp.
Tan-Film TM - tantalum thin film resistors - TRW/IRC Resistors
Tankard - digital set counter - Automatic Timing & Controls Co.
Tankard - digital set timer - Automatic Timing & Controls Co.
Tanktrol - pressure operated control - Autocon Inds., Inc.
Tantalex - tantalum electrolytic capacitors - Sprague Elec. Co.
Tantalite - lithium tantalate - Crystal Technology
Tantalytic - capacitors - General Elec. Co.
Tape Cable - flat flexible cable - Brand-Rex Co.
TAPECON - tape cable connector assemble - Burndy Corporation
TAPELESS TAPE MEASURE - Hand Held Measuring Device - ENM
TAPE PAK - fish tapes - Ideal Industries Inc.
Taperlock - connector for semi-rigid cable - Cablewave Systems Inc.
Tapeswitch - longitudinal contact pairs - Tapeswitch Corp. Amer.
Tapfree - cutting fluid - Brooks Co. Inc., Winfield
Tapit TM - Miniature pushbutton switches - Chicago Switch, Inc.
Tap-Lite - switches - Pacific Electricord Co.
Tap-Lok - self-tapping threaded inserts - Groov-Pin Corp.
TA'POT® - tape potentiometer - Howell Inst. Inc.
Taptone - electronic can tapping inspection device - Benthos, Inc.
TARGET - antennas - S & A Electronics
Tarzan - fan - Rotron, Inc.
Tasc-2 - radioisotopic analysis system - Harshaw Chemical Co.
Tasc-5 - cerebral function analyzer - Harshaw Chemical Co.
Tasc-8 - pulmonary function analyzer - Harshaw Chemical Co.
Taylorclad - metal clad laminates - Synthane Taylor Corp.
Taylorite - vulcanized fibre - Synthane Taylor Corp.
Tayloron - laminated plastic - Synthane Taylor Corp.
Tayp-Air - airborne taper pin - Amp Inc.
Tay-Tronic - welding controls - Taylor-Winfield Corp.
T-Bar - multi-contact switches & relays - T-Bar Inc.
TCI - touch switches - Refac Elctrns/Wild Rover
TDI - power supply - Transistor Devices
TDM - power supply - Transistor Devices
TDMD - power supply - Transistor Devices
Teachware - educational software - Fabri-Tek, Inc.
TechniMatiC - receiver and transmitter sys - Technical Mat'l.
Techni-Rite - Analog & Event Recorders - Gulton Inds., Inc.
Teckshield - custom shielded enclosures - Technical Wire Products, Inc.
Teckstik - shielding & sealing gasket - Technical Wire Products, Inc.
Teckstrip - EMI/RFI gasket - Technical Wire Products, Inc.
TEC-LITE - indicating devices - Tec, Inc.
Tekelec T-A - digital voltmeters, multimeters - Tekelec Inc.
TEL/CELL - telecommunications & standby battery - Globe Union, Inc.
Telco - antennas & installation accessories - GC Electronics
Telcon - metal alloys - Inter-Tech. Grp., Inc.
Tele-Beam II - large screen tv projector - Kalart Victor Corp.
Tele/Data 2000 series - data analyzer - Digitech Data Inds., Inc.
Telefax - X-Ray baggage inspection unit - Teltron
Tele-Pac TM - Elfab Corp.
Telepen - handwriting transmission systems - Telautograph Corp.
Tele-Power Poles - Divided, vertical multioutlet assemblies - Wiremold Co.
Teleproducts - communication products - Atlantic Research Coropration
TELEQUIPMENT - Low-priced Oscilloscopes - Tektronix, Inc.
Telescan - complete telemetry systems - Autocon Inds., Inc.
Telescriber - handwriting transmission systems - Telautograph Corp.
Teleslide - Drake Mfg. Co.
Telesponder - Tracking Radar Devices - Vega Precision Labs.
Telestep - remote control systems - Autocon Inds., Inc.
"Tele-Torque" - Torque-Wrenches, Dual-Scale - Owatonna Tool Co.
Teletrol - complete telemetry systems - Autocon Inds., Inc.
Televac - vacuum measuring instrumentation - Fredericks Co.
Televex - 45 RPM adaptors and playback styli - Aldshir Mfg.
Television Tube Caddy(R)-TV - Servicemans' Case - Argos Products Co., Inc.
Tel-Eye - solid state alarm sensor - Autocon Inds., Inc.
Telicon - Improved vidicon tube - Teletron
Telinc - voice processing equipment - International Communications
Teltronize - Patented process for (image tubes) - Teletron
Temars - transportation environment measuring and recording system - Endevco
"Temflex" - tapes & tabings - 3M Co.
TEM/Guide - coaxial/waveguide components - UTE Microwave
TEMPCAL® - thermocouple/thermal switch tester - Howell Inst. Inc.
Temperex - gold electroplating process for high temp applications. - Sel-Rex Co. Div. Oxy Metal Industries Corp.
Tempgard - temperature alarm system - Tenney Engrg., Inc.
Tempilabels - temperature indicating labels - Tempil Div.
Tempilaq - coatings - Tempil Div.
Tempil Pellets - pellets - Tempil Div.
Tempilstik - crayons - Tempil Div.
Temp-Lace - lacing tape - Gudebrod Bros. Silk Co., Inc.
TEMPO - Hi Fidelity Speakers - Oxford Speaker Co.
Temp-Plate - temperature indicating decals - Wahl, Wm. Corp.
Temp-R-Glas - teflon coated fiberglas - Connecticut Hard Rubber Co.
Temp-R-Tape - teflon tape - Connecticut Hard Rubber Co.
Tempruf - temperature compensated spring - Chatillon John & Sons
Tempscribe - Recording Thermometer - Bacharach Instrument Co.
Tempstat - standard controller - Hotpack Corp.
Tempstir - lab. mixer/stirrer/temp. controller - GCA/Precision Scientific
Temptron - industrial infrared thermometer - Barnes Engrg. Co.
Tenite - pollyallomer, polyester, cellulosic & polyolefin plastics - Eastman Chem. Prods.
Tenna Rotor - TV antenna rotator - Alliance Mfg. Co.
Tenna-Tube - wall-thru - Javex Elctrns.
Tenuline - RF Attenuators - Bird Electronic Corp.
Tera-Ohmmeter - insulation resistance tester - Rhode & Schwarz Sls.
TERG-A-ZYME - powder manual detergent - Alconox Inc.
Termaline - RF Loads & Wattmeters - Bird Electronic Corp.
Termalum - terminals & splices - Amp Inc.
Termashield - ferrules or splices - Amp Inc.
Termi-Blok - tab terminal junction block - Amp Inc.
TERMI CETTE - digital cassette terminal memory unit - Intern'l. Computer Prods., Inc.
Termi-Foil - terminals - Amp Inc.
Termi-Grid - interconnection sys - Amp Inc.
Termi-Kit - cable terminating system - General Elec.
TERMINET - data communications printer - General Elec. Co.
Terminyl - terminals & splices - Amp Inc.
Termi-Plate - connectors - Amp Inc.
Termi-Point - wiring system - Amp Inc.
Termi-Twist - connectors - Amp Inc.
Terrastar - amphibious vehicle - Lockheed Aircraft Svc.
TESTCLIP - I.C. tester and comparator - Fluke Trendar Corp.
Testclip - hand held-incircuit IC tester (digital) - Trendar
Test Lead Caddy - test aid - Air-O-Tronics Prods.
TESTPAC - Automatic test system - ZEHNTEL, Inc.
Tetco - speed recorder - Electric Tachometer Corp.
Texin r - urethane elastomer - Mobay Chem. Corporation
TEXTOLITE - industrial laminates - General Elec. Co.
"TFR" - transistorized float rectifier - Warren G-V Communications
TGS - taguchi gas sensor - Figaro Engrg. Inc.
TGS - taguchi (the inventor) gas-sensing semi-conductor - Figaro Engrg. Inc.
T Head - hand tool - Amp Inc.
The Big Look - voltmeters & ammeters - General Elec. Co.
The Fault Finder - AC leakage current detector - Sotcher Measurement
The Ferret&T - halogen leak detector - General Electric Co.
THELCO, FREAS - ovens, incubators, baths - GCA/Precision Scientific
The Metal Stickers - welding and soldering equip. - Hughes Aircraft Co.
Thermac - temperature control - Research, Inc.
Thermacomb - Corrugated Ceramics - American Lava Corp.
THERMALERT - infrared thermometer - Raytek, Inc.
Thermal Mapper - infra-red scanner - Bendix Corp.
ThermalMaster - industrial infrared thermometer - Barnes Engrg. Co.
Thermasplice - splice for shielded wire - Amp Inc.
Thermatabs - temperature indicating labels - Camwil Inc.
ThermaZip - thermal materials & jacketing - Zippertubing Co.
Thermcoat CC - ceramic cement - Omega Engrg., Inc.
Thermcoat CO and COL - cement - Omega Engrg., Inc.
Thermcoat HT - adhesive and electrical insulator - Omega Engrg., Inc.
Thermcoat Kit - insulation and cement kit - Omega Engrg., Inc.
Thermcoat SL - silicone lacquer - Omega Engrg., Inc.
THERMILINEAR - thermometer - Yellow Springs Instrument Co.
THERMIVOLT - signal conditioner - Yellow Springs Instrument Co.
Thermobead - Glass coated bead thermistor - Thermometrics, Inc.
Thermobond - Phenolic Insulating Varnish - Sterling
THERMOBOND - varactor diodes - Varian Electron Tube & Device Grp.
Thermobond - varactor diodes - Varian Assocs.
Thermochip - thermoelectric cooling modules - Melcor-Materials Elctrn. Prods.
Thermochuck - temp controlled chucks - Temptronic Corporation
Thermodur - High Temperature Varnish - Sterling
THERMOFIT - heat shrinkable tubing - Raychem Corp.
THERMOFLAG - Transistor Heat Dissipators - Staver Co., Inc.
Thermoflake - Flake (thick film) thermistor - Thermometrics, Inc.
"Thermoflo" - thermal flow measurement - Thermo Sys., Inc.
THERMOFORM - high temperature insulating products - Precision Paper Tube Co.
THERMOHM - temperature detector (resistance thermometer-type) - Leeds & Northrup Co.
Thermolain - ceramic products - Star Porcelain Co.
Thermolastic - heating element - Cox & Co., Inc.
Thermomatic - constant temperature block - Beckman Instrs., (AISSD)
Thermonic - induction heating equip. - Taylor-Winfield Corp.

Thermopad - plastic package (power transistors) - Motorola Semiconductor Prods.
Thermopak - Plastic Molded Triac & SCR No Metal Tab - ECC Corp.
Thermopatch - heating element - Cox & Co., Inc.
Thermopoxy Compound - Epoxies - Sterling
Thermoprobe - bead-in-glass probe thermistor - Thermometrics, Inc.
Thermorod - Bead-in-glass rod thermistor - Thermometrics, Inc.
Thermosheet - heating element - Cox & Co., Inc.
Thermospot - temp controlled probes - Temptronic Corporation
Thermo Stack - core memory stack - Fabri-Tek, Inc.
Thermostream - temp controlled microchambers - Temptronic Corporation
THERMOSWITCH - temperature controls - Fenwal, Inc.
Thermotab - Plastic Molded Triacs & SCR Metal Tab - ECC Corp.
Thermotape - heating element - Cox & Co., Inc.
Thermo-Tector - overload protection sys. - General Elec. Co.
Thermoterm - noise sources, hot - Maury Microwave Corp.
Therm-O-Trac - heat control soldering station - Hexacon Elec. Co.
THERMOVANE - Transistor Heat Dissipators - Staver Co., Inc.
Thermowatt - silicon power transistors - Motorola Semiconductor Prods.
Thermowire - heating element - Cox & Co., Inc.
The Short Stop - AC leakage current tester - Sotcher Measurement
The Voice of the Theatre - speaker systems - Altec Div.
"THIN-HEET" - etched foil heating element - Safeway Products
Thinistor - thermistor - Victory Engrg. Corp.
"Thinlay" - micro-thin selective electroplating - Advanced Materials Systems
Thinline - capacitors, fixed, ceramic - Republic Elctrns. Corp.
THINPAK - miniature relay - American Zettler, Inc.
Thinshield - electrostatic shielding technique - CEA
Thin-Trims - variable ceramic trimmers - Johanson Mfg. Corp.
THINVERTER - miniature power converters - Arnold Magnetics Corp.
THINWALL - pre-impregnated tubing - Precision Paper Tube Co.
Third-Hand - automated soldering gun - Hollis Engrg., Inc.
"Thirsty" Foam Wire - hi-absorbent urethane foam wiper - Clean Room Prods.
Thorkom - miniature polycarbonate connector - Viking Inds., Inc.
Thorn - cathode raytubes - Inter-Tech. Grp., Inc.
Thorn-Brimar - cathode raytubes - Inter-Tech. Grp., Inc.
Thorox - thorium oxide - National Beryllia Corp.
3-Wire Line - grounded production - UNGAR, Div.
3200 DIGITAL TESTER - bench top IC tester for digital IC's - Sitek, Inc.
Thruline - RF Wattmeters - Bird Electronic Corp.
Thumb Mite - miniature size thumbwheel switch - Tech Labs., Inc.
Thy-Mo-Trol - motor control - General Elec. Co.
Thyristrol - SCR proportional power & controllers - Cross Electronics Inc.
Thyrite - dielectric or resistance mat'l. - General Elec. Co.
Ti-Ball - pumps - Varian Assocs.
Timatch - connector - Times Wire & Cable
Time Capsule - 2 lead ac timer - Artisan Elctrns. Corp.
Time Electronics - voltage calibrator - Zi-Tech Div.
Timefax - electrosensitive recording paper - Fitchburg Coated Products
Timemark - electrosensitive recording paper - Fitchburg Coated Products
Time-O-Lite - photographic timers - Industrial Timer Corp.
Time-Pak - solid-state controlling device - Gems Sensors Div.
Tineon - indicator light - Leecraft Mfg. Co., Inc.
Tinnerman® brand - fasteners - Eaton Corporation
Tinsil - silver bearing solder - Bow Solder Products
Tintac - organic coating - Conversion Chem. Corp.
Tintillate - tin plating bath - Conversion Chem. Corp.
Tiny-Glow - pilot lights - Industrial Devices
Tiny "L" - inductors - Aladdin Elctrns.
Tinylite - Drake Mfg. Co.
Tinymag - relays - Torwico Elctrns., Inc.
Tinymax - transformers - Torwico Elctrns., Inc.
Tinymite - flexible coupling - Renbrandt, Inc.
TINY-PAK - Miniature flat pack package - Mini-Systems, Inc.
Tiny Ties - miniature wire & cable ties - Transcon Mfg. Co.
Tiny Trim - variable trimmer delay line - Kappa Networks
Tisan - programmer - Artisan Elctrns. Corp.
Tite-Bite - connectors - Thomas & Betts Co.
Titelite - Drake Mfg. Co.
TKC - printed circuit connectors - Teledyne Kinetics
T-Lite - bi-pin indicator light - GTE Sylvania Inc.
TOG-L-LOK - Clamping tool - Channellock, Inc.
Toho - paper tape perforator - Uchida of America Corp.
Tokin - all products - Tohoku Metal Inds., Ltd.
TONE-O-MATIC LOUDNESS - loudness control - V-M Corporation
Tong Test - clamp on ammeter - Columbia Electric Mfg. Co.
Tonomagic - nonship chemical - R-Columbia Products, Inc.
Tonotron - direct view storage tube - Hughes Aircraft Co.
Top Brass - microphone - Electro-Voice, Inc.
Tophel - thermocouple alloy - GTE Sylvania Inc.
Tophet - heating element alloy - GTE Sylvania Inc.
TOR Heat Sinks - aluminum heat sinks-transistor mounting pads - TOR Corporation
Tormax - stepper motors and control elec. - IMC Magnetics Corp.
TORQLINER - coil forms for electrical windings - Cambridge Thermionic Corp.
Torqometer - direct-reading dial torque measuring tools - Snap-On-Tools
Torq Switch - centrifugal switches - Torq Engineered Products, Inc.
Torqsyn Remote Positioner - direct drive servomechanism - Vernitron Corp.
TORQUE COMMANDER - screw driver sets - Vaco Products Co.
Torque-Rite - air tool torque control system - S. Himmelstein & Co.
Torque Watch - Torque Watch Gauge - Waters Mfg., Inc.
Torrex Series - x-ray inspection system - Torr Labs.
Torrlite Series - xenon flashtubes - Torr Labs.
Torr Seal - resin - Varian Assocs.
Torr Seal - high vacuum sealer - Varian Assocs.
Torx - fastener drive system - Camcar Screw & Mfg.
T-O-T - sealant and pipe thread compound - Lake Chemical Co.
Touch Mos - touch control technology - American Microsystems, Inc.
T-Pads - semiconductor pads - Transcon Mfg. Co.
Tra-Bond - adhesives - Tra-Con, Inc.
Tra-Cast - potting compounds - Tra-Con, Inc.
TRACER-flo - hermetic leak tester - Trio-Tech, Inc. of Calif.
Tracer-Tech - inspection penetrants - Shannon Luminous Mat'ls.
Tracker&T - servicemen's battery-operated portable leak detector - General Electric Co.
TRACOR WESTRONICS - all product lines - Westronics
Traction Booster - Tractor draft control system - Allis-Chalmers
TRACTORADIO - Applicable to Tractor radios - ATR Electronics, Inc.
Tra-Duct - conductive adhesives - Tra-Con, Inc.
TRAILFLEX - CV-cured mining cables - CCS Hatfield Wire & Cable Group
Trakfet - tracking field effect transistor - Analog Devices
Tran Bal - inverter ballast - Bodine Co.
Transactive DPIs - compact DPIs with added circuit functions - Analogic Corp.
Transaire - pressure transmitter - Taylor Instr. Process Control Div.
Trans-Box - plastic boxes - Vichek Plastics Co.
Transcope - pheumatic transmitter/recorder - Taylor Instr. Process Control Div.
Transelectric - telephone apparatus - Encom Prods. Co., Inc.
TransistAR - chemicals - Mallinckrodt, Inc.
Transitlite - laser alignment device - Spectra-Physics, Inc.
TRANS-O-MATIL - automatic transfer switch - Lakeshore Electric Corp.
Trans-Start - electrical controls - Electric Machinery Mfg. Co.
Transvolt - standard voltage - Guildline Instrs., Inc.
TransZorb - silicon transient suppressor - General Semiconductor Industries, Inc.
Travel-Tron - campor TV antenna - Antenna Corp. of America
TRENDTRAK - curve follower program control unit - Leeds & Northrup Co.
Trevar - alloy - Hamilton Technology, Inc.
Triac Kooler - heat dissipator - UNITRACK Div.
Tri-Amp - Selenium Rectifier - General Instruments Corp.
"Tri-Band" - 3-band antenna - Telrex Labs.
"Tri-Beam" - u.v. ray generators - Western Coil & Elec. Co.
Tri-Break - circuit breakers - General Elec. Co.
Tri/Clad - motors, generators, frequency converters - General Elec. Co.
Tricolor - Color Temp. Meter - Photo Research Corp.
Trigac - trigonometric analog converters - Singer Co.
Trigard - 3 electrode spark gap - Joslyn Elctrn. Sys.
Trig-R-Heat - soldering gun - Wall-Lenk Mfg. Co.
Trimatron - dimmer control - Leviton Mfg. Co., Inc.
Trimit - potentiometer - Bourns, Inc.
TRIM KITTM - Capacitor Kit - American Technical Ceramics
"Trimline" - PC mounting variable delay line - ESC Elctrns. Corp.
Trimpot - potentiometer - Bourns, Inc.
TRIM-STEP - encoder, shaft angle, optical - Trump-Ross Ind:'l. Controls
TR-IOTA - encoder, shaft angle, optical - Trump-Ross Ind:'l. Controls
TRI—PHASIC CONVERSION - autozeroing integration technique - Data Precision Corporation
Triplate - patented semiconductor process - Alpha Instr. Inc.
TRIPLE MATE - SOLDERING TIPS FOR ABOVE - Edsyn, Inc.
Triplematic - mixing, metering, dispensing machinery - Hardman Inc.
Tri-State - three stage output ICS - National Semiconductor Corp.
Trol Aid - control cleaner - Chemtronics, Inc.
Trol-A-Temp - heating & cooling controls - EWC, Inc.
Trolex - selector switch - CTS Corp.
Trolpac&T - control units (timing generator and register/decoder - Analogic Corp.
TRON - fuses & fuseholders & fuse clips - Bussmann Manufacturing
Troubleshooter - extension spotlights - Teledyne Big Beam
Troubleshooter - in-circuit component system - ZEHNTEL, Inc.
Truarc - rings, tools & gages - Waldes Kohinoor, Inc.
Trucote - flux coated silver rod - Chemetron Corp.
TRUFLEX - thermostat metals - Texas Instruments
TRU-MITE - encoder, shaft angle, optical - Trump-Ross Ind:'l. Controls
TRU-ROTA - encoder, shaft angle, optical - Trump-Ross Ind:'l. Controls
TRYPACK - modular precision power supplies - Systron Donner Trygon Div.
T-Screen - insulated tape-shield dividing - Superior Cable Div.
TTS - timeshare terminals - TTS
Tube O'Gel - thixotropic gelling agent - Beckman Instrs., (AISSD)
TUBE-PAC - SOLID STATE SILICON VACUUM TUBE REPLACEMENT - Semtech Corp.
TUBE-R-CAP - capacitor resistor combination - Centralab
Tuchswitch - solid state limit switch - Denison, R.B., Inc.
Tuff-Tainer - plastic boxes - Vichek Plastics Co.
Tuf-Test - lacing tape - Gudebrod Bros. Silk Co., Inc.
Tuf-Ties - wire & cable ties - Transcon Mfg. Co.
Tulox - cellulose acetate butyrate tubing - Blum, Julius & Co., Inc.
Tungar - rectifying apparatus - General Elec. Co.
Tun-O-Foam - tuner cleaner/lubricant - Chemtronics, Inc.
Tun-O-Lube - tuner cleaner - Chemtronics, Inc.
Tun-O-Power - tuner cleaner-polish-lubricant - Chemtronics, Inc.
Tun-O-Wash - tuner degreaser - Chemtronics, Inc.
TURBO - Varnished Cotton Sleeving - Brand-Rex Co.
TURBOCRYL - Acrylic Coated Glass Sleeving - Brand-Rex Co.
TURBOGLAS - Varnished Cotton Sleeving - Brand-Rex Co.
TURBOLEX - General Purpose Vinyl Tubing - Brand-Rex Co.
TURBOSIL - Silicone Coated Glass Sleeving - Brand-Rex Co.
TURBOTHERM - High Temperature Vinyl Tubing - Brand-Rex Co.
TurboTorr TM - Turbo-Molecular Pumping Units - Sargent Welch Sci. Co.
TURBOTUF - Vinyl Coated Glass Sleeving - Brand-Rex Co.
TURBOZONE - Low Temperature Vinyl Tubing - Brand-Rex Co.
TURBO 117 - Silicone Rubber Coated Glass Sleeving - Brand-Rex Co.
Turner - microphones - Conrac Corp.
Turn-Loc - captive screw - Deutsch Fastener Corp.
Tutorette - audiocard readers - Audiotronics
TV-PAC - HIGH VOLTAGE MULTIPLIER - Semtech Corp.
TVS - torque verification system - S. Himmelstein & Co.
Twenty/Twenty - epoxy adhesive - Packaged Resins Div.
Twenty/Twenty - epoxy adhesive - Allaco Prods Div.
Twinducer - Gear drives, two motors - Allis-Chalmers
Twin-Hex - crimp tool system - Amphenol RF Div.

Twin Light - circuit indicator light - GTE Sylvania Inc.
TWIP - SOLDERING & DESOLDERING SUPPLY HOLDER - Edsyn, Inc.
Twistaguide - twistable flexible waveguide - Airtron
Twist-Lite - lighted pushbutton switch - Master Specialties Co.
20/20 - custom panel instrument line - Westinghouse Elec. Corp.
2+2 - four tone selective call system - Bramco Controls Div.
TWYSTRON - microwave amplifier tubes - Varian Electron Tube & Device Grp.
Twystron - amplifier - Varian Palo Alto Microwave Tube Div.
Twystron - microwave amplifier - Varian Assocs.
Tygon - polyvinyl chloride tubing - Blum, Julius & Co., Inc.
Typotron - direct view storage tube - Hughes Aircraft Co.
Typotron - direct view storage tube - Hughes Aircraft Co.
Ty-Rap - cable ties, clamps, & tools & accessories - Thomas & Betts Co.
Tytex - batteries - Exide Power Sys. Div.
T-1 Military Indicator Light - indicator light - GTE Sylvania Inc.

U

UAR/T - universal asynchronous receiver/transmitter - General Instr. Corp.
UBIQUITOUS® - real-time spectrum analyzers - Nicolet Scientific Corp.
Uchida - fuse, electronic computer & related system - Uchida of America Corp.
U-D-F - unidirectional flow inductors - Ajax Magnethermic Corp.
UFLEX - UF & MNC types - CCS Hatfield Wire & Cable Group
Ulbloc - plastic package (transistors) - Motorola Semiconductor Prods.
Ulta-Solv - cleaning solvents - Udel Manufacturing
Ultipor - filter medium - Pall Corp.
Ultipor - filter media - Pall Trinity Micro Corp.
Ultra-Craft - catalog - Workman Electronic Prods., Inc.
Ultra "F" - graphite purification process - Ultra Carbon Corp.
ULTRAFLEX - Adjustable Speed Drives & Controllers - Cutler-Hammer, Inc.
Ultra-Flux - flux - Engelhard Minerals & Chem.
Ultra-Glow - illuminated push button, slide & rocker switches - UID Electronics Div.
ULTRA-KAP - ceramic capacitor - Centralab
Ultra-Mate - connector - Amphenol Connector Div.
ULTRA-ONE - variable resistor - Centralab
Ultrapak - wave soldering sys - Electrovert
ULTRA-SEAL - Solderable, protective coatings - Kenco Alloy & Chemical Co., Inc.
Ultrasil - clear fused quartz - Amersil, Inc.
ULTRA-SOL - Solvent cleaners - Kenco Alloy & Chemical Co., Inc.
Ultra-Strates - substrates .025" with a 2m" B/S - Accumet Engineering Corp.
Ultratec - catalog - Workman Electronic Prods., Inc.
Ultra-Temp - high temperature adhesive - Aremco Prods., Inc.
Ultraverter - uhf to vhf converter - Blonder-Tongue Labs., Inc.
Ultravox - portable sound column - PASO Sound Products Inc.
Ultrex - 100 ultra high purity chemicals - Baker, J.T. Chemical Co.
ULTROHM - Resistors - Ultronix, Inc.
Ultrol - cross-linked polyethylene cable - Brand-Rex Co.
Unibase - silicon power transistors - Motorola Semiconductor Prods.
UNIBUS - Signal Data Path - Digital Equipment Corp.
UNI-BUS - Bus Ducts & distribution systems - Cutler-Hammer, Inc.
Uniceram - fixed ceramic capacitors - JFD Electronics Components Corp.
Unicoat - insulation coating - Bacon Inds.
Unicom - CATV trunk amplifier - Delta-Benco-Cascade LTD.
Uni-Core - acid filled core solder - Alpha Metals, Inc.
UNI-CURVE - R-T, curve-matched, interchangable thermistors - Fenwal Elctrns.
Unidaptor - special 45 RPM adaptor - Aldshir Mfg.
Unidex - rotary switches - Oak Inds. Inc.
UNIDYNE - unidirectional microphone - Shure Brothers, Inc.
Uni-Kit - cable splicing kit - General Elec.
Uni-Laser - small, one-piece pulsed laser - Laser Inc.
Uniline - sound columns - University Sound
UNI-PAC - integrated circuit socket - Methode Elctrns., Inc.
Uniply - automatic multirange supply - Power Designs, Inc.
UNIRING - one piece compression termination - Burndy Corporation
UNI-ROTOR - pumps - Astro Dynamics
Uniseal - for microphones - Electro-Voice, Inc.
UNISPHERE - unidirectional microphone - Shure Brothers, Inc.
United Electron - tubes - United Page Inc.
Unitized - electric motors - General Elec. Co.
Unitrack - circuit card guides (plastic and metal) - UNITRACK Div.
Unitron - telescopes - Unitron Scientific, Inc.
Unitron - gamma radiography machines - Automation Inds.
Uni-Tunnel - backward diodes - Centralab Semiconductor
Unitwest - coupling - Jan Hardware Mfg. Co.
"Universal" - mobile antenna fittings - K-W Engineering Works
Universal - Clips - Mueller Electric Co.
Universal Active Filter - multi loop negative feedback filter - Kinetic Tech., Inc.
Universal Pilot Housing - pilot lamp socket - GTE Sylvania Inc.
Universal Time Capsule - AC or DC timer from 1 to 1000 seconds - Artisan Elctrns. Corp.
Uniwatt - plastic package (transistors) - Motorola Semiconductor Prods.
Uniweld - unique construction of coils, applied specifically to our line of buzzers - Endicott Coil Co.
Unpluggables - spring loaded test probes - Ostby & Barton Co.
UNREEL TM - Reel-less Wire & Cable Package - Belden Corp.
Urafil - fiberglass reinforced polyurethane - Fiberfil Div. - Dart Ind.
Uresolve - cured silicone & urethane dissolver - Dynaloy, Inc.
USE - magnetic comps. - U.S. Elctrns.
U-Tile-Mu - shielding tiles - Amuneal Mfg. Corp.
Utili-Splice - connectors - Amp Inc.
Utili-Tap - power cable - Amp Inc.
Utili-Tenshun - connectors - Amp Inc.
Uvex - weatherable plastic sheet - Eastman Chem. Prods.
UVtron - Ultraviolet radiation detector - Hamamatsu TV Co., Ltd.

V

Vaclon - pumps - Varian Assocs.
VACOMBO - kits - Vaco Products Co.
VACONNECTORS - tap connectors - Vaco Products Co.
VacPac - vacuum equipt - Hull Corp.
Vac-Seal - epoxy resin - Perkin-Elmer Ultek Inc.
Vac Sorb - vacuum forepump - Varian Assocs.
VacSorb - pumps - Varian Assocs.
VACTORR - vacuum pumps - GCA/Precision Scientific
Vactrol - optical couplers (or) isolators - Vactec, Inc.
Vaculoy - oxide free bar solder - Alpha Metals, Inc.
Vacumette - resistor - CW Industries
Vac-U-Sel - current rectifiers - General Elec. Co.
VADAC - voice analyzer converter - E-Systems Inc.
VAL-AN - Military Cases - Zero Mfg. Co.
Valley - Paper mill equipment - Allis-Chalmers
Valox - thermoplastic polyester - General Elec.
ValueLine - Motor control - Allis-Chalmers
Value Vial - vials - Beckman Instrs., (AISSD)
VALUPOWER SERIES - high power precision system slot range power supplies - Systron Donner Trygon Div.
Valvactor - valve positioner - Foxboro Co.
VAM - air variable capacitors - JFD Electronics Components Corp.
Vaporflo - humidification system - Tenney Engrg., Inc.
Varax - Line Voltage Regulator - Tele-Dynamics/Wanlass
Varfil - flexible sleeving - Varflex Corp.
Varflo - flexible sleeving - Varflex Corp.
Varglas - flexible sleeving - Varflex Corp.
Variable-D - microphone - Electro-Voice, Inc.
Variac® - adjustable autotransformer - General Radio Co.
Varicon - electrical contact - Elco
VARIDAC - converters - Perkin-Elmer Corp.
Vari-L - electrically variable inductors - Vari-L Co.
Varilok - electrical contact - Elco
Varipak - printed circuit card cage - Elco
Variplate - interconnecting system - Elco
Vari-Tex - Speed changers - Allis-Chalmers
Varitor - elect. variable inductor - Data Delay Devices
Varitrim - capacitors - Voltronics Corp.
Vari-Vac - metering valve - Vactronic Lab. Equip., Inc.
VAST - computer-controlled ATE - PRD Elctrns., Inc.
V BALL - precision rubber balls - Vernay Laboratories, Inc.
VECO Vamp - meter protector - Victory Engrg. Corp.
Vectorbord - Perforated Insulating Board - Vector Electronic Co., Inc.
Vectorgraphics 11 - interactive graphics display system - Vector General, Inc.
Vectortablet - data tablet - Vector General, Inc.
Vectrol - power sys. - Vectrol, Inc.
Velcor - hue shift corrector - Television Microtime, Inc.
Velometer - air-velocity instrument - Alnor Instrument Co.
VENT-RAK - Cabinets, Chassis & Accessories - General Devices Co., Inc.
Verifier - PCB tester - Western Electronic Systems
Verilux - digital indication - Toledo Scale
Vernistat - a.c. potentiometer - Perkin-Elmer Corp.
Vernitorq - brushless DC torque motor - Vernitron Corp.
Veroboard - P.C. Board - Vero Electronics
Verobox - Aluminum Mini-Enclosure - Vero Electronics
Verolock - Card Frame Locking Mechanism - Vero Electronics
Verorack - Card Frame - Vero Electronics
Versa-Cage - p.c. card rack - UNITRACK Div.
Versa-Fab - tape - General Elec.
Versaformer - Current transformer - Allis-Chalmers
Versa - Lock - matv device lock - Blonder-Tongue Labs., Inc.
Versamatic - book pasting machine - A. M. W. Corp.
Versamount brackets - card guides brackets (plastic and metal) - UNITRACK Div.
Versa-Pac - Motors - Allis-Chalmers
Versapak - temperature controllers - Honeywell
Versapot - calibrator/potentiometer - Biddle, James G.
VERSA-RANGE - refrigerated test chambers - Blue M Electric Co.
Versatap - matv tap offs - Blonder-Tongue Labs., Inc.
Versatol - rubber insulated cable - General Elec.
Versa-Tran - temperature controllers - Honeywell
Versa-Trap - roughing pump accessories - Perkin-Elmer Ultek Inc.
Versatyme® - programmable controller - Applied Materials Inc.
Versawatt - molded plastic package for TO-66 sockets - RCA Solid State Div.
Versilube - silicone lubricant - General Elec. Co.
Verterseal - environmentally sealed inverter - Nova Electric Mfg. Co.
Vertohold - Embedment anchor - Edo Western Corp.
V-Guard - stylus assembly - Stanton Magnetics, Inc.
VIBRACHOPPER - DC Driven Solid State Chopper - Solid State Electronics Corp.
VIBRALERT - vibration switches - Metrix Instrument Co.
Vibramike - optical displacement measuring device - Advanced Dynamic Instrs. Div.
Vibra-mite - vibration pickup - Vibra-Metrics, Inc.
VIBRA SONE - ultrasonic cleaning sys. - Phillips Mfg. Co.
Vibraswitch - monitoring sys - Robertshaw Controls Co.
Vibra-Tel - monitoring sys - Robertshaw Controls Co.
Vibrode - capacitor modulators - Beckman Instrs., (AISSD)
VIBROGROUND - ground resistance testers - Associated Research, Inc.
Vicom - commercial edgeboard connector - Viking Inds., Inc.
VICON® - CCTV accessories - Vicon Industries Inc.
Videofax - high speed document transmission - Datalog Div., Litton Sys.
Videopak - closed circuit TV systems - Audiotronics
VIDICUE - Model 5050 Video Tape Editing System - Datatron, Inc.
Vidifont - character generator - CBS Laboratories
Vidigage - thickness tester - Branson Cleaning Equip. Co.
Vigiltrol - safety switch-high level alarm - Autocon Inds., Inc.
VII® - CCTV accessories - Vicon Industries Inc.
Viking - tape equipment - Telex Communications, Inc.
Vikon - burn resistant vidicon surface - Teltron
Vikon - Non burn LLLTV vidicon - Teletron
VINYLINK - vinyl insulated splice - Burndy Corporation
VINYLUG - vinyl insulated terminal - Burndy Corporation
VIP - programmable controllers - Struthers-Dunn, Inc.
VIP - Aluminum Instrument Enclosures - Zero Mfg. Co.
Visicorder - graphic recorders - Honeywell, Inc.
Visi-Dial - dial assy. - Theta Instr. Corp.
Visi-Guard - lightning & electrical surge protector - Joslyn Elctrn. Sys.
VISTAL - Transluscent polycrystaline Al2O3 ceramic - Coors Porcelain Co.
VITACOTE - soldering iron tips - ESICO, Inc.
Vita Drive - rubber drive wheel-cleaner - Friend's Mfg.
Vitel - telecommunicatoions solder connector - Viking Inds., Inc.
Vitrohm - vitreous enamel wire-wound resistors - Ward Leonard Elec. Co. Inc.
Vitrolain - ceramic products - Star Porcelain Co.
VN-TC - Power & Control Cable - Brand-Rex Co.
VOCAL MASTER - sound system - Shure Brothers, Inc.

Voice Director - Portable P.A. System - Argos Products Co., Inc.
Vol-Con - voltage/continuity tester - Kurz-Kasch, Inc.
Voltaut - taut-band suspension sys. - Kratos
Volt-Pac - variable transformers - General Elec. Co.
Voltprobe - voltage testers - Amprobe Instr.
Voltrip - limit detection & control - Kratos
Voltsensor - voltage level monitor module - Calex Mgf. Co., Inc.
Volumax - controller peak - CBS Laboratories
Vol-U-Meter - flow calibrator - Brooks Instr. Div.
Volumetric - diaphragum - Electro-Voice, Inc.
Voyager I - portable microfiche reader - Visidyne Inc.
Voyager I - compact lap reader screen, 7"W x 9.5"H-20x or 24x - Visidyne Inc.
Voyager II - portable microfiche reader - Visidyne Inc.
V-Pac Power Sources - DC-DC converters - Reliability Inc.
VPR - metal film resistors - Vermont Precision Resistor Co.
V-Q - vacuum interrupters - Electric Machinery Mfg. Co.
VSMF - visual search microfilm - Information Handling Services
V TIP - rubber tipped armatures - Vernay Laboratories, Inc.
VTO - MIC Varactor-Tuned Oscillators (in TO-8 packages) - Avantek, Inc.
Vu-Break - circuit breakers - General Elec. Co.
Vulcan - soldering irons melting pots - Precision Elec. Co.
Vulkaflex - cross-linked polyolefin cords & leads - General Elec.
Vulkene - cross-linked polyethlene insulated wires - General Elec.
Vumatik - miniature pneumatic instrumentation - Honeywell
Vutronik - miniature electric instrumentation - Honeywell
V V C - voltage variable semiconductor capacitor - Codi Corporation
VX Super Refractory - crucibles, boats - Gte Sylvania, Inc.
Vycor - 96% silica glasses - Corning Glass Works
VYLINK - Irradiated Vinyl Insulated Wire - Brand-Rex Co.
V-2 - transducers - Westinghouse Elec. Corp.
V-53 - resistors - Vishay Resistive Systems Grp.
V71, V72, V73, V74 - digital computers - Varian Data Machines

W

Wafercon - P.C. board wafer connectors - Molex Inc.
Wafer-Sphere - butterfly valves - Jamesbury Corp.
Wait-A-Bit - delay lines - Aladdin Elctrns.
WALSCO - tape-phono drives & belts - GC Electronics
WAMCO - custom built cases - Miller, W. A. Co.
Wassco Glo Melt - resistance soldering material - American Elec. Heater
Water-Bloc - flooding compound - Superior Cable Div.
Watertite - moisture resistant rubber insulation - Okonite Co.
Water Welder - oxy-hydrogen flame generator - Henes Mfg. Co.
Wattcher - RF Monitor/Alarm - Bird Electronic Corp.
Watt-Pak - solid-state controlling device - Gems Sensors Div.
Wavedipper - lead tinning - Electrovert
Waveform Eductor - signal averager - Princeton Applied Resch. Corp.
Wavelabs - vibration measurement - Systron-Donner Inertial Div.
Wavetrak - wave tracking device - Edo Western Corp.
Weather-Ometer - accelerated weathering chamber - Atlas Electric Devices
Webair - computor room air conditioner - Weber Tech Products
WEDGELOCK - "T" SLUG CONSTRUCTION - Standard Grigsby Inc.
Weecoil - chokes, r.f. - Syscon Int'l., Inc.
Weecoil - variable inductors - Syscon Int'l., Inc.
Weecoil - if transformers, hf transformers - Syscon Int'l., Inc.
Weecoil - miniature inductive components - Syscon Int'l., Inc.
Weighmaster - electronic scales - Electro-Numerics Corp.
WELCON - Integrated Circuit Carriers, Contactors & Sockets - Wells Electronics, Inc.
Weldohm R - Strong Flat TV Lead-In - Belden Corp.
Weldox - adhesives compositions - Hardman Inc.
Wellflex - semi-rigid cable - Cablewave Systems Inc.
Wenking - potentiometer - Brinkmann Instrs., Inc.
Wenking - potentiostats - Brinkmann Instrs., Inc.
West - Temperature Controllers - Gulton Inds., Inc.
West-Cap - glass encapsulated monolythic cap - San Fernando Elec. Mfg.
West-ing Arc - elec. welding apparatus - Westinghouse Elec.
Wheeler - flanges - Varian Assocs.
Whisper - fan - Rotron, Inc.
WHO's - wire holding objects - Gudebrod Bros. Silk Co., Inc.
Widebeta - radioactivity detection sys. - Beckman Instrs., (AISSD)
Wik-It - solder remover - Wik-It Elctrns. Corp.
Wilbraz - hi-temp brazing alloys - Wilkinson Co.
Wild One - Solid State Guitar/P.A./Musical Instrument Amplifier - Wilder Engrg. Prods, Inc.
Willard - charge-retaining batteries - Wisco Div.
Winchester Relays - Reed Relays - Elctrn. Instr. & Specialty
Windjammer - motorized & belted blowers - Ametek/Lamb Electric
Wirecenter - semi-automatic wiring machine - Hughes Aircraft Co.
WIRE NUT - wire connectors - Ideal Industries Inc.
Wiretemp - wire temperature sensor - Trans-Met Engrg.
Wire-Wrap - tools and machines for making solderless wrapped connections - Gardner-Denver
Woelke - wow & flutter meters - Gotham Audio Corp.
Wolverine - loudspeakers - Electro-Voice, Inc.
Wood Electric - circuit breakers - Potter & Brumfield
Wrap Rack - card packaging - Scanbe Canoga Industries
Wrap-X - logic card with 16-14 or 16 pin 1c sockets - Datascan Div.
Wrarost - Terminals for wire wrapping - Auto-Swage Products Inc.
Wrinlay Process - markings for elect. panels - Photo Chemical Prods. Cal.
Write-On-It - labeling tape - Labelon Corp.
Wybar - component lead forming - Eraser Co.

X

XacTemp - pyrometers - Gordon, Claud S. Co.
XacTgland - adjustable T/C comp. fittings - Gordon, Claud S. Co.
XacThead - thermocouple heads - Gordon, Claud S. Co.
XacTlok - thermocouple comp. fitting - Gordon, Claud S. Co.
XacTohm - resistance temperature sensors - Gordon, Claud S. Co.
XacTpak - thermocouple assemblies - Gordon, Claud S. Co.
XacTseal - sealant for thermocouple wire ends - Gordon, Claud S. Co.
XCITE - hydraulic excitation equipment - Zonic Technical Labs.
X-Citers - magnetic tape head - Michigan Magnetics
"Xela" - knives - Klein, Mathias & Sons, Inc.
Xenolite - arc lamp sys - Christie Elec.
XL - bench & portable scales - Howe Richardson Scale Co.
X-L - power supply - Transistor Devices
XLS - soldering pencils - Wall-Lenk Mfg. Co.
XL-TC - power and control cable - Brand-Rex Co.
X-Olene - cross linked polyethylene cable - Okonite Co.
X Series - exit auxiliary lights - Teledyne Big Beam
Xtradur - soldering tips - Hexacon Elec. Co.
X-Var - paint strippers - Fidelity Chem. Prods. Corp.

Y

Yellow Handle - crimping tools - Amp Inc.
YELLOW 77 - wire pulling lubricant - Ideal Industries Inc.
YEW - measuring instruments - Yewtec Corporation
Yewtec - measuring instruments - Yewtec Corporation
Young World - toys - Midland International Corp.

Z

"Z" Amp - zener current source - General Resistance, Inc.
Zero Amp - mixing amplifier - Spectra Sonics
Zero Centurion - Carrying Cases - Zero Mfg. Co.
Zero-Flow - multilayer dielectric ink - Engelhard Minerals & Chem.
ZERO-HALLIBURTON - Aluminum Luggage & Camera Cases - Zero Mfg. Co.
Zeromatic - ph measuring instrs. - Beckman Instrs., (AISSD)
ZERO-PLY - Sandwich Construction Modular Cases - Zero Mfg. Co.
Zero Quip - Work Stations - Zero Mfg. Co.
ZERO-SPACE SERIES - Aluminum Cabinets & Consoles - Zero Mfg. Co.
ZERO-TRAK - Steel Chassis Slides - Zero Mfg. Co.
Zestron - reed relays - COSAR Corp.
ZIP DIP - zero insertion pressure dip skt - Textool Products, Inc.
Zipex - cable shielding - Cal-Metex Corp.
Zip-In - shelving, bins - Equipto
Zip-Loc - stressed panel fastener - Deutsch Fastener Corp.
Zippertubing - zip-on jacketing - Zippertubing Co.
Zip R Processor - processing equip. for metalphoto R - Metalphoto Corp.
ZIP Sys. - automated circuit test sys. - Automation Dynamics
ZipTape - marking systems - Zippertubing Co.
Z-Match - microwave comps. - Vari-L Co.
Z-Match - wide band transformers, mixers, frequency doublers - Vari-L Co.
Z-Trol - x-ray gage thickness control - Electron-Machine Corp.
"Z" Volt - zener voltage reference - General Resistance, Inc.

UNITED TECHNICAL PUBLICATIONS, INC. DIV. OF COX BROADCASTING CORP.
645 STEWART AVE., GARDEN CITY, N.Y. 11530 (516) 248-9700

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

VOLUME 2

PASSIVE COMPONENTS / SWITCHES / MATERIALS / HARDWARE / DISPLAYS / WIRE & CABLE / DISTRIBUTOR DIRECTORY

2•2 Capacitors (all types)
2•338 Chemicals / Cleaners / Coatings / Materials
2•345 Circuit Boards & Assemblies / Breadboarding Kits
2•368 Coil & Choke Assemblies & Forms
2•444 Connectors, Terminals, Sockets
2•1075 Panel Components (excluding Lighting & Displays)
2•1121 Displays & Readouts (including Lamps & Lights)
2•1210 Mechanical Components (Bearings, Cores, Magnets, etc.)
2•1258 Hardware (Non-Current Carrying)
2•1268 Insulators / Insulation
2•1276 Microwave Components & Accessories
2•1408 Resistors, Fixed
2•1584 Resistors, Variable
2•1693 Tools (Hand & Power) / Soldering Supplies
2•1720 Transformers
2•1835 Wire / Cable / Harnesses & Accessories

VOLUME 1

INSTRUMENTATION & SYSTEMS / POWER SOURCES / SUBASSEMBLIES / SEMICONDUCTORS / RELAYS / CONTROLS

1•2 Amplifier Assemblies
1•14 Audio Equipment & Accessories
1•44 Enclosures / Packaging Systems
1•110 Communications / Telemetering Equipment
1•127 Computing, Data Handling Equipment & Accessories
1•228 Control Systems & Components
1•279 Crystals / Oscillators / Crystal Filters
1•422 Delay Lines
1•468 Environmental Test Equipment
1•472 Fans / Blowers / Cooling Equipment
1•525 Filters (excluding Crystal)
1•601 Instruments, Measuring & Test
1•863 Instruments, Graphic Recording
1•880 Integrated Circuits & Hybrids
1•901 Microwave Systems & Subsystems
1•929 Motors & Drives
1•1006 Electro-Optical Components & Accessories
1•1026 Power Sources (including Batteries)
1•1540 Production Equipment / Manufacturing Services
1•1547 Relays & Solenoids
1•1837 Semiconductors
1•1910 Servomechanisms
1•1926 Switches / Protective Components
1•2308 Thermo-Electric Components
1•2330 Transducers
1•2350 Tubes & Tube Parts

CERALAM® MILITARY MOLDED AXIAL CAPACITORS

Transfer Molded Cases, Oxygen Free Copper Leads
MIL-STD 1276 Type C, 50 - 100 Volt Rating

Specifications

Capacity Range	10 pf to 3.3 Mfd
Capacity Tolerance	±10% and ±20%
Dissipation Factor	2.5% Max.
Insulation Resistance	100,000 Megohms or 1000 Meg Mfd whichever is less
Working Voltage	50 or 100 VDC
Flash Test Voltage	2.5 Times Rated
Temperature Characteristic	BX ±15% ΔC −55° to +125°C No Bias Voltage BX +15 −25% ΔC −55° to +125°C With Rated Voltage BR ±15% ΔC −55° to +125°C No Bias Voltage BR +15 −40% ΔC −55° to +125°C With Rated Voltage

Additional Specifications and Ordering Information on the following page.

DISC CAPACITORS

Class 1, 500 V
Temperature Compensating
Type 5000 (Formerly Type DI)

High Q and Excellent Stability . . . Dipped Phenolic Coating . . . Wax Impregnated . . . Solder Coated Copper Leads. MIL-C-20 or EIA-RS198 Class 1 Environmental Performance.

Specifications

Capacity Range	1 pf thru 1000 pf
Capacity Tolerance	±.25 pf thru ±20%
Dissipation Factor	.1% Max. 30 pf and Up
Insulation Resistance	20,000 Megohms Minimum
Working Voltage	500 VDC
Flash Test Voltage	3 Times Rated
Temperature Characteristic	NPO thru N2200 consult factory for other T.C.'s
Marking	AVX, Capacity, Capacity Tol., T.C.

Class 2, 500 V
Variable Capacitance vs. Temperature
(Formerly Type DI-0 thru D1-8)

Specific capacitance stability ranges in response to temperature . . . Dipped phenolic coating . . . Wax Impregnated . . . Solder Coated Copper Leads. MIL-C-11015 or EIA-RS198 Class 2 Environmental Performance.

Specifications

Capacity Range	10 pf thru 44000 pf
Capacity Tolerance	±5% thru GMV
Dissipation Factor	2.5% Max.
Insulation Resistance	20,000 Megohms Minimum
Working Voltage	500 VDC
Flash Test Voltage	3 Times Rated
Temperature Characteristic	X5F thru X5
Marking	AVX, Capacity, Capacity Tol., T.C.*

* If Specific TC is Ordered

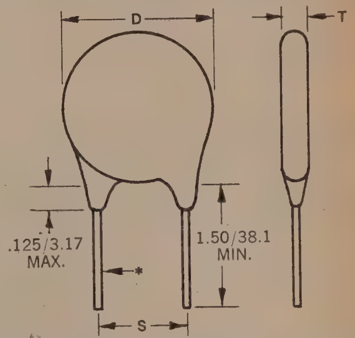
Dimensions: Inches/Millimeters



* All capacitors available with either #20 or #22 AWG Leads at AVX option unless specific gage is requested by customer.

Crimp Lead Disc Capacitors

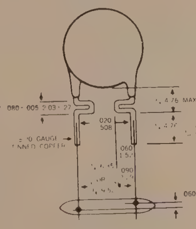
Available with either inside or outside crimp, they are designed specifically for simplification in production line assembly of printed circuit disc components.

They are available with the same electrical characteristics and physical sizes as furnished in our standard disc types.

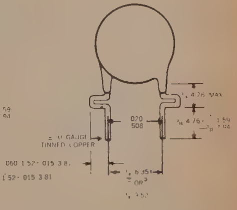
Lead spacing is .250 ±.035 on discs under .500 in diameter and .375 ±.035 on discs .500 in diameter and larger.

Lead length is normally 3⁄16″ measured from crimp — longer lead lengths are available on request.

Specify inside or outside crimp when ordering.



INSIDE CRIMP



OUTSIDE CRIMP

DISC CAPACITORS

Class 1

The tables shown below indicate the tolerance available on specific temperature characteristics. It may be noted that limits are established on the basis of measurements at 25°C and +85°C and that T.C. becomes more negative at low temperature. Wider tolerances are required on low capacitance values because of the effects of stray capacitance.

T.C. TOLERANCES: +25°C TO +°C IN PPM/°C

DISC CAPACITORS

Class 2

MIL-C-11015D CODE

Symbol	Temperature Range	
A	−55°C to +85°C	
B	−55°C to +125°C	
C	−55°C to +150°C	
Symbol	**Cap. Change Zero Volts**	**Cap. Change Rated Volts**
R	+15%, −15%	+15%, −40%
W	+22%, −56%	+22%, −66%
X	+15%, −15%	+15%, −25%
Y	+30%, −70%	+30%, −80%
Z	+20%, −20%	+20%, −30%

Temperature characteristic is specified by combining range and change symbols, for example BR or AW. Specification slash sheets indicate the characteristic applicable to a given style of capacitor.

EIA CODE

Percent Capacity Change Over Temperature Range

RS198	Temperature Range
X7	−55°C to +125°C
X5	−55°C to +85°C
Y5	−30°C to +85°C
Z5	+10°C to +85°C
Code	**Per Cent Capacity Change**
D	±3.3%
E	±4.7%
F	±7.5%
P	±10%
R	±15%
S	±22%
T	+22%, −33%
U	+22%, −56%
V	+22%, −82%

EXAMPLE — A capacitor is desired with the capacitance value at 25°C to increase no more than 7.5% or decrease no more than 7.5% from −30°C to +85°C. EIA Code will be Y5F.

HIGH VOLTAGE DISC CAPACITORS

Type HVD-1 thru HVD-7 — 1000 VDC thru 6000 VDC

Dipped Phenolic Coating, Wax Impregnated, Solder Coated Copper Leads
EIA-RS165 Environmental Performance

Specifications

Capacity Range	26 pf thru 22000 pf
Capacity Tolerance	10%, (X5R only) 20% & GMV
Dissipation Factor	2.5%
Insulation Resistance	20,000 Megohms Minimum
Working Voltage	1000 VDC thru 6000 VDC
Flash Test Voltage	1.75 Times Rated Voltage
Temperature Characteristic	X5R and Z5U

Type HVD Disc Capacitors are available in many variations of capacity, temperature characteristics and voltage. The capacity range charts cover the popular ranges but by no means all combinations. Our Engineering Department is available to design to your special requirements.

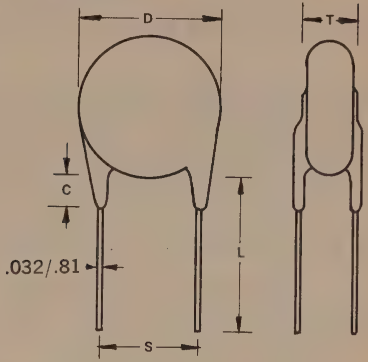
VOLTAGE MULTIPLIER CAPACITORS

8 and 10 KV Discs, Style: 5038, 5039, 5054



Designed for High Voltage D.C. Multiplier Circuits . . . Excellent Temperature Stability . . . Low Voltage Coefficient . . . Anti-Corona Performance Epoxy Coated — Compatible with Potting or Molding Compounds.

Specifications

Capacity	1,000 or 700 pf
Capacity Tolerance	±20%
Dissipation Factor	2% Max. at 1 KHz
Insulation Resistance	20,000 Megohms, Minimum
Working Voltage	8 and 10 KV
Flash Test Voltage	1.5 Times Rated Voltage
Temperature Characteristic	Z5R, ±15% ΔC +10 to +85°C
Voltage Characteristic	−20% ΔC at 10 KV
Corona Voltage	2500 VRMS @ 60 Hz 100 Pico Coulombs

FEED-THRU CAPACITORS

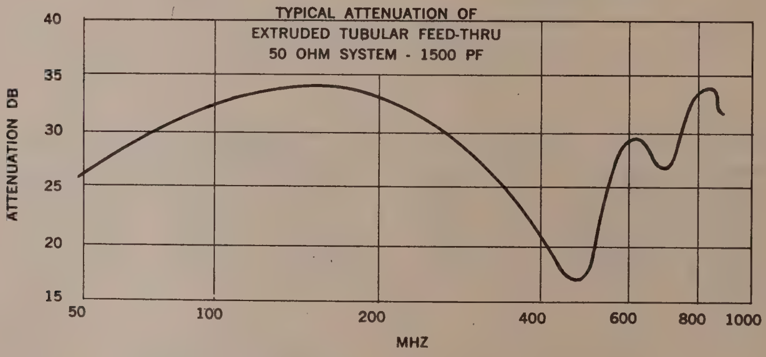
Types 4400 and 7400 — 250 and 1500 Volt — Bolt and Eyelet

Units shown are produced with conventional tubular dielectrics. Bolt type units are shown with Z5U characteristic dielectric (GP). If need exists for a specific TC, consult factory. Eyelet type feed-thrus shown as 4420 thru 4428 are inexpensive, dependable miniaturized eyelet feed-thrus differing from the 7400 Series in that the solder form is furnished as an integral part of the feed-thru — eliminating the need of solder preforms in assembly. All operations on these parts are done automatically, giving the capacitor a high degree of reliability.

Post style units have terminals held in position by a crimp and are soldered at both ends of the tube. Square terminals for wire wrapped solderless connections are also available.

Specifications

Capacity Range	5 pf thru 4000 pf
Capacity Tolerance	±5%; ±10%, ±20% and GMV
Dissipation Factor	.2 to 3%
Insulation Resistance	10,000 Megohms Minimum
Working Voltage	250, 500, 1,000 and 1,500 Volts DC
Flash Test Voltage	2 Times Rated Voltage
Temperature Characteristic	P200 thru Z5U
Marking	Typographical or Color Code on 7404-7405



AVX: The Insiders.

Alissa Manufacturing Company

MANUFACTURERS OF HIGH RELIABILITY OPTOELECTRONIC TEST EQUIPMENT

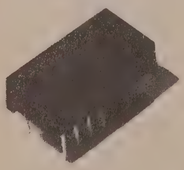
ALISSA MANUFACTURING COMPANY MANUFACTURES CUSTOMIZED OPTOPRODUCT TEST EQUIPMENT SUCH AS:

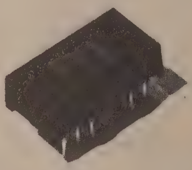
- PHOTOTRANSISTOR ARRAY TESTERS
- LED TESTERS
- PHOTODIODE TESTERS
- NUMERIC INDICATOR TESTERS
  FOR PRODUCTION AS WELL AS FINAL ACCEPTANCE TESTING.

HI-REL TESTING AND LIFE TESTING ARE PERFORMED ON ALL OPTOPRODUCTS AND OTHER RELATED COMPONENTS INCLUDING THE TESTING OF DIGIT-MONO-DIES AND PHOTO-DIES.

ALISSA WILL TEST THE ABOVE OPTOPRODUCTS PER CUSTOMER SPECIFICATIONS WHICH INCLUDE CRITICAL PARAMETERS SUCH AS:

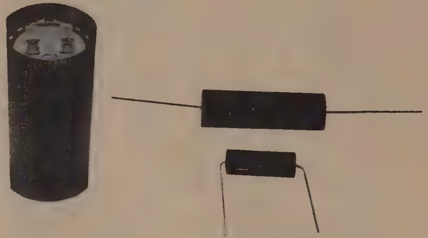
- LIGHT CURRENT SENSITIVITY CAN BE MEASURED AT 0.01 mw/cm^2
- VCE AND T_C CAN BE VARIED AND CHECKED ACCURATELY BEYOND THE PRESENT-STATE-OF-THE-ART.





MANUFACTURERS OF HIGH RELIABILITY FILM CAPACITORS

THE HOT ONES!



WITH THE COOLEST PERFORMANCE!!

- ULTRA HIGH-REL 200°C RATED FILM CAPACITORS
- HIGH VOLTAGE CAPACITORS
- HERMETICALLY SEALED, METAL CASED CAPACITORS
- EPOXY 'B' CASED CAPACITORS
- WRAP AND FILL CAPACITORS
- SPECIAL BATH-TUB CANS WITH SEVERAL TERMINATION CONFIGURATIONS
- CAPACITORS FOR ALL TYPES OF AC/DC APPLICATIONS

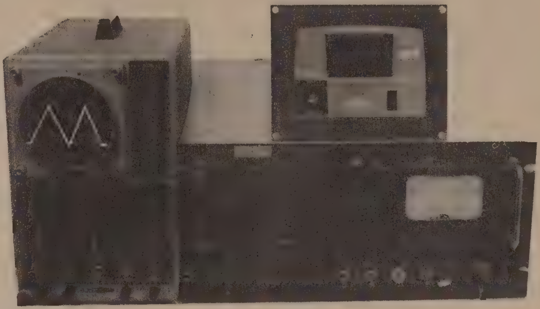
2800 LA CIENEGA AVENUE • LOS ANGELES, CALIFORNIA 90034 • (213) 559-7480

Alissa Manufacturing Company

ALL ALISSA CAPACITORS ARE 100% AC-POWER CONDITIONED AT VERY HIGH FREQUENCIES AND CHECKED FOR HEAT RISE TO INSURE THE UTMOST IN RELIABILITY. THIS POWER CONDITIONING IS CONDUCTED DURING THE THERMAL SHOCK/CYCLING TEST FROM -62°C AND UP TO + 200°C, FOLLOWING THE 100% DC POWER CONDITIONING TESTS.



GENERAL CAPACITOR INFORMATION

- METAL CASED CAPACITORS AND EPOXY ‘B’ CASED CAPACITORS

  Case Sizes–can be supplied per Mil-C-83421/1 or per customer requirements
  μF Values and Voltage Ratings–per customer requirements
  Screening Levels Available–Levels 1, 2, and 3 per Table I.

- HIGH VOLTAGE CAPACITORS

  600VDC and higher voltage ratings are available in metal cases or Epoxy ‘B’ cases
  μF Values–per customer requirements
  Screening Levels Available–Levels 1, 2, and 3 per Table I.

- CAPACITOR DIELECTRICS

  The above capacitors are metallized film capacitors and are available in Polycarbonate, Polysulfone, and Kapton dielectrics

- LEAD WIRE MATERIAL AVAILABLE

  Tinned Copperweld, Oxygen Free Copper, or Nickel per Mil-Std-1276

2800 LA CIENEGA AVENUE • LOS ANGELES, CALIFORNIA 90034 • (213) 559-7480

Alissa Manufacturing Company

CAPACITOR SPECIFICATIONS

AKJ–Polycarbonate film capacitors (metallized and foil)
CMJ–Polysulfone film capacitors (metallized and foil)
PMJ–Kapton film capacitors (metallized and foil)
Other dielectric capacitors are also available such as Mylar, Polypropylene, Polystyrene, etc.

- OPERATING TEMPERATURE RANGE

AKJ – –62°C to +125°C
CMJ – –62°C to +150°C
PMJ – –62°C to +200°C

- INSULATION RESISTANCE

The minimum Insulation Resistance when measured from terminal to terminal with an applied potential equal to the rated voltage shall be as follows:

+25°C = 3.0×10^6 MEGS Min
+85°C = 1.5×10^6 MEGS Min
+125°C = 2.5×10^4 MEGS Min

- DISSIPATION FACTOR

0.15% Max at 25°C

- TEST POTENTIAL

DC–At 25°C ± 5°C capacitors shall withstand a DC Voltage of at least 200% of the rated DC Voltage
AC–At 25°C ± 5°C capacitors shall withstand an AC Voltage of at least 200% of the rated AC Voltage

- CAPACITANCE CHANGE WITH TEMPERATURE

Relative to +25°C: –55°C = –1% and at +125°C = +0.75%

- FINE LEAK AND GROSS LEAK TESTS

Fine Leak Test–1×10^{-6} ATM-CC/sec max leak rate
Gross Leak Test–Oil test for 1 minute in accordance with method 112 of MIL-STD-202, Condition A.

- GENERAL INFORMATION

Capacitors are capable of meeting or exceeding requirements of any existing established Hi-Rel Capacitor Specification.

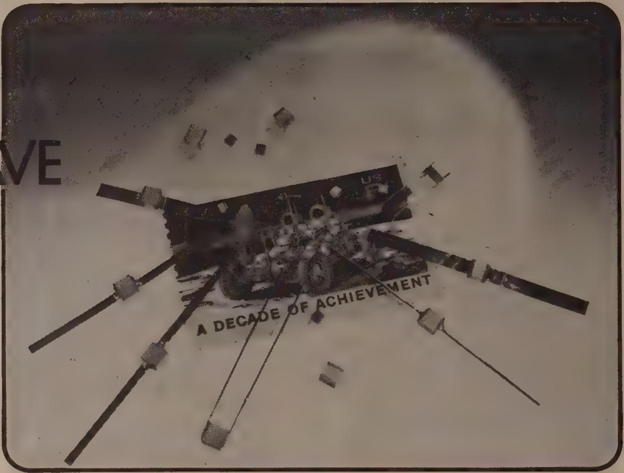
UHF/MICROWAVE CAPACITORS



ATC 100 UHF/MICROWAVE LOW-LOSS PORCELAIN CAPACITORS

- High Q thru Microwaves
- 0.1 pF to 1000 pF standard
- High R F current capability
- Rugged Terminations
- Absolute Retrace
- Hermetic Construction
- Close Tolerances standard
- High Reliability
- Completely Characterized: Full RF and DC test data

APPLICATIONS

Phased-array radar . . . wide-band amplifiers . . . low noise circuits . . . receiver RF-IF stages . . . proximity fuses . . . radiosonde . . . microwave power sources . . . UHF mobile . . . ECM . . . DME . . . UHF/microwave power amplifiers . . . tropo-scatter communications . . . commercial aircraft communications . . . military . . . marine and amateur AM/FM/SSB . . . military hand-held survival radios.

CHARACTERISTICS

Quality Factor: Greater than 10,000 at 1 MHz.
Capacitance Values: Case A, from 0.1 pF to 100 pF; Case B, from 0.1 pF to 1000 pF.

Tolerances: B (±0.1 pF); C (±0.25 pF); D (±0.5 pF); F (±1%); G (±2%); J (±5%); K (±10%); M (±20%)
Temperature Coefficient of Capacitance: +90 ±20 PPM/°C (-55°C to +125°C)
Dielectric Test Voltage: 250% of WVDC rating for 5 secs
Retrace: ±0.1% or ±0.1 pF, whichever is greater
Aging Effects: None
Piezoelectric Effects: None (No capacitance variation with voltage or pressure)
Capacitance Drift: ±0.1% or ±0.1 pF, whichever is greater
Insulation Resistance: 0.1 pF to 470 pF: 10^6 megohms min @25°C, 10^5 megohms min @125°C; 510 pF to 1000 pF: 10^5 megohms min @25°C, 10^4 megohms min @125°C
Operating Temperature Range: From -55°C to +125°C (no derating of working voltage); above 125°C, derate linearly to 50% WVDC @200°C

MILITARY SPECIFICATIONS (QPL)

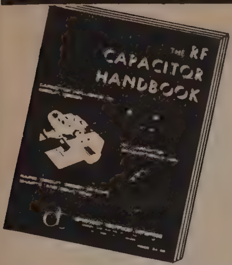
CAPACITOR

FOR 1975 CATALOG, RF CAPACITOR HANDBOOK, OR CAPACITOR SAMPLES, CONTACT ATC AT



The RF Capacitor Handbook presents over 200 pages of comprehensive detail for design considerations and uses for miniature chip and leaded RF capacitors. You'll find theoretical and empirical high-frequency circuit design equations, characteristics of capacitor dielectrics, especially at high RF power levels and frequencies, actual test data at frequencies from 100 MHz to 3 GHz, and practical design methods for increasing gain and power, DC to RF conversion efficiency, bandwidth, transistor lifetime, circuit MTBF, and low-noise performance.

ATC 700 ULTRA-STABLE CERAMIC CAPACITORS

- True Zero T.C.
- 47 pF to 5100 pF standard
- No Piezoelectric Effects
- No Aging effects
- 1000 pF in 55 mil cube

APPLICATIONS

Excellent for low power levels at UHF frequencies as DC blocks and emitter bypasses . . . superior in VHF low power high-stability tank circuits for variable-frequency oscillators, and H.F. discriminators . . . reduces variation due to temperature in low frequency filters . . . permits predictable RC timing circuits . . . replaces mica, polystyrene and teflon dielectric capacitors with much greater capacity values per unit volume and improved environmental characteristics.

CHARACTERISTICS

Capacitance Values: Case A, from 47 pF to 1000 pF; Case B, from 200 pF to 5100 pF
Tolerances: F (±1%); G (±2%; J (±5%); K (±10%); M (±20%)
Working Voltage: 50 WVDC
Temperature Coefficient of Capacitance: 0 ± 30 PPM/°C (-55°C to +125°C)
Dissipation Factor: .0005 max @1 KHz except .001 for Case A > 470 pF
Insulation Resistance: 10^5 megohms min @ 25°C, 10^4 megohms min @ 125°C
Dielectric Test Voltage: 300% rated voltage for 5 secs
Operating Temperature Range: -55°C to +125°C

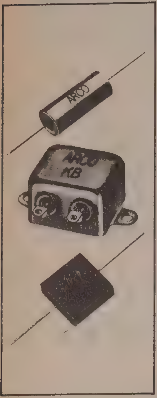
Arco Electronics, Inc. PFC Manufacturing Division ARCO ELECTRONICS precision polystyrene capacitors



ZERO TEMPERATURE COEFFICIENT

TYPE KT TUBULAR

TYPE KB RECTANGULAR BATHTUB CANS

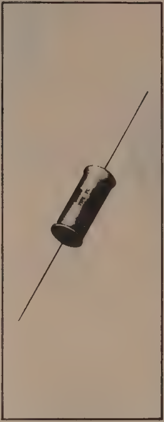
HERMETICALLY SEALED — METAL CASE

TYPE KE FLAT EPOXY ENCAPSULATED

A unique combination of Polystyrene and Mica dielectrics resulting in a capacitor offering a truly ZERO TEMPERATURE COEFFICIENT (±10 ppm/°C from −55°C to +85°C standard production) with the ultimate in long term STABILITY. Type KT and KB capacitors will meet or exceed all requirements of MIL-C-19978, where applicable, under ALL ENVIRONMENTAL CONDITIONS specified therein.

ARCO Type KT, KB, and KE capacitors provide the utmost in performance for PRECISION-OSCILLATORS, TIMING CIRCUITS, and RC NETWORKS.

BURN-IN: All ARCO capacitors are subjected to a minimum of two 16 hour burn-in periods with 300% of rated voltage applied at 85°C.



SUPERIOR ENVIRONMENTAL PROTECTION AT LOW COST — SMALLEST SIZE

TYPE PC & PJ TUBULAR

TYPE SC & SJ TUBULAR

The unique design of ARCO Type PC capacitors provides physical and electrical stability, ruggedness and strength of termination, and excellent uniformity in production. All these features enable tight control of the narrow specification limits published. Type PC offers the smallest, lowest cost construction available, while retaining optimum performance characteristics.

The Type PC enclosure provides unusual protection against moisture, solvents and inadvertent contact with a soldering iron. The rugged, heat resistant jacket material makes Type PC particularly suited to printed circuit dip-solder assemblies subject to solvent cleaning and also to densely packed component structures where there is danger of damage to adjacent units while making solder connections.

Extensive evaluation has confirmed the excellent moisture resistance of the Type PC (surpassed only by metal cased enclosures) and its conformance to the most stringent shock and vibration specifications.

Type PC capacitors are exceptionally well suited for PRECISION FILTERS, DELAY LINES, and PRECISION TIMING CIRCUITS, where small size and excellence of performance are mandatory at LOW COST.

GENERAL SPECIFICATIONS

OPERATING TEMPERATURE RANGE: The ARCO capacitor types listed can be used for continuous operation from −55°C to +85°C without derating. Transient exposure to +95°C will have NO DELETERIOUS effect.

CAPACITANCE TOLERANCE: ARCO specializes in precision capacitors. Available from standard production are tolerances of ±10%, ±5%, ±3%, ±2%, ±1%, ±½%, ±¼%, ±0.1%.

VOLTAGE RATING: All ARCO capacitors are available in 100, 200, 400, 600 and 1,000 Volts DC ratings. Special voltages can be supplied upon request or to specification.

SPECIFICATIONS

DISSIPATION FACTOR: When measured at or referred to 1 kHz the dissipation factor shall not exceed the following:

.001 @ 23°C

INSULATION RESISTANCE: Insulation resistance when measured at the applicable test temperature, shall equal or exceed the following values:

	23°C	*85°C
megohm x mfd	10^5	10^3
except the insulation resistance in megohms need not exceed	10^6	10^4

***NOTE:** Verified on 100% of production.

STABILITY: Long term (1 year) capacitance drift under maximum operating conditions shall not exceed ±0.05%.

TEMPERATURE COEFFICIENT: The temperature coefficient of ARCO Type KT, KB, and KE capacitors is truly zero, they are usually produced to a tolerance of ±10 ppm/°C. They can also be produced to zero ±5 ppm°/C. The linearity of the temperature coefficient regardless of tolerance is ±1 ppm/°C. Other temperature coefficient centers may be supplied within the range of −100 to +20 ppm/°C. THE TEMPERATURE COEFFICIENT OF THESE CAPACITORS is tested on a 100% basis. Data verifying these tests can be supplied at NO EXTRA COST as requested.

DIELECTRIC ABSORPTION: When tested in accordance with paragraph 4.6.15 of MIL-C-19978, the dielectric absorption shall not exceed 1.0% over the entire operating temperature range.

CONSTRUCTION: The ARCO Type KT, KB, and KE capacitors are constructed by a unique combination of polystyrene dielectric sections with a linear negative temperature coefficient cross compensating a mica dielectric capacitor section with a linear positive TC. The polystyrene capacitor section is wound with a SOLID CORE in the center for optimum stability, and is terminated with a disc lead assembly soldered directly to the extended foil for a completely NON-INDUCTIVE construction resulting in the lowest possible contact resistance. The mica capacitor section is the well known Arco capacitor exhibiting highest reliability and performance characteristics. The individual capacitor sections as well as their combination have been constructed so as to guarantee all performance characteristics listed as well as complete FREEDOM FROM MICROPHONISM.

SPECIFICATIONS

DISSIPATION FACTOR: When measured at or referred to 1 kHz the dissipation factor shall not exceed the following:

.0001 @ 23°C .0002 @ 85°C

INSULATION RESISTANCE: Insulation resistance when measured at the applicable test temperature, shall equal or exceed the following values:

	23°C	*85°C
megohm x mfd	10^6	1.5×10^5
except the insulation resistance in megohms need not exceed	2×10^6	3×10^5

***NOTE:** Verified on 100% of production.

DIELECTRIC ABSORPTION: When tested in accordance with paragraph 4.6.15 of MIL-C-19978, the dielectric absorption shall not exceed 0.05% over the entire operating temperature range.

STABILITY: Long term (1 year) capacitance drift under maximum operating conditions shall not exceed the following limits for the types listed:

Type PC & PJ	±0.1%	Type SC & SJ	±0.05%

TEMPERATURE COEFFICIENT: The temperature coefficient of all the ARCO capacitor types herein listed is negative 120 ±15 ppm/°C.

CONSTRUCTION: The ARCO precision polystyrene capacitors Types PC and SC are encased in an irradiated polyolefin jacket sealed with bonded silicone rubber. Types PJ & SJ are encased in a silicone treated fused polystyrene jacket. This unique construction economically protects the excellent electrical characteristics exhibited in Types PC and SC and is primarily intended for use where they will not be subjected to the following hazards:

1. Physical damage due to excessive heat during dip or flow solder assembly.
2. Solvent damage during cleaning operations.
3. Exposure to excessive humidity for prolonged periods of time.

All types herein listed are wound with a SOLID CORE in the center for optimum stability, and are terminated with a disc lead assembly soldered directly to the extended foil for a completely NON-INDUCTIVE construction resulting in the lowest possible contact resistance and exhibiting complete FREEDOM FROM MICROPHONISM.

---

precision RC networks

THE ULTIMATE IN TEMPERATURE COEFFICIENT CONTROL OF RC PRODUCT

LINEAR TC OF ±5 PPM/°C OVER TEMPERATURE RANGE OF −55°C TO +85°C

ARCO's ability to produce capacitors with adjustable and closely uniform characteristics has facilitated the design of highly precise RC networks. By matching zero temperature coefficient resistors and capacitors, or by balancing temperature coefficients to obtain a zero (or other specified) T.C. on the RC product, networks which have long term stability independent of temperature are obtained. At the same time, RC products of better than ±0.05% accuracy can be supplied. Testing is performed on a 100% basis on both resistors and capacitors with temperature coefficient data recorded at the temperature extremes.

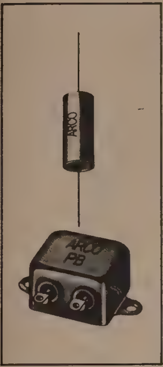
precision polystyrene capacitors



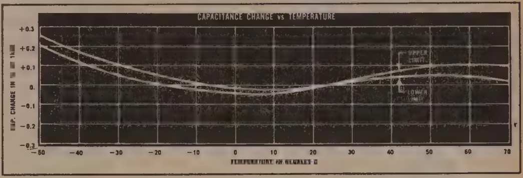
FOR MILITARY APPLICATIONS AND HOSTILE ENVIRONMENTS
TYPE PT, & ST TUBULAR
TYPE PB, & SB RECTANGULAR BATHTUB CANS
HERMETICALLY-SEALED — METAL CASE

Design innovations and extreme care in production have enabled ARCO to approach the optimum performance characteristics of the polystyrene film. These capacitors will exceed all performance requirements of MIL-C-19978 under ALL ENVIRONMENTAL CONDITIONS specified therein. ARCO polystyrene capacitors were specifically designed for the most critical applications where requirements for extremely high insulation resistance, high Q, extraordinary stability, close tolerance, and low dielectric absorption and dissipation factor are mandatory. These capacitors are intended primarily for use in ANALOG and DIGITAL COMPUTERS, CALCULATORS, HIGH Q TUNED CIRCUITS, INTEGRATORS, PRECISION FILTER CIRCUITS, PULSE NETWORKS, SERVO SYSTEMS, and as REFERENCE CAPACITORS.

TEMPERATURE-STABLE SMALL SIZE
TYPE HT TUBULAR
TYPE HB RECTANGULAR BATHTUB CANS
HERMETICALLY SEALED — METAL CASE

An exclusive ARCO design modifying the temperature characteristics of the dielectric film to provide capacitors insensitive to temperature changes (±0.1% change to 85°C). Type HT and HB capacitors will meet ALL ENVIRONMENTAL REQUIREMENTS OF MIL-C-19978.

ARCO Type HT and HB capacitors are specifically designed for INTEGRATORS, PRECISION TIMING CIRCUITS, and PRECISION RC NETWORKS.



GENERAL SPECIFICATIONS

OPERATING TEMPERATURE RANGE: The ARCO capacitor types listed can be used for continuous operation from −55°C to +85°C without derating. Transient exposure to +95°C will have NO DELETERIOUS effect.

CAPACITANCE TOLERANCE: ARCO specializes in precision capacitors. Available from standard production are tolerances of ±10%, ±5%, ±3%, ±2%, ±1%, ±½, ±¼%, ±0.1%.

DIELECTRIC ABSORPTION: When tested in accordance with paragraph 4.6.15 of MIL-C-19978, the dielectric absorption shall not exceed 0.05% over the entire operating temperature range.

INSULATION RESISTANCE: Insulation resistance when measured at the applicable test temperature, shall equal or exceed the following values:

	23°C	*85°C
megohm x mfd	10^6	1.5×10^5
except the insulation resistance in megohms need not exceed	10^8	10^6

***NOTE:** Verified on 100% of production.

CONSTRUCTION: All ARCO precision polystyrene capacitor types here listed are hermetically sealed in metal cases with compression glass-to-metal, solder-sealed terminals. They are wound with a SOLID CORE in the center for optimum stability, and are terminated with a disc lead assembly soldered directly to the extended foil for a completely NON-INDUCTIVE construction resulting in the lowest possible contact resistance and exhibiting complete FREEDOM FROM MICROPHONISM.

SPECIFICATIONS

DISSIPATION FACTOR: When measured at or referred to 1 kHz the dissipation factor shall not exceed the following:

.0001 @ 23°C .0002 @ 85°C

VOLTAGE RATING: All ARCO capacitors are available in 100, 200, 400, 600 and 1,000 Volts DC ratings. Special voltages can be supplied upon request or to specification.

STABILITY: Long term (1 year) capacitance drift under maximum operating conditions shall not exceed the following limits for the types listed:

Type PT & PB ±0.1% Type ST & SB ±0.05%

TEMPERATURE COEFFICIENT: The following temperature coefficient variants are available:

Type PT & PB negative 120 ±15 ppm/°C
Type ST & SB negative 120 ±15 ppm/°C

SPECIFICATIONS

DISSIPATION FACTOR: When measured at or referred to 1 kHz the dissipation factor shall not exceed 0.002 @ 23°C.

VOLTAGE RATING: ARCO Type HT and HB capacitors are produced in 100 Volt DC rating. Other voltages to 1,000 volts can be supplied upon request.

STABILITY: Long term (1 year) capacitance drift under maximum operating conditions shall not exceed ±0.1%.

TEMPERATURE COEFFICIENT: The temperature coefficient of ARCO Type HT and HB capacitors is controlled so that the variation of capacitance from room temperature to 85°C is less than ±0.1%; from room temperature to −55°C variation is less than ±0.25%. Tighter control is available to special order (±0.05% from 10°C to 50°C).

BURN-IN: All ARCO capacitors are subjected to a minimum of two 16 hour burn-in periods with 300% of rated voltage applied at 85°C.

---

new products

precision polypropylene capacitors

TYPE PPT TUBULAR HERMETICALLY SEALED METAL CASE

ARCO's unique design innovations and extreme care in production has resulted in a polypropylene capacitor approaching the performance parameters of polystyrene. With polypropylene dielectric there is approximately a 50% reduction in size. These capacitors can also be operated to 125°C without derating voltage. ARCO polypropylene capacitors are excellent for all critical applications which require high insulation resistance, high Q, extreme stability, close tolerance, low dielectric absorption and dissipation factor. The temperature coefficient makes an excellent choice for high Q tuned circuits, precision filter circuits, pulse networks and RC circuits.

SPECIFICATIONS

OPERATING TEMPERATURE RANGE: The ARCO capacitor types listed can be used for continuous operation from −55°C to +125°C without derating.

CAPACITANCE TOLERANCE: ARCO specializes in precision capacitors. Available from standard production are tolerances of ±10%, ±5%, ±3%, ±2%, ±1%, ±½%, ±¼%.

DIELECTRIC ABSORPTION: When tested in accordance with paragraph 4.6.15 of MIL-C-19978, the dielectric absorption shall not exceed .05% over the entire operating temperature range.

STABILITY: Long term (1 year) capacitance drift under maximum operating conditions shall not exceed:

±0.1% to 105°C ±0.2% to 125°C

DISSIPATION FACTOR: When measured at or referred to 1 kHz the dissipation factor shall not exceed the following:

.0002 @ 23°C .0003 @ 85°C

INSULATION RESISTANCE: Insulation resistance when measured at the applicable test temperature, shall equal or exceed the following values:

	23°C	*85°C	105°C	125°C
Megohm x mfd	10^6	1.5×10^5	10^5	10^4
Except the insulation resistance in megohms need not exceed	10^7	1.5×10^6	10^6	10^5

***NOTE:** Verified on 100% of production.

TEMPERATURE COEFFICIENT:
Negative 200 ±30 ppm/°C from room temperature to −55°C
Negative 350 ±30 ppm/°C from room temperature to +105°C

BURN-IN: All ARCO capacitors are subjected to a minimum of two 16 hour burn-in periods with 300% of rated voltage applied at 85°C.

CONSTRUCTION: ARCO Type PPT capacitors are hermetically sealed in metal cases with compression glass-to-metal, solder-sealed terminals. They are wound with a SOLID CORE in the center for optimum stability, and are terminated with a disc lead assembly soldered directly to the extended foil for a completely NON-INDUCTIVE construction resulting in the lowest possible contact resistance and exhibiting complete FREEDOM FROM MICROPHONISM.

TYPE PE

ARCO Electronics announces availability of a new polystyrene dielectric capacitor with a thin configuration specifically designed for conservation of space in printed circuits and in filters. Flat polystyrene sections are encapsulated in uniform epoxy preforms to provide the following features:

0.1" THICKNESS

Uniform lead spacing for p-c use.
Uniform size and flush mounting.
Both weldable and solderable leads.
Rugged, moisture proof construction.

ACTUAL
SIZE

2NI2

WELDABLE LEADS
Nickel "A"
(solderable, too)
0.7" spacing

SPACE SAVERS
10 capacitors
per inch
.312" high
Flush mount

In addition to the physical advantages of this design, the electrical excellence of ARCO polystyrenes has been retained. High long term stability under maximum operating conditions, low dissipation factor and dielectric absorption, extremely high insulation resistance, close tolerance are featured. And also important is the ARCO control of quality which results in close uniformity not only from unit to unit, but from production lot to production lot as well.

The Nickel "A" leads of ARCO Type PE capacitors are welded directly to the capacitor section. The strength and permanence of electrical contact is thereby entirely independent of encapsulation.

All ARCO Type PE capacitors are "debugged" 100% prior to shipment by accelerated life test at stress levels exceeding ratings to eliminate potential early failures.

SPECIFICATIONS

CAPACITANCE RANGE: .001 to .01 mfd (lower and higher values are available upon request). Max. value .015 mfd.

TOLER.: ±5%, ±2%, ±1%, ±½%, ±¼%, ±0.1%.

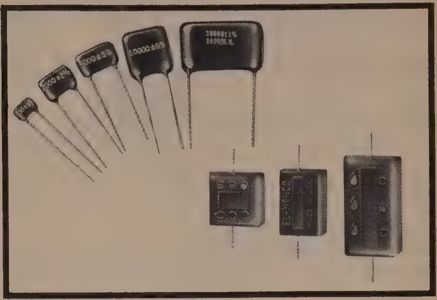
CAPACITORS

DIPPED AND MOLDED SILVERED MICA

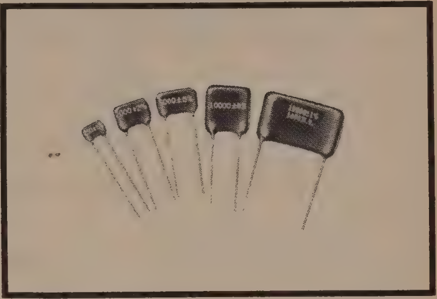
ONLY 1 FAILURE PER 43,000,000 UNIT-HOURS!



- It has been computed that "debugged" DM30, 10,000 MMF units, when subjected to 257,000 hours of life at 85°C with 100% of the rated DC voltage applied, will yield only 1 FAILURE PER 43,000,000 UNIT-HOURS!
- DM15, DM16, DM19, DM20 . . . perfect for miniaturization and for new designs using printed wiring circuits. Also available in DM30, DM42 and DM43.
- New "hairpin" parallel leads insure easy application.
- Exceed all electrical requirements of military specification MIL-C-5A.
- DM5 — subminiature completely encapsulated mica capacitors. Ideal for high density miniature applications.
- CM15, CM20, CM30, CM35 and CM42 . . . molded mica designed to meet MIL-C-5 specifications.

HIGH RELIABILITY MICA

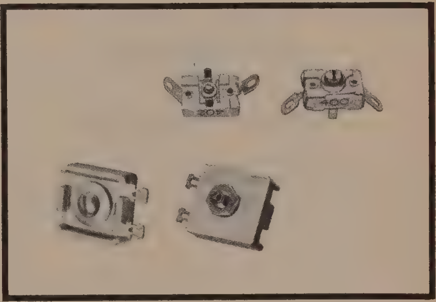
PER MIL-C-39001A



- Designed to meet the most critical design requirements.
- Types CMR04; CMR05, CMR06; CMR07 & CMR08 designed to meet MIL-C-39001A.
- Rated voltages 100, 300 and 500 VDCW.
- Temperature Ranges: 0 = −55° to +125°C
  P = −55° to +150°C
- Failure Levels: L = 2.0% per 1000 hours
  M = 1.0% per 1000 hours
  P = 0.1% per 1000 hours

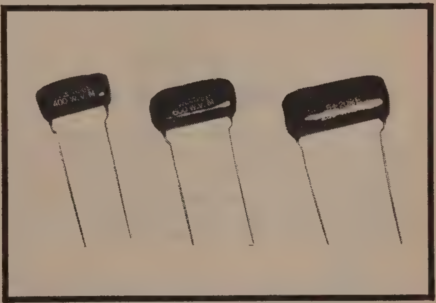
TRIMMERS/PADDERS

DESIGN VERSATILITY!



- Available in 350 VDC and 500 VDC as well as other test voltages.
- All bases are of low-loss steatite.
- Special lugs are obtainable for printed circuitry.
- Miniature units are available.
- Solder Lugs can be bent in any position without affecting the capacity setting due to the rigid construction.
- Various types of mounting brackets are available for all trimmers.
- Units can be constructed for special applications.

DIPPED TUBULARS



- Working volts DC: 100, 200, 400, 600, 1000 and 1600.
- Durez phenolic resin impregnated.
- Tolerances: ±10% and ±20% (closer tolerances available).
- Dielectric strength: 2 or 2½ times rated voltage, depending upon working voltage.
- Exceed all electrical requirements of E.I.A. specification RS-164 and military specifications MIL-C-91A and MIL-C-25A.

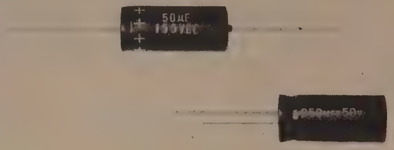
CAPACITORS

ELECTROLYTICS MINIATURE ALUMINUM ARCOLYTICS

MINIATURE ALUMINUM ELECTROLYTICS

- Ultra-small units are made for transistor circuitry and other subminiature applications.
- High quality, low cost electrolytic capacitors, with windings sealed in an aluminum can protected by a vinyl sleeve.
- Operation temperature: −30°C to +85°C.
- Available in either axial or radial lead construction.
- Available voltages: 3, 6, 12, 15, 25, 50, 100, 150, 250 and 350 VDCW.



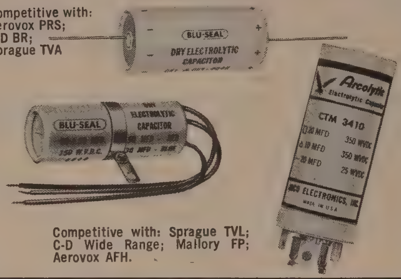
Axial and radial leads. Competitive with: Sprague TE. 30D, 500D, 502D, 503D, WH11D; C-D NLW; Mallory TT.

ARCOLYTIC CAPACITORS

TUBULAR & TWIST MOUNT ELECTROLYTICS

- Hermetically sealed in aluminum cans.
- Made with 99.99% pure aluminum foil.
- Designed for high temperature operation: 85°C.
- Suitable to withstand high surge voltages and ripple currents.
- Built and tested to meet EIA specification RS-154.
- Greater shelf, operating life and dependable performance in TV, Radio and Hi-Fi applications.
- Available in single, and multiple section units.
- Excellent moisture resistance due to construction, either hermetically sealed aluminum tube with insulating cardboard sleeves, or double insulated wax filled cardboard tubes. Supplied on tubular units only.

Competitive with:
Aerovox PRS;
C-D BR;
Sprague TVA

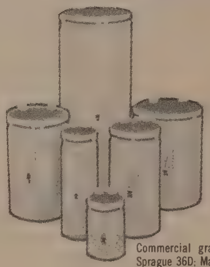


Competitive with: Sprague TVL; C-D Wide Range; Mallory FP; Aerovox AFH.

NEW PRODUCTS 85°C COMPUTER GRADE

ARCO now offers the Type ARC computer grade capacitors in the widest range of capacity and voltage available in the industry.

The ARCOLYTIC Type ARC capacitors are designed for use in computers, power supply filters, industrial controls, welders and photo flash energy storage, or any other application where high reliability, heavy duty electrolytic capacitors are required.

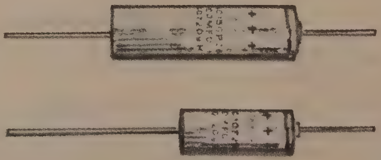


Commercial grades. Competitive with Sprague 36D; Mallory CG; GE 86F.

TUBULAR COMPUTER GRADE

ARCO Type 39A is the axial tubular version of the 85°C computer grade capacitor. These capacitors are now available in a wide variety of case sizes and standard ratings plus extra high density ratings.

ARCO 39A family capacitors are designed for use in computers, power supplies, industrial controls, energy storage or any other applications where extreme high reliability, compact size and performance are required.



Axial leads.
Competitive with Sprague 39D.

CAPACITORS

1000VDCW CERAMIC DISCS

- Low cost, small size for by-pass and coupling applications in IF and RF circuits, where temperature coefficient is unimportant.
- Outstanding moisture resistance due to rugged phenolic coating and high temperature way impregnation.
- Conservative design provides extra reserve for resistance to surges and temporary overloads.
- Available in 1000, 3000 and 6000 VCDW, and temperature compensating (TO; NPO; N750) and stable types.
- Ideal for original equipment or for replacement.

General purpose and industrial grade. Competitive with: Sprague 5GA; Centralab DD; Aerovox GPD.

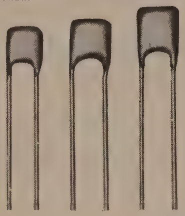
LOW VOLTAGE CERAMIC DISCS

- Inexpensive, miniature size for high density designs.
- Popular values, for Transistor circuits.
- New Low Voltage Disc Ceramics, 25, 50 and 100 VDCW.
- Small size for transistor circuitry.
- Available in ±20%, and +80% −20% tolerance.
- Values from .005 mfd to .1 mfd with Z5U or Z5V characteristics.

Competitive with: Spragues TG, HY; Centralab CK, UK, DC.

MONOLITHIC CERAMICS

- Miniature sizes for transistor circuitry.
- Available at 50, 100 VDCW.
- General Purpose, NPO and 15% Stable T.C. Types.
- Applications for Commercial Timing and Coupling Circuits.
- Capacitance Ranges from 1.0 pf thru 4.7 mfd. with ±1, 2, 5, 10 and 20% tolerances.
- Dipped Durez construction for durability.



Monolithic Ceramics
General purpose. NPO, 15% T.C. stable types. Competitive with: Erie Red-Caps; Aerovox Sky-Caps.

DIPPED TANTALUM

- Sub-miniature designs for high density packaging.
- Available in standard voltages 6.3 to 50VDCW.
- Capacitance range 0.1 to 680 MFD.
- Straight or crimped leads.
- Solid electrolyte with a highly stable oxide layer with an epoxy coating for reliability.

Competitive with
KEMIT: T360, T362
DICKSON: GS
ITT: TAG
SPRAGUE: 196D

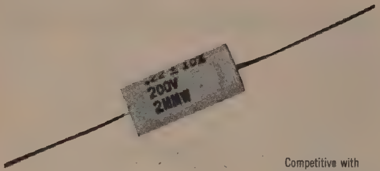
POLYESTER (MYLAR®) WRAP TYPES MW AND MWA

- Low priced film wrapped units for use in industrial electronic equipment, computers, communications and home entertainment equipment.
- Available Standard Voltages: 100, 200, 400, and 600 VDCW.
- Standard Tolerance: ±10% others on request.
- Extended Foil Construction with epoxy end-seals.
- Capacitance Range .001 to 5.0 MFD.

Competitive with
CORNELL-DUBILIER Type: WMF
SPRAGUE Type: 416P

METALIZED MYLAR® WRAP TYPE 2MMW

- Economically priced metalized film wrap units.
- Size saving over conventional film foil units.
- Voltage Rating: 200 VDC.
- Insulation Resistance: 30,000 megohms min.
- Metalized Polyester Tape - wrapped construction and end sealed with thermosetting epoxy.
- Standard tolerance: ±10%.
- Operating Temperature Range: −55°C to +85°C.
  to +125°C derated 50%



Competitive with
TRW Type: X663P
PAKTRON Type: WC.
SPRAGUE Type: 431P.

MINIATURE POLYPROPYLENE WRAP TYPE 2MP

- Small miniature design and uniform size suited for automatic insertion.
- 200 VDC working voltage.
- Operating Temperature Range: −55° to +105°C.
- Excellent Moisture Resistance.
- Capacitance Ranges .001 to .15MFD.
- Standard tolerance: ±10%.

Competitive with
PAKTRON Type: PP

MINIATURE POLYESTER (MYLAR®) WRAP TYPE 2MPT

- Highly stable units.
- Miniature designs.
- 200 VDC working voltage.
- Low inductance and high insulation resistance.
- Operating Temperature Range: −55°C to +85°C.
  to +125°C derated 50%
- Capacitance Range: .001 to .15 MFD.
- Standard Tolerance: ±10%.

Competitive with
PAKTRON Type PT
CORNELL-DUBILIER Type WMC
SPRAGUE Type 192P

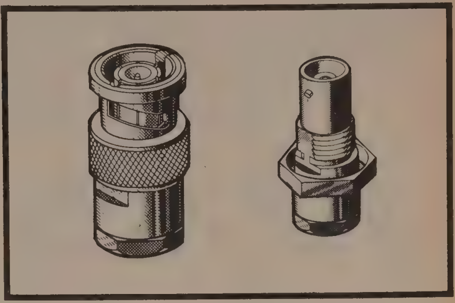
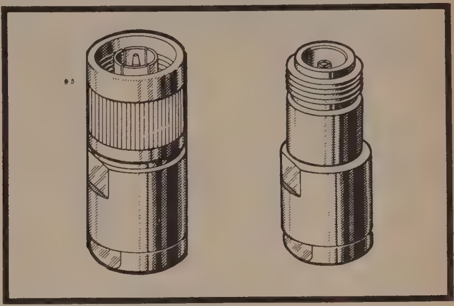
TYPE BNC

These Connectors are small and lightweight, equipped with a bayonet lock coupling for fast connection and disconnection. They are of constant impedance with a nominal value of 50 ohms and introduce little discontinuity in 50 ohm coaxial circuits. BNC's are fully weatherproofed, and rated for use where maximum voltage does not exceed 500 volts.



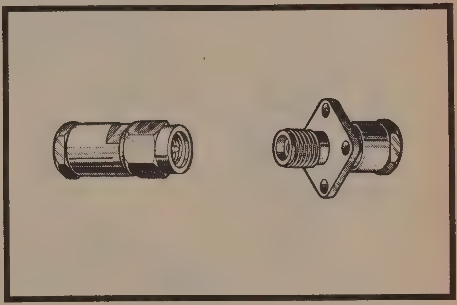
TYPE N

Recommended for use where a medium size connector with screw type coupling is desired. They are a general purpose connector of constant impedance and may be used with minimum mismatch in 50 ohm circuits. These connectors have a maximum peak rating of 1500 volts and a practical frequency limit of 10,000 mc, they are also gasketed for weatherproof operation.



TYPE SMA

Developed to fill the need for a low VSWR general purpose connector for use at all microwave frequencies. Its inherent ruggedness, simplicity and size lend well to lower frequency usage also, it is especially well suited for systems as well as components use; with a complete range of types available. The relatively small size and low VSWR, compared to other commonly used microwave connectors, has contributed measurably to the miniaturization of microwave connectors. It also allows operation at all frequencies up to 26 GHz. Choice of materials is an important consideration. All shell and body parts are made of stainless steel for ruggedness and long life.



TYPE SMB & SMC

Designed for critical miniaturization requirements. Recommended for use in test equipment vidio lead applications, communication receivers, IF & RF circuits, or wherever miniaturization is a factor. Their rugged construction, matched impedance and excellent frequency characteristics make them well suited to missile & satellite applications. Both series are fundamentally of the same interior construction allowing outside dimensions to remain essentially constant for most cable sizes used.

DRIMICA CAPACITORS

High Voltage & High Reliability

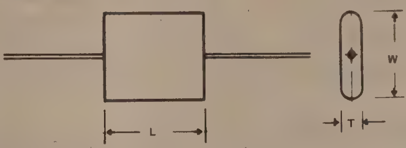
AXEL DRIMICA capacitors are used in high voltage circuits of electronic and electrical equipment. Using a solid dielectric system of reconstituted mica and thermosetting resin, AXEL capacitors are ideal for both military and industrial use where conservation of space and weight is required without compromising reliability and performance.

The dry, solid state construction permits unusual shape factors and extremely low self inductance not usually available at high voltages with oil-filled units.

Features

- High Energy Densities
- High Corona Resistance
- Low Capacitance Change with Temperature and Frequency
- High Radiation Resistance
- Dry Solid State Package — No Leaks
- No Cumbersome High Voltage Bushings
- Compatible for use in Dielectric Fluids
- Wide Temperature Capability
- Available in Mylar Wrap, Epoxy Case, Epoxy Flat Rectangular, Epoxy Flat Disc, and Epoxy Molded Enclosures

MD4AL104K
5KVDC
0.1MFD ±10%



Applications

- High Voltage DC
- Low Inductance Energy Discharge
- Pulse Forming Networks
- DC Filtering
- By-Pass
- Coupling-Blocking
- Arc Suppression
- Power Factor Correction

Meets Life requirements, Vibration and Shock, Moisture Resistance and Temperature Immersion cycling as specified in MIL-C-5, MIL-C-25, MIL-C-19978, MIL-N-23182.

SUPPLEMENTARY CAPACITOR-INFORMATION SECTION

INDEX TO CATALOG SUPPLEMENT

CRC HAS ADDED THIS SECTION TO PROVIDE INFORMATION ON NEW PRODUCTS, UNUSUAL CAPACITOR TEST DATA, AND A COMPILATION OF MISCELLANEOUS ITEMS OF INTEREST TO DESIGNERS, COMPONENT ENGINEERS, AND RELIABILITY PERSONNEL. IN ADDITION WE ARE PLANNING TO MANUFACTURE A COMPREHENSIVE PRODUCT LINE OF STANDARD AND CUSTOM FEED-THROUGH CAPACITORS AND EMI FILTERS. WE BELIEVE THESE PRODUCTS WILL BE OF HIGHER QUALITY AND PERFORMANCE THAN ANY SIMILAR PRODUCTS NOW AVAILABLE.

MANY OF OUR CUSTOMERS NOW USING EMI FILTERS HAVE EXPRESSED DISSATISFACTION WITH THE QUALITY AND RELIABILITY OF THE FILTERS PRESENTLY AVAILABLE, AND HAVE URGED US TO ENTER THIS AREA OF INTEREST. PLEASE FORWARD TO US ANY OF YOUR REQUIREMENTS FOR CAPACITORS, NETWORKS, AND EMI FILTERS, SO THAT WE CAN DETERMINE IF WE CAN MEET YOUR NEEDS.

NEW LOCATION AFTER NOVEMBER
1655 TWENTY SIXTH STREET
SANTA MONICA, CALIFORNIA 90404

AS THIS CATALOG SUPPLEMENT IS BEING PUBLISHED, CONSTRUCTION IS BEING COMPLETED ON OUR NEW, MODERN RESEARCH AND MANUFACTURING FACILITY LOCATED A SHORT DISTANCE FROM OUR PRESENT FACILITY AT 1717 19th STREET, IN SANTA MONICA. OVER 50,000 SQUARE FEET OF MANUFACTURING, RESEARCH AND WAREHOUSE SPACE WILL BE AVAILABLE TO US TO HANDLE THE EVER INCREASING DEMAND FOR OUR ESTABLISHED RELIABILITY CAPACITORS.

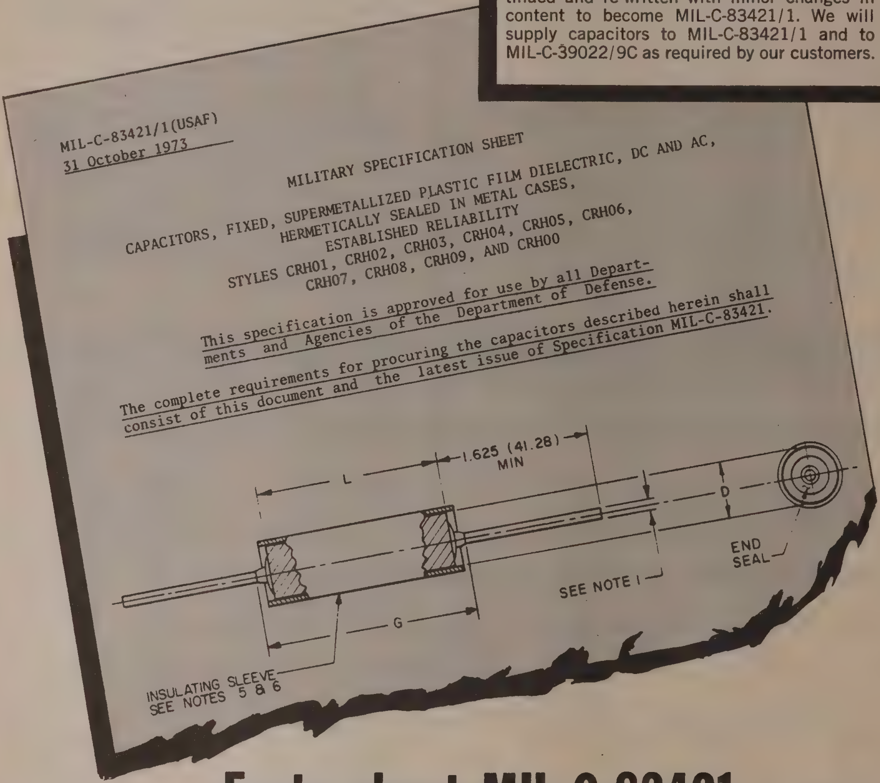
CRC PREMIUM PERFORMANCE
ESTABLISHED RELIABILITY FILM CAPACITORS

QUALIFIED TO MIL-C-83421/1 & *MIL-C-39022/9C

* **MIL-C-39022/9B and /9C** have been discontinued and re-written with minor changes in content to become MIL-C-83421/1. We will supply capacitors to MIL-C-83421/1 and to MIL-C-39022/9C as required by our customers.



MIL-C-83421/1(USAF)
31 October 1973

MILITARY SPECIFICATION SHEET

CAPACITORS, FIXED, SUPERMETALLIZED PLASTIC FILM DIELECTRIC, DC AND AC, HERMETICALLY SEALED IN METAL CASES, ESTABLISHED RELIABILITY

STYLES CRH01, CRH02, CRH03, CRH04, CRH05, CRH06, CRH07, CRH08, CRH09, AND CRH00

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The complete requirements for procuring the capacitors described herein shall consist of this document and the latest issue of Specification MIL-C-83421.

Facts about MIL-C-83421

This catalog covers comprehensive information concerning MIL-C-83421/1 capacitors, including dimensions, specifications, quality assurance, retention of qualification testing and pricing.

Component Research Co. presents this information as part of its effort to improve the reliability and performance of capacitors for aerospace use.

MIL-C-83421 is a new general specification that contains higher quality, reliability and performance, metallized plastic film capacitors than MIL-C-39022/1 to MIL-C-39022/8. MIL-C-83421 will ultimately cover a range of metallized polycarbonate, polysulfone, polystyrene, polypropylene, teflon, and other plastic films. The scope of MIL-C-83421 will be to provide 100% screened, high reliability capacitors suitable for critical aerospace and industrial use.

Special screening tests and tight parameter limits have been incorporated in order to make MIL-C-83421 capacitors superior in reliability, performance, and quality for DC or AC applications.

Additional testing and data covering corona, radiation effects, ESR ratings, and dielectric absorption ratings with temperature and short durations, will ultimately be included.

CRC HIGH RELIABILITY CAPACITORS

MIL-C-83421/1 SCREENING AND KEY FEATURES

100% GROUP A SCREENING AND INSPECTION MIL-C-83421/1 POLYCARBONATE CAPACITORS

CRC QUALITY LEVEL 1			CRC QUALITY LEVEL 3

CRC QUALITY LEVEL 1

1 48 hours Burn-In at 125°C and 140% of rated DC voltage.

2 10 Cycles of thermal aging from −65°C to +125°C.

3 Gross leak test.

4 Helium leak test. 1×10^{-6} atm cm^3/sec max. leak rate.

5 AC dielectric hipot by 100 Hz square wave at a minimum peak to peak voltage of 3 x rated DC voltage (except 800 V P/P for 400 VDC).

6 DC dielectric hipot at 200% rated volts.

7 Insulation resistance at 25°C, 300,000 megohms-uF. 3,000,000 megohms minimum for values 0.1 uF or less.

8 0.15% max. dissipation factor at 25°C.

9 Capacitance % tolerance at 25°C.

10 0.1% max. dielectric absorption.

11 Visual inspection for workmanship dimensions, marking and packaging

CRC QUALITY LEVEL 3

1 5 Cycles of thermal aging from −65°C to +125°C.

2 Gross leak test.

3 Helium leak test. 1×10^{-5} atm cm^3/sec max. leak rate.

4 AC dielectric hipot by 100 Hz square wave at a minimum peak to peak voltage of 3 x rated DC voltage (except 800 V P/P for 400 VDC).

5 DC dielectric hipot at 200% rated volts.

6 Insulation resistance at 25°C, 100,000 megohms-uF. 1,000,000 megohms minimum for values 0.1 uF or less.

7 0.15% max. dissipation factor at 25°C.

8 Capacitance % tolerance at 25°C.

9 0.1% max. dielectric absorption.

10 Visual inspection for workmanship dimensions, marking and packaging

HIGH INSULATION RESISTANCE	Styles CRH01 to CRH05 exceed 3,000,000 megohms at 25°C for values 0.1 uF or less. CRC polycarbonate capacitors have the highest insulation resistance of any capacitors available for their size. Specially screened capacitors of this type are available with an insulation resistance of 1,000,000 megohms-uF at 25°C and improved IR characteristics at higher temperatures.
AC RATED TO 40 KHz	CRC miniature metallized polycarbonate capacitors have a dissipation factor so low, (generally 0.1% but rated 0.15% max.) that they can handle high current for their size. Their dissipation factor remains low after burn-in, 100% thermal aging, and AC square wave hipot. This quality feature of CRC capacitors makes them mandatory for use in most aerospace programs which require maximum reliability in AC applications under extreme environments.
HIGH STABILITY LOW TEMP. COEFFICIENT	The A12 and K12 capacitors offer a choice of temperature coefficient and stability limits to suit your application requirements. The capacitance vs. temperature slopes from capacitor to capacitor within a lot are very similar. The A12 series differ approximately ±30PPM/°C from unit to unit, within a lot, from −55°C to +125°C.
LOWEST COST HIGHEST RELIABILITY	When ordinary type metallized polycarbonate capacitors are subjected to a form of screening to hopefully produce high reliability capacitors, the results may be costly and uncertain. The savings achieved by the use of CRC capacitors are: **Uniform performance, longer equipment life possible; Improved stability, reduced rejects, and costly failure analysis. The cost for continuous Group B testing for retention of qualification is included in the unit price; there are no extra costs for test samples or testing.**

CRC CAPACITORS QUALITY CONFORMANCE

PERIODIC TESTING PROGRAM

(FOR RETENTION OF QPL MIL-C-83421/1)

GROUP "B" INSPECTION PER MIL-C-83421, TABLE IV

GROUP B, SUBGROUPS 1, 2 AND 3: In order to maintain qualification, Component Research Company performs Periodic Testing (Quality Conformance Testing). Capacitors are selected from current production lots of CRH01 through CRH00 styles, which have successfully completed 100% "Group A" inspection shown on page 3.

SUBGROUP 1 TESTS

10 Each CRH Style Monthly

- Barometric Pressure
- Insulation Resistance at Max. Rated Temperature
- Temperature Coefficient
- Life (2,000 Hours)

SUBGROUP 2 TESTS

CRH01 Parts Jan., July
CRH02 Parts Feb., Aug.
100 Volt Parts March, Sept.
200 Volt Parts April, Oct.
400 Volt Parts May, Nov.

- AC Conditioning 250 Hours
- Dissipation Factor
- Insulation Resistance
- △ Capacitance

SUBGROUP 3 TESTS

18 Parts Every 6 Months,
Consisting of CRH01,
CRH02, CRH03, CRH04 and CRH05

- Vibration
- Salt Spray
- Immersion
- Solderability
- Shock
- Moisture Resistance
- Terminal Strength
- Resistance to Solvents

DC LIFE TEST PERFORMED MONTHLY

GROUP B, SUBGROUP 1 FOR ALL CRH STYLES COVERING ALL FAILURE RATE LEVELS

Capacitors are DC-Life tested at 100°C and at 140% of the rated D.C. voltage for 2,000 hours. (This is an acceleration factor of 5:1, approximately).

EXAMINATION OR TEST	CONDITIONS	POST TEST LIMITS	
		CRH01, CRH02, CRH03, CRH04, and CRH05	CRH06, CRH07, CRH08, CRH09, and CRH00
Barometric Pressure	Per MIL-C-83421	No breakdowns	No breakdowns
Insulation Resistance	@ Rated voltage @ 125°C	2,000 Megs-uF need not exceed 20,000 Megs	1,000 Megs-uF need not exceed 10,000 Megs
Temperature Coefficient	△ Cap. at −55°C Retrace at 25°C △ Cap. at +125°C	−1.5% to 0.5% max. ±0.1% max. +0.8% to −0.5% max.	−2.0% to −0.5% max. ±0.25% max. ±2.0% max.

POST LIFE TEST LIMITS AFTER 2,000 HOURS LIFE

EXAMINATION OR TEST	CONDITIONS	CRH01, CRH02, CRH03, CRH04, and CRH05	CRH06, CRH07, CRH08, CRH09, and CRH00
Insulation Resistance at Rated Voltage and 25°C	Insulation Sleeves	10,000 Megs min.	10,000 Megs min.
	Terminal to Terminal	100,000 Meg-uF need not exceed 1,000,000 Megs	33,333 Megs-uF need not exceed 333,333 Megs
	Terminals to Case	10,000 Megs min.	10,000 Megs min.
△ Capacitance % change with life	At 1 KHz and 25°C	±2% max. of initial value	±4% max. of initial value
% Dissipation Factor	At 1 KHz and 25°C	0.25% max.	0.35% max.

AC-SINUSOIDAL LIFE TEST PERFORMED MONTHLY

Capacitors are AC life tested for 250 hours at 100°C and at 140% of the rated RMS voltage at the applicable test frequency as shown in Table V. This test is performed monthly in order to verify the AC RMS voltage and current ratings.

POST AC TEST LIMITS

Insulation Resistance at Rated Voltage and 25°C	100,000 Megs-uF, need not exceed 1,000,000 Megs
Capacitance % Change at 1 KHz and 25°C	2% max. of initial value
% Dissipation Factor at 25°C	0.25% max.

TABLE V AC-LIFE TEST PARAMETERS PER MIL-C-83421/1

05	A12E	400	240	336	400

CRC HIGH RELIABILITY CAPACITORS

AC-DC LIFE TEST DATA

MIL-C-83421/1 POLYCARBONATE CAPACITORS

DC LIFE TEST

Data shown is typical of continuous DC life testing performed monthly with samples from current production lots. Samples are tested monthly to maintain failure rate P (0.1%/1,000 hrs.).

AC LIFE TEST

Each month capacitors of assorted values selected from Table I of MIL-C-83421/1 and of the voltage rating specified in paragraph 4.6.2.1.1 (b) of MIL-C-83421, are submitted to 250 hours life at the test voltage and frequency specified in Table V of MIL-C-83421/1.

The excellent low loss and high quality of CRC polycarbonate capacitors enables them to withstand this severe testing without failure. Under these test conditions a 3.9 uF, 50 VDC capacitor is handling 5 AMPS RMS. This can be considered outstanding with a case size as small as 0.562 x 1.375. A 3.9 uF, 50 VDC capacitor is normally rated at 3.6 AMPS RMS AC MAX, as shown in Table I of MIL-C-83421/1.

DC LIFE TEST DATA

PER MIL-C-83421 PARA. 3.27, 4.7.23.2.1 TEST REPORT 74TR35 CRH01 Through CRH00

TEST RESULTS FOR 280 POLYCARBONATE CAPACITORS TESTED FOR 2000 HOURS AT 100°C WITH 140% RATED VOLTAGE APPLIED.

THERE WERE NO FAILURES FOR THIS TEST.

CRC HIGH RELIABILITY CAPACITORS

HOW TO SELECT AND SPECIFY MIL-C-83421/1 CAPACITOR PART NUMBERS

SELECTION INFORMATION

MIL-C-83421/1 covers 30 volt to 400 volt DC rated capacitors for applications requiring a tight capacitance tolerance, excellent capacitance stability, very high insulation resistance and low loss factors. This specification applies in addition where the AC component of voltage is large with respect to the applied DC voltage, and where momentary breakdowns cannot be tolerated.

MIL-C-83421/1 offers the users two quality level styles. Each style includes 30 VDC, 50 VDC, 100 VDC, 200 VDC and 400 VDC rated capacitors, with 0.25%, 0.5%, 1%, 2%, 5% and 10% capacitance tolerances to select from.

A study of catalog page 3 provides a comparison of screening steps and key features that are unique with capacitors qualified to MIL-C-83421/1. If any doubt exists as to the use of these capacitors for high energy AC conditions not covered in the AC ratings of Table 1, a complete description of current and voltage conditions, including waveforms, should be forwarded to us for review and recommendations.

CONSTRUCTION INFORMATION

All CRH capacitors are tubular, metal cased, with both wire lead terminals isolated from the case. All the capacitors are provided with a plastic heat shrink-fit sleeve to insulate the metal case. The lead wires are #22 AWG for 0.312 or less case diameters and #20 AWG for 0.400 and 0.500 diameters. The lead wires are normally tinned copper clad steel per type "W" of MIL-STD-1276. Capacitors with gold plated nickel leads per N2 of MIL-STD-1276 can also be provided at additional cost. For 0.562" and larger diameters, #18 AWG tinned copper, OFHC, leads are used.

Unless you specifically request a lead material type for 0.500" and smaller diameters, Component Research will supply the material currently in production at time of order.

AC RATINGS

AC ratings at 400 Hz; 4000 Hz; and 40,000 Hz RMS AC voltage (sinusoidal), with current limits from −55°C to +100°C, are listed for each individual capacitance value and DC voltage rated style in Table 1. When operating above 100°C, derate all voltages linearly from full rated voltage at 100°C to 50% of rating at 125°C.

Although CRC capacitors have a low dissipation factor of 0.15% max. at 25°C, their dissipation factor is lower yet at temperatures from 75°C to 125°C.

This results in lower watts-loss and heat rise at elevated temperatures — with, of course, improved reliability for AC or DC applications.

APPLICATION NOTES

Make certain that the sum of any instantaneous peak AC voltages plus any superimposed DC voltages do not exceed the capacitor's rated DC voltage.

Effective heat sinking will permit operation at higher current levels than listed in Table 1. However, our CRC application engineers should be advised prior to use in any application where non-sinusoidal operating conditions are encountered, or when higher RMS currents are involved.

Component Research Co. can supply special AC capacitors with greater current handling capability and reduced heat rise.

FAILURE RATE LETTERS

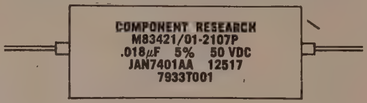
Component Research is presently qualified to failure rate "P" and intends to maintain this level continuously. Because MIL-C-83421/1 has such stringent post test limits, a "P" failure rate is indicative of higher quality than a higher letter such as "R" or "S" in other film capacitor specifications with looser post test limits.

Series A12 and K12 prices covering MIL-C-83421/1 capacitors are listed at the rear of this catalog and are based upon a "P" failure rate.

HOW TO SPECIFY MIL-C-83421/1 PART NUMBERS

For ordering and marking purposes only, MIL-C-83421/1 capacitors must be identified as M83421/01 ....

An example of MIL-Spec marking is shown below. The sample shown is a 0.018μF, 5%, 50 volt, Style CRH02 capacitor.



COMPONENT RESEARCH
Manufacturer's name, may be abbreviated when space is limited.

M83421/01
Basic military specification number (for marking only).

-2
Indicates CRH02 style which covers 50 VDC rating and higher quality screened type. (CRH07 is a 50 VDC style with reduced screening and performance. See page 3.)

107
Dash No. of required μF value and % tolerance selected from Table 1 of MIL-C-834212/1.

P
(P is failure rate letter.)

JAN
Jan marking.

7401
Weekly date code per MIL-STD-1285.

AA
Unique sub lot or batch code for traceability.

12517
CRC federal code number.

***7983T**
Unique batch test number.

***001**
Unique serial number.

**This marking found on CRC capacitors is not required by MIL-C-83421/1 but is standard marking identification used by CRC to permit maximum traceability for Level 1 parts such as CRH01 to CRH05 styles.*

ADDITIONAL MARKING EXAMPLE:

A 0.0015 μF, 1%, 100 VDC, CRH03 capacitor selected from Table 1 below would be identified as M83421/01-3015P.

MIL-C-83421/1

CRC HIGH RELIABILITY CAPACITORS

MIL-C-83421/1 AC RATED CAPACITORS RELIABILITY QUESTIONS AND ANSWERS

What are the limiting factors restricting the use of metallized polycarbonate capacitors for AC applications?

A properly manufactured and screened capacitor can handle considerable RMS and peak currents from −55°C to +125°C without significant case temperature heat rise. The dissipation factor of capacitors to be used in AC applications must be uniformly low to limit the watts loss incurred usually by capacitors with a high (ESR) equivalent series resistance.

We recommend a maximum dissipation factor of 0.15% at 1 KHz as the acceptance test limit. All capacitors should be subjected to temperature cycling prior to final measurement of DF to observe if they remain less than 0.15%. This test eliminates problems which may occur in use, after storage, or operation at extreme temperatures, leading to higher DF and operational failure.

CRC catalog page 9 contains the maximum RMS current and voltage ratings for sinusoidal conditions, continuous duty cycle, at 400 Hz and 40 KHz. For conditions other than shown, send to our sales office a sketch of the current and voltage waveforms under worst case and normal operating conditions. Include all other information necessary for quotation purposes. See page 35.

Is polycarbonate better than other dielectrics for AC applications?

If size, weight, cost, or operating temperatures were not important considerations, then other dielectric style capacitors are superior to polycarbonate.

As an example, CRC can supply polystyrene, teflon, or polypropylene AC capacitors with approximately ten times lower loss than the series 12 polycarbonate capacitors.

Polysulfone introduced as a new product on pages 38 and 39, is slightly better than polycarbonate for AC applications below 100°C, and can be used above 125°C (the limit for polycarbonate), to 150°C with proper voltage derating.

CRC considers mylar and paper dielectric styles too lossy for AC applications and therefore does not recommend this type for such requirements. Additional information on AC capacitors appears on other pages of this catalog.

What type of screening test will assure that the polycarbonate capacitors are reliable for AC applications?

Once it has been determined that your application requirements can be met by CRC standard polycarbonate series 12 capacitors, the screening test used by CRC and incorporated into MIL-C-83421/1 will be sufficient to provide the quality assurance needed.

As an example 100% of the capacitors are temperature cycled then are subjected to a square wave voltage at 100 Hz at 300% of rated DC voltage for peak to peak amplitude.

During this test the capacitors must handle approximately 35 microsecond wide current pulses for one minute at a rate of 200 per second.

A routine examination of the current and voltage waveforms during square wave hipot of 10 uF, 50 VDC type CRH capacitors, shows that with 150 volts peak to peak voltage at 100 Hz applied, the peak current is 85 amps. This is equivalent to operation with a half sine wave peak current pulse of 8.5 amps/uF at a 200 PPS rate. SEE WAVEFORMS AT RIGHT.

Following the square wave voltage stress test the capacitors must meet 0.15% max. dissipation factor limits.

As shown on catalog page 5, life testing of CRC metallized polycarbonate capacitors at 400 Hz and 4000 Hz is performed continuously as retention of qualification to MIL-C-83421/1.

Are the new CRC series 12 AC rated polycarbonate capacitors higher in cost than their earlier type PL and PG capacitors supplied since 1965?

A study of series 12 polycarbonate prices, shows that with few exceptions price reductions (particularly for closer tolerances and larger uF values) are the rule. An examination of the series 12 specifications shows higher guaranteed performance and continuous retention of qualification testing. This in itself represents a substantial price decrease in terms of value adding without increased cost.

Why are CRC low dissipation factor polycarbonate capacitors replacing commonly manufactured capacitors in AC applications?

There is a risk that the dissipation factor of such capacitors will increase with use and result in hot spots at the terminations. Field failures of such capacitors have been reported where the capacitors have exploded and caused fire damage.

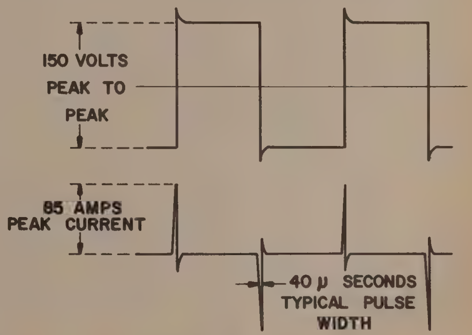
It may be possible to use ordinary higher DF capacitors without noticeable problems at 400 Hz provided that RMS voltage is sufficiently low such that the RMS current is limited. Heat sinking will also help prevent excess heat rise due to poor quality terminations.

Interestingly enough CRC polycarbonate capacitors have a lower dissipation factor at temperatures from 75°C to 125°C than at 25°C which lowers their effective heat rise at higher temperatures. Where the current source is limited, higher DF capacitors may not heat sufficiently to short, but may gradually suffer from increasing DF to the point where they are effectively open.

What is the maximum current that can be applied to MIL-C-83421/1 capacitors?

The 40 KHz current and voltage ratings listed in Table I of the Mil-Spec and also shown on page 9 of this catalog are based upon continuous operation under sinusoidal conditions. It is essential that any use under conditions exceeding these limits be discussed further with our applications engineers for elimination of failures. Under certain conditions, the capacitors can be used at higher frequencies and in square wave filtering applications. For good reliability it is best to study these special applications on an individual basis. CRC plans to provide data tables showing allowable working conditions during higher frequency sinusoidal, pulsed, and non-sinusoidal conditions.

TYPICAL VOLTAGE AND PEAK CURRENT WAVEFORMS SHOWN FOR A12B106, 10 uF, 50 V, METALLIZED POLYCARBONATE CAPACITOR DURING THE ONE MINUTE AC SQUARE WAVE SCREENING AT 100 Hz.



CRC HIGH RELIABILITY CAPACITORS

SERIES 12 POLYCARBONATE

AC RATINGS 400 Hz TO 40,000 Hz COVERS MIL-C-83421/1 AND MIL-C-39022/9C CAPACITORS

Component Research Co. has over 150 KVA of specialized AC generating equipment operating from 400 Hz to 100,000 Hz, sinusoidal conditions, for burn-in, life testing, and continuous research and development. In addition, square wave and pulse generators capable of simulating massive energy stress or sharp rise times enables Component Research engineers to sample test standard production type capacitors to ascertain their capability under higher stress operating conditions. Custom designed capacitors for critical space, military, and commercial applications are thoroughly screened and evaluated to eliminate excess heating or any other cause for failure. The AC ratings of MIL-C-83421/1 were developed as a result of tests conducted on CRC polycarbonate capacitors from 400 Hz to 40,000 Hz. Following is data similar to that found in MIL-C-83421/1.

AC Ratings: AC ratings are for sinusoidal conditions from −55°C to +100°C. Derate linearly to 50% of AC rated RMS voltage at 125°C.

MIL-C-83421/1 POLYCARBONATE AC TESTED CAPACITORS

COMPONENT
RESEARCH
COMPANY, INC.

MIL STYLE	DC VOLTS	400 Hz AC VOLTS	CRC BASIC P/N
CRH01	30	22 VRMS	A12A
CRH02	50	36 VRMS	A12B
CRH03	100	60 VRMS	A12C
CRH04	200	120 VRMS	A12D
CRH05	400	240 VRMS	A12E

SERIES A12 QUALITY ASSURANCE

ALL CAPACITORS ARE 100% SCREENED AND TESTED AS FOLLOWS:

1	48 hours Burn-in at 125°C and 140% of the rated DC voltage.
2	Thermal aging. 10 temperature cycles from —65°C to 125°C.
3	Helium Leak Test. 1 x 10^{-6} atm/cm^3/sec max. leak rate.
4	DC dielectric strength. Apply 200% of rated DC voltage from lead to lead and from leads to case for one minute.
5	AC dielectric strength. Apply 100 Hz square wave from lead to lead at a minimum peak to peak voltage of 3 x rated DC Voltage for one minute (except 800V peak to peak for 400 VDC styles).
6	Insulation Resistance. At rated voltage and 25°C, 300,000 megs — uF minimum, but need not exceed 3,000,000 Megohms.
7	Capacitance. % Tolerance at 1 KHz and 25°C.
8	Dissipation Factor. At 1 KHz and 25°C, 0.15% maximum.
9	Temperature Coefficient. Measured from —55°C to 125°C at a minimum of 5 temperature points. (Performed on monthly lot sampling basis).
10	0.1% max. dielectric absorption.
11	Visual inspection. Check dimensions, marking and packaging.
12	Traceability to production and test records by permanent marking of parts with lot control number.
13	Process and inspection data is maintained on file per NPC-200-3, MIL-Q-9858 quality control standards and MIL-STD-790, Reliability Assurance Program.
14	Capacitors are serialized and packaged with certified test data to accompany each shipment.

CONSTRUCTION: Polycarbonate dielectric, hermetically sealed, extended metal film electrodes, leads isolated from case.

LEAD WIRE SIZE AND TYPE

Case Diameter	Lead Wire Size #AWG	Lead Wire Material
0.312″ and smaller	22	Tinned Copper Clad Steel (Tinned Copperweld) CRC type "W"
0.400″ and 0.500″	20	
0.562″ and larger	18	Oxygen free tinned copper wire CRC type "C" or type "W"

CRC SERIES A12 QUALITY LEVEL 1

SPECIFICATIONS

OPERATING TEMPERATURE: —65°C to 100°C at full rated voltage. Derate linearly from 100°C to 50% of rated voltage at 125°C.

CAPACITANCE CHANGE WITH TEMPERATURE (25°C REFERENCE)

—55°C	—0.5% to —1.5%
25°C	0.1% Max. Hysteresis
+125°C	—0.5% to +0.8%

STABILITY: Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

RANGE	RETRACE
—25°C to 85°C	0.03% Max.
—65°C to 125°C	0.2% Max.

INSULATION RESISTANCE: Measured from terminal to terminal at rated voltage, and 5 minutes maximum charge time. For values greater than 1 uF, allow an additional minute/uF charge time.

MINIMUM IR

Range	25°C	55°C	85°C	100°C	125°C
.001 to 0.1 uF (in Megohms)	3,000,000	2,000,000	1,000,000	300,000	20,000
Greater than 0.1 uF (in Megohms — uF)	300,000	200,000	100,000	30,000	2,000

Readings shown are for 1 uF or less. For values over 1 uF, divide readings by uF to obtain min IR.
Example: A 4 uF capacitor is 75,000 megohms at 25°C.

DIELECTRIC ABSORPTION: 0.1% Max. at 25°C.

DISSIPATION FACTOR: 0.15% Max. at 1 KHz and 25°C. Values greater than 1 uF measure at 0.1 KHz.

DIELECTRIC STRENGTH: 200% of rated voltage.

SEAL TEST: 1 x 10^{-6} atm/cm^3/sec Max. leak rate.

ENVIRONMENTAL: Capacitors shall meet all applicable requirements of MIL-C-83421/1.

SPECIFICATIONS

OPERATING TEMPERATURE: −65°C to 100°C at full rated voltage. Derate linearly from 100°C to 50% of rated voltage at 125°C.

CAPACITANCE CHANGE WITH TEMPERATURE (25°C REFERENCE)

−55°C	−0.5% to −2.0%
25°C	0.25% Max. Hysteresis
+125°C	±2%

STABILITY: Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

RANGE	RETRACE
−25°C to 85°C	0.05% Max.
−65°C to 125°C	0.25% Max.

INSULATION RESISTANCE: Measured from terminal to terminal at rated voltage, and 5 minutes maximum charge time. For values greater than 1 uF, allow an additional minute/uF charge time.

MINIMUM IR

Range	25°C	55°C	85°C	100°C	125°C
.001 to 0.1 uF (in Megohms)	1,000,000	500,000	100,000	50,000	10,000
Greater than 0.1 uF (in Megohms — uF)	100,000	50,000	10,000	5,000	1,000

Readings shown are for 1 uF or less. For values over 1 uF, divide readings by uF to obtain min. IR.

Example: A 10 uF capacitor is 10,000 megohms at 25°C.

DIELECTRIC ABSORPTION: 0.1% Max. at 25°C.

DISSIPATION FACTOR: 0.15% Max. at 1 KHz and 25°C. Values greater than 1 uF measure at 0.1 KHz.

DIELECTRIC STRENGTH: 200% of rated voltage.

SEAL TEST: 1 x 10^{-5} atm/cm³/ sec Max. leak rate.

ENVIRONMENTAL: Capacitors shall meet all applicable requirements of MIL-C-83421/1.

CRC HIGH RELIABILITY CAPACITORS

100% Group A Screening & Inspection

*MIL-C-39022/9 POLYCARBONATE CAPACITORS

* MIL-C-83421/1 HAS REPLACED MIL-C-39022/9C FOR NEW DESIGN. CRC WILL CONTINUE TO SUPPLY BOTH TYPES AS REQUIRED. SEE PAGES 2-11.

HIGH INSULATION RESISTANCE

CHROIA, D, G, K and N styles exceed 3,000,000 megohms at 25°C for values 0.1 uF or less. CRC polycarbonate capacitors have the highest insulation resistance of any capacitors available for their size. Special CRC capacitors are available with higher limits.

AC RATED TO 40KHz

CRC miniature polycarbonate capacitors, have a dissipation factor so low, (generally 0.1% but rated 0.15% max.) that they can handle extremely high RMS or peak current. See page 9 for further information.

HIGH STABILITY - LOW TEMPERATURE COEFFICIENT

Three quality levels are available with a choice of drift and TC limits suitable for most temperature sensitive applications. Long term drift data on file indicates 0.5% max. capacitance shelf drift for five years, with current production showing improved stability.

FREE FROM MOMENTARY BREAKDOWNS

CRC capacitors are engineered to be completely free from breakdowns, intermittents or noise. All CRC capacitors must pass rigorous testing with sensitive equipment capable of detecting changes of several picoamps.

HIGHEST QUALITY AT LOWEST COST

Year after year CRC capacitor quality is upgraded. CRC specifications become more exacting, yet CRC manages to maintain or lower capacitor prices. Furthermore, there are no additional charges for MIL-C-39022/9 Retention of Qualification Testing, when purchasing CHROI capacitors from CRC (See page 4 for Retention of Qualification Testing.)

CRC HIGH RELIABILITY CAPACITORS

HOW TO SELECT & SPECIFY

*MIL-C-39022/9 CAPACITOR PART NUMBERS

SELECTION INFORMATION

MIL-C-39022/9 covers 30 volt to 400 volt DC rated capacitors for applications requiring a tight capacitance tolerance, excellent capacitance stability, very high insulation resistance and low loss factors. This specification applies in addition where the AC component of voltage is large with respect to the applied DC voltage, and where momentary breakdowns cannot be tolerated.

Table II of MIL-C-39022/9 describes in part, three quality levels and their respective performance and test criteria.

CRC has clarified the data shown in table II and all additional specifications requirements, by presenting this information in test plan form on page 12 of CRC catalog J.

A study of life test data on Page 5 will indicate the excellent characteristics of polycarbonate capacitors manufactured by Component Research Co. to MIL-C-39022/9 latest revision.

HOW TO SPECIFY MILITARY PART NUMBERS

Select the style required, then place the dash number after M39022/9. As an example: A 0.001 uF 1% 50VDC CHROIE capacitor as shown in table 1 would be identified as M39022/9-E003P. **The P indicates our failure rate as of March 1972. See section dealing with failure rates on this page.**

SLEEVING

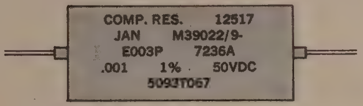
All CHROI capacitors are mylar shrink-fit sleeved.

LEADS

All CHROI capacitors are supplied with #22 AWG tinned copper clad steel leads for 0.312″ or less case diameters. #20 AWG leads are supplied for 0.400″ and .500″ diameter capacitors. Gold plated nickel leads are still being used where specifically requested, but are not recommended for new designs. #18 AWG tinned copper, OFHC leads are used for 0.562″ and larger diameter capacitors.

Unless you specifically request a lead material choice for the 0.500″ diameter and smaller cases, Component Research will supply the material currently in production at time of order.

MARKING EXPLANATION (TYPICAL EXAMPLE)



COMP. RES.	ABBREVIATION FOR COMPONENT RESEARCH CO. (WHEN SPACE IS LIMITED).
12517	CRC VENDOR CODE NO.
JAN M39022/9-	BASIC MILITARY MARKING
E003	DASH NO. SELECTED FROM TABLE 1.
P	(P IS FAILURE RATE LETTER)
7236A	WEEKLY DATE CODE PER MIL STD 1285
*5093T	REPRESENTS UNIQUE CRC TEST NUMBER.
067	UNIQUE SERIAL NUMBER

*This marking is not required by MIL-C-39022/9. This is standard CRC marking for CHR01A, D, G, K and N styles only.

*** MIL-C-83421/1 HAS REPLACED MIL-C-39022/9C FOR NEW DESIGN. CRC WILL CONTINUE TO SUPPLY BOTH TYPES AS REQUIRED. SEE PAGES 2-11.**

AC RATINGS

AC ratings at 400Hz; 4000Hz; and 40,000Hz RMS AC voltage (sinusoidal), with current limits from −55°C to +100°C, are listed for each individual capacitance value and DC voltage rated style in table 1. When operating above 100°C, derate all voltages linearly from full rated voltage at 100°C to 50% of rating at 125°C.

CRC qualified polycarbonate capacitors, with a 0.15% max. dissipation factor, will in a still-air environment, and at maximum rated operating conditions rise no more than 20°C. With conventional heat sinking methods, the capacitor heat rise will be considerably less than 20°C.

Although CRC capacitors have a low dissipation factor of 0.15% max. at 25°C, their dissipation factor is lower yet at temperatures from 75°C to 125°C.

This results in lower watts-loss and heat rise at elevated temperatures—with, of course, improved reliability for AC or DC applications.

APPLICATION NOTES

Make certain that the sum of any instantaneous peak AC voltages plus any superimposed DC voltages do not exceed the capacitor's rated DC voltage.

Effective heat sinking will permit operation at higher current levels than listed in table 1. However our CRC application engineers should be advised prior to use in any application where non-sinusoidal operating conditions are encountered, or when higher RMS currents are involved.

Our engineers will be pleased to study your needs and advise you if the capacitors will operate reliably under your special operating conditions.

Component Research Co. can supply special AC capacitors with greater current handling capability and reduced heat rise, in the same case sizes as shown for MIL-C-39022/9. **See page 35.**

FAILURE RATE LEVELS

Component Research Co. is conducting continuous lot testing in order to achieve lower failure rates. Upon periodic review of this data by DESC, lower failure rates will be granted based on total number of capacitor life test hours without any failure.

Because MIL-C-39022/9 has such stringent post test limits the failure rate levels in MIL-C-39022/9 are effectively lower than the same failure rate levels in conventional film capacitor specifications and other military specifications.

C12 SPECIFICATIONS

OPERATING TEMPERATURE: −65°C to 100°C at full rated voltage. Derate linearly from 100°C to 50% of rated voltage at 125°C.

TEMPERATURE COEFFICIENT OF CAPACITANCE: (25°C Reference).

−0.75% ±0.25% at −55°C	+0.05% ±0.1% at 55°C
−0.35% ±0.15% at −25°C	+0.15% ±0.15% at 85°C
−0.25% ±0.15% at −10°C	+0.25% ±0.25% at 125°C
−0.15% ±0.1% at 0°C	

STABILITY: Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

RANGE	RETRACE
−25°C to 85°C	0.03% Max.
−65°C to 125°C	0.2% Max.

INSULATION RESISTANCE: Measured from terminal to terminal at rated voltage, and 5 minutes maximum charge time. For values greater than 1 uF, allow an additional minute/uF charge time.

MINIMUM IR

Range	25°C	55°C	85°C	100°C	125°C
.001 to 0.1 uF (in Megohms)	3,000,000	2,000,000	1,000,000	300,000	20,000
Greater than 0.1 uF (in Megohms—uF)	300,000	200,000	100,000	30,000	2,000

Readings shown are for 1 uF or less. For values over 1 uF, divide readings by uF to obtain min IR.

Example: A 4 uF capacitor is 75,000 megohms at 25°C.

DIELECTRIC ABSORPTION: 0.1% Max. at 25°C.

DISSIPATION FACTOR: 0.15% Max. at 1KHz and 25°C. Values greater than 1 uF measure at 0.1KHz.

DIELECTRIC STRENGTH: 200% of rated voltage.

CONSTRUCTION: Polycarbonate dielectric, hermetically sealed, extended metal film electrodes, leads isolated from case.

LEAD WIRE SIZE AND TYPE

Case Diameter	Lead Wire Size #AWG	Lead Wire Material
0.312″ and smaller	22	Tinned Copper Clad Steel (Tinned Copperweld) CRC type "W"
0.400″ and 0.500″	20	
0.562″ and larger	18	Oxygen free tinned copper wire CRC type "C"

SEAL TEST: 1 x 10⁻⁶ atm/cm³/sec max. leak rate.

ENVIRONMENTAL: Capacitors shall meet all applicable requirements of MIL-C-39022/9C.

C12 QUALITY ASSURANCE

All capacitors are 100% screened and tested as follows:

1. 48 hours Burn-In at 125°C and 140% of the rated DC voltage.
2. 10 Temperature Cycles from −65°C to 125°C.
3. Helium Leak Test. 1 x 10^{-6} atm/cm³/sec max. leak rate.
4. DC dielectric strength apply 200% of rated DC voltage from lead to lead and from leads to case for one minute.
5. AC dielectric strength apply 100 Hz square wave from lead to lead at a minimum peak to peak voltage of 3 x rated DC voltage for one minute (except 800V peak to peak for 400VDC styles).
6. Insulation Resistance at the rated voltage and 25°C, 300,000 megs — uF minimum, but need not exceed 3,000,000 Megohms.
7. Capacitance % Tolerance at 1KHz and 25°C.
8. Dissipation Factor at 1KHz and 25°C, 0.15% maximum.
9. Temperature Coefficient measured from −55°C to 125°C at a minimum of 5 temperature points. (Performed on lot sampling monthly basis.)
10. Visual Inspection for dimensions, marking and packaging.
11. Traceability to production and test records by permanent marking of parts with lot control number.
12. Process and inspection data is maintained on file per NPC-200-3, MIL-Q-9858 quality control standards and MIL-STD-790, Reliability Assurance Program.
13. Capacitors are serialized and packaged with certified test data to accompany each shipment.

3. DC dielectric strength apply 200% of rated DC voltage from lead to lead and from leads to case for one minute.
4. AC dielectric strength apply 100 Hz square wave from lead to lead at a minimum peak to peak voltage of 3 x rated DC voltage for one minute (except 800V peak to peak for 400VDC styles).
5. Insulation Resistance at the rated voltage and 25°C, 100,000 megs — uF minimum, but need not exceed 1,000,000 Megohms.
6. Capacitance % Tolerance at 1KHz and 25°C.
7. Dissipation Factor at 1KHz and 25°C, 0.15% maximum.
8. Visual Inspection for dimensions, marking and packaging.
9. Traceability to production and test records by permanent marking of parts with lot control number.
10. Process and inspection data is maintained on file per NPC-200-3, MIL-Q-9858 quality control standards and MIL-STD-790 Reliability Assurance Program.

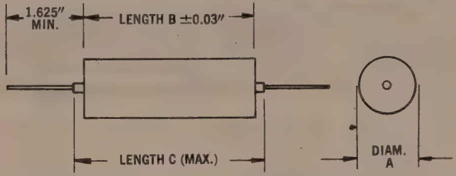
SERIES
12

MIL-C-39022/9C VS MIL-C-83421/1

MIL-C-39022/9C Polycarbonate capacitor specifications have been replaced by MIL-C-83421/1 as explained in CRC catalog pages 2-11. MIL-C-83421/1 screening steps are not basically different than those of MIL-C-39022/9C but re-writing of the documents has resulted in a more clearly understood specification for our Metallized Polycarbonate capacitors. Several case dimensions were changed in going to MIL-C-83421/1, and minor corrections were made in current and voltage ratings, and several capacitance values were added and deleted. CRC will continue to supply both types as long as required by our customers. All "C" max dimensions for Series A12 and K12 capacitors shown on page 8 of catalog J, are 0.1" shorter than for MIL-C-39022/9C capacitors listed below.

All capacitor values and dimensions which differ from MIL-C-83421/1 or from CRC A12, K12 specifications are shown in bold face type below.



CASE DIMENSION	TOLERANCE LIMITS
"A" Diameter	±0.010" Without Sleeving −0.00" +0.02" With Mylar Sleeving
"B" Case Length	±0.03" With or Without Sleeving
"C" Bead to Bead Length	The lengths shown in tables are maximum and include the solder bead.

uF	12A	30VDC		12B	50VDC		12C	100VDC		12D	200VDC		12E	400VDC

CRC HIGH RELIABILITY CAPACITORS

CAPACITOR IDENTIFICATION & CROSS REFERENCE TABLE

Component Research Co. has been manufacturing precision film capacitors since 1959. As a result of introducing new, improved products, our part numbers have changed and a few older types are now considered obsolete. CRC will continue to supply obsolete types if you cannot find a substitute item, and we are able to obtain the required film materials. Following is a guide to the old and new part number types which are similar. Due to possible differences in screening, dimensions, and performance, it is best to contact our applications department when you plan to retrofit or use our new part numbers to replace the old. Old catalogs describing obsolete part numbers are available if required.

IDENTIFICATION FOR SPECIAL REQUIREMENTS

CRC believes that there is a sufficient choice of capacitors in this catalog to satisfy virtually all applications. In the event you have any requirement involving a modification of our specifications the following special identification will be used.

Example: X11B154BW588 (typical special part number). "X" preceding the part number indicates a special customer requirement. The number group at the end of the part number is assigned as a unique identification of the special manufacturing and inspection instructions.

In the example shown above "588" is a typical unique identification number.

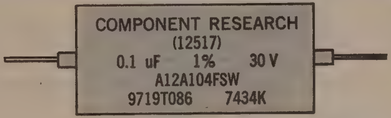
PART NUMBER EXAMPLES

Example 1 A12A104FSW shown to the right and in the marking example on Page 18, is a metallized polycarbonate, 0.1 uF, 1%, 30 VDC, ungrounded case, capacitor. The capacitor has sleeving, tinned copper-clad steel leads, 48 hours burn-in, and 10 thermal aging cycles. It is made to quality level 1.

Example 2 C11B183FXW is a "C" screened metallized teflon level 1 capacitor, 0.018 uF, 1% tol., 50 VDC. No sleeving is required. It has an ungrounded case and tinned copper clad steel leads.

Example 3 E22D15993BSC is "E" screened, metallized polycarbonate, 1.599 uF, 0.25%, 200 VDC. The capacitor has a grounded case with mylar sleeving and OFHC leads. 15993 in the part number is derived by adding three zeros to 1599 to make 1,599,000 picofarads, which is 1.599 uF. Example 3 is considered a nonstandard part because of the grounded case and the uF value.

MARKING EXAMPLE — Standard Types



UNIQUE TEST & SERIAL NO.—All level 1 capacitors are permanently identified with a test number followed by a serial number for traceability to test records. 9719T is a typical test number, 086 is the capacitor serial number.

LOT CONTROL NO.—All level 1, 2, and 3 capacitors are traceable to process records and materials used, by means of the weekly date code. The individual lot letter K, indicates the tenth lot made in the 34th week of 1972.

NOTE: ONLY LEVEL 1 CAPACITORS ARE SERIALIZED

CRC HIGH RELIABILITY CAPACITORS

MANUFACTURING & INSPECTION FLOW PLAN

MIL-C-83421 • MIL-C-39022/9C • STANDARD CAPACITORS

100% INSPECTION PER MIL-C-83421

The high reliability capacitor screening plans developed by Component Research Co. have been adopted by space and military contractors throughout the world for critical programs. The new general specification MIL-C-83421 incorporates much of the screening features shown below at an attempt to provide a "state of the art" capacitor specification for general industrial and aerospace use.

Our flow plan for manufacturing and inspection shown below covers the steps used to process and screen all of our polycarbonate, teflon, polystyrene and polysulfone film capacitors. The individual specifications shown in the catalog list the actual screening performed for each style. A choice of three quality levels provides different degrees of intensive screening to assure the highest possible quality at lowest cost. Special screening plans are available which include tests such as 100% corona inception inspection, 40 KHz AC burn-in at 100°C, high impedance monitoring for intermittent conditions at low voltage during temperature cycling, ESR inspection at 100 KHz, dielectric absorption effects with rapid switching rates and varying temperature, and many other sensitive measurement phenomena.

*MANUFACTURING AND INSPECTION FLOW PLAN

100% PROCESSED AND SCREENED

Steps 1-6 show the 100% processing (up to and including hermetic sealing), of MIL-C-39022/9 and MIL-C-83421/1 qualified polycarbonate and CRC standard capacitors — Polycarbonate, Teflon, Polystyrene and Polysulfone. The quality level selected will be determined by the individual capacitor specification.

*SPECIAL MIL-C-83421/1 SCREENING IS SHOWN ON PAGE 3

PROCESSING STEPS

1. CAPACITOR MATERIAL INSPECTION
2. IDENTIFY PROCESSING PAPERWORK WITH MATERIAL LOT NUMBERS
3. CAPACITOR SUB-ASSEMBLY INSPECTION
4. SPECIAL VACUUM PROCESSING
5. HERMETIC SEAL AFTER NITROGEN BACK-FILL
6. INITIAL INSPECTION OF COMPLETED CAPACITOR (7X POWER)

QUALITY LEVEL ①

7. BURN-IN
8. TEMPERATURE CYCLING
9. HELIUM LEAK TEST AND GROSS LEAK TEST
10. AC-DIELECTRIC STRENGTH
11. DC-DIELECTRIC STRENGTH
12. INSULATION RESISTANCE
13. % CAPACITANCE TOLERANCE
14. % DISSIPATION FACTOR
15. SELECTION FOR PERFORMANCE GRADES
16. SERIALIZATION OF LEVEL 1 CAPACITORS
17. REPEAT ELECTRICAL MEASUREMENTS AND RECORD DATA AS REQUIRED
18. CONDUCT SPECIAL MEASUREMENTS WHEN REQUIRED BY CUSTOMER
19. FINAL VISUAL INSPECTION OF WORKMANSHIP, MARKING, PAPERWORK AND PACKAGING
20. SHIP DATA AND CERTIFICATE OF COMPLIANCE WITH PARTS

Highest reliability capacitors with standard or special screening for Apollo, Viking, and other space programs. Also used in military and ultra high quality industrial applications.

Qualified for space, critical applications, F15 aircraft, and other programs.

QUALITY LEVEL ②

7. BURN-IN
8. TEMPERATURE CYCLING
9. HELIUM LEAK TEST AND GROSS LEAK TEST
10. AC-DIELECTRIC STRENGTH
11. DC-DIELECTRIC STRENGTH
12. INSULATION RESISTANCE
13. % CAPACITANCE TOLERANCE
14. % DISSIPATION FACTOR
15. FINAL VISUAL INSPECTION OF WORKMANSHIP, MARKING, PAPERWORK, AND PACKAGING
16. SHIP C OF C WITH PARTS

High reliability capacitors screened for space, missile and industrial applications. Qualified for many programs such as The Tow Missile, The Lance Missile and F15 aircraft.

QUALITY LEVEL ③

7. TEMPERATURE CYCLING
8. HELIUM LEAK TEST AND GROSS LEAK TEST
9. AC-DIELECTRIC STRENGTH
10. DC-DIELECTRIC STRENGTH
11. INSULATION RESISTANCE
12. % CAPACITANCE TOLERANCE
13. % DISSIPATION FACTOR
14. FINAL VISUAL INSPECTION OF WORKMANSHIP, MARKING, PAPERWORK AND PACKAGING
15. SHIP C OF C WITH PARTS

High reliability capacitors with reduced screening and performance levels for lower cost high volume programs, such as missiles, aircraft and telephone equipment applications.

Random samples from completed production lots of all quality levels are periodically tested.

These tests may consist of Insulation Resistance at high temperature, Dielectric Absorption, Temperature Coefficient and AC stress analysis tests.

In addition, samples are life tested for retention of qualification.

CRC HIGH RELIABILITY CAPACITORS

GENERAL PRODUCT INFORMATION

ORDERING INFORMATION — **Prices:** See pages 40 to 49 for net prices covering quantities from 1 to 10 pieces. Discount schedules for quantities up to 250 pieces are also listed. Please contact our sales office for larger quantities. **Terms:** Our terms are net 30 days to customers approved by our credit department. All shipments are F.O.B., Santa Monica, Calif. **Delivery:** Most items listed are available from stock or within 10 weeks for quantities up to 1000 pieces. **Minimum Order:** Minimum billing per order is $20.00. **Complete Part Number:** Please make certain that you have complete part number to avoid any errors or delays. Please check part number instructions in individual specification pages and part number information shown on page 18.

PATENT INFORMATION — CRC capacitors are exclusively manufactured under one or more of the following patents and additional patents pending: 3,238,428; 3,260,906; 3,292,063; 3,506,895; 3,539,886; 3,603,849; 3,626,362.

CONSTRUCTION INFORMATION — All standard capacitors listed are hermetically sealed after vacuum process and both gross leak and helium leak tested for true hermeticity. Unless otherwise specified all parts listed are metal cased, tubular, with both wire terminals isolated from the metal case.

PART NUMBER OBSOLESCENCE — Due to changes in military specifications for which we are qualified, upgrading of our catalog specifications, or size reduction, part numbers formerly used may now be obsolete. We urge our customers to change their existing drawings to indicate the new part numbers for old and new design, wherever possible. If you are unable to make this change, CRC will continue to supply and mark parts indefinitely to the old specifications. See page 19.

INSTALLATION INSTRUCTIONS — To prevent damage to the hermetic seal joint, use a tweezer type heat sink between the soldering iron and solder beads when soldering within ¼″ of beads. Prior to lead bending or twisting, protect glass seals and solder joints by gripping with a small pliers, area of leads near solder beads.

Contaminating films on the glass seal surfaces may occur during customer handling and installation of capacitors. To preserve the high insulation resistance inherent in CRC capacitors, clean the glass seal surfaces thoroughly with acetone or chlorinated hydrocarbon fluid.

CAPACITOR MEASUREMENT INFORMATION — The high quality of CRC capacitors may be difficult to evaluate unless sufficiently sensitive and accurate equipment is utilized in conjunction with proper measurement techniques.

Capacitance bridges equal to the General Radio 1620A are recommended for best accuracy of capacitance. This bridge is satisfactory for dissipation factor measurement of capacitors up to 1 uF. CRC has developed a special bridge capable of accurately measuring dissipation factor of capacitors up to 100 uF or more at frequencies up to 1KHz. For inspection of DF of larger than 1 uF capacitors it is suggested that you use samples correlated by our measurement laboratory.

Insulation resistance measurement is performed by Component Research Co. using leakage current methods which are repeatable to 1 picoamp for capacitors less than 0.1 uF. Larger values require adequate charge time to minimize dielectric absorption effects. Guard boxes are used to perform leakage current and dielectric absorption measurements.

SPECIAL MATCHING — We can assort capacitors into sets of two or more capacitors matched for capacitance value within ±0.1% of each other at nominal cost. Where capacitors must track with temperature, they can be supplied in matched sets as closely at ±0.1% over their temperature range. Capacitors of opposing temperature coefficient slopes can be supplied to obtain lower temperature coefficients than for standard types.

SPECIAL CAPACITOR VALUES — If your application requires odd values such as 0.10015 uF ±0.1% or 0.9999 uF ±0.25%, such requirements are readily met from our large stock of standard and non-standard values. Individual capacitors can be permanently marked or tagged with discrete values accurate to six places if required.

SPECIAL VOLTAGE RATINGS — Problems of size may occur when replacement of a poor quality capacitor is required. Under certain conditions such as restricting the operating temperature, or limiting DC hipot to 150% of rated volts, a substantial size reduction is possible. Check with our applications engineering department for our recommendations in such cases.

SPECIAL PART NUMBER IDENTIFICATION — CRC believes that there is a sufficient choice of capacitors in this catalog to satisfy virtually all applications. In the event you have any requirement involving a modification of our specifications, the following special identification will be used.

Example: X11B154BW588 (typical special part number). "X" preceding the part number indicates a special customer requirement. The number group at the end of the part number is assigned as a unique identification of the special manufacturing and inspection instructions. In example shown, "588" is a typical unique identification number.

*The typical weights shown above apply to all capacitor types listed in our catalog. The ±20% weight tolerance covers variations in density for a given case size part made from teflon or any other listed dielectric. The weight tolerance also makes allowance for foil or metallized construction.

Please contact us if more accurate weight information is required for any given series of capacitors.

COMPONENT RESEARCH CO., INC. • 1717 19TH STREET • SANTA MONICA, CALIF. 90404 • (213) 829-3615 TWX. (910) 343-6864

CRC HIGH RELIABILITY CAPACITORS	KEY CAPACITOR FEATURES
UNIQUE CONSTRUCTION	CRC capacitor windings are firmly supported within their hermetic enclosures to withstand high frequency shock and vibration levels per MIL-C-39022/9, and MIL-C-83421. The capacitors are uniquely constructed to provide winding support for the thinnest dielectric films, and have as well, stress free lead terminations that can withstand extended temperature cycling. CRC capacitors are exclusively manufactured under one or more of the following patents and additional patents pending: 3,238,428; 3,260,906; 3,292,063; 3,506,895; 3,539,886; 3,603,849; 3,626,362.
HIGH INSULATION RESISTANCE	Standard stock capacitors, 0.1 uF and less are rated up to 10,000,000 megohms for teflon, 5,000,000 megohms for polystyrene, and 3,000,000 megohms for polycarbonate and polysulfone types. If required, capacitors can be supplied with higher ratings for extremely critical applications. Thousands of such special teflon capacitors are in use in the attitude controls for the Boeing 747. Tests by the user during which the capacitors were left on charge for several years, indicate a capacitor self-time constant that exceeds 100 years.
LOW DIELECTRIC ABSORPTION	Special CRC equipment can perform this sensitive test at fast switching rates to determine how CRC capacitors will operate in critical sample and hold circuits. Recent tests on 1 uF capacitors using 10 milliseconds charge time, 1 millisecond discharge, and 100 milliseconds recovery time, indicate readings as low as 0.0035% for teflon and 0.007% for polystyrene capacitors.
LOW DISSIPATION FACTOR	A measure of the reliability and quality of the electrode terminations is determined by capacitor heat rise during 4 KHz to 40 KHz power measurements performed by CRC. Tests prove that the superior terminations of the CRC capacitors can be verified by their low 1 KHz and 10 KHz dissipation factor readings. The permanence of this quality has been further demonstrated by maintenance of low dissipation factor after temperature cycling, DC Life, AC Life, and all other environmental conditions. SEE PAGE 5, 7, 37
HIGH STABILITY LOW TEMPERATURE COEFFICIENT	The combined effects of CRC unique winding construction, temperature cycling and burn-in result in maximum stability, uniform TC linearity, and reproduceability. Capacitors can be supplied with virtually zero TC over limited temperature spans. SEE SPECIAL MATCHING PAGE 21.
HIGH RELIABILITY SCREENING	In addition to DC burn-in and 400 Hz RMS AC burn-in, CRC performs special burn-in at frequencies up to 40 KHz. 100% temperature cycling follows each burn-in sequence. In special AC applications, we provide 100% corona inception inspection at 150% to 200% of rated RMS AC volts. SEE PAGES 7, 18, 37.

B11 SPECIFICATIONS

OPERATING TEMPERATURE: −65°C to 125°C at full rated voltage.

TEMPERATURE COEFFICIENT OF CAPACITANCE: (25°C Reference).

+0.4%	Max. at −55°C	−0.15%	Max. at 55°C
+0.25%	Max. at −25°C	−0.25%	Max. at 85°C
+0.2%	Max. at −10°C	−0.4%	Max. at 125°C
+0.1%	Max. at 0°C		

STABILITY: Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

RANGE	RETRACE
−25°C to 85°C	0.01% Max.
−65°C to 125°C	0.05% Max.

INSULATION RESISTANCE: Measured from terminal to terminal at rated voltage, and 5 minutes maximum charge time. For values greater than 1 uF, allow an additional minute/uF charge time.

MINIMUM IR					
Range	25°C	55°C	85°C	100°C	125°C
.001 to 0.1 uF (in Megohms)	5,000,000	5,000,000	2,000,000	1,000,000	250,000
Greater than 0.1 uF (in Megohms—uF)	500,000	500,000	200,000	100,000	25,000

Readings shown are for 1 uF or less. For values over 1 uF, divide readings by uF to obtain min IR.

Example: A 2 uF capacitor is 250,000 megohms at 25°C.

DIELECTRIC ABSORPTION: 0.01% Max. at 25°C.

DISSIPATION FACTOR: 0.03% Max. at 1KHz and 25°C. Values greater than 1 uF measure at 0.1KHz.

DIELECTRIC STRENGTH: 200% of rated voltage.

CONSTRUCTION: Teflon dielectric, hermetically sealed, extended metal film electrodes, leads isolated from case.

LEAD WIRE SIZE AND TYPE		
Case Diameter	Lead Wire Size #AWG	Lead Wire Material
0.312″ and smaller	22	Tinned Copper Clad Steel (Tinned Copperweld) CRC type "W"
0.400″ and larger	20	

SEAL TEST: 1 x 10-6 atm/cm³/sec. max. leak rate.

ENVIRONMENTAL: Capacitors shall meet all applicable requirements of MIL-C-83421.

B11 QUALITY ASSURANCE

All capacitors are 100% screened and tested as follows:

1. 48 hours Burn-In at 125°C and 140% of the rated DC voltage.
2. 20 Temperature Cycles from −65°C to 125°C.
3. Helium Leak Test. 1 x 10-6 atm/cm³/sec. max. leak rate.
4. DC dielectric strength apply 200% of rated DC voltage from lead to lead and from leads to case for one minute.
5. Insulation Resistance at the rated voltage and 25°C, 500,000 megs — uF minimum, but need not exceed 5,000,000 Megohms.
6. Capacitance % Tolerance at 1KHz and 25°C.
7. Dissipation Factor at 1KHz and 25°C, 0.03% maximum.
8. Temperature Coefficient measured from −55°C to 125°C at a minimum of 5 temperature points.
9. Visual Inspection for dimensions, marking and packaging.
10. Traceability to production and test records by permanent marking of parts with lot control number.
11. Process and inspection data is maintained on file per NPC-200-3, MIL-Q-9858 quality control standards and MIL-STD-790 Reliability Assurance Program.
12. Capacitors are serialized and packaged with certified test data to accompany each shipment.

C11 SPECIFICATIONS

OPERATING TEMPERATURE: −65°C to 125°C at full rated voltage.

TEMPERATURE COEFFICIENT OF CAPACITANCE: (25°C Reference).

+0.7% Max. at −55°C	−0.25% Max. at 55°C
+0.5% Max. at −25°C	−0.50% Max. at 85°C
+0.3% Max. at −10°C	−0.60% Max. at 125°C
+0.25% Max. at 0°C	

STABILITY: Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

RANGE	RETRACE
−25°C to 85°C	0.02% Max.
−65°C to 125°C	0.1% Max.

INSULATION RESISTANCE: Measured from terminal to terminal at rated voltage, and 5 minutes maximum charge time. For values greater than 1 uF, allow an additional minute/uF charge time.

MINIMUM IR					
Range	25°C	55°C	85°C	100°C	125°C
.001 to 0.1 uF (in Megohms)	5,000,000	5,000,000	2,000,000	1,000,000	250,000
Greater than 0.1 uF (in Megohms—uF)	500,000	500,000	200,000	100,000	25,000

Readings shown are for 1 uF or less. For values over 1 uF, divide readings by uF to obtain min IR.
Example: A 2 uF capacitor is 250,000 megohms at 25°C.

DIELECTRIC ABSORPTION: 0.01% Max. at 25°C.

DISSIPATION FACTOR: 0.03% Max. at 1KHz and 25°C. Values greater than 1 uF measure at 0.1KHz.

DIELECTRIC STRENGTH: 200% of rated voltage.

CONSTRUCTION: Teflon dielectric, hermetically sealed, extended metal film electrodes, leads isolated from case.

LEAD WIRE SIZE AND TYPE		
Case Diameter	Lead Wire Size #AWG	Lead Wire Material
0.312" and smaller	22	Tinned Copper Clad Steel (Tinned Copperweld) CRC type "W"
0.400" and larger	20	

SEAL TEST: 1 x 10-⁶ atm/cm³/sec. Max. leak rate.

ENVIRONMENTAL: Capacitors shall meet all applicable requirements of MIL-C-83421.

C11 QUALITY ASSURANCE

All capacitors are 100% screened and tested as follows:

1. 48 hours Burn-In at 125°C and 140% of the rated DC voltage.
2. 10 Temperature Cycles from −65°C to 125°C.
3. Helium Leak Test. 1 x 10^{-6} atm/cm³/sec. max. leak rate.
4. DC dielectric strength apply 200% of rated DC voltage from lead to lead and from leads to case for one minute.
5. Insulation Resistance at the rated voltage and 25°C, 500,000 megs — uF minimum, but need not exceed 5,000,000 Megohms.
6. Capacitance % Tolerance at 1KHz and 25°C.
7. Dissipation Factor at 1KHz and 25°C, 0.03% maximum.
8. Capacitors are 100% tested for 0.1% maximum drift with five cycles from −65°C to 125°C.
9. Visual Inspection for dimensions, marking and packaging.
10. Traceability to production and test records by permanent marking of parts with lot control number.
11. Process and inspection data is maintained on file per NPC-200-3, MIL-Q-9858 quality control standards and MIL-STD-790 Reliability Assurance Program.
12 Capacitors are serialized and packaged with certified test data to accompany each shipment.

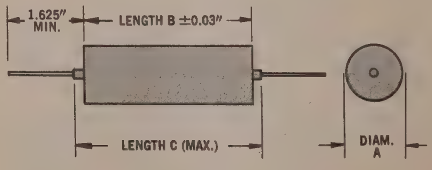
CONSTRUCTION INFORMATION



LEAD WIRE SIZE AND TYPE

Case Diameter	Lead Wire Size #AWG	Lead Wire Material
0.312″ and smaller	22	Tinned Copper Clad Steel (Tinned Copperweld) CRC type "W"
0.400″ and larger	20	

CASE DIMENSIONS	TOLERANCE LIMITS
"A" Diameter	±0.010″ Without Sleeving
	−0.00″ +0.02″ With Mylar Sleeving
"B" Case Length	±0.03″ With or Without Sleeving
"C" Bead to Bead Length	The lengths shown in tables are maximum and include the distance between solder beads.

CRC HIGH RELIABILITY CAPACITORS

TEFLON SPECIFICATIONS AND CASE SIZES

TYPE D51

D51 SPECIFICATIONS

OPERATING TEMPERATURE: −65°C to 125°C at full rated voltage.

TEMPERATURE COEFFICIENT OF CAPACITANCE (25°C Reference).

+0.8% Max. at −50°C	−0.3% Max. at + 50°C
+0.6% Max. at −25°C	−0.5% Max. at + 75°C
+0.3% Max. at 0°C	−0.6% Max. at +100°C
	−0.8% Max. at +125°C

STABILITY WITH 5 TEMPERATURE CYCLES:

0.05% Max. Drift	−25°C to + 85°C
0.25% Max. Drift	−65°C to +125°C

INSULATION RESISTANCE measured from terminal to terminal at rated voltage, and 5 minutes maximum charge time. For values greater than 1 mfd, allow an additional minute/mfd charge time.

MINIMUM IR					
Range	25°C	55°C	85°C	100°C	125°C
.001 to 0.1 uF (in Megohms)	10,000,000	5,000,000	3,000,000	1,500,000	300,000
Greater than 0.1 uF (in Megohms — uF)	1,000,000	500,000	300,000	150,000	30,000

DIELECTRIC ABSORPTION: 0.01% Max. at 25°C.

DISSIPATION FACTOR: 0.01% Max. at 1 KHz and 25°C.

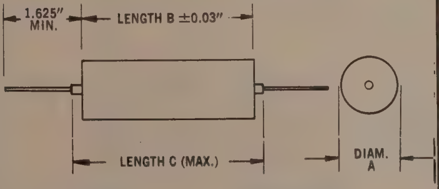
DIELECTRIC STRENGTH: 200% of rated voltage.

CONSTRUCTION: Teflon dielectric, hermetically sealed, extended metal foil or special metal film electrodes, leads isolated from case.

LEAD WIRE SIZE AND TYPE		
Case Diameter	Lead Wire Size #AWG	Lead Wire Material
0.312″ and smaller	22	Tinned Copper Clad Steel (Tinned Copperweld) CRC type "W"
0.400″ and larger	20	

SEAL TEST: 1 x 10^{-6} atm/cm³/sec. max. leak rate.

ENVIRONMENTAL: Capacitors shall meet all applicable requirements of MIL-C-83421.



CASE DIMENSION	TOLERANCE LIMITS
"A" Diameter	±0.010″ Without Sleeving
	−0.00″ +0.02″ With Mylar Sleeving
"B" Case Length	±0.03″ With or Without Sleeving
"C" Bead to Bead Length	The lengths shown in tables are maximum and include the distance between solder beads.

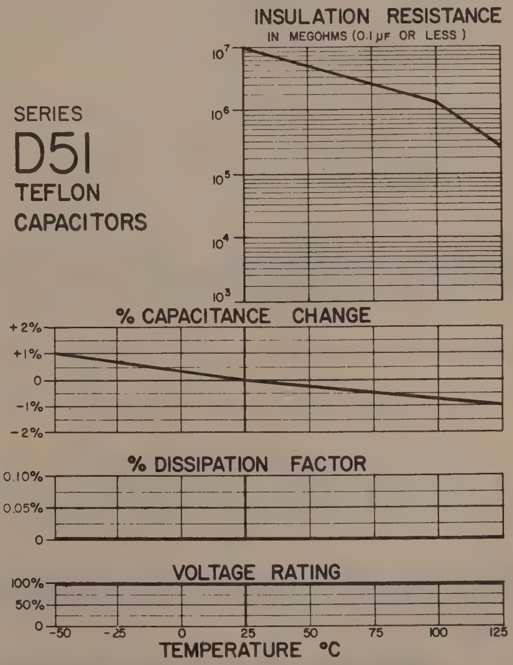
D51 QUALITY ASSURANCE

All capacitors are 100% screened and tested as follows:

1. 16 hours Burn-In at 125°C and 140% of the rated DC voltage.
2. 10 Temperature Cycles from −65°C to 125°C.
3. Helium Leak Test. 1 x 10^{-6} atm/cm³/sec. max. leak rate.
4. DC dielectric strength apply 200% of rated DC voltage from lead to lead and from leads to case for one minute.
5. Insulation Resistance at the rated voltage and 25°C, 1,000,000 megs — uF minimum, but need not exceed 10,000,000 Megohms.
6. Capacitance % Tolerance at 1KHz and 25°C.
7. Dissipation Factor at 1KHz and 25°C, 0.005% maximum.
8. Visual inspection for dimensions, marking and packaging.
9. Traceability to production and test records by permanent marking of of parts with lot control number.
10. Process and inspection data is maintained on file per NPC-200-3, MIL-Q-9858 quality control standards and MIL-STD-790 Reliability Assurance Program.



CRC HIGH RELIABILITY CAPACITORS

LIFE TEST DATA

TYPE B11B TEFLON • TYPE X51 TEFLON • TYPE "JW" TEFLON

TYPE B11B TEFLON CAPACITORS (Formerly 05TJ)

Test reports covering high reliability metallized teflon capacitors manufactured by Component Research Co. since 1962 show that these capacitors are still unequalled for low loss, stability and reliability.

The test data listed below is typical of the performance characteristics of CRC type B11B or C11B teflon capacitors, shown on pages 24 and 25 of this catalog.

Additional test data is on file which has been accumulated from qualification testing since 1963 for critical programs such as Apollo, Lunar Orbitor, Discoverer, etc.

If your application demands highest possible insulation resistance up to 125°C, and extreme low loss characteristics, we suggest series 11 teflon capacitors. For high RMS AC current applications see series 51 teflon or contact a CRC applications engineer at the address shown at bottom of page for further details.

TYPE B11B LIFE TEST SUMMARY

Summary data shown below covers 85 precision teflon 50VDC capacitors, life tested for 1000 hours at 125°C, with 70VDC applied. There were no failures for all capacitors tested. Data has been extracted from CRC test reports 70TR12, 71TR18, 71TR19, 71TR20 and 71TR21.

TYPE X51 SPECIAL TEFLON CAPACITORS (Similar to New D51 Series)

Test Item No.	Examination or Test	Conditions	Limits
1	Burn-In	@ 85°C, 96 hrs. @ 750VDC	
2	Temperature Cycling	−62°C/125°C	5 cycles
3	Seal Test	Helium Leak Test	1×10^{-6} max. leak rate
4	AC-Dielectric Strength	@25°C, 30 min. 400 volts peak square wave @ 500 Hz	
5	DC-Dielectric Strength	Lead to lead and leads to case	@ 1000VDC
6	Insulation Resistance	@ 500V, 25°C	5000 picoamps max.
7	Capacitance % Tolerance	@ 1 KHz, 25°C	±0.5% max.
8	Dissipation Factor	@ 1 KHz, 25°C	0.01% max.
9	Temperature Coefficient	0°C to 25°C 25°C to 85°C	±.35% max. ±.65% max.

In applications involving abnormal AC current or voltage conditions it is recommended that you contact CRC applications engineers or consult AC data pages in this catalog.

The X51 500 volt teflon capacitors were specially designed to provide low loss high frequency AC characteristics in small package size. Our customer was having difficulty with catastrophic failure, drift and overheating using ordinary capacitors but the CRC X51 capacitors solved these problems and improved circuit performance considerably.

Table at left is part of X51 screening and processing performed on a 100% basis.

TYPE X51 LIFE TEST SUMMARY

Data shown below covers 48 teflon-foil capacitors life tested at 750VDC at 85°C for 1000 hours. There were no failures in this test. This data has been extracted from CRC test reports 70TR09, 70TR15, 71TR22 and 71TR23.

CRC Type	Capacitance µF Value	No. Tested	Post Test Limits	Test Results Low	Test Results High	Post Test Limits	Test Results Low	Test Results High	Post Test Limits	Test Results Low	Test Results High
X51	0.1	24	1×10^5	5×10^6	1.6×10^8	±1%	0.00%	+.16%	0.01%	.01%	.01%
X51	0.2	24	1×10^5	6×10^6	2×10^7	±1%	0.00%	−.16%	0.01%	.01%	.01%

SPECIAL TYPE "JW" TEFLON CAPACITORS (For Apollo)

The series 11 teflon capacitors listed in this catalog are of the same construction and are similar in performance to the "JW" teflon capacitors.

The "JW" capacitors were specially screened to meet critical Apollo requirements and were an important factor in maintenance of precise guidance and control for Apollo flights.

Life test data is shown as a demonstration of the excellent performance of our earlier teflon high reliability capacitors.

The newer series 11 teflon capacitors are now available at much lower cost than the "JW" capacitors and have even greater reliability as a result of added years of manufacturing experience.

TYPE "JW" LIFE TEST SUMMARY

The summary data shown below covers 100 precision teflon capacitors consisting of 50 05JW2233G (0.22 uF 50VDC 2%) and 50 05JW224G (.22 uF 50VDC 2%) capacitors that were life tested for 2,000 hours at 125°C and at 75VDC. There were no failures for all the capacitors tested. Data has been extracted from CRC Test Report No. 5-534.

CRC Type	Capacitance µF Value	No. Tested	Post Test Limits	Test Results Low	Test Results High	Post Test Limits	Test Results Low	Test Results High	Post Test Limits	Test Results Low	Test Results High

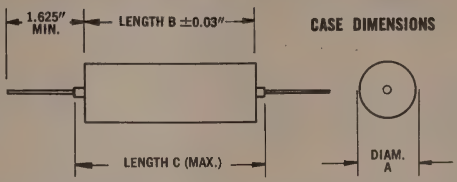
CRC HIGH RELIABILITY CAPACITORS

CORDWOOD (Reduced Length) CASE SIZES

SERIES E32 CORDWOOD POLYCARBONATE

- Specifications same as series E12 except for dimensions and AC ratings. See page 16.
- Price and ordering information appears on page 45.
- See page 18 for part number system.

SERIES E32 & D31



CASE DIMENSION	TOLERANCE LIMITS
"A" Diameter	±0.010″ Without Sleeving
	−0.00″ +0.02″ With Mylar Sleeving
"B" Case Length	±0.03″ With or Without Sleeving
"C" Bead to Bead Length	The lengths shown in tables are maximum and include the solder beads.

SERIES D31 CORDWOOD TEFLON

- See page 26 for D11 Teflon specifications which apply to D31B cordwood capacitors (except for temperature coefficient which is approximately 25% greater than D11 capacitors).
- See page 45 for prices and lead wire requirements, and ordering information.
- See page 18 for complete details concerning the part number system.

N53 SPECIFICATIONS

OPERATING TEMPERATURE: −65°C to 85°C at full rated volts.

TEMPERATURE COEFFICIENT: (See special notes below*)

Values 0.001 MFD to 0.0082 MFD	−80 ±50PPM/°C
0.01 MFD to 2.0 MFD	−60 ±50PPM/°C

*NOTES: Special Polystyrene Capacitors can be supplied with a negative coefficient of −20 to −100 PPM/°C that is linear to ±30 PPM/°C, ±20 PPM/°C and ±10 PPM/°C. A WIDE SELECTION is available of larger MFD values in bathtub and custom cases.

STABILITY: .03% maximum drift with 5 cycles from −25°C to 85°C.

INSULATION RESISTANCE: Measured from terminal to terminal at rated voltage, and 5 minutes maximum charge time. For values greater than 1 uF, allow an additional minute/uF charge time.

MINIMUM IR

Range	25°C	55°C	85°C
0.001 to 0.2 uF (in Megohms)	5,000,000 Megohms	2,500,000 Megohms	500,000 Megohms
0.22 to 1.0 uF (in Megohms)	1,000,000 Megohms	500,000 Megohms	100,000 Megohms
Above 1.0 uF (in Megohms - uF)	†1,000,000 Megohms-uF	† 500,000 Megohms-uF	†100,000 Megohms-uF

† For capacitor values over 1 uF, divide by uF value to obtain minimum IR limits.

EXAMPLE: A 2 uF capacitor at 25°C is 500,000 megohms

DIELECTRIC ABSORPTION: 0.02% Max. at 25°C.

DISSIPATION FACTOR: 0.02% Max. at 1 KHz and 25°C. Values above 1 uF measured at 0.1 KHz.

DIELECTRIC STRENGTH: 200% of rated volts.

CONSTRUCTION: Polystyrene dielectric, hermetically sealed, extended metal foil or special metal film electrodes, leads isolated from case.

LEAD WIRE SIZE AND TYPE

Case Diameter	Lead Wire Size #AWG	Lead Wire Material
0.312″ and smaller	22	Tinned Copper Clad Steel (Tinned Copperweld) CRC type "W"
0.400″ and 0.500″	20	
0.562″ and larger	18	Oxygen free tinned copper wire CRC type "C"

SEAL TEST: 1 x 10-6 atm/cm³/sec max. leak rate.

ENVIRONMENTAL: Capacitors shall be capable of meeting all applicable requirements of MIL-C-83421 including high frequency vibration.

N53 QUALITY ASSURANCE

All capacitors are 100% screened and tested as follows:

1. 5 Temperature Cycles from −65°C to 85°C.
2. Helium Leak Test. 1 x 10-6 atm/cm³/sec. max. leak rate.
3. DC dielectric strength at 200% of the rated DC voltage.
4. Insulation Resistance at the rated voltage and 25°C, 1,000,000 megs — uF minimum. See minimum IR table in specifications.
5. Capacitance % Tolerance at 1 KHz and 25°C.
6. Dissipation Factor at 1 KHz and 25°C, 0.02% maximum.
7. Visual inspection (External) for dimensions, marking and packaging.
8. Traceability to production and test records by permanent marking of parts with lot control number.
9. Process and inspection data is maintained on file per NPC-200-3, Mil-Q-9858 quality control standards and MIL-STD-790 Reliability Assurance Program.

SPECIAL MINIATURE SERIES N13 POLYSTYRENE CAPACITORS

Component Research Co. has developed a new product line of special Metallized Polystyrene Capacitors, Type N13, which are approximately 50% smaller in size than the N53 Series. The N13 capacitors have the same high quality, high performance features as Series 53 and will ultimately be qualified to established reliability specification MIL-C-83421. The unique patented construction and process features of CRC capacitors have been incorporated into the N13 Series which makes them the most reliable and miniature Polystyrene capacitors available for aerospace or industrial applications. The N13 Series has a low dissipation factor of 0.02% maximum and can be fully operated to 85°C reliably without voltage derating.

We believe the N13 Series will be useful in airborne applications where the N53 Series are too large in size and weight or where the Series 12 Polycarbonate have too high a dielectric absorption or too low an insulation resistance. Please contact our sales office for further information.

CRC HIGH RELIABILITY CAPACITORS

N53 POLYSTYRENE CAPACITORS
SPECIAL TYPE L53 POLYSTYRENE CAPACITORS

N53 POLYSTYRENE APPLICATION NOTES

Medical Research Laboratories, Industrial Research Institutes and Instrumentation Manufacturers find our N53 polystyrene capacitors are their favorite choice for integrating and other memory applications.

The N53B105KXC 1 uF, 50VDC capacitor shown below is, 0.750″ x 1.875″ hermetically sealed, and helium leak tested to maintain its low loss characteristics for long term use.

Typically, this capacitor exhibits less than 0.01 nanoamps leakage current at 25°C ±20°C with 10VDC applied. The low dielectric absorption, low dissipation factor and excellent capacitance stability with time, makes this capacitor ideal for laboratory and critical industrial applications.

N53 polystyrene capacitors are available in bathtub cases and custom designed metal cases where capacitance values above the standard values listed on catalog page 33 are needed.

STANDARD TUBULAR P/N N53B105KXC

Capacitors up to 100 uF of extremely high quality can be supplied to meet individual customer requirements.

The N53B106B 10 uF, 50VDC polystyrene capacitor shown below is approximately 2.25″ x 2.88″ x 2″ high, plus the ⅜″ wide mounting flanges. Leakage current at 10VDC and at 25°C is less than 0.1 nanoamps.

A 10 uF 10% 50VDC, N53B106K capacitor domestic price is approximately $40.00 in quantities from 1-10 pieces.

Special polystyrene capacitors for high AC power resonating use, are also available with very low loss frequency characteristics and heavy duty terminations.

SPECIAL BATHTUB P/N N53B106B

SPECIAL "L53" TYPE HIGH TEMPERATURE POLYSTYRENE CAPACITORS

CRC has developed miniature polystyrene capacitors that can safely be stored above 85°C. This has been made possible by the use of a combination of the CRC patented winding and termination construction, and special metal film electrodes which support the polystyrene dielectric in a stress-free manner at temperatures above 85°C (CRC patent pending.)

Although CRC is confident that operation is possible at temperatures up to 105°C, (some lots have been operated at 125°C) we recommend that the normal operating temperature range be limited from −65°C to 85°C. This recommendation is not based upon any reliability problems at 105°C, but is rather due to a slight capacitance offset (called TC Hysteresis) that occurs when operated or stored above 85°C. The L53 polystyrene capacitors have an unusually linear temperature coefficient slope from −55°C to 85°C. Their retrace is superb and we believe this type will be excellent for low cost standards which we now supply for laboratory use.

As of February 1971 a total of 40 capacitors ranging from 0.0022 MFD to 0.01 MFD consisting of 50 and 100 volts DC rated units were subjected to a Reliability Demonstration test for a total of 2,000 hours at 105°C and at 100% of the rated DC voltage. All the capacitors also received a total of 75 temperature cycles from −62°C to +85°C in order to further stress the terminations of these capacitors. The capacitors were then visually inspected, seal tested and electrically inspected.

The capacitors indicated no significant △% capacitance, % DF and IR changes and there were no opens or shorts as indicated by the measurements shown in the table below. CRC will be conducting further testing on larger quantities of capacitors covering wider microfarad and voltage ranges in order to determine the proper ratings for these unusually reliable high temperature polystyrene capacitors. See page 37.

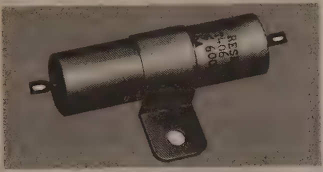
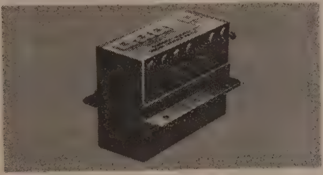
SPECIAL CAPACITOR APPLICATION SECTION

POWER RESONATING • SCR COMMUTATING • PULSE FORMING • AC ORDERING INFORMATION



The 0.033 uF, 2%, 600VDC, polystyrene capacitor shown is .562″ x 1.875″ size and is rated at 1.5 AMPS RMS AC. The capacitor is designed to handle 300V RMS AC at frequencies up to 25,000 Hz and to simultaneously withstand rugged environmental testing for a high reliability underseas application.

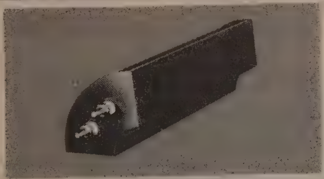
During operation and extreme environmental conditions the capacitor must not exhibit microphonics, noise, or corona and the short or long term capacitance drift must be maintained to very close limits. In many applications, burn-in under AC conditions similar to customer use can be performed as a 100% screening procedure,



In this application, high quality foil polypropylene and polystyrene capacitors were used to provide precise three phase motor control of a critical underwater guidance system. The capacitors must withstand transient voltage and current spikes during severe environmental stress without affecting reliability.

The highest quality materials are used including RTV silicone rubber potting compounds which are carefully lot controlled and processed to provide excellent electrical properties and extended life.

Typically the capacitors operate at 180V RMS from 400 Hz to 1200 Hz and must also withstand transients of 500 volts per millisecond under pulse peak to peak conditions of 800 volts.



As an example of CRC design of special purpose capacitors, four, quarter round capacitors were assembled to form a coaxial capacitor with a 2″ I.D. hole. Through this hole a copper pipe is passed with a circulating coolant to remove the heat generated due to the watts-loss of the capacitors.

In this application all parts were custom designed to provide low loss including special terminals capable of handling 100 AMPS RMS with minimum heating.

Special capacitors can be supplied to handle peak currents ranging into thousands of amperes for short periods in the microsecond region.

CRC patented capacitor designs provide the lowest possible loss, the highest reliability, consistent with minimum package size and reasonable cost.

CRC has over 150 KVA of AC power generators in constant use for power burn-in and life test of capacitors from 400 Hz to 40 KHz. Our present plans are to double this power generating capability with a view to CRC becoming a world leader in the development and manufacture of finest quality AC capacitors as well as CRC standard precision capacitors.

STUDYING YOUR AC CAPACITOR REQUIREMENTS

It is important to provide detailed information concerning all normal and worst case conditions, space availability, quantity, delivery required, and if possible any problems previously encountered with capacitors used.

In the example below the customer has presented his requirements in detail including the current and voltage waveforms.

Please provide us with similar information when making inquiries for special AC capacitors so that we can make recommendations or quotations with minimum delay.

Following is a typical example of how your AC capacitor inquiry should be formulated. (Excerpt from a customer RFQ).

	REQUIREMENTS

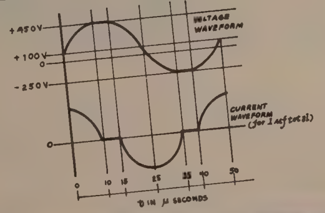
NOTES

1. Refer to voltage waveform.
2. Frame Temp.
3. Goal is < 0.05%.
4. Goal is < 0.5#/uF. Vendor to advise case size.
5. Delivery is required within 4 weeks.
6. Vendor to recommend wire size and material. best suited for current handling. 1.5″ length is satisfactory.
7. Item presently being used is foil mylar and is overheating and has too low a Q. Please recommend capacitor that will have minimum heat rise and will maintain resonance of tank circuit within ±0.3% when operated continuously at 25°C ambient ±5°C.



LIFE TEST DATA Series 14 Polysulfone Capacitors

Polysulfone, one of our newer dielectric materials, has many advantages to offer in terms of extended temperature range, and low temperature coefficient of capacitance.

In accordance with the CRC established policy of introducing new products with conservative ratings, life testing has been conducted at 125°C and at ratings that we believe will provide reliable, high quality polysulfone capacitors. Our new series 14 polysulfone specifications are in line with this policy, and are based upon the manufacture and test of thousands of polysulfone capacitors since 1970.

In addition to AC life tests, DC life at higher temperatures and voltage levels are in process. Future catalog issues will undoubtedly contain additional polysulfone specifications and life test data at extended conditions.

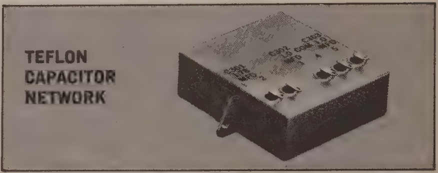
SPECIAL CAPACITOR TYPES High Energy AC Ultra High IR DC



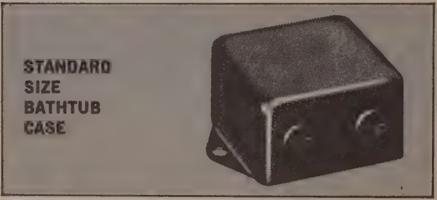
TEFLON CAPACITOR NETWORK: This teflon memory and computing network is one of the most critical components in the Lance Missile System. The capacitors must maintain very high insulation resistance, low dielectric absorption, and low capacitance change with temperature during storage and all through the severe environments of launching.

The capacitors are also specially designed to be free from mechanically induced noise which could affect the highly advanced and sensitive electronics control of the missile guidance. Testimonial letters from our customers are on file attesting to the unusually high quality and performance they have experienced in using our products.

FOR AC
APPLICATIONS

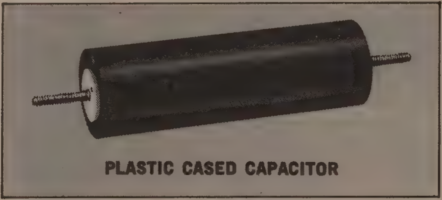
CAPACITORS DESIGNED FOR AC APPLICATIONS by CRC have very low equivalent series resistance and are remarkably cool and efficient for their size. The capacitor shown contains eight 1.2 MFD sections that operate up to 25 KHz at 170 volts AC RMS maximum with 25 amps at 25% duty cycle for each capacitor.

CRC was selected as the manufacturer to produce this special capacitor because of the extreme reliability required for a weapons program.



STANDARD SIZE BATHTUB CASES provide a quicker, convenient, lower cost method of providing special type capacitors for applications not satisfied by our standard metal cased tubular capacitors. Special capacitors of this type can frequently be shipped within three weeks of order, manufactured with a choice of dielectric materials, construction, % tolerance range, voltage ratings, and special performance characteristics that is virtually limitless in scope.

Due to a special matching and trimming technique, extremely accurate capacitors can be provided in bathtub cases at lower cost than an equivalent accuracy in our tubular style capacitors.



CRC IS NOW CUSTOM MANUFACTURING PLASTIC CASED CAPACITORS of extremely low loss and minimum heat rise for very high current, high energy applications.

These capacitors are available in ratings from DC to 50 KHz and voltages of up to 5000 volts RMS AC. The capacitors are available with brass threaded terminals or a variety of high conductivity copper lugs for low inductance and effective heat sinking. All plastic cased capacitors are thoroughly sealed against atmospheric effects by a special vacuum encapsulation process.

A standard product line offering a range of case sizes, voltage ratings, and performance styles will soon be available for prompt delivery.

CRC HIGH RELIABILITY CAPACITORS

SPECIAL SCREENING FOR CRITICAL APPLICATIONS

Component Research capacitors are used in critical applications where their reliability and performance can affect the success of an entire program involving years of preparation and billions of dollars of program cost. For over a decade, aerospace programs from Apollo to Viking have used CRC capacitors for timing circuits and other control circuits, essential for controlling spacecraft millions of miles from earth, after years of space travel.

You can depend upon CRC to provide the most reliable capacitor and screening plan for your critical applications. Following are typical screening plans for standard and special applications.

VIKING QUALIFIED POLYSULFONE

G14 Polysulfone capacitors are the H14 series listed on pages 38 and 39 with 48 hours burn-in at 150°C followed by 10 thermal aging cycles from −65°C to +125°C. A specially screened G14 type has been supplied for the Viking space program which must withstand 135°C sterilization temperatures for 600 hours, very high levels of shock and vibration, and then perform in a very high impedance circuit at low voltage levels without intermittent conditions developing. During such tests some capacitors have been observed to develop problems at low temperature and special screening methods are used in this super-critical application to 100% monitor for breakdowns during temperature cycling.

400 HZ AC BURN-IN

R12 Polycarbonate capacitors are the same as the series 12 capacitors listed in the catalog except for 100% AC burn-in at 140% of rated RMS volts at 400 Hz for 16 hours at 100°C. The 400 Hz AC testing is becoming popular as a means of achieving high reliability in aircraft programs where a faulty capacitor could lead to serious consequences. The R12 type of screening will ultimately become a standard burn-in method of testing AC capacitors for MIL-C-83421. 100% recorded readings of capacitance, dissipation factor, and insulation resistance, can be provided, before and after burn-in.

40 KHZ BURN-IN & CORONA SCREENING

Type BF51 teflon foil capacitors are being used in a high frequency switching application with a rise time of less than 1 microsecond, in a limited space. Typically a 0.025 uF, 400 VDC rated teflon foil, oil impregnated capacitor operates with; 200 volt peak to peak, 10 KHz square wave voltage conditions, a rise and fall time of 100 nanoseconds, in a 0.312 x 1.063 case. Under these conditions this teflon capacitor is relatively cool with peak current of 30 amps developed at a 20 KHz repetition rate.

Following is the 100% screening used for this AC application.

1. **Burn-in** for 48 hours at 125°C. Apply 180 VRMS at 40 KHz ±5%.
2. **Thermal aging** temperature cycle 5 times −65°C to +125°C. Per MIL-C-83421.
3. **Seal Test** Bake for 4 hours at 125°C. Check for oil leakage or visual damage.
4. **Corona Test** Apply 400 VRMS at 60 Hz and check for evidence of corona inception.
5. **AC Stress Test** Apply 100 Hz square wave voltage, terminal to terminal, for 1 minute, per MIL-C-83421/1, at 1000 volts peak to peak.
6. **DC Hipot** Apply 800 VDC terminal to terminal and to case at 25°C for 1 minute, per MIL-C-83421.
7. **Insulation Resistance** when measured wtih 400 VDC at 25°C, 1,000,000 megohms minimum.
8. **% Capacitance** at 1 KHz.
9. **% Dissipation factor** at 10 KHz, 0.01% maximum.
10. **Final visual** and mechanical inspection.

40 KHZ AC BURN-IN

Special 40 KHz burn-in for type 12 polycarbonate capacitors is available at maximum rated conditions of the RMS AC voltage conditions of Table I of MIL-C-83421/1. Typically, a 0.1 uF, 30 VDC rated type C12A104 or A12A104 is receiving 22 volts RMS AC at 40 KHz, at 85°C, for 168 hours, a special screening for the Trident program.

SCREENING FOR SPACE APPLICATIONS

Type J11 teflon and J12 polycarbonate capacitors receive 96 hours burn-in and other screening conditions as required by JPL for their space applications. If you have a JPL or similar space agency subcontract, we will be happy to coordinate capacitor specification preparation to facilitate procurement with minimum delay and effort.

105°C SCREENED POLYSTYRENE CAPACITORS

Series L53 105°C screened polystyrene capacitors are one of the many unique Component Research capacitor products which demonstrate CRC superior performance and outstanding quality. The following screening plan for a space application is typical of the many custom screening procedures we have available for the most critical and sophisticated applications.

L53 SCREENING PER TP619

Test Step	Test	Conditions	Limits	Record Readings
1	Burn-in	At 140% of rated voltage at 105°C for 16 hours.	No opens or shorts	NO
2	Temperature Cycling	5 cycles from −65°C to +85°C.	N/A	NO
3	Gross Leak	Helium bomb for 1 hour at 75 PSI. Place in alcohol and check for bubbles.	No bubbles	NO
4	Fine Leak Test	Place in helium leak detector and evacuate and check for leakage.	1 x 10^{-6} atm/ cm^3/sec. max. leakage rate	NO
5	AC Dielectric Strength	Apply 100 Hz square wave from lead to lead at min. peak voltage of 3X rated DC voltage for 1 min. minimum.	No opens or shorts	NO
6	DC Dielectric Strength	Apply 2X rated DC voltage, lead to lead and lead to case for 1 minute minimum.	No opens or shorts	NO
7	Insulation Resistance	At 25°C at rated voltage. Charge time 1 minute.Allow 1 minute additional charge time/uF for values above 1 uF.	Ref. MIL-C-83421	YES
8	Capacitance % Tolerance	At 1 KHz at 25°C.	Ref. MIL-C-83421	YES
9	Dissipation Factor	At 1 KHz at 25°C. Above 1 uF measure at .1 KHz.	.02%	YES
10	Serialize parts that pass above screening tests.			
11	DC Dielectric Strength	Apply 2X rated DC voltage, lead to lead and lead to case for 1 minute minimum.	No opens or shorts	NO
12	Insulation Resistance	At 25°C at rated voltage. Charge time 1 minute. Allow 1 minute additional charge time/uF for values above 1 uF.	Ref. MIL-C-83421	YES
13	Capacitance % Tolerance	At 1 KHz at 25°C.	Ref. MIL-C-83421	YES
14	Dissipation Factor	At 1 KHz at 25°C. Above 1 uF measure at .1 KHz.	.02%	YES
15	Burn-In	At 140% of rated DC voltage at 85°C for 100 hours.	No opens or shorts	NO
16	Temperature Cycling	5 cycles from −65°C to +85°C.	N/A	NO
17	DC Dielectric Strength	Apply 2X rated DC voltage, lead to lead and lead to case for 1 minute minimum.	No opens or shorts	NO
18	Insulation Resistance	At 25°C at rated voltage. Charge time 1 minute. Allow 1 minute additional charge time/uF for values above 1 uF.	Ref. MIL-C-83421	YES
19	Capacitance % Tolerance	At 1 KHz at 25°C.	Ref. MIL-C-83421	YES
20	Dissipation Factor	At 1 KHz at 25°C. Above 1 uF measure at .1 KHz.	.02%	YES
21	Visual Inspection	Inspect condition of leads, case and marking per CRC Method 875.	N/A	NO

FURTHER L53 POLYSTYRENE INFORMATION APPEARS ON PAGE 34.

RESEARCH
COMPANY, INC.

- **-65°C TO +150°C OPERATING TEMPERATURE**
- **VERY LOW TEMPERATURE COEFFICIENT**
- **100% SCREENED AND TESTED**
- **MEETS APPLICABLE REQUIREMENTS OF MIL-C-83421**

DC VOLTS	CRC TYPE	OLD P/N
50VDC	H14B	05 MP
100VDC	H14C	1 MP
200VDC	H14D	2 MP
400VDC	H14E	4 MP

- PART NUMBER SYSTEM: PAGE 18
- CASE DIMENSIONS: PAGE 39
- LIFE TEST DATA: PAGE 36
- AC RATINGS: PAGE 39
- STANDARD TOLERANCES: ±0.25% to ±10%
- PRICES: Add approximately 30% to polycarbonate D12 prices shown on pages 40 - 44 or contact our sales office for exact price schedule.

H14 SPECIFICATIONS

OPERATING TEMPERATURE: −65°C to 125°C at full rated voltage. Derate linearly from 125°C to 50% of rated voltage at 150°C.

TEMPERATURE COEFFICIENT: 25°C reference

−0.5% ±0.2% at −50°C	0.00% ±0.2% at +75°C
−0.2% ±0.15% at −25°C	+0.10% ±0.3% at +100°C
0.0% ±0.1% at 0°C	+0.30% ±0.5% at +125°C
0.0% ±0.1% at +50°C	+0.50% ±0.7% at +150°C

STABILITY: Capacitance values measured at any two corresponding temperature points taken in five successive temperature cycles shall be as follows:

RANGE	RETRACE
−25°C to +85°C	.05% Max.
−65°C to +150°C	0.2% Max.

INSULATION RESISTANCE: Measured from terminal to terminal at rated voltage, and 5 minutes maximum charge time. For values greater than 1 uF, allow an additional minute/uF charge time.

MINIMUM IR					
Range	**25°C/50°C**	**75°C**	**100°C**	**125°C**	**150°C**
.001 to 0.1 uF (in Megohms)	3,000,000	1,000,000	100,000	20,000	5,000
Greater than 0.1 uF (in Megohms—uF)	300,000	100,000	10,000	2,000	500

Readings shown are for 1 uF or less. For values over 1 uF, divide readings by uF to obtain min IR.

Example: An 8 uF capacitor is 37,500 megohms at 25°C.

DIELECTRIC ABSORPTION: 0.2% Max. at 25°C.

DISSIPATION FACTOR: 0.15% Max. at 1 KHz and 25°C. Values greater than 1 uF measure at 0.1 KHz.

DIELECTRIC STRENGTH: 200% of rated DC volts.

CONSTRUCTION: Polysulfone Dielectric, extended metal film electrodes, hermetically sealed metal tubular case, leads isolated from case.

LEAD WIRE SIZE AND TYPE		
Case Diameter	**Lead Wire Size #AWG**	**Lead Wire Material**
0.312″ and smaller	22	Tinned Copper Clad Steel (Tinned Copperweld) CRC type "W"
0.400″ and 0.500″	20	
0.562″ and larger	18	Oxygen free tinned copper wire CRC type "C"

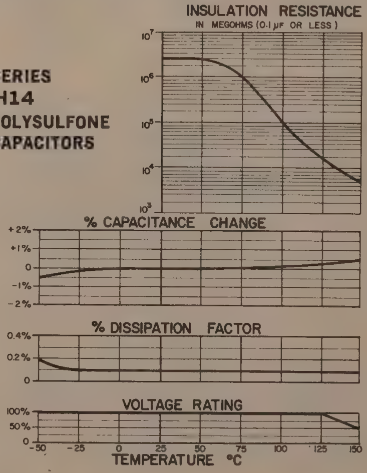
SEAL TEST: 1 x 10-6 atm/cm³/sec max. leak rate.

ENVIRONMENTAL: Capacitors shall meet all applicable requirements of MIL-C-83421.

H14 QUALITY ASSURANCE

All capacitors are 100% screened and tested as follows:

1. 16 hours Burn-In at 150°C and 140% of the rated DC voltage. (Allow for 50% derating).
2. 10 Temperature Cycles from −65°C to 125°C.
3. Helium Leak Test. 1 x 10-6 atm/cm³/sec max. leak rate.
4. DC dielectric strength apply 200% of rated DC voltage from lead to lead and leads to case for one minute.
5. AC dielectric strength apply 100 Hz square wave from lead to lead at a minimum peak to peak voltage of 3 x rated DC voltage for one minute, (except 800V peak to peak for 400VDC styles).
6. Insulation Resistance at rated voltage and 25°C, 300,000 megs — uF minimum but need not exceed 3,000,000 megohms.
7. Capacitance % Tolerance at 1 KHz and 25°C.
8. Dissipation Factor at 1 KHz and 25°C, 0.15% maximum.
9. Visual Inspection for dimensions, marking and packaging.
10. Traceability to production and test records by permanent marking of parts with lot control number.
11. Process and inspection data is maintained on file per NPC-200-3, MIL-Q-9858 quality control standards, and MIL-STD-790 Reliability Assurance Program.



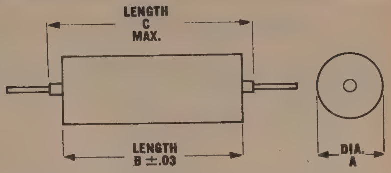
SERIES H14 POLYSULFONE CAPACITORS

CRC HIGH RELIABILITY CAPACITORS

SERIES 14 POLYSULFONE

CAPACITOR DIMENSIONS • AC RATINGS

Series H14 Polysulfone capacitors are being supplied for many applications where the temperature range exceeds 125°C and reaches 150°C, and where the temperature coefficient must be lower than for our Polycarbonate capacitors. Although the quality and supply of Polysulfone film has varied for several years of past production, CRC is continuing to receive sufficient material to manufacture most items listed below and believes the quality and supply problems will end during 1975. Type H14 specifications are subject to change and will be revised in the near future when it is anticipated they will be added to the MIL-C-83421 list of established reliability, metallized film capacitors.



NOTES:

1) "A" dimensions listed are for unsleeved cases.
2) "C" dimension is 0.2" Max. more than "B" dimensions in table.

CRC HIGH RELIABILITY CAPACITORS

30VDC POLYCARBONATE PRICES (1-10 UNITS)

SERIES 12A

HOW TO ORDER

- Select basic part number required and place desired tolerance letter, at end of basic number.
- See part number system on page 18 for complete details concerning sleeving and wire leads.
- **IMPORTANT:** You must have complete part number for ordering purposes.

  Example: D12A183JXW describes a 0.018 uF, 5%, 30 VDC capacitor, without sleeving and with "D" type screening.

SERIES 12A INFORMATION

- Complete information is found on pages 12 - 17.
- 12A capacitors can be ordered by MIL Spec part number — See page 13.
- 5.6 uF or smaller capacitor values, (0.500" and smaller in diameter) use "W" wire leads.
- 6.8 uF or larger values, (0.562" and larger in diameter), use "C" wire leads.
- Prices subject to change.
- **QUANTITY DISCOUNTS:**

11-25 less 10%	26-50 less 15%	Contact our sales offies
51-100 less 20%	101-250 less 25%	for larger quantities.

MIL-C-83421/1	PRICE INFORMATION	SPECIFICATIONS
Type CRH01 30 VDC	Use C12A Prices +10%	See A12A Page 10
Type CRH06 30 VDC	Use E12A Prices +10%	See K12A Page 11

CRC HIGH RELIABILITY CAPACITORS

50VDC POLYCARBONATE PRICES (1-10 UNITS)

SERIES
12B

HOW TO ORDER

- Select basic part number required and place desired tolerance letter, at end of basic number.
- See part number system on page 18 for complete details concerning sleeving and wire leads.
- **IMPORTANT:** You must have complete part number for ordering purposes.

  Example: C12B504BXW describes a 0.5 uF, 0.25%, 50 VDC capacitor, without sleeving and with "C" type screening.

SERIES 12B INFORMATION

- Complete information is found on pages 12 - 17.
- 12B capacitors can be ordered by MIL Spec part number — See page 13.
- 3.3 uF or smaller capacitor values, (0.500″ and smaller in diameter) use "W" wire leads.
- 4.0 uF or larger values, (0.562″ and larger in diameter), use "C" wire leads.
- Prices subject to change.
- **QUANTITY DISCOUNTS:**
  11-25 less 10% 26-50 less 15%
  51-100 less 20% 101-250 less 25%
  Contact our sales office for larger quantities.

CRC HIGH RELIABILITY CAPACITORS

100VDC POLYCARBONATE PRICES (1-10 UNITS)

SERIES **12C**

HOW TO ORDER

- Select basic part number required and place desired tolerance letter, at end of basic number.
- See part number system on page 18 for complete details concerning sleeving and wire leads.
- **IMPORTANT:** You must have complete part number for ordering purposes.

  Example: C12C106FSC describes a 10 uF, 1%, 100 VDC capacitor, with mylar sleeving, #18AWG OFHC leads, and "C" type screening.

SERIES 12C INFORMATION

- Complete information is found on pages 12 - 17.
- 12C capacitors can be ordered by MIL Spec part number — See page 13.
- 0.82 uF or smaller capacitor values, (0.500" and smaller in diameter) use "W" wire leads.
- 1.0 uF or larger values, (0.562" and larger in diameter), use "C" wire leads.
- Prices subject to change.
- **QUANTITY DISCOUNTS:**

11-25 less 10%	26-50 less 15%	Contact our sales office
51-100 less 20%	101-250 less 25%	for larger quantities.

MIL-C-83421/1	PRICE INFORMATION	SPECIFICATIONS

CRC HIGH RELIABILITY CAPACITORS

200VDC POLYCARBONATE PRICES (1-10 UNITS)

SERIES
12D

HOW TO ORDER

- Select basic part number required and place desired tolerance letter, at end of basic number.
- See part number system on page 18 for complete details concerning sleeving and wire leads.
- **IMPORTANT:** You must have complete part number for ordering purposes.
  Example: D12D224BSW describes a 0.22 uF, 0.25%, 200 VDC capacitor, with mylar sleeving and "D" type screening.

SERIES 12D INFORMATION

- Complete information is found on pages 12 - 17.
- 12D capacitors can be ordered by MIL Spec part number — See page 13.
- 0.56 uF or smaller capacitor values, (0.500″ and smaller in diameter) use "W" wire leads.
- 0.68 uF or larger values, (0.562″ and larger in diameter), use "C" wire leads.
- Prices subject to change.
- **QUANTITY DISCOUNTS:**
  11-25 less 10% 26-50 less 15%
  51-100 less 20% 101-250 less 25%
  Contact our sales office for larger quantities.

CRC HIGH RELIABILITY CAPACITORS

400VDC POLYCARBONATE PRICES (1-10 UNITS)

SERIES
12E

HOW TO ORDER

- Select basic part number required and place desired tolerance letter, at end of basic number.
- See part number system on page 18 for complete details concerning sleeving and wire leads.
- **IMPORTANT:** You must have complete part number for ordering purposes.

  Example: D12E104FSW describes a 0.1 uF, 1%, 400 VDC capacitor, with mylar sleeving and "D" type screening.

SERIES 12E INFORMATION

- Complete information is found on pages 12 - 17.
- 12E capacitors can be ordered by MIL Spec part number — See page 13.
- 0.22 uF or smaller capacitor values, (0.500″ and smaller in diameter) use "W" wire leads.
- 0.33 uF or larger values, (0.562″ and larger in diameter), use "C" wire leads.
- Prices subject to change.
- **QUANTITY DISCOUNTS:**
  11-25 less 10% 26-50 less 15% Contact our sales office
  51-100 less 20% 101-250 less 25% for larger quantities.

CORDWOOD POLYCARBONATE
CAPACITOR PRICES

HOW TO ORDER

- See page 31 for specification information and case sizes.
- Select basic part number required and place desired tolerance letter at end of basic number.
- **IMPORTANT:** You must have complete part number for ordering purposes.
  Example: E32A563GXW is a 0.056 uF, 2%, 30 VDC, polycarbonate capacitor, no sleeving with level 3 screening.
- Check part number information on page 18 for complete details concerning sleeving and wire leads.
- Type "W" leads are used for all capacitor values listed.
- Prices subject to change.
- **QUANTITY DISCOUNTS:**
  11-25 less 10% 51-100 less 20%
  26-50 less 15% 101-250 less 25%

CORDWOOD TEFLON
CAPACITOR PRICES

HOW TO ORDER

- See page 31 for specification information and case sizes.
- Select basic part number required and place desired tolerance letter at end of basic number.
- **IMPORTANT:** You must have complete part number for ordering purposes.
  Example: D31B273BSW is a 0.027 uF, 0.25%, 50VDC teflon capacitor with mylar sleeving and level 2 screening.
- Check part number information on page 18 for complete details concerning sleeving and wire leads.
- Type "W" leads are used for all capacitor values listed.
- Prices subject to change.
- **QUANTITY DISCOUNTS:**

SERIES
11

HOW TO ORDER QUALITY LEVEL 1 B11 TEFLON

- See page 28 for 50V, 100V, and 200V, B11 series case sizes.
- *Prices shown below for 50 volt, B11B capacitors are the same for the 100 volt, B11C, and 200 volt, B11D, teflon capacitors.
- Select basic part number required and place desired tolerance letter at end of basic number.
- **IMPORTANT:** You must have complete part number for ordering purposes as shown below.
  Example: B11B103JXW is a 0.01 uF, 5%, 50V capacitor with no sleeving.
  Example: B11C334DSW is a 0.33 uF, 0.5%, 100V capacitor with mylar sleeving.
  Example: B11D105FXW is a 1.0 uF, 1%, 200V capacitor with no sleeving.
- See page 24 for B11 specifications.
- **QUANTITY DISCOUNTS:**

11-25 less 10%	26-50 less 15%
51-100 less 20%	101-250-less 25%

- Contact our sales office for larger quantities.

HOW TO ORDER QUALITY LEVEL 1 C11 TEFLON

- See page 28 for 50V, 100V, and 200V, C11 series case sizes.
- *Prices shown below for 50 volt, C11B capacitors are the same for the 100 volt, C11C, and 200 volt, C11D teflon capacitors.
- Select basic part number required and place desired tolerance letter at end of basic number.
- **IMPORTANT:** You must have complete part number for ordering purposes.
  Example: C11B682FSW is a 0.0068 uF, 1%, 50V, capacitor with mylar sleeving.
  Example: C11C152BXW is a 0.0015 uF, 0.25%, 100V, capacitor with no sleeving.
  Example: C11D155JSW is a 1.5 uF, 5%, 200V, capacitor with mylar sleeving.
- See page 25 for C11 specifications.
- Prices subject to change.
- **QUANTITY DISCOUNTS:**

11-25 less 10%	26-50 less 15%

HOW TO ORDER QUALITY LEVEL 3 E11 TEFLON

- See page 28 for 50V, 100V, and 200V, E11 series case sizes.
- *Prices shown below for 50 volt, E11B capacitors are the same for the 100 volt, E11C, and 200 volt, E11D, teflon capacitors.
- Select basic part number required and place desired tolerance letter at end of basic number.
- **IMPORTANT:** You must have complete part number for ordering purposes as shown below.
  Example: E11B204JSW is a 0.2 uF, 5%, 50V, capacitor with mylar sleeving.
  Example: E11C273BXW is a 0.027 uF, 0.25%, 100V, capacitor with no sleeving.
  Example: E11D562GSW is a 0.0056 uF, 2%, 200V, capacitor with mylar sleeving.
- See Page 27 for E11 specifications.
- Prices subject to change.
- **QUANTITY DISCOUNTS:**
  11-25 less 10% 26-50 less 15%
  51-100 less 20% 101-250-less 25%
- Contact our sales office for larger quantities.

CRC HIGH RELIABILITY CAPACITORS

100VDC & 200VDC TEFLON PRICES (1-10 UNITS)

SERIES
D51

HOW TO ORDER

- Select basic part number required and place desired tolerance letter at end of basic number.
- **IMPORTANT:** You must have complete basic number for ordering purposes as shown below.
  Example: D51C472KSW is a 0.0047 uF, 10%, 100V capacitor with mylar sleeving.
  Example: D51D824JXW is a 0.82 uF, 5%, 200V capacitor without sleeving.
- Prices subject to change.

- **QUANTITY DISCOUNTS:**
  11-25 less 10% 26-50 less 15%
  51-100 less 20% 101-250 less 25%
- Contact our sales office for larger quantities.

QUALITY LEVEL 2, D51 SERIES TEFLON CAPACITORS

- See page 28 for D51 case sizes and specifications.
- See page 30 for X51 life test data.

CRC HIGH RELIABILITY CAPACITORS

50VDC & 100VDC POLYSTYRENE PRICES (1-10 UNITS)

SERIES
N53

HOW TO ORDER

- Select basic part number required and place desired tolerance letter at end of basic number.
- **IMPORTANT:** You must have complete basic number for ordering purposes as shown below.
  Example: N53B682FSW is a 0.0068 uF, 1%, 50V capacitor with mylar sleeving.
  Example: N53C155GXW is a 1.5 uF, 2%, 100V capacitor with no sleeving.
- 0.1% tolerance capacitors are available at approximately twice the 0.5% prices shown below.

- **QUANTITY DISCOUNTS:**

11-25 less 10%	26-50 less 15%
51-100 less 20%	101-250 less25%

- Contact our sales office for larger quantities.

QUALITY LEVEL 3, N53 SERIES POLYSTYRENE CAPACITORS
- See page 33 for N53 case sizes.
- See page 32 for N53 specifications.
- See page 34 for special L53 polystyrene life test data.
- See page 35 for special AC rated polystyrene capacitors.

Component Research Co. manufactures special capacitor standards which are used as references for system checkout applications. Typically, capacitor banks can be supplied from 1 uF to 1000 uF to an accuracy of ±0.1% at 25°C. Banks can be provided with selector switches or connecting links to provide series and parallel connection capability for breadboard purposes. Assemblies generally are made from high reliability type N53 polystyrene capacitor sections which are carefully aged and sealed for low temperature coefficient and drift. Their insulation resistance is usually 1,000,000 megohms-uF and the dissipation factor is less than 0.1% at the output terminals.

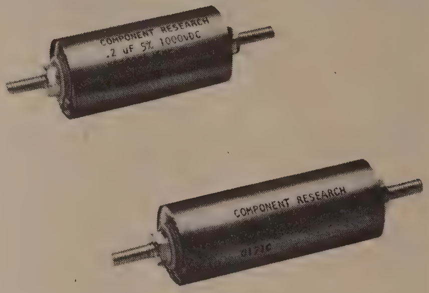
COMPONENT RESEARCH CO. INC.
SANTA MONICA, CALIF 90404
MODEL HW 699
PRECISION POLYSTYRENE CAPACITOR STANDARD

The capacitor standard shown above consists of ten individual 10 uF, ±0.25%, 100 VDC polystyrene capacitors which can be parallel connected for a total of 100 uF, ±0.25%. Provision has been made for series or parallel connection as shown on the front panel. The individual capacitor output arrangement permits connection to both legs of comparison bridges such as impedance comparators or to ratio transformer devices.



Extremely low ESR, AC and DC rated, oil impregnated foil and metallized capacitors as shown above are available in compact hermetically sealed enclosures. These capacitors are capable of handling 50 amps RMS at frequencies up to 100 KHz or more in a case size of 1″ x 2.375″. These capacitors have an unusually low heat rise under severe AC pulsed or continuous conditions.

NEW ADDRESS IN 1975

PENNSYLVANIA AT TWENTY-SIXTH STREET
SANTA MONICA, CALIF. 90404

Our new 50,000 square foot facility at Pennsylvania and 26th St. in Santa Monica, Calif. will be in operation late in 1975. This will enable CRC to handle all orders with increased efficiency in the shortest possible time.

SUPPLEMENTARY CAPACITOR-INFORMATION SECTION

CRC HAS ADDED THIS SECTION TO PROVIDE INFORMATION ON NEW PRODUCTS, UNUSUAL CAPACITOR TEST DATA, AND A COMPILATION OF MISCELLANEOUS ITEMS OF INTEREST TO DESIGNERS, COMPONENT ENGINEERS, AND RELIABILITY PERSONNEL. IN ADDITION WE ARE PLANNING TO MANUFACTURE A COMPREHENSIVE PRODUCT LINE OF STANDARD AND CUSTOM FEED-THROUGH CAPACITORS AND EMI FILTERS. WE BELIEVE THESE PRODUCTS WILL BE OF HIGHER QUALITY AND PERFORMANCE THAN ANY SIMILAR PRODUCTS NOW AVAILABLE.

MANY OF OUR CUSTOMERS NOW USING EMI FILTERS HAVE EXPRESSED DISSATISFACTION WITH THE QUALITY AND RELIABILITY OF THE FILTERS PRESENTLY AVAILABLE, AND HAVE URGED US TO ENTER THIS AREA OF INTEREST. PLEASE FORWARD TO US ANY OF YOUR REQUIREMENTS FOR CAPACITORS, NETWORKS, AND EMI FILTERS, SO THAT WE CAN DETERMINE IF WE CAN MEET YOUR NEEDS.

NEW LOCATION AFTER NOVEMBER
1655 TWENTY SIXTH STREET
SANTA MONICA, CALIFORNIA 90404

AS THIS CATALOG SUPPLEMENT IS BEING PUBLISHED, CONSTRUCTION IS BEING COMPLETED ON OUR NEW, MODERN RESEARCH AND MANUFACTURING FACILITY LOCATED A SHORT DISTANCE FROM OUR PRESENT FACILITY AT 1717 19th STREET, IN SANTA MONICA. OVER 50,000 SQUARE FEET OF MANUFACTURING, RESEARCH AND WAREHOUSE SPACE WILL BE AVAILABLE TO US TO HANDLE THE EVER INCREASING DEMAND FOR OUR ESTABLISHED RELIABILITY CAPACITORS.

COMPARISON CHART FOR MIL-SPECIFICATION

Component Research Company has prepared this capacitor performance and characteristics chart in order for engineers to clearly see what choice in specification limits and screening is available in the established reliability Mil-Specifications for Metallized Polycarbonate Capacitors.

Due to possible ambiguity in specification wording, both manufacturer and user may not be following the specifications faithfully in carrying out the intent of the military requirements.

Component Research Company as a manufacturer qualified to "R" failure rate for MIL-C-83421/1 and MIL-C-39022/9C, uses the characteristics and 100% screening shown for these two MIL-SPECIFICATIONS in this chart as a minimum, for meeting specification requirements.

CATALOG SUPPLEMENT
C

TYPE METALLIZED POLYCARBONATE CAPACITORS

A study of the dissipation factor limits and the AC ratings shows that only the MIL-C-83421/1 and MIL-C-39022/9C can be reliably used for AC applications, if we consider dissipation factor critical.

Although the dissipation factor limits for MIL-C-39022/9C styles CHR01B, E, H, L, P, C, F, J, M and R are listed as greater than 0.15% every M39022/9C shipped by Component Research Company is certified to be less than 0.15%, because we feel any value higher than this will result in unreliable life in AC applications, and possibly intermittent life in DC applications. Catalog supplement sections F and G go into greater detail on this matter.

Please note that the 100% screening performed by Component Research Company using 0.15% maximum % dissipation factor, is an additional assurance of high termination quality, which established reliability Mil-Specifications do not always assure.

LONG TERM THERMAL AGING TEST REPORT

Thirty series C12A, 30VDC, Metallized Polycarbonate Capacitors were selected from current production and submitted to thermal aging PER MIL-C-83421/1 to determine the effects of continuous temperature cycling for 1000 cycles on dissipation factor, capacitance, and insulation resistance. As of publication date, parts completed 400 cycles from −65°C to +125°C with no evidence of visual damage, catastrophic failure, or any intermittent type measurement indication.

Testing will continue to 1000 cycles and test data will be made available to anyone requesting this information. Testing will be complete prior to our next catalog publication date of June 1976.

A SUMMARY OF TEST RESULTS INDICATES THE FOLLOWING

Capacitance Value	Capacitance Drift Minimum	Capacitance Drift Maximum	% Dissipation Factor Freq.	% Dissipation Factor Maximum	Insulation Resistance Minimum IR in Megohms
.001μF	−.01%	+.13%	1 KHz 10 KHz	.07% .07%	15,000,000
.01μF	−.06%	+.26%	1 KHz 10 KHz	.07% .17%	15,000,000
.1μF	−.01%	+.18%	1 KHz 10 KHz	.08% .29%	5,000,000
1.0μF	+.04%	+.09%	1 KHz 10 KHz	.10% .46%	680,000
10μF	+.04%	+.15%	.1 KHz 1 KHz	.06% .27%	250 000 (Equivalent to 2,500,000 Megs-μF)

The capacitors tested are identical in construction with series A12A and K12A supplied to MIL-C-83421/1 and C12A, E12A, supplied to MIL-C-39022/9C. The only differences that exist are in screening and conditioning. This results in better stability for types with more extensive conditioning.

HOW TO ANTICIPATE FAILURES & IMPROVE

Plastic film dielectric type capacitors can provide remarkably good electrical characteristics and high reliability but it takes a combination of sound construction, suitable film quality, exacting process control, and 100% testing to achieve this.

We are listing below some pitfalls to avoid because we are concerned with a proliferation of marginal quality capacitors frequently used in high reliability level Aerospace and industrial applications. Additional information appears on pages 7 and 37 of our catalog "J" section.

MIS-APPLICATION OF CAPACITORS IN AC CIRCUITS

To begin with, the highest quality capacitor will fail if you are exceeding its ratings by subjecting it to excessive voltage and current stresses. In sinusoidal applications metallized capacitors that warm up over 20°C after several hours of operation are considered a borderline case, and you may be applying too high an RMS voltage or frequency. Consult the AC ratings in MIL-C-83421/1 for metallized polycarbonate capacitors as a guide to typical limits.

If the capacitors you are using have higher than normal dissipation factor readings, this may be a sign of high series resistance caused by poor terminations on the capacitor section. The square wave AC screening for one minute covered in MIL-C-83421/1 is a good way of eliminating capacitors with gross dissipation factor quality.

Unfortunately, if dissipation factor limits are set too high as post test requirements, suspect capacitors will pass the square wave test, in fact may have been damaged by this test, but are permitted to pass what we consider are abnormally high DF limits. A termination that is poor at room temperature generally should be worse at higher temperature and increased heating caused by power loss at the terminations may cause ultimate degeneration and possible explosion.

We consider 100% AC burn-in at elevated temperature an excellent method of checking for good terminations. Burn-in should be followed by 100% dissipation factor examination. See page 37 for special AC screening information.

In SCR commutation and transistor switching type applications, heat rise of a metallized capacitor is not always a good means of determining if the capacitor can handle the non-sinusoidal current pulses usually encountered if the capacitor is subjected to relatively high peak currents at a low duty cycle; it may suddenly open after hours, possibly months of operation and never may have shown more than a few degrees warm-up during operation.

A recent example of operating beyond specified limits resulting in ultimate failure is shown by the following experiment performed on three 0.033μF, 30VDC, Type E12A333, metallized polycarbonate capacitors. Each capacitor has nominal case dimensions of 0.170″ diameter by 0.562″ length and #22 AWG wire leads.

The capacitors were placed in parallel to form a 0.1μF load into the output of a CRC designed power generator supplying a 60 volt peak to peak square wave at a 20KHz repetition rate.

An examination of the current pulses developed indicated that the capacitors were handling a peak current of 8.4 amps with a cosine type waveshape having a 1.2μ second width at the base.

The capacitors were operated for 100 hours at 25°C with less than 2°C heat rise. If we compare the MIL-C-83421/1 rated current at 40KHz of 0.18A rms maximum for a 0.033μF 30VDC capacitors, with the

RESEARCH CO.

CATALOG SUPPLEMENT
G

CAPACITOR RELIABILITY BY 100% SCREENING

peak current of 2.8 amps during this test, it appears that these capacitors can handle this level.

A more conservative level which we intend to verify by long term testing is 1.8 amps maximum peak current based on a peak current not to exceed ten times the 40KHz rms rated current of 0.18A for this capacitor. After increasing the square wave voltage to 80 volts peak to peak, the capacitors opened up.

The peak current during this test period was approximately 3.8 amps which is more than twenty times the RMS rated current of 0.18 amps. This is an example of how much higher in peak current CRC capacitors can be stressed, but certainly we do not recommend that you go to extremes in using these capacitors.

We recommend that you send us your oscilloscope current and voltage waveforms for analysis if you have non-sinusoidal applications. (See page 35, Catalog "J".) We are currently undergoing a test program to confirm that it is safe to operate our metallized polycarbonate capacitors under non-sinusoidal conditions of a 1μ second current pulse width at a 10KHz repetition rate providing the peak currents do not exceed ten times their maximum AC ratings at 40KHz.

As an example a 0.1μF 100VDC rated E12C104 or K12C104 capacitor maximum rated at 0.9A rms could be operated with 9 amps of peak current provided you did not exceed a 10KHz repetition rate.

Component Research Company bases the above as a result of many other tests and customer usage. We will of course continue to increase our test scope covering non-sinusoidal operation and publish operating specifications for such conditions.

CAPACITOR OPENS & INTERMITTENTS AFTER ENVIRONMENTAL TESTING OR LONG TERM STORAGE

CRC has frequently been requested to replace "Brand X" metallized capacitors (which may have cost 50% less). Problems began to plague production lines long after being qualified for the application and long after passing initial breadboard and preproduction tests.

Unfortunately many specifications and programs do not take time into consideration. Capacitor terminations may withstand DC burn-in, DC life, and even AC life but may start to break down as a result of expansion and contraction of all the metal and plastic materials involved in the construction of a capacitor.

The extreme differences in dimensional change between plastic and metal materials as a result of temperature cycling may result in microscopic ruptures of termination joints, possible electrode oxidation and generally unstable termination series resistance.

Component Research Company patented stress free termination design and precise quality control eliminates the above problems. This is the reason we recommend 100% temperature cycling or thermal aging followed by screening as described above.

Our goal is to continue to provide increasing amounts of detailed information and data of this type. In this manner the reliability and safety of electronic equipment needed for military and commercial transportation or general usage equipment will be enhanced and maintained.

Please contact us if you have any suggestions how to further this goal.

• DC LIFE TEST DATA FOR METALLIZED TEFLON
• VIBRATION REPORT FOR METALLIZED POLYCARBONATE

TEST REPORT No. XT907

In this test, thirty metallized Teflon Capacitors, part number D11B504, 0.5μF, 50VDC, in a 0.562″ x 1.125″ case size were subjected to DC life testing at 140% of rated voltage at 125°C. At the conclusion of 7300 hours of test the capacitors changed less than 0.5% in capacitance. There was an increase in dissipation factor to 0.12% maximum for serial number 017. Twenty-one other units remained within 0.05% dissipation factor. The dissipation factor increase is not significant for DC applications where there is a relatively small AC current content. We do not recommend this type of Teflon Capacitor for high current handling AC applications. We can supply very stable, Teflon Foil Capacitors which are capable of handling over 100 AMPS RMS per microfarad and several thousand peak amperes, if required.

The insulation resistance measured from 500,000 MEGS-μF to 12,000,000 MEGS-μF, and this we consider superb performance. As can be seen it is now possible to supply high reliability, high insulation resistance, low capacitance drift Teflon capacitors to specification limits far beyond the scope of present specifications if a program requires such performance.

HIGH LEVEL VIBRATION TEST REPORT #644-1-74-152 FOR SPECIAL C12 POLYCARBONATE CAPACITORS

Component Research Company became involved in the development of C12A Metallized Polycarbonate capacitors capable of handling very high vibration levels, as a consequence of capacitor failures in the Atlas Centaur Program.

In this application we replaced other capacitors. Thus CRC provided far superior electrical performance, as well as rugged construction. And all this within a minimum of lead time.

During this test three samples of each case size covering the range of capacitor values to be qualified, while using random vibration, were subjected to a level of 35 grms and 70 grms. These levels were performed from 100 Hz to 1000 Hz by the contractor and no failures occurred.

TEST PERFORMED & A LIST OF THE CASE SIZES USED

Quan.	Diam.	Length	μF	VDC	Remarks
3	.170	.687	.082	30	Standard C12 Construction
3	.193	.813	.1	50	Standard C12 Construction

VIKING ULTRA HIGH RELIABILITY TEFLON CAPACITOR SPECIFICATIONS

Component Research Co. is proud to have been selected for Viking sole source procurement of extremely accurate, high quality teflon capacitors similar to the B11B and B11C series shown on pages 24 and 25 of catalog J.

Critical weight limitations prevent the use of redundant circuits. The capacitors must maintain their excellent performance with 600 hours of spacecraft sterilization, severe shock and vibration levels at launching and five to ten years of space travel. A single capacitor failure may mean a major setback to one of the most important and complex space ventures known to man.

Component Research Co. accepts this challenge with a confidence based upon over a decade of experience in the manufacture of high quality, high reliability film capacitors.

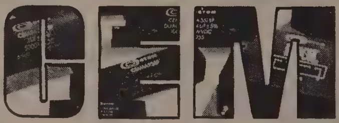
Mica Capacitors CUSTOM Has What Design Engineers Need

Wrap and Fill: **CMR Product Type**
Application: Designed primarily for hermetically sealed and potted in applications.

Epoxy Housed: **CER Product Type**
Application: For specialized mounting arrangements and operation under selected environmental parameters.



Epoxy Molded: **CEM Product Type**
Application: When specialized form factors and operation under the extremes of environmental resistance are required.

Electrical Ratings

Capacitance Range: 40 pf to 10 μf (CMR); 40 pf to 40 μf (CER, CEM).
Capacitance Tolerance: ±10% (±2, ±5 or ±20% available).
Voltage Range: 250 V to 40 KV (CMR); 250 V to 50 KV (CER, CEM).
Volume Efficiency: approx. .25 joules per cubic inch (CMR);
approx. .2 joules per cubic inch (CER, CEM).
Thermal Coefficient of Capacitance: +5% max. from 25°C to 125°C.
−3% max. from 25°C to −55°C.
Operating Temperature −65°C to +125°C without derating.

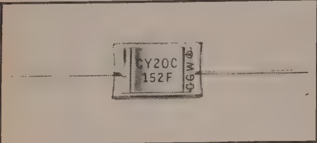
Glass Capacitors

CYFM10, 15, 20, 30 (INDUSTRIAL); CY10, 15, 20, 30 (QPL to MIL-C-11272)



APPLICATIONS

These extremely stable glass capacitors, CORNING® style CYFM, meet or exceed all requirements of MIL-C-11272. With glass dielectric, fused monolithic construction and true glass-to-metal seals at the leads, they have very low losses and are virtually immune to severe environmental stresses.

PERFORMANCE CHARACTERISTICS

Tolerance—Available tolerances for each value of capacitance are shown in the ordering information table. For codes, refer to the Part Numbers paragraph.

Temperature Coefficient—+140 ±25 ppm/°C at 100 kHz. TC will track and retrace to within ±5 ppm. Capacitance drift is less than 0.1% or 0.1 pF, whichever is greater.

Voltage Coefficient—Zero

Losses—Extremely low, and remain relatively low at elevated temperatures. Dissipation factor is less than 0.001 at 1.0 kHz and 25°C.

Life—After 2,000 hours at 125°C with 150% of rated voltage applied, capacitance change is less than 0.5% or 0.5 pF whichever is greater.

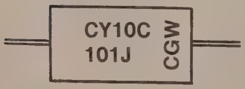
Insulation Resistance—Greater than 100,000 megohms at 25°C; greater than 10,000 megohms at 125°C.

Voltage/Temperature Ratings—Voltage ratings are shown in the ordering information table. The operating temperature range is −55°C to +125°C with no derating required.

Moisture Resistance—Exceeds all requirements of MIL-C-11272 and MIL-STD-202, Method 106.

Part Numbers—Basic part numbers are shown in the ordering information table. Add the appropriate suffix to specify tolerance. Suffix codes: "C" = ±0.25pF, "D" = ±0.5pF, "F" = ±1%, "G" = ±2%, "J" = ±5%, "K" = ±10%, "M" = ±20%.

PART MARKING



CY — Glass Capacitor
10 — Case Size
C — Operating Temperature Range
101 — Capacitance. Coded in pF
J — Tolerance
CGW — Corning Glass Works

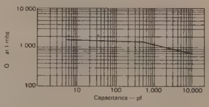
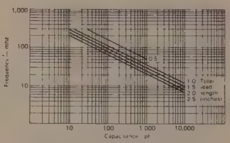
Quality Factor vs. Temperature



Quality Factor vs. Capacitance



Resonant Frequency vs. Capacitance

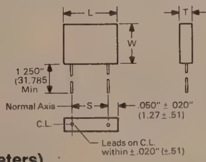
Quality Factor and Dissipation Factor vs. Frequency



Dimensions—Inches (Millimeters)

Case Size	L ±.005 (±.13)	W ±.010 (±.25)	T ±.005 (±.13)	S ±.020 (±.51)	Weight (Grams)
CY06	.300 (7.62)	.200 (5.08)	.115 (2.92)	.200 (5.08)	.3 - .4
CY07	.300 (7.62)	.300 (7.62)	.115 (2.92)	.200 (5.08)	.4 - .5
CY08	.500 (12.70)	.300 (7.62)	.115 (2.92)	.400 (10.16)	.7 - .8

Note: All leads are 24 AWG, .020 ± .002 (.51 ± .05) diameter. Leads are solderable and weldable gold-plated Dumet, per MIL-STD-1276, Type D.

APPLICATIONS

—These precision miniature glass capacitors, CORNING ® style TY0, meet or exceed all requirements of MIL-C-11272. Constructed of a fused monolithic capacitive element in a rectangular case with gold-plated radial Dumet leads, this series permits high packaging efficiency for printed circuit applications where extremely stable, low-loss capacitors are required.

PERFORMANCE CHARACTERISTICS

Tolerance—Available tolerances are "C" = ±0.25pF, "D" = ±0.5pF, "F" = ±1%, "G" = ±2%, "J" = ±5%, "K" = ±10%, "M" = ±20% as shown in the ordering information table. Standard tolerance for 5.1pF and above is ±5%, below 5.1pF the standard tolerance is ±0.25pF.

Temperature Coefficient—+140 ±25 ppm/°C at 100 kHz. TC will track and retrace to within ±5ppm. Capacitance drift is less than 0.1% or 0.1 pF, whichever is greater.

Voltage Coefficient—Zero.

Losses—Extremely low, and remain relatively low at elevated temperatures. Dissipation factor at 1 kHz and 25°C is less than 0.001 for values greater than 100 pF and less than 0.002 for values of 100 pF and below.

Life—After 2,000 hours at 125°C with 150% of rated voltage applied, capacitance change is less than 0.5% or 0.5 pF; dissipation factor is less than 0.0025 for values above 100 pF and less than 0.0045 for values of 100 pF and below; insulation resistance is greater than 100,000 megohms.

Insulation Resistance—Greater than 100,000 megohms at 25°C; greater than 10,000 megohms at 125°C.

Voltage/Temperature Rating —WVDC over the temperature range of −55°C to + 125°C with no derating required.

APPLICATIONS

These precision glass-dielectric capacitors are QPL to Established Reliability specification MIL-C-23269. Fused monolithic construction provides excellent electrical performance, environmental immunity, stability and retraceability.

PERFORMANCE CHARACTERISTICS

Temperature Coefficient—+140 ±25 ppm/°C from −55°C to +125°C. TC of all units will track and retrace to within ±5 ppm.

Life—At rated conditions (100% rated voltage, 125°C), capacitance change is less than:

±0.5% after 2,000 hours
±2.0% after 30,000 hours

At accelerated conditions (150% rated voltage, 125°C), capacitance change is less than:

±0.5% after 2,000 hours
±2.0% after 6,000 hours

Insulation Resistance—A minimum of 100,000 megohms at 25°C and 10,000 megohms at 125°C.

Voltage/Temperature Ratings—Voltage ratings are shown in the part number tables. The operating temperature range is −55°C to +125°C.

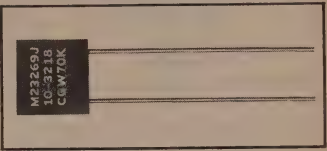
Note: All leads are copper-clad nickel-iron in accordance with MIL-STD-1276 Type D.



APPLICATIONS

These precision glass-dielectric capacitors are QPL to Established Reliability specification MIL-C-23269. Fused monolithic construction provides excellent electrical performance, environmental immunity, stability and retraceability.

PERFORMANCE CHARACTERISTICS

Temperature Coefficient—+140 ±25 ppm/°C from −55°C to +125°C. TC of all units will track and retrace to within ±5 ppm.

Life—At rated conditions (100% rated voltage, 125°C), capacitance change is less than:

±0.5% after 2,000 hours
±2.0% after 30,000 hours

At accelerated conditions (150% rated voltage, 125°C), capacitance change is less than:

±0.5% after 2,000 hours
±2.0% after 6,000 hours

Insulation Resistance—A minimum of 100,000 megohms at 25°C and 10,000 megohms at 125°C.

Voltage/Temperature Ratings—Voltage ratings are shown in the part number tables. The operating temperature range is −55°C to +125°C.

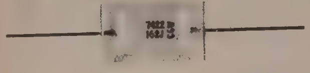
Glass Capacitors

CYFR 10, 15, 20, 30 (HIGH RELIABILITY)



CYFR20

APPLICATIONS

CORNING® style CYFR high reliability glass capacitors have failure rates among the lowest available. These capacitors meet or exceed all requirements of Corning specifications J-950 and J-951, which combine the most exacting features of many specifications and substantially exceed those of most.

PERFORMANCE CHARACTERISTICS

Tolerance—Available tolerances are "C" = 0.25 pF, "D" = ±0.5 pF, "F" = ±1%, "G" = ±2%, "J" = ±5% as shown in the ordering information table.

Temperature Coefficient—+140 ±25 ppm/°C at 100 kHz. TC will track and retrace to within ±5 ppm. Capacitance drift is less than 0.1% or 0.1 pF, whichever is greater.

Voltage Coefficient—Zero.

Losses—Extremely low, and remain relatively low at elevated temperatures and high frequencies. Dissipation factor is less than 0.001 at 1 kHz and 25°C.

Life—After 2,000 hours at 125°C with 150% of rated voltage applied, capacitance change is less than 0.5% or 0.5 pF, dissipation factor is less than 0.0015, and insulation resistance is greater than 500,000 megohms.

Insulation Resistance—Greater than 500,000 megohms at 25°C; greater than 10,000 megohms at 125°C.

Voltage/Temperature Ratings—Voltage ratings are shown in the ordering information table. The operating temperature range is −55°C to +125°C with no derating required.

Moisture Resistance—Exceeds all requirements of MIL-C-11272 and MIL-STD-202, Method 106.

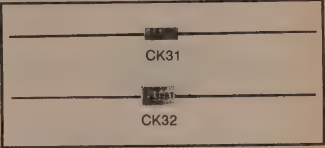
Note: Leads are gold-plated, solderable and weldable Dumet per MIL-STD-1276, Type D.



APPLICATIONS

These miniature multilayer ceramic capacitors, CORNING® style CYK01 and CYK02, meet or exceed all requirements of MIL-C-11015. High volumetric efficiency and reliable performance result from the special GLASS-K® dielectric, which is fused into a compact monolithic structure, sized for automatic insertion. Available in three different stability characteristics, these capacitors are suitable for both military and commercial applications in miniature circuitry.

PERFORMANCE CHARACTERISTICS

Tolerance—± 20% and ± 10% in characteristics "U" and "V", and ±10% and ±5% in characteristic "T".

Stability Characteristics—Available as follows:

T— TC: +2, −10%;
TVC: +2, −10%
U— TC: +2, −15%;
TVC: +2, −15%
V— TC: +20, −45%;
TVC: +20, −50%

Dissipation factor—
T: <1%
U: <1.5%
V: <3.0%

Life—Meets or exceeds requirements of MIL-C-11015. At 200% of rated voltage, 125°C, the capacitance change for each stability characteristic is as follows:
T: <2%
U: <5%
V <20%

Insulation Resistance—100,000 megohms or 1,000 megohm-microfarads, whichever is less.

Voltage/Temperature Ratings—Rated voltage is 50 Vdc. The operating temperature range is −55°C to +125°C.

Moisture Resistance—Meets or exceeds requirements of MIL-C-11015 and MIL-STD-202, Method 106. The capacitance change is less than 2% for stability characteristics T and U, and less than 5% for characteristic V.

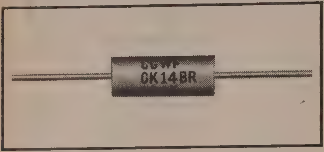
Ceramic Capacitors

CK12, 13, 14 (QPL to MIL-C-11015/20)



APPLICATIONS

These miniature multilayer ceramic capacitors are QPL to MIL-C-11015/20. The exclusive dielectric provides high volumetric efficiency and superior reliability. The monolithic units are molded into rugged flame-retardant cases, ideally suited for automatic insertion.

PERFORMANCE CHARACTERISTICS

Tolerance—±20% and ±10%.

Stability Characteristics—Available as follows:
X — TC: ±15%; TVC: +15, −25%
R — TC: ±15%; TVC: +15, −40%

Dissipation Factor—2.5% maximum @ 1 kHz.

Life—Meets or exceeds requirements of MIL-C-11015, 200% of rated voltage, 125°C, for 2,000 hours.

Insulation Resistance—100,000 megohms or 1,000 megohm-microfarads.

Voltage/Temperature Ratings —Voltage ratings are shown in the ordering information table. The operating temperature range is −55°C to +125°C.

Moisture Resistance—Meets or exceeds requirements of MIL-C-11015 and MIL-STD-202, Method 106.

Dielectric Withstanding Voltage—250% of rated dc voltage.

Part Numbers—Part numbers are shown in the ordering information table. Use suffix "M" for ±20% tolerance if available, and suffix "K" for ±10% tolerance.

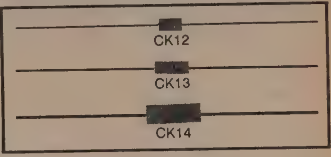
Note —Leads are solder coated Dumet per MIL-STD-1276 Type D.



APPLICATIONS

These miniature multilayer ceramic capacitors are QPL to Established Reliability specification MIL-C-39014/5. The dielectric is fused into a monolithic structure, which is then molded into a tough, flameproof case, sized for automatic insertion. These units offer excellent frequency characteristics, superior voltage coefficients and high volumetric efficiency.

PERFORMANCE CHARACTERISTICS

Tolerance—±20% and ±10%.

Stability Characteristics—Available as follows:

BX—TC: ±15%; TVC: +15, −25%
BR—TC: ±15%; TVC: +15, −40%

Dissipation Factor—2.5% maximum.

Insulation Resistance—At 25°C, 100,000 megohms or 1,000 megohm-microfarads. At 125°C, 10,000 megohms or 100 megohm-microfarads.

Voltage/Temperature Ratings—Voltage ratings are shown in the ordering information table. The operating temperature range is −55°C to +125°C.

Part Numbers—Part numbers are formed by adding a dash number from the part number table to the basic mil spec number —M39014/05—(add dash number)

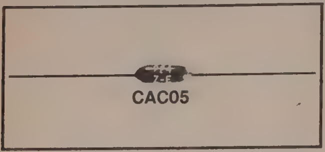
Ceramic Capacitors

CAC02, 03, 04, 05 (SPINSEAL)™ Axial, Conformal Coated



INTRODUCING SPINSEAL™

These miniature monolithic ceramic capacitors are designed for high volume commercial and industrial applications where space and weight are at a premium. The Spinseal technology permits us to manufacture axials at high speeds while closely controlling uniformity and performance. Especially suited for automatic insertion application, Spinseal is *the* low cost axial ceramic capacitor.

EIA TEMPERATURE CHARACTERISTICS

Available as follows:

X7R (stable)—±15%
from −55°C to +125°C

Z5U (general purpose)—+22%
−56% from +10°C to +85°C

PERFORMANCE CHARACTERISTICS

Standard capacitance tolerances available.

X7R K = ±10%
M = ±20%

Z5U M = ±20%
Z = +80, −20%

Dissipation Factor:

X7R—2.5% maximum
Z5U—3.0% maximum

Insulation Resistance:

X7R—100,000 megohms or 1000 megohm-microfarads, whichever is less.

Z5U—10,000 megohms or 100 megohm-microfarads, whichever is less.

Voltage Ratings: 50 and 100 volts dc.

Dielectric Strength: 2.5 times rated voltage for 1 to 5 seconds.

PART MARKING

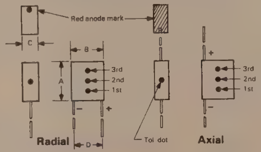
MMJ case size is type marked, all others are color coded.

EIA COLOR DOT CODING

0—Black (omitted)
1—Brown
2—Red
3—Orange
4—Yellow
5—Green
6—Blue
7—Violet
8—Gray
9—White

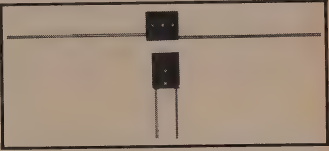
Capacitance value is shown by means of standard EIA color code dots except for the MMJ case size where all data is printed. Because the polyester cases are black, black dots are omitted. ±10% tolerance is indicated by a silver dot. ±5% tolerance by a gold dot. No tolerance dot is used for ±20%.



Dimensions—Inches (Millimeters)

Case Size	A Max.	B Max.	C Max.	D
MMW	.100 (2.54)	.050 (1.27)	.040 (1.02)	.030 (.76) ±.015 (±.38)
MMU	.125 (3.18)	.070 (1.78)	.040 (1.02)	.050 (1.27) ±.015 (±.38)
MMF	.165 (4.19)	.120 (3.05)	.070 (1.78)	.100 (2.54) ±.020 (±.51)
MMM	.225 (5.72)	.185 (4.70)	.075 (1.91)	.150 (3.81) ±.020 (±.51)
MML	.290 (7.37)	.220 (5.59)	.110 (2.79)	.180 (4.57) ±.025 (±.64)
MMS	.310 (7.87)	.230 (5.84)	.130 (3.30)	.200 (5.08) ±.025 (±.64)
MMJ	.475 (12.07)	.375 (9.53)	.150 (3.81)	.300 (7.62) ±.025 (±.64)

Leads: W leads are 33 AWG, .007 ± .001 (.18 ± .025) diameter
U, F, M leads are 30 AWG, .010 ± .002 (.25 ± .051) diameter
L, S, J leads are 26 AWG, .016 ± .002 (.41 ± .051) diameter
All anode leads are 1.625 ± .125 (41.3 ± 3.18) long
All cathode leads are 1.375 ± .125 (34.9 ± 3.18) long



APPLICATIONS

FOR FILTERING • COUPLING • BY-PASSING • TIMING

These precision, microminiature polar capacitors are suitable for general filtering, coupling, bypassing, and noncritical RC timing applications to 85°C without derating and to 125°C with derating to 2/3 WVDC (Except MMW case size). Very favorable capacitance to volume ratios make them especially suited to high density applications such as found in avionics systems, subminiature communications equipment, and thick film circuitry.

PERFORMANCE CHARACTERISTICS

Capacitance—Measured at +25°C and 120Hz on a polarized capacitance bridge with a maximum polarizing voltage of 2.2 vdc and a maximum ac signal of 1.0 volts rms.

Tolerance—Except for the MMW and MMU case sizes, Standard tolerance is ±20% with ±10% or ±5% tolerance available in all case sizes (.01 MFD and above in the W case size). 10% decade values are offered in ±10% or ±5% tolerance.

Dissipation Factor—Measured simultaneously with capacitance as above. See Part Number Table for maximum +25°C, 120 Hz values.

DC Leakage Current—With rated WVCD applied through a 1000 ohm resistor for 5 minutes maximum, DCL values in µA at +25°C will not exceed those shown in the Part Number Table. At 85°C, DCL values will not exceed 10 times Part Number Table values. At 125°C with 2/3 rated WVDC applied, DCL values will not exceed 15 times Part Number Table values.

Operating Voltage—Capacitors will operate reliably up to rated WVDC AT +85°C and to +125° C with linear derating to 2/3 WVDC (With the exception of the MMW case size which is limited to +85°C operation). Capacitors will withstand peak voltages in the reverse direction equal to 15% of the dc rating at +25°C, 10% at +55°C, and 5% at +85°C. Ac ripple voltage should be limited so that the forward dc voltage plus peak ac voltage does not exceed rated WVDC.

Surge Voltage—At +85°C and at 60-second intervals, capacitors withstand 1000 30-second applications at 130% rated WVDC.

Moisture Resistance—Following Method 106, MIL-STD-202 testing, capacitors will meet initial dc leakage requirements. Capacitance will be within ±10% of initial values.

Life Test—After 2,000 hours +85°C with rated WVDC applied, capacitors will meet initial dc leakage and DF requirements. Capacitance will not change more than ±10% from original values.

MECHANICAL

Construction—Tantalum pellets are encased in polyester sleeves and sealed with a special moisture resistant epoxy resin. This rugged, fully insulated package withstands a one minute application of a 100 volt potential applied between the leads shorted together and an encircling metal foil envelope.

Leads—Leads are solder coated (W case size leads are gold plated) pure nickel wire suitable for soldering or welding. Tested in accordance with MIL-C-55365, .007" diameter leads withstand an 8 oz pull, .010" diameter leads a 1 lb. pull, and .016 diameter leads a 3 lb. pull. All lead diameters withstand 5 rotations twist.

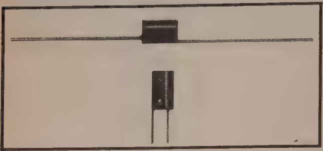
SUBMINIATURE MINITAN CORDWOOD MZ SERIES



APPLICATIONS
FOR FILTERING • COUPLING • BY-PASSING • TIMING

These precision, microminiature polar capacitors are suitable for general filtering, coupling, bypassing, and noncritical RC timing applications to +85°C without derating and to +125°C with derating to 2/3 WVDC. Very favorable capacitance to volume ratios make them especially suited to high density applications such as found in avionics systems, subminiature communications equipment, and thick film circuitry.

PERFORMANCE CHARACTERISTICS

Capacitance—Measured at +25°C and 120Hz on a polarized capacitance bridge with a maximum polarizing voltage of 2.2 vdc and a maximum ac signal of 1.0 volts rms.

Tolerance—Except for MZY and MZP case sizes, standard tolerance is ±20% with ±10% or ±5% tolerance available in all case sizes. 10% decade values are offered in ±10% or ±5% tolerance.

Dissipation Factor—Measured simultaneously with capacitance as above. See Part Number Section for maximum +25°C, 120 Hz values.

DC Leakage Current—With rated WVDC applied through a 1000 ohm resistor for a maximum of 5 minutes, at 25°C. DCL values in µA will not exceed those shown in the part number section.
at 85°C—10 times the value
at 125°C— 15 times the value (at 2/3 rated voltage).

Operating Voltage—Capacitors will operate reliably up to rated WVDC at +85°C and to +125°C with linear derating to 2/3 WVDC. Capacitors will withstand peak voltages in the reverse direction equal to 15% of the dc rating at +25°C, 10% at +55°C, and 5% at +85°C. Ac ripple voltage should be limited so that the forward dc voltage plus peak ac voltage does not exceed rated WVDC.

Surge Voltage—At +85°C and at 60-second intervals, capacitors withstand 1000 30-second applications of 130% rated WVDC.

Temperature—No derating is required between −55°C and +85°C. Between +85°C and +125°C, derate linearly to 2/3 WVDC.

Moisture Resistance—Following Method 106, MIL-STD-202 testing, capacitors will meet initial dc leakage requirements. Capacitance will be within ±10% of initial values.

Life Test—After 2,000 hours +85°C with rated WVDC applied, capacitors will meet initial dc leakage and DF requirements. Capacitance will not change more than ±10% from original values.

MECHANICAL

Construction—Tantalum pellets are encased in polyester sleeves and sealed with a special moisture resistant epoxy resin. This rugged, fully insulated package withstands a one minute application of a 100 volt potential applied between the leads shorted together and an encircling metal foil envelope.

Leads—Leads are solder coated pure nickel wire suitable for soldering or welding. Tested in accordance with MIL-C-55365, .010 diameter leads withstand a 1 lb. pull and .016 diameter leads withstand a 3 lb. pull. All lead diameters withstand 5 rotations twist.

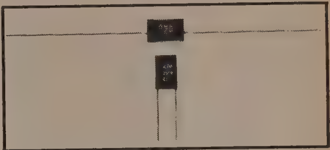
All others are 30 AWG, .010 ±.002 (.25±.051) diameter
All leads are 1.625 ±.125 (41.3 ±3.18) long
Cap and WVDC are printed on NS case



APPLICATIONS

FOR FILTERING • COUPLING • BY-PASSING • TIMING

These precision, microminiature nonpolar capacitors are intended specifically for high density packaging applications where occasional or continuous voltage reversals occur. No dc bias is required. Weldable/solderable leads and a wide range of shapes, case sizes, and lead configurations facilitate application to a broad range of miniaturized electronic circuitry.

PERFORMANCE CHARACTERISTICS

Capacitance—Measured at +25°C and 120Hz on a polarized capacitance bridge with a maximum polarizing voltage of 2.2 vdc and a maximum ac signal of 1.0 volts rms.

Tolerance—Standard tolerance is ±20% with ±10% or ±5% tolerance available in all case sizes. 10% decade values are offered in ±10% or ±5% tolerance.

Dissipation Factor—Measured simultaneously with capacitance as above. See Part Number Table for maximum +25°C, 120 Hz values.

DC Leakage Current—With rated WVDC applied through a 1000 ohm resistor for 5 minutes maximum, DCL values in µA at +25°C will not exceed those shown in Part Number Table. At 85°C DCL values will not exceed 10 times Part Number Table values. At +125°C with 2/3 rated WVDC applied, DCL values will not exceed 15 times Part Number Table values.

Operating Voltage—Capacitors will operate at +85°C and to +125°C with linear derating to 2/3 rated voltage. Dc biasing is not necessary. Peak ac voltage plus dc voltage should not exceed rated voltage.

Surge Voltage—At +85°C and at 60-second intervals, capacitors withstand 1000 30-second applications of 130% rated WVDC.

Moisture Resistance—Following Method 106, MIL-STD-202 testing, capacitors will meet initial dc leakage requirements. Capacitance will be within ±10% of initial values.

Life Test—After 2000 hours at +85°C with rated WVDC applied, capacitors will meet initial dc leakage and DF requirements. Capacitance will not change more than ±10% from original values.

MECHANICAL

Construction—Tantalum pellets are encased in polyester sleeves and sealed with a special moisture resistant epoxy resin. This rugged, fully insulated package withstands a one minute application of a 100 volt potential applied between the leads shorted together and an encircling metal foil envelope.

Leads—Leads are solder coated pure nickel wire suitable for soldering or welding. Tested in accordance with MIL-C-55365, .010 diameter leads withstand a 1 lb. pull and .016 diameter leads a 3 lb. pull. All lead diameters withstand 5 rotations twist.

Marking—Capacitance value is shown by means of standard EIA color code dots. Because the polyester cases are black, black dots are omitted. ±10% tolerance is indicated by a silver dot, ±5% tolerance by a gold dot. No tolerance dot is used for ±20%. MNS case size is type marked all other case sizes are color coded.

Solid Tantalum Capacitors

SUBMINIATURE MINIDIPS MD SERIES

APPLICATIONS

For Filtering • Coupling • By-Passing • Timing

These subminiature, polar tantalum capacitors are suitable for general filtering, coupling, by-passing, and non-critical RC timing applications to +85°C without voltage derating. Intended specifically for commercial and industrial applications. Minidip Series capacitors feature subminiature size and superior performance at a reasonable cost.

PERFORMANCE CHARACTERISTICS

Capacitance—Measured on a polarized capacitance bridge with a maximum polarizing voltage of 2.2 vdc and a maximum ac signal of 1.0 volts rms.

Tolerance—Standard tolerance is ±20%.

Dissipation Factor—Measured simultaneously with capacitance as above.

Operating Voltage—Capacitors will operate reliably up to rated WVDC at +85°C without derating. Ac ripple voltage should be limited so that the forward dc voltage plus peak ac voltage does not exceed rated WVDC.

Temperature Range—(−55°C to +85°C) without voltage derating.

Surge Voltage—At +85°C and at 60-second intervals, capacitors withstand 1000 30-second applications of 130% rated WVDC.

Life Test—After 2000 hours at +85°C with rated WVDC applied, capacitors will not exceed 150% of the initial dc leakage and D.F. limits. Capacitance will not change more than ±10% from the initial value.

MECHANICAL

Construction—Minidip Series capacitors feature subminiature tantalum anodes, sealed in high stability, moisture resistant epoxy.

Leads—Leads are solder coated, high purity nickel wire suitable for either soldering or welding. They will withstand a 1 lb. pull.

Marking—Capacitance value in pF is shown by means of standard EIA color code rings. Polarity and rated voltage is indicated by a colored dot.

Solid Tantalum Capacitors

SUBMINIATURE TANTALUM CHIPS MC SERIES

APPLICATIONS

For Filtering • Coupling • By-Passing • Timing

Microminiature MC chip capacitors are designed specifically for hybrid, thick film, and microcircuit applications where mounting space is critical and where conventionally packaged capacitors may not be used. The MC series capacitors are suitable for general coupling, filtering, by-passing, and non-critical timing applications over the temperature range of −55°C to +125°C and over the capacitance range .1 to 100µF. Extended capacitance values are available on special order.

PERFORMANCE CHARACTERISTICS

Capacitance—Measured on polarized capacitance bridge with a maximum polarizing voltage of 2.2 vdc and a maximum ac signal 1. 0 volts rms. See Part Number Table for available ratings.

Tolerance—Standard tolerance is ±20%, except for the MCU case size (+40, −20%). ±10% and ±5% tolerances are available in all case sizes. 10% decade values are offered in ±10% or ±5% tolerances.

DC Leakage Current—With rated dc voltage applied through a 1000 ohm resistor in series with the capacitor. DCL will not exceed the values shown in Part Number Table. At +85°C, DCL values will not exceed 10 times Part Number Table values. At +125°C with ⅔ rated WVDC applied, DCL values will not exceed 15 times Part Number Table values.

Operating Voltage—Capacitors will operate reliably up to rated WVDC at +85°C and +125°C with linear derating to ⅔ WVDC. Ac ripple voltage should be limited so that the forward dc voltage plus peak ac voltage does not exceed rated WVDC.

Temperature—No derating is required between −55°C and +85°C. Between +85°C and +125°C, derate linearly to ⅔ WVDC.

Surge Voltage—At +85°C and at 60-second intervals, capacitors withstand 1000 30-second applications of 130% rated WVDC.

Life Test—After 2000 hours at +85°C with rated WVDC applied, capacitors will meet initial dc leakage and DF requirements. Capacitance will not change more than ±10% from initial values.

MECHANICAL

Construction—Tantalum pellets are coated with 60/38/2 (2% silver) eutectic solder suitable for reflow solder mounting. The negative terminal is the capacitor body itself. The positive terminal is a solder coated nickel wire.

Lead Attachment—Positive leads may be attached by conventional welding or soldering techniques. Negative terminal attachment is accomplished by reflow soldering. Soldering technique, time, and temperature are critical to reliable performance and circuit yields.

electrocube capacitors

Special service on non-standard ratings, sizes or packages.

Capacitors, in nearly any value, type, case configuration or size can be furnished by Electrocube, on special order with short delivery. We'll design them to a particular requirement or make them to your specifications. We'll supply metal cases including bath tubs, tubular and rectangular hermetically sealed units, as well as epoxy, and wrap and fill types. More than 4,000 standard units are also available. Representative data for standard units are presented on the following pages. Information on other case styles, voltages and dielectrics is available on request.

Size reductions. Electrocube can supply a full line — more than 800 different units in six case styles and four voltage ratings — that require as little as 39% of the volume of standard metallized mylar units. Volume reductions of as much as 30% are possible with Electrocube metallized polycarbonate capacitors made with .00008 gauge film.

Plug-in packages. Six different sizes, both 14 and 16 lead DIP units are available for automatic insertion. Each package will accommodate as many as seven or eight capacitors. These units save package space and assembly time.

EMI filters. We also design and produce filters for a wide range of applications. Electrocube filters have been used in such projects as Apollo, Minuteman and the C-5A. We can supply subminiatures to multicircuit to high power and screen room filters — .1 to 500 Amp, 1 to 5,000 VDC, DC to 1,000 Hz. **(See page 1•553)**

RC networks. Our RC networks are tough enough to take up to 2,000,000 arcs, sparks or noise transients. Standard molded units are rated 125 to 500 VAC, 200 to 2,000 VDC. Molded or metal case units can be furnished to your requirements.

Ballasts. We can supply weight saving custom units to meet MIL specs and almost any lamp or supply requirement.

Transformers. Electrocube manufactures wire wound and foil wound transformers, both laminated and C core, toroids and special inductors. Through company funded development and testing, Electrocube introduced the first commercially available autotransformers in 10KVA and lower ratings, and has developed processing techniques that make these devices reliable and economical. We also can supply aluminum foil chokes with advantages similar to those of foil wound transformers. (See pgs. 2•1736, 2•1737)

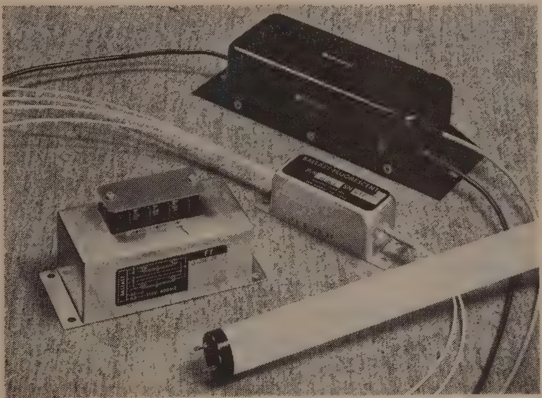
Ballasts



Electrocube has designed and produced a wide variety of fluorescent ballasts for airborne and ground systems installation, as well as selected commercial applications. These lightweight units are offered in 60 Hz and 400 Hz versions, and feature load factor correction, burnout protection and cold weather starting.

Ballasts have been produced for operation on DC and to 15 KHz, for fixed or dimmable circuits. Either leading or lagging power factors may be specified, and burnout protection can be provided against tube rectification. For cold weather applications, ballasts have been designed for normal operation in temperatures to −10°C.

While these ballasts are intended for particular customer needs, the company's modular approach to design and production, and the large inventory of existing designs accumulated over many years, enhances the probability of satisfying new requirements efficiently and economically.

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

New From ERIE | Low Profile VARI-Thin®

CERAMIC TRIMMER CAPACITORS

ERIE STYLE 513

3 TIMES SIZE
ACTUAL SIZE

ONLY .196″ (5mm) DIAMETER

Outstanding Features

- Only .196″ (5mm) diameter x .080″ (2mm) high
- Ideal for wide range of products requiring real miniaturized capacitance trimming.
- Operates efficiently at -55°C to +125°C
- Available in your choice of three terminal arrangements.
- Ceramic base seats directly on module substrates or circuit boards. No metal or mechanical attachments protruding beneath the base plane.
- Monobloc® Rotor design offers optimum stability for higher capacitance ranges. Eliminates need to use unstable higher K dielectric materials. Monobloc construction offers greater ruggedness which cannot be achieved when using single plate construction, particularly with fragile Hi-K Dielectric materials.

DIMENSIONS IN INCHES
For dimensions .125″, tolerance is ±.005
For dimensions .126″, tolerance is ±.015
Except as noted.

The smallest trimmer now gets smaller . . . this describes ERIE's new Style 513 VARI-Thin Ceramic Trimmer Capacitor. Only .196″ in diameter and .080″ high the ERIE 513 is perfect for electronic quartz watches, avionics apparatus, communications equipment, oscilloscopes, crystal oscillators, crystal filters . . . an almost endless variety of applications requiring miniaturized capacitance trimming. The tiny 513 VARI-Thin is available with three terminal arrangements as shown at left. Today ERIE VARI-Thin Trimmer Capacitors are found in many popular electronic quartz watches . . . principally due to their small size, excellent performance and accurate trimming capability.

SPECIFICATIONS

Working Voltage .... See Table Below
Dielectric Strength .... 2.5 times WVDC for 1 to 5 seconds
Operating Temperature Range .... —55°C to +125°C
Q Factor @ 1MHz .... 500 Min. (Dielectric Code A)
200 Min. (Dielectric Code G)
Torque .... 0.3 to 2.0 oz. in.
Qualification Specification .... ERIE Spec. 513

ORDERING DATA and CAPACITANCE RANGES

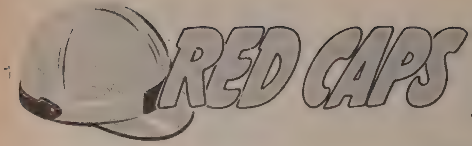
ERIE



50 and 100 VOLT CERAMIC CAPACITORS

RED CAP dielectrics are manufactured by ERIE's exclusive Monobloc Process® . . . the most modern proven ceramic film technology. This advanced capability affords a broad range of capacitance values and a wide selection of temperature characteristics . . . in the smallest practical sizes . . . with proven reliability.

Lower value capacitors incorporate electrically and mechanically rugged, single plate. High capacitance values are obtained by stacking parallel plates with noble metal electrodes and firing at very high temperatures to form an inherently reliable fuzed monolithic "bloc."

RED CAPS are encapsulated with JET-SEAL, a hard, bright polymeric coating, formulated to provide mechanical and electrical protection under the most severe environmental conditions.

RED CAPS meet or exceed all applicable requirements of Mil-C-20 and Mil-C-11015.

RED CAPS 500 VOLT ERIE

CERAMIC CAPACITORS

Erie High Voltage Red Caps are designed for applications where compactness and light weight are critical. Where higher voltages are required than are available in standard monolithic capacitors. Where replacement for larger size mica capacitors is advantageous. Where reliability of standard dual capacitors is not sufficient.

The range of temperature characteristics available adapts these capacitors from the ultra stable requirements of tuned circuits to the general purpose needs for coupling and by-passing. Filter Networks, Power Supplies, Transmitters, and more ideal applications for Erie High Voltage Red Cap Ceramic Capacitors.

These small size, very reliable 500 Volt Capacitors are available in a full range of capacitance values. Red Caps are manufactured by Erie's exclusive Monobloc Process® . . . a modern, advanced ceramic film technology. They feature . . . high insulation resistance, shock resistance, small size, and Jet Seal encapsulant . . . a hard, bright polymeric coating.

Application	Catalog Type	Description	Voltage Range	UF Range	Temperature Range	Bulletin Reference	Market Usage
For polar and nonpolar coupling, filtering, decoupling, bypass, energy storage and timing in military and high-performance industrial amplifiers, transmitters, receivers, servo systems, and navigation systems.	29F	Standard and high-voltage tantalum foil; MIL-C-3965: **CL20, CL21, CL22, CL23, CL24, CL25, CL26, CL27, CL30, CL31, CL32, CL33, CL34, CL35, CL36, CL37, CL51, CL52, CL53, CL54, CL70, CL71, CL72, CL73.** Tubular and rectangular	Up to 450 VDC	0.15 to 3500 μf	−55C to 85C or 125C	GEP-1812	Military, Industrial
High-reliability type for military or aerospace use where hermetic seal and extreme reliability are prime factors.	16K	Hermetic seal tantalum foil; MIL-C-39006: CLR25, CLR27, CLR35, CLR37.	Up to 150 VDC	0.15 to 580 μf	−55C to 125C	GEP-1858	Military
For polar applications where no reverse voltage is expected—coupling, decoupling, filtering, bypass, energy storage and timing in military and high-performance industrial amplifiers, transmitters, receivers, servo systems, and navigation systems.	69F	Tantalum porous anode; MIL-C-3965: CL64, CL65, CL55 Tubular and rectangular	Up to 125 VDC	1.7 to 2400 μf	−55C to 125C	GEP-1814	Military, Industrial
	69F2000	Extended capacitance tantalum porous anode. Tubular only.	Up to 125 VDC	22 to 1800 μf	−55C to 125C	GEP-1842	Military Industrial
For polar applications where no reverse voltage is expected — coupling, decoupling, filtering, bypass, energy storage and timing in military and high-performance industrial equipment for severe environmental conditions requiring hermetic seal.	69F3000	Glass-to-metal hermetic seal tantalum porous anode; MIL-C-3965: CL66, CL67.	Up to 125 VDC	1.7 to 560 μf	−55C to 125C	GEP-1846	Military Industrial
	69F4000	Glass-to-tantalum hermetic seal tantalum porous anode; MIL-C-39006: CLR65.	Up to 125 VDC	1.7 to 560 μf	−55C to 125C	GEP-1857	Military
For polar applications where no reverse voltage is expected—coupling, filtering, decoupling, bypass, energy storage and timing in industrial and entertainment amplifiers, transmitters, receivers, servo systems, and navigation systems, within temperature capabilities.	62F	Porous anode subminiature tantalum.	Up to 60 VDC	0.1 to 325 μf	−55C to 85C	GEC-1840	Industrial
	69F900	Subminiature tantalum porous anode	Up to 60 VDC	3.3 to 450 μf	−55C to 85C	GEP-1841	Industrial
For bulk filtering and energy storage in military and high-performance or standard industrial power supplies, including computer usage and welding equipment.	86F	High performance, high volumetric efficiency	Up to 450 VDC	75 to 540,000 μf	−40C to 65C, 85C	GEC-1813	Industrial
	88F 92F	Long life, high ripple current	Up to 150 VDC	170 to 180,000 μf	−40C to 85C	GEP-1861 GEP-1860	Industrial
For filtering, bypass, decoupling, and coupling in entertainment-type radio, TV, high-fidelity systems, and in industrial instruments and test equipment.	84F	Tubular aluminum electrolytic	Up to 450 VDC	2 to 18,000 μf	−40C to 85C	Consult GE Sales Engineer	Industrial, Entertainment

Application	Catalog Type	Description	Voltage Range	UF Range	Temperature Range	Bulletin Reference	Market Usage
For circuits in test, measurement, control, and communications equipment of all types, where high-quality film-foil units are an economic choice.	75F	Polyester film-foil. Epoxy-encapsulated. Welded radial leads. Units have mounting feet and precise dimensions, for high-density packaging.	50 to 600V	.0010 to 1 µf	−55C to 125C	GEP-1816	Industrial
For low-voltage printed-circuit board applications where board space is at a premium.	65F	Polyester film and aluminum foil roll, compressed and packaged in a regular epoxy case with radial leads.	50V only	.0010 to 1.5 µf	−55C to 85C	GEC-1834	Industrial
For use where size, weight, cost, and reliability give advantage over metal-clad tubulars, molded, or ceramic case units.	61F 63F AE	Polyester film-foil roll, wrap and -pot, with axial leads. 63F meets performance requirements of MIL-C-27287.	Up to 300V	.0010 to 2 µf	−55C to 125C	GEC-1833 GEP-1853 GEC-1819	Industrial, Military
	74F51	Same as 61F except with polycarbonate film dielectric	100 or 200V	.0010 to 1 µf	−55C to 125C	GEP-1854	Industrial
For manufacturing and test equipment, electronic timers and control, communications equipment, and other forms of industrial electronic equipment where small size is required.	BA	Metallized polyester film roll, wrap-and-pot, with axial leads.	100 or 200V	0.1 to 10 µf	−55C to 125C	GEC-1815	Industrial
	74F01	Same as BA except with metallized polycarbonate film.	200V	0.1 to 10 µf	−55C to 125C	GEP-1855	Industrial
General-purpose d-c capacitors for filtering, blocking, bypass, and arc-suppression in power supplies, control circuits, and other d-c circuit functions.	23F	Paper/Pyranol® in drawn metal cases.	400 to 12,500 VDC,	0.05 to 35 µf	−55C to 85C	Consult GE Sales Engineer	Industrial
Specially designed for such SCR applications as phase control, frequency multipliers and changers, power supply filters, time ratio controls, inverters, and rectifier spike suppression.	28F	Paper, metallized paper, and film dielectrics with very low internal losses and high peak current carrying capability.	200 to 2000 VDC, 115 to 700 VAC	0.25 to 150 µf	−55C to 80C	GEA-8688	Industrial
General-purpose a-c capacitors for motor and transformer applications. New Pyranol II impregnant multiplies life and increases reliability.	45F	Paper/Pyranol II in drawn oval cases.	200 to 720 VAC	0.5 to 55 µf	−30C to 70C	GEA-8691	Industrial
General-purpose a-c capacitors for transformer or motor-run applications in geographical areas where the use of polychlorinated biphenyl (PCB) impregnant is undesirable or prohibited.	26F	Paper/ECONOL* in drawn metal cases. ECONOL is the name of General Electric's new biodegradeable, low-toxicity impregnant. *Trade-mark of General Electric Co.	330 to 660 VAC	0.5 to 55 µf	−55C to 70C	Consult GE Sales Engineer	Industrial
For high-voltage d-c rectifier power supply filters, and high-voltage blocking and bypass in communications, radar and other high-voltage circuits.	14F	Paper/Film oil impregnated in all-welded steel rectangular case of leak-proof construction.	5000 to 20,000 VDC	0.67 to 150 µf	−40C to 105C	GEP-1752	Industrial
For light-duty energy storage-discharge duty, such as photoflash applications.	14F	Paper/Pyranol in fabricated steel cases.	1000 to 10,000 VDC	12.5 to 640 µf	0 to 40C	GEP-1751	Industrial

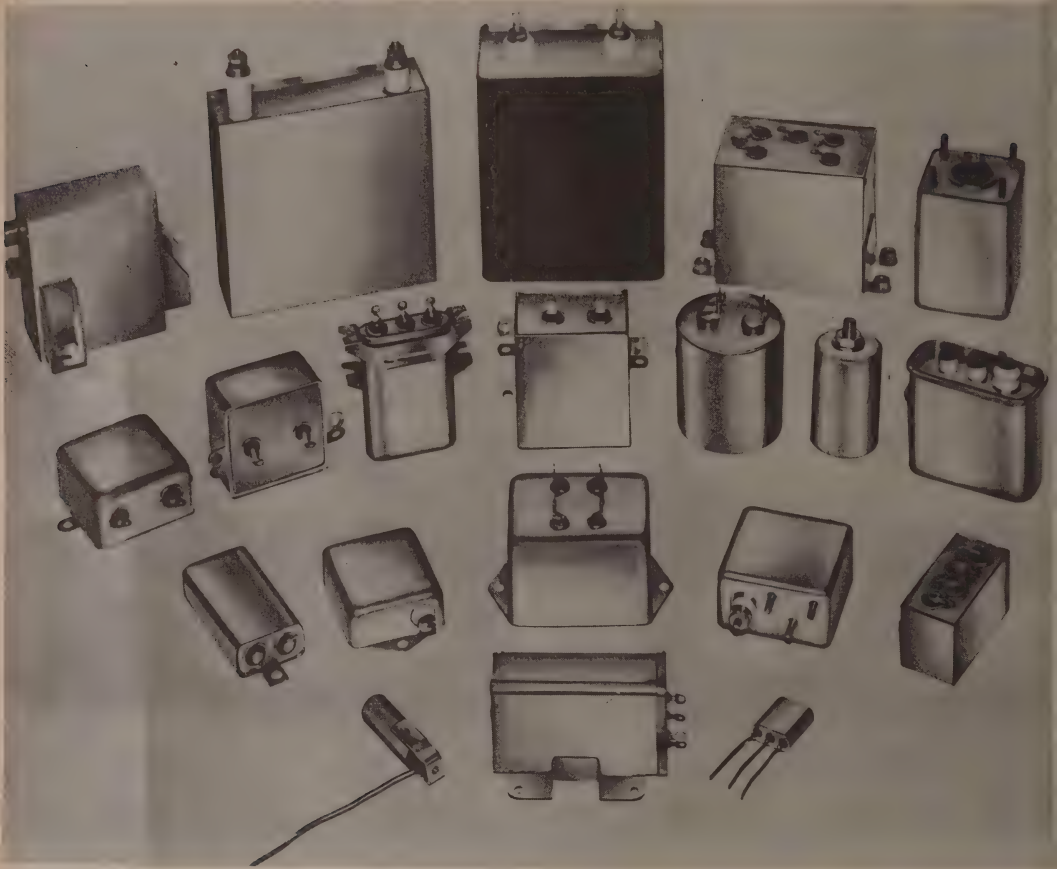
standard and special capacitors designed to individual specifications



The Gudeman Company has long been an established leader in the field of manufacturing special capacitors to customer's individual specifications.

Pictured above are just a few examples of the variety of styles and configurations available. There are literally thousands of designs for special capacitors in our files which have been produced over the years for satisfied users. The unique flexibility of The Gudeman Company with respect to such specials is available for use in your application.

This flexibility of design and fabrication covers not only mechanical or physical configurations but extends to the use of most dielectric materials presently available.

The examples shown above have been manufactured utilizing such dielectrics as: paper, paper-mylar, mylar, metallized mylar, polystyrene, mylar-polystyrene, teflon, metallized teflon, polycarbonate, metallized polycarbonate, metallized paper, metallized paper-mylar and irradiated polyethylene. Other dielectric materials are presently under investigation for use with both standard and special capacitors alike.

Impregnants used in conjunction with special items are: micro-crystalline wax, silicone oil, chlorinated diphenyl, mineral oil, polybutene, "perma-fil" special epon resins, and many special combination impregnants for specific applications.

Capacitor enclosures are available for standard or unusual geometric outlines with standard or special hardware as dictated by application.

As circuit design requires, units are available in multiple sections of large banks, with matched values, if necessary. Combinations of dielectric materials are also available for such "modules."

The Gudeman Company offers a unique service with respect to special capacitors with the over-all capabilities of "long and short run" facilities, engineering in depth and a closely governed Quality Control system. The Quality Control operation offers additional advantages relative to complete qualification testing facilities for quality assurance testing if necessary. The "QC" department has monitored over 60,000,000 unit hours of testing on our line of high reliability capacitors and is well versed in statistical analysis where required.

We might add that our manufacturing experience in the line of high reliability capacitors allows us to constantly improve on the reliability of all capacitors, standard or special. The feedback of information in this product line is incorporated into the design and fabrication techniques of all other lines to reduce potential "failure modes."

The Gudeman Company offers its design-engineering-production staff for consultation on your special capacitor requirements. An unusual "design-comparison" file often results in substantial savings to users in both time and money with improved performance in the capacitor component.

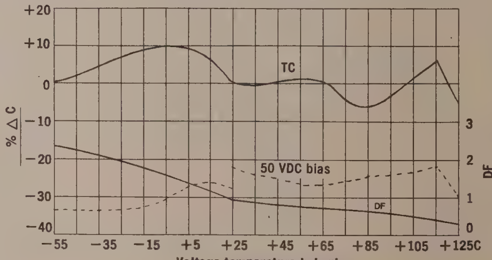
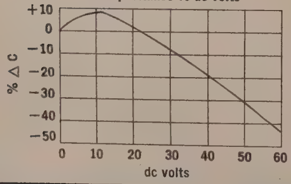
typical performance curves

from 1.0 MFD units aged 500 HRS

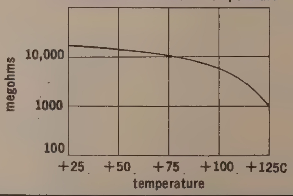


Voltage-temperature behavior

capacitance vs dc volts



insulation resistance vs temperature



features

A. Compact — no other smaller units known — an outstanding achievement
B. Style — popular radial CK06 series.
C. Stability — 15% TC, −55°C to +125°C. (EIA X7R) meets BX/BR characteristics through most applications — a unique positive trend TC
D. D F— low dissipation factor even at negative temperature range
E. Voltage — rated 50 VDC, 125 VDC Hi-pot, (typical breakdown 400-600 VDC)
F. IR — insulation resistance exceptionally high at all temperatures

construction

These special dielectric capacitors are formulated to produce a temperature characteristic (TC) which tends to be positive over most of the temperature range. They have superb multilayer technology with dense layers and are processed to eliminate the problem of internal delaminations and flaws which seem to plague others. A full soldered lead attachment using high temperature solder (MP+224°C) and encapsulated in a pre-molded shell with a tough moisture resistant epoxy.

specifications

general

Standard capacitors have 10% tolerance and solder coated copper leads. Marking includes Mfg. - Cap. and Tol. (Mil code) - Voltage - Part Number

A. Temperature Range — −55°C to +125°C
B. Capacitance — 1.0 MFD through 5.0 MFD, 10% tolerance
C. Leads — solder coated copper
D. Case — pre-molded, epoxy or epoxy "dipped"

electrical

A. Voltage — 50 VDC rated, 125 VDC Hi-pot
B. Measurement — 25°C, 1 VRMS, 1 KHz
C. Dissipation Factor — 2.5% maximum
D. Insulation Resistance — +25°C — 1000 MEGOHM-MICROFARADS +125°C — 100 MEGOHM-MICROFARADS
E. Temperature Characteristic — 15% (EIA X7R)
F. Environmental — Gudeman monolithic ceramic capacitors are designed to meet the requirements of MIL-C-39014

Q.C. NOTE: High voltages will temporarily change capacitance. Units can be de-aged to time zero (remove voltage and hi-pot history) by heating to +150°C for one hour.

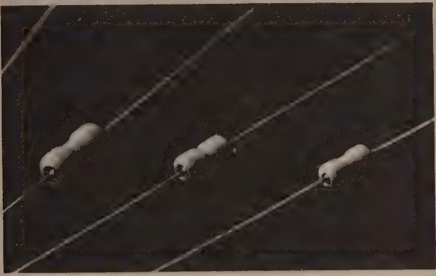
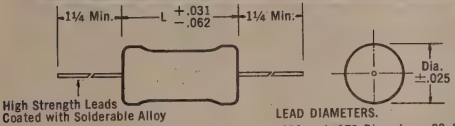
miniature tubular polycarbonate dielectric capacitors

series 357 "PCG" −55°C to +125°C

Sealed in Non-Metallic Cases 100 VDC and 200 VDC





LEAD DIAMETERS.
.138 and .170 Diameters: 22 AWG
.204 Diameter and larger: 20 AWG

specifications

DISSIPATION FACTOR:
Less than .25% when measured at or referred to a frequency of 1,000 CPS at +25°C.

INSULATION RESISTANCE:
The minimum insulation resistance when measured with an applied potential of 100 to 200 volts, but not to exceed the rated voltage, shall be as follows:

TEMPERATURE	MEGOHMS MINIMUM
At + 25°C	150,000
At + 85°C	15,000
At +125°C	1,000

TEST VOLTAGE:
Shall withstand a DC voltage equal to 200% of the rated voltage for one minute at a temperature of +25%, ±5°C.

ACCELERATED LIFE TEST:
Shall withstand an accelerated life test of 250 hours with 140% of the voltage rating, applied at the applicable high ambient temperature, per MIL-C-25C. Not more than one failure in 18 pieces tested shall be allowed.

VOLTAGE RATINGS:
These capacitors are designed to operate over the temperature range of −55°C to +85°C at full rated DC voltage and up to +125°C with working voltages as follows:

+85°C	+125°C
200 VDC	100 VDC
100 VDC	50 VDC

LEAD PULL TEST:
These capacitors shall withstand a five (5) pound pull applied axially for one minute.

LEAD BEND TEST:
Leads shall be bent without breakage about the point of egress from the capacitor. First 90 degrees in one direction then back to the original position, and the 90 degrees in the opposite direction.

CAPACITANCE CHANGE WITH TEMPERATURE:
The capacitance change shall not exceed the following values with reference to the +25°C capacitance value:

TEMPERATURE	% CAP. CHANGE
− 55°C	−2% Maximum
+ 85°C	±1.25% Maximum
+125°C	±2% Maximum

HUMIDITY TEST:
Series 357 capacitors are not intended to be operated where humidity is a problem. This series is intended for use in circuits which are encapsulated or hermetically sealed.

MARKING:
Small size of units limits marking information to the following: capacity, voltage, series prefix (357), Gudeman or trademark.

SPECIAL CAPACITORS:
Capacitance values, voltages and sizes not listed in this bulletin will be furnished upon request.

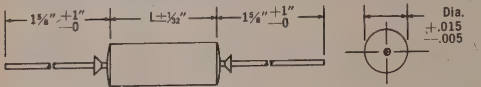
outline drawing

Standard leads consist of solid, bare, tinned wire. Special nickel leads are available for applications requiring a high degree of weldability.



LEADS: 24 gauge: .175 and .195 Dia.; 22 gauge: .235 and .312 Dia.; 20 gauge: .400 Dia. and larger case sizes.
For sleeving add .020 max. to Dia. and 1/16 to nominal case length.

specifications

CAPACITANCE AND TOLERANCE

The capacitance limits at +25°C are determined by the specified tolerance. Capacitors are measured at or referred to a frequency of 1000 cps.

DISSIPATION FACTOR

Less than .15% at 1000 cps. at +25°C.

INSULATION RESISTANCE

The charging potential is equal to the specified operating voltage for a given temperature. The minimum electrification time is two minutes. Listed below are minimum values:

Temperature	Nominal Capacitance Mfd.	R X C Megohms X mfd.	R Megohms
+25°C	Greater than .5	50,000	
	Smaller than .5		100,000
+85°C	Greater than .5	5,000	
	Smaller than .5		10,000
+125°C	Greater than .5	500	
	Smaller than .5		1,000

TEST VOLTAGE

Shall withstand a DC voltage equal to 200% of the rated voltage for one minute at a temperature of +25°C, ±5°C.

ACCELERATED LIFE TEST

Shall withstand an accelerated life test of 250 hours with 140% of applied rated voltage at applicable high test temperature. Only one failure in 12 capacitors tested shall be allowed. A failure is defined as the following:
A) If the capacitor has a short or open circuit.
B) If the capacitance has changed more than 5% from its original value.
C) If the insulation resistance is less than 50% of the specified value above.
D) If the DF is greater than 20% of its initial specified value.

TEMPERATURE AND IMMERSION CYCLING

Shall meet all requirements of the applicable paragraph of the latest issue of MIL-C-19978.

MOISTURE RESISTANCE

Designed to meet all requirements of the applicable paragraph of the latest issue of MIL-C-19978.

VIBRATION

Designed to withstand the Grade 3 vibration tests of the applicable paragraph of the latest issue of MIL-C19978.

A-C VOLTAGE RATING:

(—55°C to +85°C Ambient)

D-C Voltage Rating	400 cps
100	65
200	120
300	200
400	240
600	250

LEAD PULL TEST

Shall withstand a steady pull force of 5 lbs. applied axially to a capacitor lead for one minute.

LEAD BENDING TEST

The leads shall withstand without breakage the following stresses performed near the point of egress: bend 90 degrees in one direction, then back to the original position and 90 degrees in the opposite direction.

CAPACITANCE CHANGE WITH TEMPERATURE

The change of capacitance with reference to the actual value at ∓25°C does not exceed the following limits.

TEMPERATURE	CHANGE OF CAPACITANCE
—55°C to +125°C	2%

100 V.D.C.

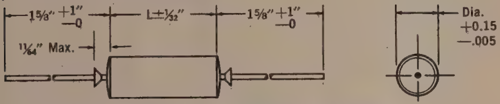
outline drawing

Standard leads consist of solid, bare, tinned wire. Nickel or gold plated leads per MIL-STD 1276 are also available.



Leads: 22 gauge: .235 and .312 Dia.; 20 gauge: .400 and larger
For sleeving add .032 to dia. and 1/16 to the nominal case length.

specifications

CAPACITANCE AND TOLERANCE
The capacitance limits at +25°C are determined by the specified tolerance. Capacitors are measured or referred to a frequency of 1000 CPS.

DISSIPATION FACTOR
Less than .3% from +25°C to +125°C at 1000 CPS.

INSULATION RESISTANCE
The charging potential is equal to the specified operating voltage for a given temperature. The electrification time is two minutes. Minimum values are:

Temperature	Nominal Capacitance MFD	R X C Megohms X MFD	R Megohms
+25°C	Greater than .5	25,000	
	Smaller than .5		50,000
+125°C	Greater than .5	200	
	Smaller than .5		500

TEST VOLTAGE
Shall withstand a DC voltage equal to 200% of the rated voltage for one minute at a temperature of +25°C.

ACCELERATED LIFE TEST
Shall withstand an accelerated life test of 1000 hours with 140% of applied rated voltage at ∓125°C with one failure allowed in 18 capacitors tested. A failure is defined as:
- A. If the capacitor has a short or open circuit
- B. If the capacitance has changed more than 1.5% from its original measured value
- C. If the insulation resistance is less than 50% of the specified value at +25°C
- D. If the DF is greater than .5% at +25°C

TEMPERATURE AND IMMERSION CYCLING
Meets the requirements of the applicable paragraph of MIL-C-19978.

MOISTURE RESISTANCE
Meets the requirements of the applicable paragraph of MIL-C-19978.

VIBRATION
Shall withstand Grade 3 vibration tests of the applicable paragraph of MIL-C-19978.

AC VOLTAGE RATING (—55°C to ∓105°C Ambient)

DC VOLTAGE RATING	AC VOLTAGE RATING @400 CPS
100	70
200	140
400	240
600	330

LEAD PULL TEST
Shall withstand a steady pull force of 5 lbs. applied axially for one minute.

LEAD BENDING TEST
The leads shall withstand without breakage the following stresses performed near the point of egress: bend 90 degrees in one direction, then back to the original position and 90 degrees in the opposite direction.

CAPACITANCE CHANGE WITH TEMPERATURE
Values below are guaranteed performance. Typical values are lower than those stated.

Rated Voltage	Temperature	Maximum Capacitance Change*
100VDC - 200VDC	+25°C to +125°C	+ .5 % — .75%
100VDC - 200VDC	+25°C to —55°C	— .25% —1.5 %
400VDC - 600VDC	+25°C to +125°C	+1.5 % — .75%
400VDC - 600VDC	+25°C to — 55°C	—1.0 % —1.5 %

*For capacitance values greater than .01 mfd. Values of .01 mfd. and less exhibit same change as 400-600 VDC units.

specifications

INSULATION RESISTANCE

The minimum insulation resistance when measured with an applied potential of 100 volts and an electrification time of two minutes shall be as follows:

At 25°C—75,000 megohm-mfds. minimum, but need not exceed 200,000 megohms

At 85°C—4000 megohm-mfds. minimum, but need not exceed 8000 megohms.

At 125°C—250 megohm-mfds. minimum, but need not exceed 500 megohms.

At 165°C—50 megohm-mfds. minimum, but need not exceed 100 megohms.

NOTE—The above IR characteristics are very conservative and it can be generally expected that they will be much higher than specified. The Gudeman engineering dept. believes that in introducing a new line of capacitors a conservative view point be maintained, thereby proffering a component which will offer the greatest degree of reliability.

POWER FACTOR

The power factor of these capacitors shall be no greater than .5 percent when measured at 1000 cps at 25°C.

ACCELERATED LIFE TEST

These capacitors shall withstand an accelerated life test of 250 hours at 165°C with an applied voltage of 140 percent of rated voltage on units not exceeding .05 watt seconds.

One failure in 12 samples permitted.

TEST VOLTAGE

These capacitors shall withstand a DC voltage equal to 200 percent of the rated voltage for one minute at a temperature of 25°C.

MOISTURE RESISTANCE AND VIBRATION

These capacitors shall meet the requirements for Moisture Resistance and Vibration of Specification MIL-C-25A.

CAPACITANCE CHANGE

The capacitance change shall not be greater than —2 percent to +6 percent from —65°C to +165°C when compared to the nominal value measured at +25°C.

specifications

DISSIPATION FACTOR
The dissipation factor shall not exceed 1.0% when measured at or referred to a frequency of 1,000 CPS at +25°C.

INSULATION RESISTANCE
The minimum insulation resistance when measured with an applied potential of 80 to 500 volts, but not to exceed the rated voltage, shall be as follows:

At + 25°C 50,000 megohm-mfds minimum but need not exceed 150,000 megohms.
At + 85°C 5,000 megohms-mfds minimum but need not exceed 15,000 ohms.
At + 125°C 50 megohms-mfds minimum but need not exceed 300 megohms.

TEST VOLTAGE
Shall withstand a DC voltage equal to 200% of the rated voltage for one minute at a temperature of +25%, ±5°C.

ACCELERATED LIFE TEST
Shall withstand an accelerated life test of 250 hours with 140% of the voltage rating, applied at the applicable high ambient temperature, per MIL-C-25C. Not more than one failure in 18 pieces tested shall be allowed.

VOLTAGE RATINGS
These capacitors are designed to operate over the temperature range of —55°C to +85°C at full rated DC voltage and up to +125°C with working voltages as follows:

+85°C	+125°C
600 VDC	300 VDC
400 VDC	200 VDC
200 VDC	150 VDC
80 VDC	50 VDC

MOISTURE ASSISTANCE
Capacitors shall withstand 500 hours of 95% relative humidity at 40°C. Voltage will not be applied. Upon completion of test, units will be dried for four hours. Minimum insulation resistance at 25°C. will be 25,000 megohm-mfds but need not exceed 75,000 megohms. Not more than one failure in 12 shall be permitted.

MARKING
Small size of units limits marking information to the following: capacity, voltage, series prefix (356), Gudeman or trademark.

LEAD PULL TEST
Shall withstand a five (5) pound pull applied axially for one minute.

LEAD BENDING TEST
Leads shall be bent without breakage about the point of egress from the capacitor. First 90 degrees in one direction then back to the original position, and then 90 degrees in the opposite direction.

CAPACITANCE CHANGE WITH TEMPERATURE
The capacitance change shall not exceed the following values with reference to the +25°C capacitance value:

TEMPERATURE	% CAP. CHANGE
— 55°C	—10% Maximum
+ 85°C	+ 5% Maximum
+125°C	+16% Maximum

80 VDC

specifications

DISSIPATION FACTOR

Less than 1.0% when measured at or referred to a frequency of 1000 CPS at +25°C, per MIL-C-25C.

INSULATION RESISTANCE

The minimum insulation resistance when measured with an applied potential of 50 to 500 volts, but not to exceed the rated voltage, shall be as follows:

At + 25°C 50,000 megohm-mfds minimum but need not exceed 150,000 megohms.

At + 85°C 1000 megohm-mfds minimum but need not exceed 6000 ohms.

At + 125°C 50 megohm-mfds minimum but need not exceed 300 megohms.

TEST VOLTAGE

Shall withstand a DC voltage equal to 200% of the rated voltage for one minute at a temperature of +25°C, ±5°C.

ACCELERATED LIFE TEST

Shall withstand an accelerated life test of 250 hours with 140% of the voltage rating, applied at the applicable high ambient temperature, per MIL-C-25C.

The 355, and 338 series capacitors are furnished with high strength leads coated with a solderable alloy in the sizes shown below:

355 SERIES	GAUGE	338 SERIES
Up to .156 Dia.	#24 AWG	"T" Dim. up to .156
.156 Dia. to .375 Dia.	#22 AWG	"T" Dim. .156 to .375
.375 to .750 Dia.	#20 AWG	"T" Dim. .375 to .750
Greater than .750 Dia.	#18 AWG	"T" Dim. Over .750

MOISTURE RESISTANCE

Shall withstand the moisture resistance requirements as specified in military specification MIL-C-25C.

VIBRATION-ACCELERATION

Shall withstand the Grade 3 vibration-acceleration requirements of MIL-C-25C.

VOLTAGE RATINGS

Designed to operate over the temperature range of —55°C to +85°C at full rated DC voltage and up to +125°C with working voltages as follows:

+85°C	+125°C
600 VDC	300 VDC
400 VDC	200 VDC
200 VDC	150 VDC
150 VDC	100 VDC
50 VDC	50 VDC

LEAD PULL TEST

Shall withstand a five (5) pound pull applied axially for one minute, per MIL-C-25C.

LEAD BEND TEST

Shall be bent without breakage about the point of egress from the capacitor. First 90 degrees in one direction then back to the original position, and then 90 degrees in the opposite direction, per MIL-C-25C.

CAPACITANCE CHANGE WITH TEMPERATURE

The capacitance change shall not exceed the following values with reference to the +25°C capacitance value:

TEMPERATURE	% CAP. CHANGE
− 55°C	—10% Maximum
+ 85°C	+ 5% Maximum
+125°C	+16% Maximum

DIM. TOLERANCES:
Add following to Part No. for tolerance: —M = ±20%; —K = ±10%; —J = ±5%; —B = ±2%.
Add prefix "F" to specify outer fibreglas wrap in lieu of Mylar.

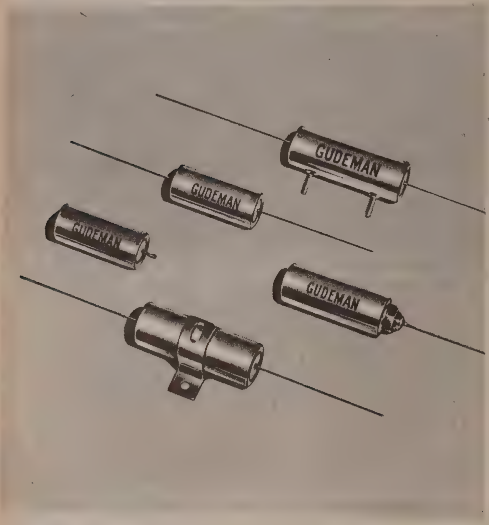
TUBULAR METALLIC CASE
−65°C TO +85°C
LOW DIELECTRIC ABSORPTION



specifications

TEST VOLTAGE

Withstand 200% of rated voltage for 1 minute at 25°C.

LIFE TEST

Not more than one failure of 12 units on test for 250 hours when tested at 140% of rated voltage at 85°C.

DISSIPATION FACTOR

Less than .05% at 1000 Hz and 25°C up to 1. ufd and less than .2% for values over 1. ufd.

INSULATION RESISTANCE

The minimum insulation resistance when measured with an applied potential of 100 volts and an electrification time of two minutes at 25°C shall be as follows: 500,000 megohms x mfd. minimum for capacitance values from 10 mfd. to .33 mfd. For values less than .33 mfd. insulation resistance to be 1,500,000 megohms min. but need not exceed 10,000,000 megohms.

CAPACITOR "Q"

"Q" is greater than 2000 up to 1 megacycle at 25°C.

CAPACITANCE STABILITY

Less than .25% drift per year.

TEMPERATURE COEFFICIENT OF CAPACITANCE

The capacitance change shall not be greater than +1.5% to −.8% from −65°C to +85°C when referred to 25°C capacitance value, or −100 PPM/°C ±30 PPM/°C.

DIELECTRIC ABSORPTION

At 25°C — less than .05% of the initial 100 volts charging voltage shall reappear after charging for ½ hour and immediately discharging for 10 seconds through 1 ohm resistor. Absorption Voltage should be read 5 minutes but not late than 10 minutes after removing shorting bar.

Percent dielectric absorption = V Absorp./V Charge x 100

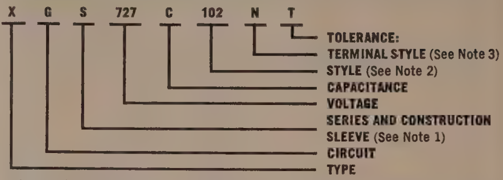
NOTES ON MEASUREMENT OF DIELECTRIC ABSORPTION

Dielectric absorption voltage is a complex phenomena and has been the subject of many studies at the Gudeman Co.

In general, the following holds true:

1. Absorption voltage is approximately proportional to charging time, charging voltage and temperature.
2. It decreases with longer shorting time.
3. Immediately after removal of shorting bar the measured absorption voltage appears low but rises steadily and finally levels off.

example of catalog number



NOTE 1. Insert letter "S" only when insulating sleeve is required.
NOTE 2. Insert the letter for style required. Absence of letter symbol indicates basic style is to be furnished.
NOTE 3. Insert the letter "T" only when solder lug terminals are required in lieu of axial wire lead terminals.

CIRCUIT AND INTERNAL CONSTRUCTION

XG-727 Specifies — one terminal grounded, extended foil construction.
XF-727 Specifies — both terminals insulated, extended foil construction.

VOLTAGE RATING AT 85°C

DC Working Voltage	Symbol
100	B
200	C
400	E
600	F

SPECIAL CAPACITORS

Non-standard capacitance values and tolerances not listed are available upon special request. Polystyrene capacitors may also be obtained in bathtub and in rectangular case styles. The above coding system can be used in like manner to obtain any specific types desired when ordering.

ELECTRICAL AND ENVIRONMENTAL TESTS

Series X-727 Polystyrene capacitors will meet the applicable electrical and environmental requirements of Military Specification MIL-C-25C in addition to the more stringent requirements as specified herein.

CAPACITANCE

The nominal capacitance value is expressed in micro-microfarads by a three digit number. The first two digits are the first two digits of the capacitance value. The last digit designates the number of zeros which follow the first two digits.

CAPACITANCE TOLERANCE

For .0099 mfd. and smaller the Standard Tolerance is ±20%. For .01 mfd. and larger the Standard Tolerance is ±10%.

Tolerance Symbol	Tolerance
—20	±20%
—10	±10%
—5	±5%
—2	±2%
—1	±1%

LEAD SPECIFICATIONS

Standard lead length is 2¼" min. in the following AWG sizes.

Case Diameter	AWG Size
.187	No. 24
.235 to .312	No. 22
.400 and larger	No. 20

SELECTION OF EXTENDED FOIL AND INSERTED TAB CONSTRUCTION

The extended foil construction is generally recommended except where a saving of size and space is of paramount importance and the circuit requirement is such that the applied voltage is not less than 10 volts and the higher loss, due to the inserted tab construction, does not constitute a critical factor in the design of the circuit.

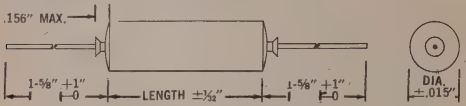
30 VDC THRU 600 VDC

outline drawing



Grounded circuits are available in all sizes: for grounded length subtract 1/16 inch from catalog length.

Case Diameter (Inches)	Lead Gauge (AWG)
.175 and .195	24
.235 and .312	22
.400 and up	20

Standard leads consist of solid, bare, tinned wire. Special nickel leads are available for applications requiring a higher degree of weldability.

specifications

CAPACITANCE AND TOLERANCE
The capacitance limits at ±25°C are determined by the specified tolerance. Capacitors which have a nominal value of 1 MFD or less are measured or referred to a frequency of 1000 cps. Nominal capacitances above 1 MFD are measured at or referred to a frequency of 60 cps.

DISSIPATION FACTOR
Less than 0.6% at +25°C.

INSULATION RESISTANCE
The charging potential is equal to the specified operating voltage for a given temperature. The minimum electrification time is two minutes. Listed below are minimum values:

Temperature	Nominal Capacitance Mfd	R X C Megohms X Mfd	R Megohms
25°C	Greater than .5	50,000	
	Smaller than .5		100,000
85°C	Greater than .1	5,000	
	Smaller than .1		50,000
125°C	Greater than .02	100	
	Smaller than .02		5,000
150°C	Greater than .01	10	
	Smaller than .01		1,000

TEST VOLTAGE
Designed to withstand a test potential equal to 200% of the rated voltage for two minutes at 25°C.
The test voltage must be applied and discharged through a current limiting resistance of approximately 1000 ohms.

VOLTAGE RATING ABOVE 85°C
Derate above +85°C at a rate of 1.2% of rated voltage per degree C.

ACCELERATED LIFE TEST
Capacitors are designed to withstand a test potential equal to 140% of the rated voltage at the test temperature used for a period of 250 hours. One failure in 25 samples tested is permitted. The life test voltage must be applied and discharged through a current limiting resistance of approximately 1,000 ohms.

TEMPERATURE AND IMMERSION CYCLING
Designed to meet all requirements of the applicable paragraph of the latest issue of MIL-C-25.

MOISTURE RESISTANCE
Designed to meet all requirements of the applicable paragraph of the latest issue of MIL-C-25.

VIBRATION
Designed to withstand the Grade 3 vibration tests of the applicable paragraph of the latest issue of MIL-C-25.

AC VOLTAGE RATING
Designed to operate safely up to the following AV voltages at 85°C.

NOMINAL VOLTAGE VDC	AC — VOLTAGES AT 85°C (rms)	
	Up to 120 cps	Up to 400 cps
100	70	56
200	140	70
400	280	110
600	420	160

For 105°C operation the listed AC voltages should be derated to 60% of the 85°C values.
If both AC and DC voltages are present the sum of the DC voltage and the amplitude of the AC voltage must not exceed the specified DC-rating at a given temperature.

LEAD PULL TEST
Designed to withstand a steady pull force of 5 lbs. applied axially to a capacitor lead for one minute.

LEAD BENDING TEST
The leads withstand without breakage the following stresses performed near the point of egress: bend 90 degrees in one direction, then back to the original position and 90 degrees in the opposite direction.

LEAD SPECIFICATIONS: Solid tinned leads 1⅝" long +1" —0 tolerance. No. 22 AWG for .235" and .312" Dia. cans. No. 20 AWG for larger case diameters. For Series F371 (Both Terminals Insulated From Case) add 1/16" to above case length for diameters larger than .400". For diameters .400 and smaller add 3/32" to above case length.

specifications

DISSIPATION FACTOR

Maximum dissipation factor shall be 0.1% at +25°C when measured at a frequency of 1000 CPS. Maximum dissipation factor shall be 0.2% at +200°C.

INSULATION RESISTANCE

The minimum insulation resistance when measured with an applied potential of between 200 and 500 volts and an electrification time of 2 minutes, but never greater than rated voltage shall be as follows:

At + 25°C	125,000 megohm-mfds capacitance values .5 MFD and greater. 250,000 megohms for cap. values below .5 MFDS.
+ 85°C	40,000 meg-mfds for cap. values 1. MFD and greater. 40,000 megohms for cap. values below 1. MFD.
+ 125°C	5,000 meg x mfds for cap. values .25 MFD and greater.

TEST VOLTAGE

Shall withstand a DC voltage equal to 200% of the rated voltage for 2 minutes. Test voltage will be applied and discharged through a current limiting resistor of one Ohm per volt.

LIFE TEST VOLTAGE

Shall withstand an accelerated life test of 250 hours at +200°C and 140% of rated voltage. One failure in 12 samples permitted.

CAPACITANCE DRIFT

Capacitance will drift less than 2% from its initial value at 25°C after being temperature cycled from —55°C to 200°C.

CAPACITANCE "Q"

The "Q" of Gudeman Series 371 will average 5000 up to +125°C and will exceed 500 at +200°C.

DIELECTRIC ABSORPTION

At +25°C less than .05% of the initial 100 volts charging voltage shall reappear after charging for ½ hour and immediately discharging for 10 seconds through a one ohm resistor. Absorption voltage should be read 5 minutes, but not later than 10 minutes, after removing shorting bar. Percent dielectric absorption =V absorption x 100.
V charge

MOISTURE RESISTANCE AND VIBRATION

Shall meet the requirements for moisture resistance and vibration of Specification MIL-C-25A.

CAPACITANCE CHANGE WITH TEMPERATURE

Capacitance change shall not be greater than —4% at 200°C or +2.5% at —55°C relative to the nominal value at +25°C.

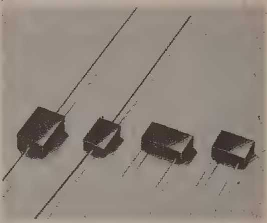
ULTRAMINIATURE
SEALED IN RECTANGULAR EPOXY CASES
−55°C TO +125°C WITHOUT DERATING
SERIES 317 AXIAL LEADS
SERIES 318 RADIAL LEADS



specifications

OPERATING TEMPERATURE RANGE
317-318 series capacitors are designed to operate within the temperature range of −55°C to +125°C without voltage derating.

CAPACITANCE AND TOLERANCE
The capacitance limits at +25°C are determined by the specified tolerance. Capacitance is measured at or referred to a frequency of 1000 Hz.

DISSIPATION FACTOR
Th dissipation factor at +25°C is less than 0.5% at 1000 Hz.

TEST VOLTAGE
Capacitors shall withstand a DC voltage equal to 200% of the rated voltage for one minute at a temperature of +25°C, ±5°C. Test will be applied through resistor of 1 ohm per volt.

INSULATION RESISTANCE
The minimum insulation resistance when measured at rated voltage but not to exceed 500 VDC shall be as follows:
At +25°C 100,000 megohm-mfds. minimum but need not exceed 200,000 megohms.
At +125°C 100 megohm-mfds. minimum but need not exceed 2000 megohms.

ACCELERATED LIFE TEST
Capacitors shall withstand an accelerated life test of 250 hours with 140% of applied rated voltage at applicable high test temperature. Only one failure in 12 capacitors tested shall be allowed. A failure is defined as the following:
A) If the capacitor has "opened".
B) If the capacitance has changed more than 5% from its original value.
C) If the insulation resistance is less than 30% of its original specified value.
D) If the dissipation factor is greater than 1%.

CAPACITANCE CHANGE WITH TEMPERATURE
The change of capacitance with reference to the actual value at +25°C shall not exceed ±2%.

LEAD SPECIFICATIONS
The 317 and 318 series capacitors are furnished with solid-bare, tinned lead. See table in part number listing for lead gauge.
NOTE: Nickel "A" weldable leads are available with capacitors specified in this bulletin, add letter "W" as a suffix on the part number.

LEAD PULL TEST
These capacitors shall withstand a five (5) pound pull applied axially for one minute.

LEAD BEND TEST
Leads shall be bent without breakage about the point of egress from the capacitor. First 90 degrees in one direction then back to the original position and then 90 degrees in the opposite direction.

HUMIDITY TEST
Capacitors shall withstand 250 hours of 95% relative humidity at 40°C. Voltage will not be applied. Upon completion of test, units will be dried for four hours. Minimum product of insulation resistance @ 25°C shall be 33% of the original specified value.
The capacitance is not to change more than 5% of its original value.
The dissipation factor shall not exceed 1.5%.

series 317

THE GUDEMAN CORPORATION

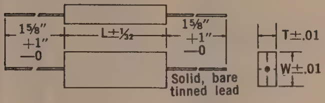
capacitors and EMI filters

340 WEST HURON STREET ▪ CHICAGO ILLINOIS 60610 ▪ 312 337 7400 ▪ TWX 910 221 3863

series 317 & 318 continued

outline drawings
series 317

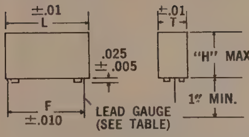
See Part No. Table for Lead Gauge.
Dimensions noted in inches.



NOTE: .42x.31x18 cases have one round standoff between leads.

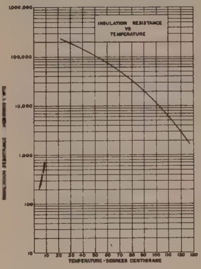
.55 x .31 x 18 has two standoffs between leads.

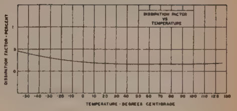
series 318

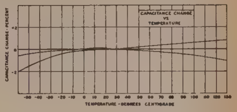


NOTE: Nickel "A" weldable leads are available with capacitors specified in this bulletin, add letter "W" as a suffix on the part number.

typical curves







example of part number

K 105 A 317

CAPACITANCE TOLERANCE:
B = ±2% J = ±5%
K = ±10% M = ±20%

CAPACITANCE: The nominal capacitance value expressed in picofarads is identified by a three digit number: The first two digits represent significant figures and the last digit specifies the number of zeros to follow.

VOLTAGE RATING: A = 50

SERIES NUMBER:
317 metallized polycarbonate dielectric extended foil construction premolded plastic case, axial leads with resin end seal.

318 metallized polycarbonate, extended foil construction premolded plastic case, radial leads with resin end seal.

series 318

specifications

CAPACITANCE AND TOLERANCE

The capacitance limits at +25°C are determined by the specified tolerance.

Capacitance is measured at or referred to a frequency of 1000 Hz.

DISSIPATION FACTOR

The dissipation factor at +25°C is less than 0.3% at 1000 Hz.

INSULATION RESISTANCE

The charging potential is equal to the specified operating voltage for a given temperature. The electrification time is two minutes. Listed below are minimum values:

TEMPERATURE	CAPACITANCE (mfd.)	RXC (megohms x mfd.)	R (megohms)
25°C	>.5	100,000	
	<.5		200,000
125°C	>.5	1000	
	<.5		2000

ACCELERATED LIFE TEST

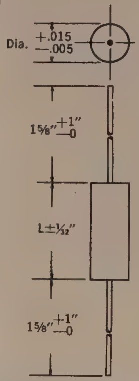
Capacitors shall withstand an accelerated life test of 250 hours with 140% of applied rated voltage at applicable high test temperature. Only one failure in 18 capacitors tested shall be allowed. A failure is defined as the following:

A) If the capacitor has "opened."

B) If the capacitance has changed more than 5% from its original value.

C) If the insulation resistance is less than 50% of its original value.

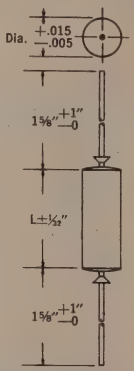
Series 409



Dim. Include Solder Eyelet

LEADS: 24 gauge: .175 and .195 Dia.; 22 gauge: .235 and .312 Dia.; 20 gauge: .400 Dia. and larger case sizes.

Series 410



LEADS: 24 gauge: .175 and .195 Dia.; 22 gauge: .235 and .312 Dia.; 20 gauge: .400 Dia. and larger case sizes.

For Sleeving Add .020 max to Dia. and 1/32 ± 1/32 to length

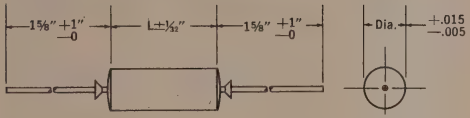
—55°C TO +125°C WITHOUT DERATING
100 TO 400 VDC

outline drawing



Standard leads consist of solid, bare, tinned wire. Special nickel leads are available for applications requiring a higher degree of weldability.

LEADS: 24 gauge: .175 and .195 Dia.; 22 gauge: .235 and .312 Dia.; 20 gauge: .400 Dia. and larger case sizes.

For sleeving add .020 max. to Dia. and .032 $^{+.032}_{-.015}$ extension to each end of capacitor.

specifications

CAPACITANCE AND TOLERANCE
The capacitance limits at +25°C are determined by the specified tolerance. Capacitors are measured or referred to a frequency of 1000 cps.

DISSIPATION FACTOR
The dissipation factor at +25°C is less than 0.3% at 1000 cps.

INSULATION RESISTANCE
The charging potential is equal to the specified operating voltage for a given temperature. The minimum electrification time is two minutes. Listed below are minimum values:

Temperature	Nominal Capacitance Mfd	R X C Megohms X mfd	R Megohms
25°C	Greater than .5	100,000	
	Smaller than .5		200,000
125°C	Greater than .5	1,000	
	Smaller than .5		2,000

TEST VOLTAGE
Shall withstand a DC voltage equal to 200% of the rated voltage for one minute at a temperature of +25°C, ±5°C. Test will be applied through resistor of 1 ohm per volt.

TEMPERATURE AND IMMERSION CYCLING
Designed to meet all requirements of the applicable paragraph of the latest issue of MIL-C-18312.

ACCELERATED LIFE TEST
Shall withstand an accelerated life test of 250 hours with 140% of applied rated voltage at applicable high test temperature. Only one failure in 18 capacitors tested shall be allowed. A failure is defined as the following.
A) If the capacitor has "opened."
B) If the capacitance has changed more than 5% from its original value.
C) If the insulation resistance is less than 50% of its original value.
(D) If the DF is greater than 1%.

MOISTURE RESISTANCE
Designed to meet all requirements of the applicable paragraph of the latest issue of MIL-C-18312.

VIBRATION
Designed to withstand the Grade 3 vibration tests of the applicable paragraph of the latest issue of MIL-C-18312.

A-C VOLTAGE RATING:
(—55C to +85C Ambient)

D-C Voltage Rating	400 cps
100	65
200	120
300	200
400	240

LEAD PULL TEST
Designed to withstand a steady pull force of 5 lbs. applied axially to a capacitor lead for one minute.

LEAD BENDING TEST
The leads shall withstand without breakage the following stresses performed near the point of egress: bend 90 degrees in one direction, then back to the original position and 90 degrees in the opposite direction.

CAPACITANCE CHANGE WITH TEMPERATURE
The change of capacitance with reference to the actual value at +25°C does not exceed the following limits:

TEMPERATURE	CHANGE OF CAPACITANCE
—55°C	2%
+125°C	1%

100 VDC

engineering specifications

BASIC DESCRIPTION
Gudeman 412 series capacitors use a metallized polycarbonate dielectric, hermetically sealed in rectangular metallic, non-magnetic cases with glass-to-metal compression seals.

OPERATING TEMPERATURE RANGE
412 series capacitors are designed to operate within the temperature range of −55°C to +125°C without voltage derating.

CAPACITANCE AND TOLERANCE
The capacitance limits at +25°C are determined by the specified tolerance. Capacitors are measured or referred to a frequency of 1000 cps.

DISSIPATION FACTOR
The dissipation factor at +25°C is less than 0.3% at 1000 cps.

INSULATION RESISTANCE
The charging potential is equal to the specified operating voltage for a given temperature. The minimum electrification time is two mintues. Listed below are minimum values:

Temperature	Nominal Capacitance Mfd.	R X C Megohms X Mfd.	R Megohms
25°C	Greater than .5	100,000	
	Smaller than .5		200,000
125°C	Greater than .5	1,000	
	Smaller than .5		2,000

ACCELERATED LIFE TEST
Capacitors shall withstand an accelerated life test of 250 hours with 140% of applied rated voltage at applicable high test temperature. Only one failure in 18 capacitors tested shall be allowed. A failure is defined as the following:
- A) If the capacitor has "opened."
- B) If the capacitance has changed more than 5% from its original value.
- C) If the insulation resistance is less than 50% of its original value.
- D) If the DF is greater than 1%.

TEST VOLTAGE
412 series capacitors shall withstand a DC voltage equal to 200% of the rated voltage for one minute at a temperature of +25°C, ±5°C. Test will be applied through resistor of 1 ohm per volt.

TEMPERATURE AND IMMERSION CYCLING
This series is designed to meet all requirements of the applicable paragraph of the latest issue of MIL-C-39022.

MOISTURE RESISTANCE
This series is designed to meet all requirements of the applicable paragraph of the latest issue of MIL-C-39022.

VIBRATION
This series is designed to withstand the Grade 3 vibration tests of the applicable paragraph of the latest issue of MIL-C-39022.

AC VOLTAGE RATING:
(−55°C to +85°C Ambient)

DC Voltage Rating	400 cps
50	30
100	65
200	120
300	200
400	240

LEAD PULL TEST
Capacitors of this series are designed to withstand a steady pull force of 5 lbs. applied axially to a capacitor lead for one minute.

LEAD BENDING TEST
The leads shall withstand without breakage the following stresses performed near the point of egress: bend 90 degrees in one direction, then back to the original position and 90 degrees in the opposite direction.

LEAD SPECIFICATIONS
Standard leads consist of solid, bare, tinned wire. Special nickel leads are available for applications requiring a higher degree of weldability.

CAPACITANCE CHANGE WITH TEMPERATURE
The change of capacitance with reference to the actual value at +25°C does not exceed the following limits:

Temperature	Change of Capacitance
−55°C	−2%
+125°C	±1%

SPECIAL CAPACITORS
Capacitance values, voltage ratings, tolerances and sizes not listed in this catalog will be furnished upon request.

ENGINEERING SERVICE
Please feel free to consult our engineering department, without obligation, for assistance on any problem relating to the design, use or application of capacitors.

example of part number

NSE F 412 B 154 S —10

CAPACITANCE TOLERANCE: −20 ±20%; −10 ±10%; −5 ±5%; −1 ±1%.

MODIFICATION: Leave blank if basic style is desired. Insert the following letters to identify a modified style. **S**—Polyester insulating sleeve. (Nominal to the nominal case length.)

CAPACITANCE: Expressed in micro-microfarads by a three-digit number. The first two represent significant figures, the last one the number of zeroes to follow. (Example: .15MFD.)

VOLTAGE: **B**—100VDC; **C**—200VDC; **D**—300VDC; **E**—400VDC; **A**—50VDC; **AX**—75VDC; **Y**—150VDC.

SERIES NUMBER: Identifies the basic capacitor as described in this catalog.

CIRCUIT: **F**—For "Floating" (sizes as listed). **G**—For "Grounded" (subtract 1/16" from floating length).

For units with no solder seal "extension" where high component density exists or for printed circuit board applications; add prefix "NSE" to part number. (Example: NSE F412B1545-10.)

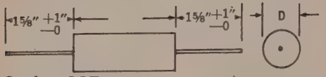
series 396 & 397

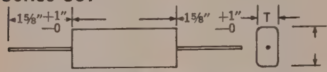
ULTRAMINIATURE TUBULAR (Series 396)
AND FLAT CAPACITORS (Series 397)
SEALED IN NON-METALLIC CASES
WITH PLASTIC RESIN END SEALS
—55°C TO +125°C WITHOUT DERATING
100 VDC TO 200 VDC

outline drawings

Series 396



Series 397



Solid, Bare Tinned Lead
See Part No. Table for Lead Gauge

NOTE: Nickel "A" weldable leads are available!
Add suffix "W" to Part No. for nickel lead.

specifications

CAPACITANCE AND TOLERANCE

The capacitance limits at +25°C are determined by the specified tolerance.
Capacitors are measured or referred to a frequency of 1000 cps.

DISSIPATION FACTOR

The dissipation factor at +25°C shall be less than 0.5% at 1000 cps.

INSULATION RESISTANCE

The charging potential is equal to the specified operating voltage for a given temperature. The minimum electrification time is two minutes. Listed below are minimum values:

Temperature	Nominal Capacitance Mfd.	R X C Megohms X mfd.	R Megohms
25°C	Greater than .5 Smaller than .5	50,000	100,000
125°C	Greater than .5 Smaller than .5	500	1,000

TEST VOLTAGE

Shall withstand a DC voltage equal to 200% of the rated voltage for one minute at a temperature of +25°C, ±5°C. Test voltage will be applied through resistor of 1 ohm per volt.

ACCELERATED LIFE TEST

Shall withstand an accelerated life test of 250 hours with 140% of applied rated voltage at applicable high test temperature. Only one failure in 12 capacitors tested shall be allowed. A failure is defined as the following:

A) If the capacitor has "opened."
B) If the capacitance has changed more than 5% from its original value.
C) If the insulation resistance is less than 50% of the original specified value.
D) If the DF is greater than 1%.

HUMIDITY

Not intended to be operated where humidity is a problem. This series is intended for use in circuits which are encapsulated or hermetically sealed.

LEAD PULL TEST

These capacitors shall withstand a five (5) pound pull applied axially for one minute, per MIL-C-25.

LEAD BEND TEST

Leads shall be bent without breakage about the point of egress from the capacitor. First 90 degrees in one direction then back to the original position and then 90 degrees in the opposite direction.

CAPACITANCE CHANGE WITH TEMP.

The change of capacitance with reference to the actual value at 25°C will not exceed the following limits:

TEMPERATURE	CHANGE OF CAPACITANCE
— 55°C +125°C	—2% ±1%

100 VDC TO 200 VDC

SERIES 322 — RADIAL LEADS

SERIES 323 — AXIAL LEADS

specifications

DISSIPATION FACTOR

The dissipation factor shall not exceed 1.0% when measured at or referred to a frequency of 1,000 CPS at +25°C. Nominal capacitance values above 1.0 mfd. are measured at or referred to a frequency of 60 cps.

INSULATION RESISTANCE

The minimum insulation resistance when measured with an applied potential of 50 to 200 volts, but not to exceed the rated voltage, shall be as follows:
At +25°C 10,000 megohm-mfds. minimum but need not exceed 30,000 megohms.
At +85°C 500 megohm-mfds. minimum but need not exceed 3000 megohms.
At +125°C 10 megohm-mfds. minimum but need not exceed 150 megohms.

ACCELERATED LIFE TEST

Shall withstand an accelerated life test of 250 hours with 140% of applied rated voltage at applicable high test temperature. Only one failure in 12 capacitors tested shall be allowed.
A failure is defined as the following:
A) If the capacitor has "opened" or short circuited.
B) If the capacitance has changed more than 10% from its original value.
C) If the insulation resistance is less than 30% of its specified value.

TEST VOLTAGE

Shall withstand a DC voltage equal to 200% of the rated voltage for one minute at a temperature of +25°C±5°C.

VOLTAGE RATINGS

Designed to operate over the temperature range of —55°C to +85°C at full rated DC voltage and up to +125°C with working voltages as follows:

+85°C	+125°C
200VDC	100VDC
100VDC	50VDC

HUMIDITY TEST

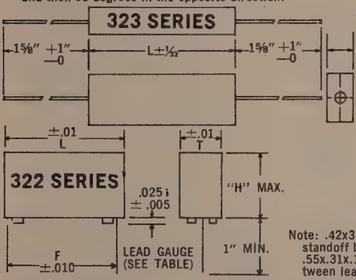
Capacitors shall withstand 250 hours of 95% relative humidity at 40°C. Voltage will not be applied. Upon completion of test, units will be dried for four hours. Minimum product of insulation resistance shall be 5000 megohm-mfd but need not exceed 15,000 megohms.
The capacitance will change not more than 10% of its original value. The dissipation factor shall not increase over 1.5%.

LEAD PULL TEST

Shall withstand a five (5) pound pull applied axially for one minute.

LEAD BEND TEST

Leads shall be bent without breakage about the point of the egress from the capacitor. First 90 degrees in one direction then back to the original position, and then 90 degrees in the opposite direction.



Note: .42x31x.18 case have one round standoff between leads.
.55x.31x.18 has two standoffs between leads.

NOTE: Nickel "A" weldable leads are available, simply add the letter "W" as a suffix on the part number.

Note: Larger case sizes may be supplied in plastic case material other than epoxy. Add following to part no. for tolerance: —M = ±20%; —K = ±10%; —J = ±5%; —B = ±2%.

THE GUDEMAN CORPORATION

capacitors and EMI filters

340 WEST HURON STREET ▪ CHICAGO ILLINOIS 60610 ▪ 312 337 7400 ▪ TWX 910 221 3863

"thinfilm" metallized mylar* dielectric

series 363 & 364

ULTRA MINIATURE FLAT AND TUBULAR CAPACITORS
SEALED IN NON-METALLIC CASES with PLASTIC RESIN END SEALS
—55°C TO +125°C
100 VDC TO 600 VDC

specifications

DISSIPATION FACTOR
The dissipation factor shall not exceed 1.0% when measured at or referred to a frequency of 1,000 CPS at +25°C per MIL-C-25C. Nominal capacitance values above 1.0 mfd. are measured at or referred to a frequency of 60 cps.

INSULATION RESISTANCE
The minimum insulation resistance when measured with an applied potential of 50 to 500 volts, but not to exceed the rated voltage, shall be as follows:

At + 25°C	50,000 megohm-mfds minimum but need not exceed 150,000 megohms
At + 85°C	500 megohm-mfds minimum but need not exceed 3000 megohms
At + 125°C	10 megohm-mfds minimum but need not exceed 150 megohms

TEST VOLTAGE
Shall withstand a DC voltage equal to 200% of the rated vol age for one minute at a temperature of +25°C, ± 5°C.

ACCELERATED LIFE TEST
Shall withstand an accelerated life test of 250 hours with 140% of applied rated voltage at applicable high test temperature. Only one failure in 12 capacitors tested shall be allowed. A failure is defined as the following:

A) If the capacitor has "opened" or short circuited.
B) If the capacitance has changed more than 10% from its original value.
C) If the insulation resistance is less than 30% of its original value.

VOLTAGE RATINGS
Designed to operate over the temperature range of —55°C to +85°C at full rated DC voltage and up to +125°C with working voltages as follows:

+85°C	+125°C
400 VDC	200 VDC
200 VDC	100 VDC
100 VDC	50 VDC

MOISTURE RESISTANCE
Shall withstand the moisture resistance requirements as specified in military specification MIL-C-25C.

VIBRATION-ACCELERATION
These capacitors shall withstand the Grade 3 vibration-acceleration requirements of MIL-C-25C.

LEAD PULL TEST
Shall withstand a five (5) pound pull applied axially for one minute, per MIL-C-25C.

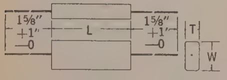
LEAD BEND TEST
Leads shall be bent without breakage about the point of egress from the capacitor. First 90 degrees in one direction then back to the original position, and then 90 degrees in the opposite direction, per MIL-C-25C.

CAPACITANCE TEST WITH TEMPERATURE
The capacitance change shall not exceed the following values with reference to the +25°C capacitance value:

TEMPERATURE	% CAP CHANGE
— 55°C	—10% Maximum
+ 85°C	+ 5% Maximum
+125°C	+16% Maximum

outline drawings

Series 363



NOTE: Nickel "A" weldable leads are available with the capacitors specified in this bulletin, simply add the letter "W" as a suffix on the part number.

DIMENSIONAL TOLERANCES: T & W Under .250 ± .046, .250 & Up ± .062, Length ± 1/16"

.400 and up	20

specifications

CAPACITANCE AND TOLERANCE
The capacitance limits at 25°C are determined by the specified tolerance. Capacitors which have a nominal valu of 1 MFD or less are measured or referred to a frequency of 1000 cps. Nominal capacitances above 1 MFD are measured at or referred to a frequency of 60 cps.

DISSIPATION FACTOR
The dissipation factor at 25°C is less than 1.0%. Reference frequencies are as specified above.

INSULATION RESISTANCE
The charging potential is equal to the specified operating voltage for a given temperature. The minimum electrification time is two minutes. Listed below are minimum values:

Temperature	Nominal Capacitance MFD	R x C Megohms x MFD	R Megohms
25°C	Greater than .333	50,000	
	Smaller than .333		150,000
85°C	Greater than .167	500	
	Smaller than .167		3,000
125°C	Greater than .067	10	
	Smaller than .067		150

TEST VOLTAGE
Designed to withstand a test potential equal to 200% of the rated voltage for two minutes at 25°C.
The test voltage must be applied and discharged through a current limiting resistance of approximately 1000 ohms.

VOLTAGE RATING ABOVE 85°
No derating of the voltage is required for nominal ratings of 200, 400 and 600 VDC. All 100 VDC capacitors, however, are to be derated above 85°C at the rate of 1 VDC per degree C.

ACCELERATED LIFE TEST — AT 125°C
Capacitors are designed to withstand a test potential equal to 140% of the voltage at 125°C for a period of 250 hours.
The life test voltage must be applied and discharged through a current limiting resistance of approximately 1000 ohms.

TEMPERATURE AND IMMERSION CYCLING
Designed to meet all requirements of the applicable paragraph of the latest issue of MIL-C-25.

MOISTURE RESISTANCE
Designed to meet all requirements of the applicable paragraph of the latest issue of MIL-C-25.

VIBRATION
Designed to withstand the vibration tests of the applicable paragraph of the latest issue of MIL-C-25.

LEAD PULL TEST
Capacitors of this series are designed to withstand a steady pull force of 5 lbs. applied axially to a capacitor lead for one minute.

LEAD BENDING TEST
The leads withstand without breakage the following stresses performed near the point of egress: bend 90 degrees in one direction, then back to the original position and 90 degrees in the opposite direction.

CAPACITANCE CHANGE WITH TEMPERATURE
The change of capacitance with reference to the actual value at 25°C does not exceed the following limits:

TEMPERATURE	CHANGE OF CAPACITANCE
— 55°C	— 8%
+ 85°C	+ 5%
+125°C	+18%

AC VOLTAGE RATING
Designed to operate safely up to the following AC voltages at 85°C.

DC VOLTAGE RATING	AC — VOLTAGES AT 85°C (rms) Up to 120 cps	AC — VOLTAGES AT 85°C (rms) Up to 400 cps
100	70	56
200	140	70
400	280	110
600	420	160

For 105°C operation the listed AC voltages should be derated to 60% of the 85°C values.
If both AC and DC voltages are present, the sum of the DC voltage and the amplitude of the AC voltage must not exceed the specified DC-rating at a given temperature.

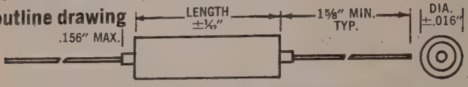
WAX IMPREGNATED — METALLIZED DIELECTRIC
HERMETICALLY SEALED (GLASS TO METAL)
TUBULAR METAL CASE
—55°C TO +125°C WITHOUT DERATING
100 THRU 600 VDC

outline drawing



Standard leads consist of solid, bare, tined wire. Special Nickel leads are available for applications requiring a higher degree of weldability.

LEAD SPECIFICATIONS

Case Diameter (inches)	Lead Gauge (AWG)
.187	24
.235 and .312	22
.400 and up	20

specifications

CAPACITANCE AND TOLERANCE
The capacitance limits at +25°C are determined by the specified tolerance. Capacitors which have a nominal value of 1 MFD or less are measured at or referred to a frequency of 1000 cps. Nominal capacitances above 1 MFD are measured at or referred to a frequency of 60 cps.

DISSIPATION FACTOR
The dissipation factor at +25°C is less than 1.0%. Reference frequencies are as specified above.

INSULATION RESISTANCE
The charging potential is equal to the specified operating voltage for a given temperature. The minimum electrification time is two minutes.

TEMPERATURE	Nominal Capacitance MFD	Voltage VDC	R x C Megohms x MFD	R Megohms
+ 25°C	Greater than .167	ALL	2,000	
	Smaller than .167			12,000
+ 125°C	Greater than .067	100 thru 300 VDC	10	
	Smaller than .067			150
	Greater than .067	400 and 600 VDC	40	
	Smaller than .067			600

TEST VOLTAGE
Designed to withstand a test potential equal to 200% of the rated voltage for two minutes at + 25°C.
The test voltage must be applied and discharged through a current limiting resistance of approximately 1,000 ohms.

VOLTAGE RATING ABOVE 85°C.
No derating of the voltage is required for nominal ratings of 200 through 600 VDC. All 100 VDC capacitors, however, are to be derated above + 85°C at the rate of 1 VDC per degree C.

ACCELERATED LIFE TEST — AT 125°C
Designed to withstand a test potential equal to 140% of the rated voltage at + 125°C for a period of 250 hours.
The life test voltage must be applied and discharged through a current limiting resistance of approximately 1,000 ohms.

TEMPERATURE AND IMMERSION CYCLING
Designed to meet all requirements of the applicable paragraph of the latest issue of MIL-C-25.

MOISTURE RESISTANCE
Designed to meet all requirements of the applicable paragraph of the latest issue of MIL-C-25.

VIBRATION
Designed to withstand the vibration tests of the applicable paragraph of the latest issue of MIL-C-25.

AC OPERATION
51 Series capacitors are designed to operate up to the following AC voltages.

NOMINAL VOLTAGE VDC	AC VOLTAGES AT + 85°C (rms) Up to 120 cps	Up to 400 cps
100	70	56
200	140	70
300	220	96
400	280	110
600	420	160

For + 105°C operation the listed AC voltages should be derated to 60% of the + 85°C values.
If both AC and DC voltages are present, the sum of the DC voltage and the amplitude of the AC voltage must not exceed the specified DC rating at a given temperature.

LEAD PULL TEST
Capacitors of this series are designed to withstand a steady pull force of 5 lbs. applied axially to a capacitor lead for one minute.

LEAD BENDING TEST
The leads withstand without breakage the following stresses performed near the point of egress: bend 90 degrees in one direction, then back to the original position and 90 degrees in the opposite direction.

CAPACITANCE CHANGE WITH TEMPERATURE
The change of capacitance with reference to the actual value at 25°C does not exceed the following limits.

TEMPERATURE	CHANGE OF CAPACITANCE
— 55°C	— 10%
+ 85°C	+ 4%
+ 125°C	+ 13%

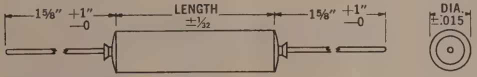
outline drawing



Solid Tinned Wire Leads.

The folowing lead sizes will apply:

.235 and .312 diameter	#22 AWG
.400 diameter and up	#20 AWG

NOTE: Mounting by means of lead wires is not recommended for units larger than .562 x 1 13⁄16″ long

NF STYLE WILL BE FURNISHED WITH #22 AWG LEADS.

specifications

CAPACITANCE AND TOLERANCE
The capacitance shall be within the specified tolerance limits of the nominal rating.
Capacitors of 1.0 MFD or less shall be measured at, or referred to, a frequency of 1000 cycles per second at 25°C. Capacitors greater than 1.0 MFD shall be measured at, or referred to, a frequency of 60 cycles per second at 25°C.

DISSIPATION FACTOR
The dissipation factor shall be a maximum of 1.0% at 25°C.
Capacitors of 1.0 MFD or less shall be measured at, or referred to, a frequency of 1000 cycle per second. Capacitors above 1.0 MFD shall be measured at, or referred to, a frequency of 60 cycles per second.

INSULATION RESISTANCE
Insulation resistance shall be measured at a charging potential of 50 VDC.
The insulation resistance shall equal or exceed the following for capacitance values up to and including 4.0 MFD.

Temperature	Tolerance
25°C—	4000 megohms X mfd or 12,000 megohms, whichever is less
85°C—	100 megohms X mfd or 300 megohms, whichever is less
125°C—	10 megohms X mfd or 150 megohms, whichever is less

For values above 4.0 MFD, the insulation resistance shall equal or exceed the following:

Temperature	Tolerance
25°C—	2000 megohms X mfd
85°C—	50 megohms X mfd
125°C—	5 megohms X mfd

TEST VOLTAGE
Shall withstand a D.C. potential of 200% of rated D.C. voltage at a temperature of 25°C applied for a period not to exceed two minutes, without permanent breakdown.
When the case is not a terminal, they shall withstand a D.C. potential of 200% of rated voltage between the case and the terminals.

LIFE TEST
Shall withstand a test potential of 140% of the rated D.C. voltage at 125°C for 250 hours.
One failure out of twelve (12) samples tested is allowed. A capacitor will be considered to have failed when:

A. The capacitance has changed more than 10% from its original value.
B. The insulation resistance is less than 50% of its original requirements.
C. It exhibits a permanent open or short circuit.

TEMPERATURE & IMMERSION CYCLING
These capacitors shall meet the temperature and immersion cycling test of Military Specification MIL-C-25C.

MOISTURE RESISTANCE
Shall meet the moisture resistance requirements of Military Specification MIL-C-25C.

VIBRATION
Shall withstand the Grade 3 vibration as specified in Military Specification MIL-C-25C.

CORROSION RESISTANCE
These capacitors shall meet the corrosion test of Military Specification MIL-C-25C.

specifications (continued)

LEAD PULL TEST
Shall withstand a pull of 5 lbs. applied axially to the lead for a period of one minute.

LEAD BEND TEST
The leads shall withstand without breakage, a bend at the point of egress from the capacitor first 90° in one direction, back to the original position and then 90° in the opposite direction.

SHOCK
When securely mounted by their normal mounting means, the capacitors shall withstand 3 impact shocks of 50G intensity (18 shocks total) in each direction of each of the three major axis. The time duration of each impulse shock shall be 11 ±1 milli-seconds.
There shall be no intermittent or permanent open or short circuit as a result of this test.

CAPACITANCE CHANGE WITH TEMPERATURE
The Capacitance change at 125°C shall not be greater than 5% of the measured capacitance value at +25°C.
The capacitance change at —55°C shall not be greater than 10% of the measured capacitance value at +25°C.

—55°C TO +85°C WITHOUT DERATING
75% RATING TO 105°C

specifications

HIGH ALTITUDE APPLICATION:
The DC Voltage ratings listed are primarily for application at a barometric pressure between 28 and 32 inches. For high altitude application the permissible DC voltage should never exceed the rated DC voltage and shall be equal to or less than the maximum permissible operating voltage per length of glass tubing as follows:

PERMISSIBLE VOLTAGE RATING FOR HIGH ALTITUDE

Tube Length (in.)	1 3/16	1 9/16	1¾	2¼	2¾	3½	4¼
Max. Volt. at 50,000 ft.	4500	5000	5300	5500	6000	7000	8000
Max. Volt. at 60,000 ft.	2400	2800	3500	4000	4300	4500	4700

RIPPLE VOLTAGE:
The ratings given are the steady-state DC voltage, or the DC voltage plus the permissible ripple voltage wherein the peak value of the permissible ripple voltage shall not exceed:

20% of the rating at 60 cps.
15% of the rating at 120 cps.
8% of the rating at 400 cps.
5% of the rating at 1000 cps.

INSULATION RESISTANCE:
The minimum insulation resistance when measured with an applied potential of 100 to 500 volts shall be as follows:

At 25°C—10,000 megohm-mfds. minimum but need not exceed 20,000 megohms.
At 85°C—100 megohm-mfds. minimum but need not exceed 1000 megohms.
At 105°C—30 megohm-mfds. minimum but need not exceed 300 megohms.

TEST VOLTAGE:
Shall withstand a DC voltage equal to 200% of the rated voltage for five seconds at a temperature of 25°C.

LIFE TEST:
Shall withstand an accelerated life test of 250 hours at 85°C with an applied voltage as follows:

Watt-Second Group	% of Rated Voltage for life test
0. to 0.49 watt-seconds	140
0.5 to 4.9 watt-seconds	130

One failure in 12 samples tested is permitted.

VOLTAGE DERATING:
When operated at high ambient temperature the capacitors shall be derated as follows:

At 85°C	No derating
At 105°C	25% derating

POWER FACTOR:
The power factor at 25°C shall not be more than 1% when measured at or referred to a frequency of 1000 cycles per second.

LEAD PULL TEST
Shall withstand for one minute a steady 5 pound pull applied axially.

VIBRATION:
The GC246 Series capacitors (wire leads) shall be mounted and soldered to rigidly supported terminals and the length of the lead shall be approximately ⅝ of an inch when measured from the capacitor to the supporting terminal. The GC245 Series shall be mounted to brackets.
The capacitors when mounted and subjected to a simple harmonic motion having an amplitude of 0.03 inches (Total excursion 0.06 inches maximum), and the frequency being varied uniformly between 10 to 55 cycles per second and return in approximately one minute. This motion shall be applied for a period of three hours in any direction. During the last ½ hour of vibration measurement shall be made for intermittent contacts, open circuits or short circuits. One failure in six samples tested is permitted.

TEMPERATURE AND IMMERSION CYCLING:
These capacitors shall be subjected to five thermal cycles as follows:

Start at +25°C
Raise to +105°C
Return to +25°C
Reduce to —55°C
Return to +25°C

After the thermal cycle the capacitors shall be subjected to five successive immersion cycles in two tanks of saturated solutions of sodium chloride and water, one at 65°C and the other at 0°C. The period of each cycle shall consist of 60 minutes immersion in each tank. After immersion cycling, the capacitors shall be washed in tap water, surface dried with a clean cloth and dried from 4 to 6 rours at room temperature. Tre capacitor srall meet the following requirements:

Dielectric Strength	125% Rated Voltage
Insulation Resistance	4000 megohms-mfds. minimum but need not exceed 8000 megohms.

In addition, the capacitors shall show no harmful or extensive corrosion and at least 90% of the exposed metallic surfaces of the capacitors shall be protected by the finish.

HIGH ALTITUDE APPLICATION:
The DC Voltage ratings listed are primarily for application at a barometric pressure between 28 and 32 inches. For high altitude application the permissible DC voltage should never exceed the rated DC voltage and shall be equal to or less than the maximum permissible operating voltage per length of glass tubing as follows:

PERMISSIBLE VOLTAGE RATING FOR HIGH ALTITUDE							
Tube Length (in.)	1 3/16	1 9/16	1 3/4	2 1/4	2 3/4	3 1/2	4 1/4
Max. Volt at 50,000 Ft.	4500	5000	5300	5500	6000	7000	8000
Max. Volt at 60,000 Ft.	2400	2800	3500	4000	4300	4500	4700

RIPPLE VOLTAGE:
The ratings given are the steady-state DC voltage, or the DC voltage plus the permissible ripple voltage wherein ahe peak value of the permissible ripple voltage shall not exceed:

20% of the rating at 60 cps.
15% of the rating at 120 cps.
8% of the rating at 400 cps.
5% of the rating at 1000 cps.
1% of the rating at 10,000 cps.

INSULATION RESISTANCE:
The minimum insulation resistance when measured with an applied potential of 500 volts shall be as follows:

At + 25°C—20,000 megohm-mfds. minimum but need not exceed 100,000 megohms.
At +125°C—20 megohm-mfds. minimum but need not exceed 250 megohms.

TEST VOLTAGE:
Shall withstand a DC Voltage equal to 200% of the rated voltage for five seconds at a temperature of +25°C.

ACCELERATED LIFE TEST:
These capacitors shall withstand an accelerated life test at 250 hours at +125°C with an applied voltage as follows:

Watt-Second Group	% of Rated Voltage for Life Test
0. to 0.49 Watt-Seconds	140
0.5 to 4.9 Watt-Seconds	130

One failure in 12 samples tested is permitted.

TEMPERATURE AND IMMERSION CYCLING:
Shall meet the temperature and immersion cycling tests of military specification MIL-C-25C.

POWER FACTOR:
The power factor of the capacitors at +25°C shall not be more than 1% when measured at or referred to a frequency of 1000 cycles per second.

MOISTURE RESISTANCE:
Shall meet the moisture resistance tests of the military specification MIL-C-25C.

VIBRATION:
Shall meet the high frequency vibration requirements of MIL-C-25C.

paper plastic dielectric

series 672

DRAWN RECTANGULAR CASE
−55°C TO +125°C
400 VDC TO 12500 VDC

specifications

ACCELERATED LIFE TEST
These capacitors shall withstand an accelerated life test of 250 hours with 140% of the voltage rating, applied at the applicable high ambient temperature, per MIL-C-25C. Not more than one failure in 24 units tested will be permitted.

TEST VOLTAGE
The 672 Series capacitor shall withstand a DC voltage equal to 200% of the rated voltage between terminals and terminals to case for one minute at a temperature of +25°C to ±5°C.

RIPPLE VOLTAGE
The sum of the peak AC voltage and the applied DC voltage shall not exceed the applicable rated voltage.
The peak AC voltage shall not exceed the percentage of the rated voltage as follows:

20% @ 60 Hz	8% @ 400 Hz	1% @ 10 KHz
15% @ 120 Hz	5% @ 1KHz	

VOLTAGE RATINGS
The 672 Series, temperature symbol E, capacitors are designed for continuous operation over the temperature range of −55°C to +85°C. The 672 Series, temperature symbol K, capacitors are designed for continuous operation over the temperature range of −55°C to +125°C.

CAPACITANCE CHANGE WITH TEMPERATURE
The capacitance change shall not exceed ±10% over the operating temperature range of −55°C to +125°C when referred to the +25°C capacitance value.

DISSIPATION FACTOR
The dissipation factor shall not exceed .5% when measured at or referred to a frequency of 60 Hz at +25°C per MIL-C-19978B.

INSULATION RESISTANCE
The minimum insulation resistance when measured with an applied potential equal to the DC voltage rating or 500 VDC, whichever is less and an electrification time of two minutes shall be as follows:

At +25°C The minimum insulation resistance shall be 20,000 megohms times microfarads, but need not exceed 100,000 megohms.
At +85°C The minimum insulation resistance shall be 300 megohms times microfarads, but need not exceed 2,000 megohms.
At +125°C The minimum insulation resistance shall be 20 megohms times microfarads, but need not exceed 250 megohms.

Insulation resistance to case when the case is not a terminal shall be greater than 50,000 megohms.

MILITARY SPECIFICATION
These capacitors are designed to meet and exceed the requirements of Military Specification MIL-C-19978B, Style CQ72 (MIL-C-199788/3).

MOISTURE RESISTANCE
The 672 Series capacitors shall withstand the moisture resistance requirements as specified in military specification MIL-C-25C.

VIBRATION-ACCELERATION
These capacitors shall withstand the Grade 3 (2,000 cycle) vibration-acceleration requirements of MIL-C-25C. (MIL standard 202B, method 204, test condition B.)

TEMPERATURE AND IMMERSION
These capacitors shall meet the temperature and immersion cycling requirements of MIL-C-25C.

SPECIAL CAPACITORS
Capacitance values, voltages and sizes not listed will be furnished upon request.

THE GUDEMAN CORPORATION

capacitors and EMI filters

340 WEST HURON STREET ▪ CHICAGO ILLINOIS 60610 ▪ 312 337 7400 ▪ TWX 910 221 3863

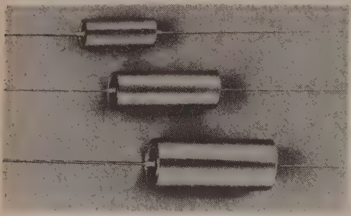
paper plastic dielectric

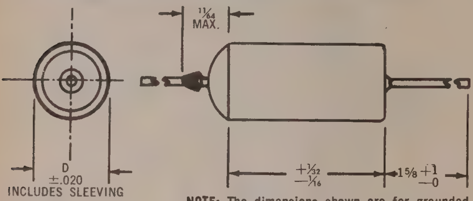
series 462

HIGH RELIABILITY CAPACITORS
HERMETICALLY SEALED (GLASS TO METAL)

TUBULAR METALLIC CASE

—65°C TO +125°C WITHOUT DERATING





NOTE: The dimensions shown are for grounded (XRGS) units. For floating (XRFS) units add 3/32" to length for diameters of .255, .332 and .420. Above .420 diameter, add 1/16" to length.

Furnished with "copper-clad" steel wire leads.

Case Diameter (In.)	AWG Size
.235 to .312	22
.400 to 1.00	20

specifications

XRFS462 units meet all electrical environmental requirements of MIL-C-14157.

INSULATION RESISTANCE

The minimum insulation resistance when measured in accordance with Specification MIL-C-14157 shall be as follows:

At 25°C—15,000 megohm-mfds. for capacitance values .6MFD and greater. 25,000 megohms for capacitance values below .6 MFD.

AT 125°C—20 megohm-mfds. for capacitance values .08 MFD and greater. 250 megohms for capacitance values below .08 MFD.

CAPACITANCE CHANGE FROM +25°C ±5°C.

The maximum capacitance change shall be as follows:

At — 65°C ±3°C . . . + 2%, —10%
At +125°C ±3°C . . . +10%, — 3%

DISSIPATION FACTOR

The dissipation factor when measured at room temperature shall not be more than 0.6%.

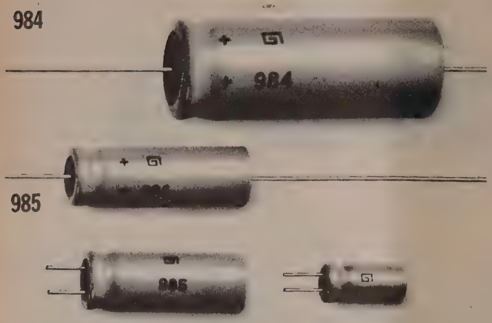
The GI catalog tells you almost everything you need to know about our capacitors. Sub-miniature aluminum electrolytics. Silver dipped mica. Polyester film capacitors. Off the shelf delivery available from your local GI/Miconics distributor.

GENERAL INSTRUMENT CORPORATION

the capacitor company

SUB-MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS −30° TO +85°C GI POLAR TYPE 984 AND 985

SPECIFICATIONS



Construction: Tubular aluminum case with electrical grade rubber end seal and copper tinned terminal wires emerging from the seal. Internal connections are all-welded. A PVC sleeve insulates the case.

Configuration: Type 984 has axial leads. Alternate Type 986 has negative lead brought down side of case under the PVC insulating sleeve. Type 985 is designed for P/C mounting.

Operating Temperature: −30° C to +85° C (continuous) for sizes shown. Special designs available for +85° C and +105° C.

Working Voltage (Vdcw): The maximum continuous voltage which may be applied for the temperature range.

Surge Voltage (Vdcs): The maximum allowable short term (30 second) voltage, including transients and peak ripple which may be applied without damage.

The surge test is performed with a 1000 ohm resistor connected in series with the capacitor. The surge voltage shown in the tables is applied for 30 seconds at a rate of 12 times per hour for 100 hours at +25° C. At the completion of the test, capacitors shall meet the initial DC leakage requirements.

Capacitance: Shown as microfarads (uF) in the tables for each case size and working voltage. Measurement is made by the bridge method at +25° C and 120Hz with a maximum 1.0 volt rms signal applied.

Capacitance Tolerance: The standard tolerance is −10% +75% of rated capacitance from 3 to 50 Vdcw and −10% +50% from 51 to 150 Vdcw. Special tolerances are available: ±10% for 10uF and up; ±20% for 5uF and up.

Polarity: Types 984 and 985 capacitors are polarized for DC operation.

Reverse Voltage: Voltage reversals not exceeding 1.5 volts may be applied without damage.

Leakage Current (DCL): DCL in microamperes (uA) is measured after capacitors have been pre-conditioned by applying rated voltage (Vdcw) for 15 minutes at least 24 hours and not more than 48 hours prior to testing. To test, apply Vdcw to the capacitor with a 1000 ohm resistor in series for 5 minutes. Read DCL in uA. The maximum allowable DCL is determined by:

$$I = .06E\sqrt{C}$$

Where: I = Current in microamperes; E = Rated DC voltage; and C = Rated capacitance in microfarads. Leakage current need not be less than that derived from the formula or the following, whichever is greater:

Rated Vdcw	3	6	12	15	16	25	50	100	150
DCL uA	4	4	4	4	8	8	8	15	30

Dissipation Factor (DF): DF in percent is measured by the bridge method at +25° C and 120Hz with a maximum 1.0 volt rms signal applied. DF shall not exceed:

Rated Vdcw	3	6	12	15	25	50	100	150
DF%	40	35	30	26	19	19	17	15

Equivalent Series Resistance (ESR): $\text{ESR} = \dfrac{\text{DF} \times 10^4}{2\pi fC}$

Where: DF = Dissipation Factor in %; f = frequency (Hertz); and C = Capacitance in microfarads (uF).

Ripple Current: The peak ripple voltage in combination with the DC polarizing voltage shall not exceed 120% of the rated Vdcw nor cause a voltage reversal in excess of 1.5 volts.

The maximum rms ripple current in milliamperes (mA) at +70°C and 120 Hertz which may be applied is:

Case Dia. Code	**B**	**M**	**E**	**G**	**H**	**J**	**K**	**L**
Case Dia. In.	.257	.282	.333	.396	.458	.521	.612	.646
Max. Ripple mA	$8\sqrt{C}$	$9\sqrt{C}$	$10\sqrt{C}$	$15\sqrt{C}$	$20\sqrt{C}$	$25\sqrt{C}$	$30\sqrt{C}$	$35\sqrt{C}$

For maximum ripple current at temperatures less than +70° C and frequencies other than 120 Hertz, multiply the figures derived from the preceding table by:

Temp. °C	Frequency (Hz)			
	60	120	400	2400
70	.8	1.0	1.1	1.4
65	1.6	2.0	2.2	2.8
45	2.0	2.5	2.75	3.5
25	2.4	3.0	3.3	4.2

Life Test: Test is conducted in a suitable chamber with circulating air. Apply voltage not to exceed the rated Vdcw for 1000 hours at +85° C ± 2° C. Remove capacitors from chamber and allow to cool to +25° C ±1° C in a normal manner. Capacitance shall be at least 85% of the initial measured value (90% for a 500 hour life test). The product of ESR (ohms) and capacitance (uF) shall not exceed 130% of initial requirements.

Shelf Test: Conduct test in chamber with circulating air. No voltage is applied for 100 hours at +85° C ±2° C. Remove capacitors from chamber and allow to cool to +25° C ±1° C in a normal manner. Measure the capacitance as previously described. It shall meet initial requirements as shall ESR. The DCL shall not exceed 200% of the initial requirements.

Low Temperature Test: A suitable chamber must be used and capacitors stabilized to within ±1° C of the testing temperature. Measure capacitance as previously described. It shall not have decreased to less than the percentages of the initial measured value as shown:

Vdcw	Temperature °C		
	+25	−20	−30
3–12	100%	70%	60%
15 up	100%	85%	75%

Terminal Test: Terminal wires shall withstand a steady axial pull of 5 pounds for 5 seconds.

Marking: Minimum marking shall be: General Instrument logotype. Capacitance (uF), Vdcw, EIA code, date code and polarity. Marking is normally applied to the outer PVC sleeve.

Packaging: Standard packaging is bulk in corrugated cartons (Approx. 4″ × 7″ × 9″). Reel packaging is available for Type 984 up to .375″ diameter. The standard G.I. reel packaging specification is available upon request.

SUB-MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS
−30° TO +85°C GI POLAR TYPE 984 AND 985

AXIAL LEAD
984 POLAR −30° +85°C

Specially engineered for commercial and entertainment electronic use. Combine high volumetric efficiency with excellent performance and reliability. 37 standard case sizes. Working voltages from 3 to 150. Popular ratings are shown below.

RADIAL LEAD
985 POLAR −30° +85°C

Special high gain foils are used for maximum volumetric efficiency consistent with reliability performance. The operating temperature range is compatible with most commercial and entertainment electronic applications. The 72 ratings shown below are the most popular.

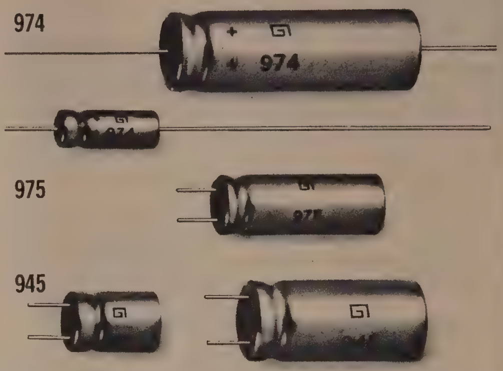
SUB-MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS
−40° TO +85°C GI POLAR TYPE 974, 975 AND 945

SPECIFICATIONS



Construction: Type 974, tubular aluminum case with butyl end seal, PVC insulating sleeve and axial wire leads. Alternate Type 976 has negative lead brought down side of case under the PVC insulating sleeve. Type 975 has both terminal wires emerging through the end for P/C mounting. The Type 945 adds a phenolic disc for improved resistance to vibration.

Operating Temperature: −40° C to +85° C (continuous)

Working Voltage: The maximum continuous working voltage (Vdcw) which may be applied for the operating parameters stated.

Surge Voltage (Vdcs): The maximum allowable short term (0.5 minute) voltage including transients and peak ripple which may be applied for 30 seconds without permanent damage.

The surge test is performed with a 1000 ohm resistor connected in series with the capacitor. Surge voltage is applied for 30 seconds at a rate of 12 times per hour for 100 hours at +25° C. At the completion of this test, capacitors shall meet the initial DC leakage requirements.

Capacitance: Shown as microfarads (uF) in the tables for each case size and working voltage. Measurement is made by the bridge method at +25° C and 120Hz with a maximum 1.0 volt rms signal applied.

Capacitance Tolerance: The standard tolerance is −10% +75% of rated capacitance from 3 to 50 Vdcw and −10% +50% from 51 to 150 Vdcw. Tolerances of ±20% are available for 5uF and up or ±10% for 10uF and up.

Polarity: Types 974, 975 and 945 capacitors are polarized for DC operation.

Reverse Voltage: Voltage reversals not exceeding 1.5 volts may be applied without damage.

Leakage Current: Expressed as DCL and in terms of microamperes (uA). Capacitors must be pre-conditioned by applying rated voltage (Vdcw) for 15 minutes at least 24 hours and not more than 48 hours prior to testing. Measure DCL by applying rated DC voltage (Vdcw) to the capacitor with a 1000 ohm resistor in series for five minutes and read DCL in microamperes (uA). Maximum allowable DCL is determined by the formula:

$$I = \frac{E\sqrt{C}}{30}$$

Where: I = Current in microamperes; E = Rated DC voltage; and C = Rated capacitance in microfarads.

Leakage current need not be less than that derived from the formula or the following, whichever is greater:

Rated Vdcw	3	6	12	15	25	50	150
DCL (uA)	1	1	2	2.5	3	4	15

Dissipation Factor: The Dissipation Factor (DF) in percent is measured by the bridge method at ±25° C and 120Hz with a maximum 1.0 volt rms signal applied.

DF (in percent) shall not exceed:

Rated Vdcw	3	6	12	15	25	50	150
DF%	34	26	26	26	19	19	15

$$\text{Equivalent Series Resistance: ESR (ohms)} = \frac{DF \times 10^4}{2\pi fC}$$

Where: DF = Dissipation Factor (%); f = frequency (Hz); and C = Capacitance (uF).

Ripple Current: Peak ripple voltage in combination with the DC polarizing voltage shall not exceed 120% of the rated Vdcw nor cause a voltage reversal exceeding 1.5 volts. Maximum ripple at +85° C and 120Hz is:

Case Dia. (Max. In.)	.271	.333	.396	.458	.521	.646
Max Ripple (mA)	$8\sqrt{C}$	$10\sqrt{C}$	$15\sqrt{C}$	$20\sqrt{C}$	$25\sqrt{C}$	$35\sqrt{C}$

At temperatures other than 85° C or frequencies other than 120 Hertz, multiply the above figures by:

Temp. °C	Frequency (Hertz) 60	120	400	2400
85	.8	1.0	1.1	1.4
65	1.6	2.0	2.2	2.8
45	2.0	2.5	2.75	3.5
25	2.4	3.0	3.3	4.2

Life Test: Conduct test in a chamber with circulating air. Apply rated voltage for 1000 hours at +85° C ±2° C. Remove the capacitors and allow to cool normally to +25° C ±1° C. Capacitance shall be at least 85% of the initial measured value. The product of ESR and capacitance shall not exceed 130% of the initial requirements.

Shelf Test: Test is conducted in a suitable chamber with circulating air. The capacitors are stored for 100 hours in the chamber at +85° C with no voltage applied. At the conclusion of 100 hours, remove the capacitors from the chamber and allow them to cool to +25° C ±1° C in a normal manner. Measure the capacitance as previously described. It shall meet initial requirements as shall ESR. DCL shall not exceed two times the initial requirements.

Low Temperature Test: In a suitable chamber, stabilize the temperature to within ±1° C of the desired value. The capacitance is measured while the capacitors remain in the chamber and shall not have decreased to less than the percentages of the initial measured value as follows:

Vdcw	Temperature °C +25	−20	−30	−40
3–12	100%	70%	60%	45%
15 up	100%	85%	75%	60%

Terminal Test: Terminal wires shall withstand a steady axial pull of 5 pounds for 5 seconds.

Marking: Minimum marking on the PVC insulating sleeve shall be: General Instrument logotype, capacitance, Vdcw, EIA code, date code and polarity.

Packaging: 974—Standard packaging is bulk in corrugated cartons (approx. 4″ × 7″ × 9″). Reel packaging is available for Type 974 up to .375″ diameter. The standard G.I. reel packaging specification is available upon request.

975/945—Bulk in egg-crate cartons.

SUB-MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS
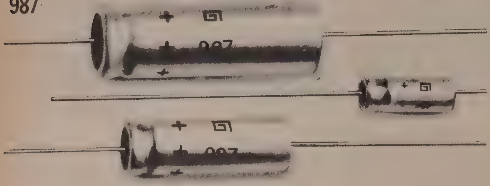
—40° TO +105°C POLAR TYPE 987

SPECIFICATIONS

987



Construction: Tubular aluminum case with high temperature elastomer seal and axial wire leads. All critical connections welded. Polyester insulating sleeves are standard.

Configuration: Axial wire leads for point to point wiring or horizontal mounting on P/C board.

Operating Temperature: —40°C to +105°C.

Working Voltage: Expressed as Vdcw in the tables and is the maximum continuous voltage which may be applied over the operating temperature range.

Surge Voltage: Expressed as Vdcs in the tables. This is the maximum allowable short term (0.5 minute) voltage including transients and peak ripple which may be applied without causing permanent damage.

The surge test is performed with a 1000 ohm resistor connected in series with the capacitor. The surge voltage shown in the tables is applied for 30 seconds at a rate of twelve times per hour for 100 hours at +25° C. At completion of test, units shall meet leakage requirements.

Capacitance: Capacitance is shown in microfarads (uF) in the tables for each case size and range of working voltages. Measurement is made by the bridge method at +25° C and 120 Hertz with a maximum 1.0 volt rms signal applied during measurement.

Capacitance Tolerance: The standard tolerance is —10% +50% of rated capacitance. Where required, ±20% tolerance is available above 5 uF; ±10% may be specified above 10uF.

Polarity: Type 987 capacitors are polarized for DC operation.

Reverse Voltage: Voltage reversals not exceeding 1.5 volts may be applied without damage.

Leakage Current: Expressed as DCL and in terms of microamperes (uA). Capacitors must be pre-conditioned by applying rated voltage (Vdcw) for 15 minutes at least 24 hours and not more than 48 hours prior to testing. Measure DCL by applying rated DC voltage (Vdcw) to the capacitor with a 1000 ohm resistor in series for five minutes and read DCL in microamperes (uA). Maximum allowable DCL is determined by the formula:

$$I = \frac{E\sqrt{C}}{30}$$

Where: I = Current in microamperes; E = Rated DC voltage; and C = Rated capacitance in microfarads.

Leakage current need not be less than that derived from the formula or the following, whichever is greater:

Rated Vdcw	3	6	12	15	25	50
DCL uA	1	1	2	2.5	3	4

Dissipation Factor: Expressed as DF in terms of percent. Measurement is made by the bridge method at +25° C and 120 Hertz with a maximum 1.0 volt rms signal applied. The dissipation factor at 120 Hertz shall not exceed the values shown in the following table:

Rated Vdcw	3	6	12	15	25	50
DF%	30	24	24	22	18	10

$$ESR = \frac{DF \times 10^4}{2\pi fC}$$

Where: DF = Dissipation Factor in %; f = frequency (Hertz); and C = Capacitance (uF).

Ripple Current: The peak ripple voltage in combination with the DC polarizing voltage shall not exceed 120% of the rated Vdcw nor cause a voltage reversal in excess of 1.5 volts. The maximum rms ripple current in milliamperes (mA) at +105° C and 120 Hertz which may be applied is:

Case Dia. (In.) (Max.)	.257	.333	.396	.458	.521
Max. Ripple (mA)	$8\sqrt{C}$	$10\sqrt{C}$	$15\sqrt{C}$	$20\sqrt{C}$	$25\sqrt{C}$

For maximum ripple current at temperatures less than +105°C and frequencies other than 120 Hertz, multiply the figures derived from the preceding table by:

Temp.	Frequency (Hertz)			
°C	60	120	400	2400
105	.8	1.0	1.1	1.4
85	1.6	2.0	2.2	2.8
65	2.0	2.5	2.75	3.5
25	2.4	3.0	3.3	4.2

Life Test: Test is conducted in a suitable chamber with circulating air. Apply voltage not to exceed the rated Vdcw for 1000 hours at +105° C ±2° C. Remove capacitors from chamber and allow to cool to +25° C ±1° C in a normal manner. Capacitance shall be at least 85% of the initial measured value (90% for a 500 hour life test). The product of ESR (ohms) and capacitance (uF) shall not exceed 130% of initial requirements.

Shelf Test: Test is conducted in a suitable chamber with circulating air. The capacitors are stored for 100 hours in the chamber at +105° C with no voltage applied. At the conclusion of 100 hours, remove the capacitors from the chamber and allow them to cool to +25° C ±1° C in a normal manner. Measure the capacitance as previously described. It shall meet initial requirements as shall ESR. DCL shall not exceed two times the initial requirements.

Low Temperature Test: A suitable test chamber must be used and capacitors stabilized to within ±1° C of the testing temperature. Capacitance is measured as previously described. The capacitance shall not have decreased to less than the percentages of the initial measured value as shown in the following table:

Vdcw	Temperature °C		
	+25° C	—30° C	—40° C
3–20	100%	75%	60%
25–40	100%	80%	70%
50	100%	85%	75%

Low Temperature Impedance: At low temperatures the 120 Hertz impedance shall not increase more than that shown in the following table:

Vdcw	Temperature		
	+25° C	—30° C	—40° C
3–20	100%	5.0x	10.0x
25–40	100%	3.0x	5.0x
50	100%	1.5x	3.0x

Lead Test: Leads shall withstand a steady pull of 5 pounds applied axially for 5 seconds.

Marking: Minimum marking shall be General Instrument logotype, Capacitance (uF), Vdcw, EIA code, date code and polarity.

Packaging: Standard packaging is bulk in corrugated cartons (approx. 4″ × 7″ × 9″). Reel packaging is available up to .375″ diameter. The standard G.I. reel packaging specification is available upon request.

SUB-MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS −40° TO +105°C GI POLAR TYPE 987

AXIAL LEAD
987 POLAR −40° +105°C

Extended temperature range for extra reliable performance at temperatures up to +105°C. Specially selected foils and electrolytes are used in manufacturing these capacitors. Recommended standard ratings are shown below.

SUB-MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS −30° TO +85°C NON-POLAR TYPE 904 AND 905

Construction: 904 Tubular aluminum case with elastomer seals at each end for axial terminal wires. PVC insulating sleeves are supplied as standard. 905 Tubular aluminum case with single elastomer seal and PVC insulating sleeve.

Operating Temperature: −30° C to +85° C.

Working Voltage: Expressed as Vnpw in the tables and is the maximum continuous voltage which may be applied over the operating temperature range.

Surge Voltage: Expressed as Vdcs in the tables. This is the maximum allowable short term (0.5 minute) voltage including transients and peak ripple which may be applied without causing permanent damage.

The surge test is performed with a 1000 ohm resistor connected in series with the capacitor. The surge voltage shown in the tables is applied for 30 seconds at a rate of twelve times per hour for 100 hours at +25° C. At completion of test units shall meet initial leakage requirements.

Capacitance: Capacitance is shown in microfarads (uF) in the tables for each case and range of working voltages. Measurement is made by the bridge method at +25° C and 120 Hertz with a maximum 1.0 volt rms signal applied during measurement.

Capacitance Tolerance: The standard tolerance is ±30% of the nominal rated value for all operating voltages. Special tolerances are available: ±20% for ratings 5 uF and up; ±10% for ratings 10 uF and up.

Polarity: Types 904 and 905 capacitors are non-polarized for DC operation. Working voltage (Vnpw) may be applied in either direction.

Frequency: Types 904 and 905 capacitors are rated for operation at 120 Hertz. Special designs are available for other frequencies. Contact the factory.

Leakage Current: Expressed as DCL and in terms of microamperes (uA). Capacitors must be pre-conditioned by applying rated voltage (Vdcw) for 15 minutes at least 24 hours and not more than 48 hours prior to testing. Measure DCL by applying rated DC voltage (Vdcw) to the capacitor with a 1000 ohm resistor in series for five minutes and read DCL in microamperes (uA). Maximum allowable DCL is determined by the formula:

$$I = .06E\sqrt{C}$$

Where: I = Current in microamperes; E = Rated DC voltage; and C = Rated capacitance in microfarads.

Leakage current need not be less than that derived from the formula or the following, whichever is greater:

Rated Vnpw	3	6	12	15	16	25	50	100
DCL uA	4	4	4	4	8	8	8	15

Dissipation Factor: Expressed as DF in terms of percent and measured by the bridge method at +25° C and 120Hz with a maximum 1.0 volt rms signal applied. The dissipation factor shall not exceed the values shown:

Case Dia. (Inches)	.257	.271	.333	.396	.458	.521	.646
(Code)	(B)	(C)	(E)	(G)	(H)	(J)	(L)
DF%	20	20	20	15	15	15	15

Equivalent Series Resistance: Expressed as ESR in ohms as follows:

$$ESR = \frac{DF \times 10^4}{2\pi fC}$$

Where: DF = Dissipation Factor in %; f = frequency in Hertz; C = Capacitance in uF.

SPECIFICATIONS

Ripple Current: The maximum allowable ripple current is derived from the formula:

$$I = K\sqrt{WC}$$

Where: I = Current in milliamperes (mA); K = Constant (61.5 for B, C and E diameters and 71 for G, H, J and L); W = Watts (see table); C = Capacitance in microfarads (uF).

L	X	X	X	.200	.220	.252	.280	.300	.330	.350

Life Test: Test is conducted in suitable chamber with circulating air. Apply rated voltage for 500 hours at +85° C ±2° C and reverse voltage each 24 hours throughout test. Remove capacitors from chamber and allow to cool normally to room temperature (+25° C ±1° C). Capacitance shall be at least 80% of initial measured value and DF shall not increase to more than 150% of initial requirement.

Shelf Test: Test is conducted in a suitable chamber with circulating air. The capacitors are stored for 100 hours in the chamber at +70° C with no voltage applied. At the conclusion of 100 hours, remove the capacitors from the chamber and allow them to cool to +25° C ±1° C in a normal manner. Measure the capacitance as previously described. It shall meet initial requirements as shall ESR. DCL shall not exceed two times the initial requirements.

Low Temperature Test: A suitable test chamber must be used and capacitors stabilized to within ±1° C of the testing temperature. Capacitance is measured as previously described. The capacitance shall not have decreased to less than the percentages of the initial measured value as shown in the following table:

Vnpw	Temperature °C +25	 −20	 −30
3–12	100%	70%	60%
15 up	100%	85%	70%

Lead Test: Leads shall withstand a steady pull of 5 pounds applied axially for 5 seconds.

Marking: Minimum marking shall be General Instrument logotype, Capacitance (uF), Vnp, EIA code, and date code. Marking is normally applied to the outer PVC sleeve.

Packaging: Type 904 and 905 standard packaging is bulk in corrugated cartons (approx. 4″ × 7″ × 9″). Reel packaging is available for Type 904 up to .375 diameter. The standard G.I. reel packaging specification is available upon request.

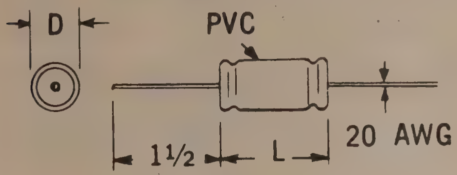
SUB-MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS −30° TO +85°C NON-POLAR TYPE 904 AND 905

AXIAL LEAD
904 NON-POLAR −30° +85°C

Engineered for non-polar applications. Special double bung construction ensures balanced operation in critical circuits. Standard tolerance is ±30%, ±20% is available above 5 μF and ±10% is available above 10 μF. Recommended standard ratings appear below. The complete range of values and specifications appear in Bulletin EL-118. * ±20% only.



RADIAL LEAD
905 NON-POLAR −30° +85°C

Designed for non-polar electronic applications. The isolated case ensures balanced operation. The standard capacitance tolerance is ±30%, ±20% is available above 5 μF and ±10% is available above 10 μF. For complete specifications and all available ratings, see the engineering Bulletin EL-117.

DIPPED SILVER-MICA CAPACITORS COMMERCIAL RDM and MIL-C-5D TYPES

Mica capacitors are as near to the perfect model of a capacitor as one can acquire commercially. Schematically the mica is classic: A flat insulator with conductors on each side. Electrically it is hard to beat. It has been said that if all other capacitors suddenly evaporated and only the mica was left, mica could do any task. Of course this is not very practical because electronic economics would take a terrible beating. But, here we have the second oldest capacitor known to man (The Leyden Jar is less than one year older), and the mica capacitor hangs in there doing its assigned tasks.

Why is the mica capacitor so good? One really need look no farther than the basic dielectric. Mica is a totally inert inorganic material. Formed millions of years ago by the awesome pressures of the earth's creation. Few other materials have mica's record of stability. And, it is this stability which makes mica so desirable in capacitors.

Stability is what makes the mica so widely used in RF circuitry. Once selected and installed, the mica stays there doing its job. This is also one of the reasons micas are widely specified in precision instruments: Rock solid stability. And, there's another point: accuracy. Capacitance tolerances to plus or minus one-half percent are available at very little extra expense (Above 100pF, of course).

The original mica capacitor was not an exact model of efficiency. Crude and cumbersome, it was gradually supplanted by the molded style. The molded style has now largely been replaced by the dipped style thanks to the invention of epoxy.

The dipped mica capacitor is made of a series of thin mica sheets with pure silver deposited on each side in a precise pattern and location. The sheets are then stacked with conductive foil (usually tin) between each sheet. The foil is folded toward one end and the entire stack clamped under pressure and held there by the clamp/terminal assembly. The terminals take off in one direction from the stack to form a "radial" configuration.

The stack is immediately treated with silicone to prevent moisture infiltration. Then the stack is dipped into Durez from one to four times to form an outer coating. This coating is porous and provides the media for the final epoxy impregnation. Of course there is a practical limit, which happens to be four coats, beyond which there is little or no gain in humidity protection.

The coating process is important to the user. The best protection is secured by the normal four coat G. I. Type RDM. The single coat SRDM offers good protection but should not be used in severe humidity conditions without subsequent potting. Another type, the ERDM has no Durez at all. It only has epoxy. This type must always be potted after assembly.

Mica capacitors may be operated continuously from −55 to +150°C which is well within the operating parameters of most other electronic components. The temperature coefficient is generally positive. Several TC values may be stated by the user within the limits of availability (See listings).

The following pages contain a listing of all MIL-C-5D ratings plus a selection of popular intermediate values. The list also shows non-MIL types such as RDM05, 16 and 20.

General Instrument is fully qualified to MIL-C-5D in styles CM04 through 13 in all ratings and voltages.

The lists on the following pages show a wide selection of popular ratings but are only a hint of the broad range of values and configurations available. For complete information, write for Bulletin MC-2B.

HOW TO SPECIFY MICA CAPACITORS

1. Select the desired capacitance/voltage/lead spacing. Lead spacing is standard within each type and increases as the Type number becomes larger. RDM05 is the smallest (.120″) and RDM42 the largest (1.062″).
2. Select the desired capacitance tolerance. Not all tolerances are available in all ratings (see notes). This is because the minimum practical tolerance is plus or minus ½ picofarad.
3. Decide whether normal straight wire leads or the crimped configuration will be best. There is no extra charge for crimped leads.
4. Use the following lists to identify the exact capacitor desired by means of the part numbering system.
   Typical part number: RDM10CD010D03
   a. *Prefix:* No prefix (as shown) indicates straight leads. Use "2" as a prefix for standard outside crimp.
   b. *Style:* RDM = Multiple Durez/Epoxy
      SRDM = Single Durez/Epoxy
      ERDM = Epoxy only. No Durez.
   c. *Type:* 05, 10, 15, 16, 19, 20, 30 or 42 (Lead spacing increases as type number increases).
   d. *Characteristic:* This refers to the temperature coefficient in parts per million PER°C and capacitance drift. The example states "C" which is −200 to +200 ppM and plus or minus (0.5% *plus* 0.1 pF)
      "D" = −100 to +100 ppM and ±(0.3% + .1 pF)
      "E" = −20 to +100 ppM and ±(0.1% + .1 pF)
      "F" = 0 to +70 ppM and ±(0.05% + .1 pF)
      The listings show the *best* available characteristic.
   e. *Working Voltage:* In the example "D" shows the working voltage as 500 Vdcw.
      "C" = 300 Vdcw
      "A" = 100 Vdcw
      Other voltages available on special order (Please see Bulletin MC-2B for details).
   f. *Capacitance:* Expressed in picofarads (pF). The example shows "010" (zero, one, zero). The last digit *always* indicates the number of zeros. The *preceeding* digits are significant. The example "010" therefore indicates *one* picofarad.
      010 = 1 pF, 100 = 10 pF, 101 = 100 pF, 102 = 1000 pF, 1250 = 125 pF, 1251 = 1250 pF, etc.
   g. *Tolerance:* This is always shown by a code letter. The example shows "D" which is ±½ pF and the *tightest* available tolerance for *any* rating. "E" = ±½%, F = ±1%, G = ±2%, H = ±3%, J = ±5%, K = ±10%, M = ±20%. Note that "D" and "J" are synonomous at 10 pF.
   h. *Operating Temperature:* Shown by the next to last digit in the part number as the letter "O". The standard is "O" which is −55 to ±125°C. "P" = −55 to +150°C and is available on most ratings. "N" is sometimes used in old specs and indicates −55 to +85°C.
   i. *Vibration Grade:* The last digit "3" indicates resistance to vibration per MIL-STD-202D, Method 204A (Condition D) from 10-2000Hz which is standard.

DIPPED SILVER-MICA CAPACITORS
RDM05-RDM10 and MIL-C-5D CM04/09

RDM05 (NO MIL EQUIV.)

Small and compact, the RDM05 is ideal for miniature delay lines and similar equipment.

While there is no MIL equivalent to the RDM05, each operating parameter of the capacitor well exceeds MIL requirements. The tables below show the full range of ratings available from 1 to 200 pF. Intermediate ratings are also available. Crimped leads are not recommended.

* Complete type number by inserting tolerance code in space marked "±". Add prefix "S" for SRDM.

RDM10 (CM04/09)

The smallest MIL-C-5D style, the RDM10 (CM04/09) is one of the most popular mica capacitors.

The table below shows *all* of the available MIL ratings plus a selection of RDM10 ratings within the full range from 1 to 1000pF. Intermediate ratings are available and may be specified.

Cap. pF 1.	G. I. Type *	MIL Type *	G. I. & MIL Type No. *	Opt. MIL Tol.	Opt. RDM Tol.	Max. Size (Inches)

1. Ratings are for 500 Vdcw except ① (100V) and ③ (300V).

* Complete type number by inserting tolerance code in space marked "±". Add prefix "S" for SRDM. Add prefix "2" to RDM for crimped leads. Change CM04 to CM09 for crimped leads.

DIPPED SILVER-MICA CAPACITORS RDM15 (CM05/10) and RDM16

RDM15 (CM05/10)

By far the most popular mica capacitor style, the RDM15 (CM05/10) offers a broad range of ratings from 1 to 1500 pF and an advantageous size/cost ratio. All ratings in MIL-C-5D CM05/10 are shown in the table below *plus* the full *range* of RDM15 ratings. Intermediate ratings are available in RDM15.

RDM16 (NO MIL EQUIV.)

The RDM16 is a special mica capacitor engineered for telephone equipment.

There is no MIL equivalent to the RDM16 but all performance details well exceed the MIL requirements. The tables below list the full range of values from 100 to 1800 pF. In addition to the ratings shown, intermediate ratings may be specified.

Cap. pF	Vdcw (Max.)	G. I. Type No. *		Opt. RDM Tol.	Max. Size (Inches)

◀ RDM15 NOTES

1. Ratings are for 500 Vdcw except ① (100V) and ③ (300V).

* Complete type number by inserting tolerance code in space marked "±". Add prefix "S" for SRDM. Add prefix "2" to RDM for crimped leads. Change CM05 to CM10 for crimped leads.

DIPPED SILVER-MICA CAPACITORS RDM19 (CM06/11) and RDM20

RDM19 (CM06/11)

The RDM19 (CM06/11) offers a higher level of capacitance than the RDM15 and is somewhat larger. *All* MIL-C-5D ratings are shown below plus a selection of RDM19 values which illustrate the range of the line. Intermediate ratings within the range are available.

RDM19/SRDM19 ALSO AVAILABLE IN:
1000 VDCW FROM 100 pF to 3000 pF.
SEE BULLETIN MC-2B

1. All ratings are for 500 Vdcw except ① (100V) and ③ (300V).

* Complete type number by adding tolerance code in space marked "±". For single dipped style add prefix "S" to RDM. For crimped leads add prefix "2" to RDM. For crimped lead MIL types change CM06 to CM11.

READ "HOW TO SPECIFY" BEFORE ORDERING

RDM20 (NO MIL EQUIV.)

The RDM20 was originally designed for use in television receivers. It offers genuine reliability advantages to other users because of its well-proven record providing the modest size increase can be accommodated.

There is no MIL equivalent to the RDM20. However, all performance details well exceed the MIL requirements.

* Complete the type number by inserting the desired tolerance letter code in the space marked "±".

DIPPED SILVER-MICA CAPACITORS RDM30 (CM07/12) and RDM42 (CM08/13)

RDM30 (CM07/12)

The RDM30 (CM07/12) provides ratings from 470 to 30,000 pF and operating voltages up to 2000 Vdcw.

The tables below list all of the available CM07/12 MIL ratings plus additional RDM30 ratings which illustrate the broad range available. Intermediate values may be specified in the RDM type.

Cap. pF 1.	G. I. Type *	MIL Type *	G. I. & MIL Type No. *	Opt. MIL Tol.	Opt. RDM Tol.	Max. Size (Inches) RDM30 & CM07 L	W	T	SRDM30 L	W	T
